The scarcity of medical officers for the British Service is partly due to the fact that they have to do most of their service in India alongside their brethren of the Indian Service at a much lower rate of pay, and are debarred from holding most of the appointments which give extra pay.

Just now there are in India as many surgeon-majors as surgeons, owing partly to there being few surgeons, and partly to get the seniors' pay out of the pockets of the Indian Government.

If Mr. Hardy's scheme had answered, and got a good supply of juniors, the Indian Government would have got a cheap medical staff; it has failed, and seniors have to do the work of juniors at an increased rate of pay. A surgeon-major receives something like £1,000 per annum, while a surgeon gets about £360. In the old regimental system men stood by their regiments, and were content to serve on knowing that some day their turn would come for promotion; but now the ten-years men know that only one in five will have a chance of selection, and that, although they may serve their full term, £1,000 bonus is all they can hope to get out of the Service—except broken health, which is a certainty. The mortality of medical officers is exactly twice that of the combatant officers. Short service and no pension, to give a provision for impaired health, is but a poor prospect. So allow me to add a word of caution to those now joining—think twice before you embark for a bad climate.—I am. &c.,

CENTURION.

MARRIED OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your correspondent of last Saturday, who signs himself "Centurion," might perhaps be enlightened from the contemplation of the fact that the greatest soldiers of all times, whether ancient or modern, have been married men—characteristic of their good sense. As a married officer, I accept the assertion that we "do no end of injury," extending even to the "ruin of the Service," as a piece of mild flattery. I cannot, however, retort with the same soft impeachment, as I should imagine that "Centurion," from the general tenour of his ideas and his somewhat confused manner of expressing them, is totally incapable of doing any harm, or good either.—Yours, &c.,

A MARRIED OFFICER.

March 20, 1877.

The Secretary of State for War directs that an officer returning from abroad on private affairs will be liable to pay the expense of his successor's passage. This rule will be enforced if the officer retires from the Service (except on half pay) or exchanges, or is made supernumerary to his regiment, or is transferred to the Militia, except as adjutant.

Mr. Serjeant Simon asked the Secretary of State for War on Monday whether it is intended to make any special allowances to the officers and troops serving in the Straits Settlements during the late outbreak. Mr. Hardy said it had been arranged that they shall have the same advantages as were enjoyed by the European troops sent to Abyssinia, and application has been made to the India Office to ascertain what those advantages were in order that they may be given to them.

The Woolwich correspondent of the *Morning Post* says:—"An examination is ordered to take place on Feb. 1, 1878, for the selection of eight officers to form the next advanced class of the Royal Artillery. The course of study will commence on April 1 following, and will continue for two years, the subjects studied to be mathematics, chemistry, metallurgy, electricity, heat, mechanics, and professional subjects. At the end of the two years a final examination, open to all officers of the Royal Artillery, will be held in all the subjects of the course; and a further examination for honours in any particular subject will be allowed. It is intimated that officers passing the final examination satisfactorily will be recommended for such appointments as they may be considered suited to fill, but the examination will not, of itself, constitute a claim for employment."

COLONELS SECOND COMMANDANT, R.M.L.I.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In a late impression you said somewhat about the duties of the second commandant, R.M.L.I. At Chatham his duties are as follows:—Inspect and pass all clothing, sit as president of the following boards and committees, viz.—audit, invalid, discharge, clothing, officers' mess and library, divisional fund, the provost-sergeant's weekly accounts, and will lend his assistance, as required, to the commandant. I have reason to believe that these duties are not all performed by the officer in question at the other divisions—in fact, there appears to be no definite order as to what his duties are. We have heard a good deal lately from the Royal Marine Office about the Queen's Regulations being made the rule and guide of the Service. It would be a good plan, I think, if, from that office, certain rules, to be binding on all the divisions on various subjects, to be called "The Rules of Unity," were issued, one of which should set forth most clearly the duties of the second commandant. These rules should also define the composition of each board and committee, their duties, &c., and to which each member should attach his signature. I consider the signature of all the members important. At present I see several signatures attached to a board on property valued at, say, 10s., and only one to a committee having under their management very much property, as in the officers' mess.—I commend these observations to the deputy adjutant-general, R.M.L.I.—Yours obediently, WANT OF UNITY.

March 27, 1877.

BIRTH.

THORNTON.—April 10, at 7, Tavistock Road, Westbourne Park, W., the wife of Major C. E. Thornton (late) The Royal Fusiliers, of a daughter (Catherine Isabella).

MARRIAGES.

ATKINSON.—WRIGHT.—April 5, at the Parish Church, Stoke Damerel, by the Rev. Richard Atkinson, M.A., Vicar of Cockerham, Lancashire, father of the bridegroom, assisted by the Rev. Jordan Palmer, M.A., F.S.A., Charles William Atkinson, Esq., late 26th Cameronians, to Charlotte H. Digby Wright, eldest daughter of Capt. Wright, late Royal Artillery.

KEARSLEY.—FERGUSSON.—April 10, at St. Jude's, South Kensington, by the Rev. R. W. Forrest, Vicar, Robert Wilson Kearsley, Captain 5th Dragoon Guards, to Margaret Lowther Irving (Minnie), second daughter of the late John Fergusson, Esq., of Gloucester Square, Hyde Park, and of Mrs. Fergusson, 10, Queen's Gate Place.

SEWELL.—HARRISON.—April 10, at St. Mary's, Bloxham, by the Rev. G. C. Ommanney, M.A., brother of the bride, assisted by the Rev. J. Hodgson, M.A., Vicar of the Parish, Samuel Frederick Sewell, Esq., late Captain 61st Regiment, youngest son of the late Francis Theodore Dudley Sewell, Esq., of Wick Hill House, Bracknell, Berks, Lieutenant R.N., to Annie Maria, widow of the late Charles Thomas Harrison, Esq., Royal Engineers, and third daughter of Octavius Ommanney, Esq., J.P. of Bloxham, Oxfordshire.

DEATHS.

SMITH.—April 8, at Newport, Fife, N.B., William Smith, Esq., M.D., Fleet Surgeon, H.M.S. Unicorn.

ROGER.—March 15, at St. Kitts, W.I., Neill Roger, Esq., Commissariat Department, aged 32.

Advertisements.

ARROQUHAR PARISH. — WANTED, for this Parish a RESIDENT MEDICAL OFFICER. The Parochial Board offer a salary of £60 a-year, and, as Arroquhar Village, on the shores of Loch Long, and within two miles of Loch Lomond, is a favourite resort of numerous families from all parts of the kingdom during the summer and autumn months, there is a considerable general practice. The conditions are especially favourable to a retired naval or military surgeon. Apply to A. J. Dewar, Inspector of Poor, Arrochar, not later than the 11th May.

WANTED, in perfect condition, a SET of PORTABLE MILITARY FURNITURE. Ross, of Dublin, preferred. Apply, stating price and particulars, to Mess Sergeant, Officers' Mess, Yarmouth, Norfolk.

WANTED, a COOK for the Officers' Mess, 7th Dragoon Guards, Newbridge. Apply to P. M. C.

TO MESSMEN and OFFICERS.—WANTED, a situation by a first-class COOK. Good testimonials from Mess Presidents. Apply, Cook, 85, Castle Street, Cambridge.

WANTED, by the Advertiser—a 24 years' Sergeant, R.A.—a situation as MESSMAN, STEWARD, or BUTLER. Many years mess butler. Reference and testimonials on application to H. S., 115, High Street, Ryde.

YOUNGER SONS, RETIRED OFFICERS, and others desirous to increase their incomes, can purchase rich grazing land in Southern Minnesota, U.S.A., at £2 per acre freehold, and, by raising stock for the English markets, realise from fifty to one hundred per cent. profits on their investments. Plenty of game and fishing. The Land Commissioner will have pleasure in accompanying a party this spring, and, under his auspices, the entire cost of transit from Liverpool to the land will not exceed £12. For full particulars apply to the Land Commissioner, Mr. F. C. Taylor, 57, Charing Cross. Plans may be seen and circulars obtained at the offices of Mr. William Ellison, Architect, Mansion House Buildings, Queen Victoria Street, London, E.C. Bankers—Messrs. M'Culloch and Co., 41, Lombard Street.

SHORNCLIFFE.—TO BE LET, Crafton Cottage, West, newly furnished, containing five bed-rooms and three sitting-rooms, with good offices and garden in rear. Situation excellent. Address J. E. K., 15, Lonsdale Road, Barnes, Surrey.

WILLIAM NICHOLLS,

The best and only certain remedy ever discovered for preserving, strengthening, beautifying, or restoring the
HAIR, WHISKERS, OR MOUSTACHES,
And preventing them turning grey.
Price 3s. 6d., 6s., and 11s.
C. & A. OLDRIDGE,
22, WELLINGTON STREET, STRAND, LONDON, W.C.,
AND ALL CHEMISTS AND PERFUMERS.

For children it is invaluable, as it forms the basis of a magnificent head of hair, prevents baldness in mature age, and obviates the use of dyes and poisonous restoratives.

HIRE SYSTEM. Elegant and useful FURNITURE, CARPETS and BEDDING, and FURNISHING REQUISITES of every kind on this convenient system, displayed in numerous extensive and the most beautiful show-rooms in the kingdom. Prices fixed from an Illustrated Catalogue representing the stock, and all the advantages offered by numerous wholesale houses are combined and to be found in this establishment, and at one profit only.—Prospectus and priced Illustrated Catalogue on application to the Manager, Hire Department, 81, Brompton Road. Established 60 years.

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.—Chairman, the Duke of SUTHERLAND, K.G.—Communications to be addressed to T. Gibson Bowles, Esq., Hon. Sec., 2, Harriet Street, Lowndes Square, S.W.

Subscriptions will be received by Major-General Sir Henry Green, Hon. Treasurer, Stafford House, S.W.; by Messrs. Drummond and Co., Charing Cross; Messrs. Smith, Payne, and Co., 1, Lombard Street; Messrs. Barnetts, Hoares, and Co., 62, Lombard Street; and by Messrs. H. S. King and Co., 45, Pall Mall, and will be acknowledged in the published list.

The Right Hon. the Lord Mayor has undertaken to receive subscriptions for the fund, which may be paid to him at the Mansion House.

Contributions are especially invited of blankets, warm jerseys, warm underclothing, and hospital linen, which will be received at Taylor's Depository, Pimlico, and should be labelled "For Relief of Suffering Turkish Soldiers."

THE SOLDIERS' DAUGHTERS' HOME, Hampstead. Instituted 8th March, 1855.
Chairman—
Major-General J. T. Boileau, R.E., F.R.S.

Number of Children in the Home, 171; Vacancies, 29; Candidates awaiting Admission, 124.

Owing to the loss, by death, of several of the largest annual subscribers, and to the great falling off in donations, the funds are at present unequal to support the increased number of girls (26) who have been added to the Foundation during the last two years.

Further aid is earnestly solicited to meet the increased call upon the funds. Remittances to be made to C. R. Low, Esq., Secretary, No. 7, Whitehall, London, S.W. A guinea yearly gives 1 vote; five guineas, 2 votes for life.

ROYAL SCHOOL FOR DAUGHTERS OF OFFICERS of the ARMY.—His Royal Highness the DUKE of CAMBRIDGE will preside at the ANNUAL GENERAL MEETING of this Institution, which will be held at the Royal United Service Institution, Whitehall Yard (by the kind permission of the Council), on Thursday, 26th April, 1877, at 3 p.m.—By order,

April, 1877. G. W. FORSTER, Secretary.

SHIPWRECKED MARINERS' SOCIETY.

Patron—Her Most Gracious Majesty the Queen.

The THIRTY-EIGHTH ANNUAL MEETING will be held (D.V.) at the CITY TERMINUS HOTEL, Cannon Street, at 2 p.m., on FRIDAY, April 20th, 1877.

The Society received last year 10,386 widows, orphans, and shipwrecked persons.

W. H. SYMONS, Commander, R.N., Secretary.

Office—Hibernia Chambers, London Bridge, S.E.

FURNISH YOUR HOUSE or APARTMENTS THROUGHOUT on MOEDER'S HIRE SYSTEM. The original, best, and most liberal. Cash prices; no extra charge for time given. Large useful stock to select from. Illustrated price Catalogue, with terms, post free. 248, 249, and 250, Tottenham Court Road. Established 1862.

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON SEA, near Ramsgate, in 1 hour and 45 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE."
"The situation of the palatial establishment on a cliff somewhat removed from the town, though conveniently proximate thereto, is an advantage greatly augmented by its superb suite of ozone and various other health-giving baths, its well-constructed rink, its excellent and cheerfully appointed table d'hôte, and all other liberal additions of comfort, luxury, and amusement since the hotel has come into the present enterprising hands."—"Daily Telegraph," March 29.

THE "GRANVILLE" HOTEL.
The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL.
"Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

Address the Manager, Granville Hotel, St. Lawrence-on-Sea, Ramsgate.

HOLLOWAY'S PILLS.—With the changes in the weather will come trials to the constitution, over which any one moderately observant may pass, provided Holloway's Medicine be taken when the first symptoms of disordered action or depressed feelings indicate a departure from health. These mildly purgative yet powerfully purifying Pills are admirably adapted for literary persons, women, and children, and for all whose occupations mostly confine them to the house, whose appetite is generally poor, and whose digestion is slow and imperfect. The directions apportion the exact doses for every invalid, who may, with moderate attention, regain good health, and confidently point out to fellow sufferers how these remedies will be their best mode of cure and surest sources of strength.

WILLIAM S. BURTON,
39, OXFORD STREET, W.

THE PERFECT SUBSTITUTE FOR SILVER.—The REAL NICKEL SILVER introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs. Elkington and Co., is the best article next to silver that can be used as such, either usefully or ornamentally, as by no test can it be distinguished from real silver.

Patterns.	Fiddle or Old Silver	Bead or Thread	King's or Shell.
	£ s. d.	£ s. d.	£ s. d.
Table Forks or Spoons, per doz.	1 10 .	2 1 .	2 5 .
Dessert do., per doz.	1 2 .	1 9 .	1 11 .
Tea Spoons ,,	. 14 .	1 . .	1 2 .

These are as strongly plated, and are in every respect at least equal to what other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern:—Table Spoons and Forks, 23s. per doz.; Dessert, 17s. per doz.; Tea Spoons, 12s. per doz.

Tea and Coffee sets, in white metal, from £3 15s. to £7 7s.; Dish Covers, beaded pattern, £11; Ditto ditto, fluted, £15; from £9 to £24 the set of four; Corner Dishes, from £7 10s. to £18 18s. the set of four; Warmers, £7 2s. 6d. to £15 15s.; Biscuit Boxes, 14s. to £5 10s.; Cruet and Liquor Frames, &c., at proportionate prices.

The largest stock in existence of Plated Dessert Knives and Forks, and Fish-eating Knives and Forks, and Carvers.

All kinds of re-plating done by the patent process

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

ESTABLISHED 1864.

TIMEWELL,
SPECIAL TAILOR & MILITARY OUTFITTER TO GENTLEMEN WHO REQUIRE NO CREDIT
8, SACKVILLE STREET,
PICCADILLY, LONDON, W.

A large private trade of highest class and character, yielding to its patrons the full advantages of their position.

E. LAZENBY and SON'S PICKLES, Sauces, and Condiments—E. Lazenby & Son, sole proprietors of the celebrated receipts and manufacturers of the pickles, sauces, and condiments so long and favourably distinguished by their name, beg to remind the public that every article prepared by them is guaranteed as entirely unadulterated.—92, Wigmore Street, Cavendish Square (late 6, Edward's Street, Portman Square), and 18, Trinity Street, London, S.E.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated sauce are particularly requested to observe that each bottle prepared by E. LAZENBY and SON bears the label used so many years, signed, "*Elizabeth Lazenby.*"

In consequence of Spurious Imitations of
LEA and PERRINS' SAUCE,
which are calculated to deceive the Public, LEA and PERRINS have adopted A NEW LABEL, bearing their Signature—
LEA AND PERRINS,
which signature is placed on every bottle of
WORCESTERSHIRE SAUCE,
and without which none is genuine.

Sold Wholesale by the Proprietors, Worcester, Crosse and Blackwell, London; and Export Oilmen generally.

Retail, by dealers in Sauces throughout the World]

COCKS' READING SAUCE
Is the best and most economical Sauce ever manufactured for
FISH, ENRICHING SOUPS, GRAVIES, &c.
It only requires a trial to convince the purchaser of its excellence.
CAUTION.—The genuine is protected by Trade Mark, viz., CHARLES COCKS' Signature on a white ground across the Reading Arms.

107, STRAND (Corner of Savoy Steps),
LONDON.
Order of your Grocer, but see that you get
"JOHN BURGESS & SONS'."

LIEBIG COMPANY'S EXTRACT OF MEAT.
Finest Meat-Flavouring Stock for Soups, Made-Dishes, and Sauces. Caution.—Genuine ONLY with facsimile of Baron Liebig's signature across Label.

KINAHAN'S LL WHISKY.
UNIVERSALLY
RECOMMENDED BY THE MEDICAL PROFESSION. A pure old spirit, mild, mellow, delicious and most wholesome. Dr. Hassall says, "The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The whisky must be pronounced to be pure, well matured, and of very excellent quality." Wholesale—20, Great Titchfield Street, London, W.

FALKNER'S "REAL MALT" WHISKEY.
The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only.
LONDON, 40, CHARING CROSS.
DUBLIN, 83, GRAFTON STREET.

SCHWEPPE'S MALVERN SELTZER.
SCHWEPPE'S SODA WATER.
SCHWEPPE'S LEMONADE.
SCHWEPPE'S POTASS WATER.
Consumers are particularly requested to ask for SCHWEPPE'S, and observe Trade Mark on Labels (a Fountain), as many imitations are offered to the Public.—To be obtained from the leading Chemists, Wine Merchants, and Grocers.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3, ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

ESTIMATES ON APPLICATION.

MAJOR CREASE'S PATENT SELF-REGULATING, CLEANABLE CHARCOAL FILTER

Has been universally adopted in the Royal Navy, East Indian and English Transport Services; the German, Russian, American, and Austro-Hungarian Navies;

ALSO BY

HER MAJESTY'S WAR DEPARTMENT,

For BARRACKS, HOSPITALS, CAMPS, &c., &c.

And for which Patents have been granted by the Governments of Great Britain, the United States of America, Italy, France, and Canada to Major Crease, Sole Patentee of the Self-regulating, Cleanable Filter.

The designs are of three classes—

1.—For dwelling rooms and halls. To suit different styles of furniture three types have been employed—the Classic, the Japanese, and the Mediæval. None of these forms have been before employed for Filters.
2.—Those of simpler and cheaper designs for kitchen use.
3.—Filters of galvanized iron, either to fix to mains or cisterns, which, being capable of being made of any size, can supply pure water in sufficient quantities for the largest hospital or hotel.

The Filters, being made of special sizes, all their parts are interchangeable.

Full particulars can be obtained on application to

MESSRS. GARDNER AND SONS,

Sole Manufacturers of the Land Filters,

HAVING recently tried to show the want of preparation of our military medical arrangements, we shall now point out the hollowness of the support upon which our legislators profess to rely. "We can get as many civilians as we want by paying for them." Now, there are but two motives that will cause medical men to embrace the military medical service in time of war—romance and gain. The few who could indulge in the luxury of philanthropy would not affect the question. As to romance, let us reflect on the reply of the then Director-General of the department to the Commission in 1857:—"Did you find any difficulty before the late war in obtaining the number of young men properly educated which was required?" "None." "Did you find any difficulty during the war?" "Great difficulty." In a further reply of Dr. Smith we find an account of the reality which may well stifle romance:—"I look upon the men employed in the hospitals at Scutari to have been as much in danger of their lives as the men in the field." "Was not the mortality among them greater than among the men in service in the front?" "Yes." It is, therefore, obvious that if dependence be again placed on the temporary purchase of civilian aid, our troops in the next war will meet with the same preventible destruction which befell their predecessors in the Crimean campaign; and it is for this reason that we venture to put forward the outline of a scheme for the formation of a "medical reserve," which would supplement the active ranks and furnish a much more solid material in time of war than theoretical societies or hypothetical civilian aid Seeing, then, that the applicants for medical commissions are dwindling down at a decreasing ratio of 20 per cent. at each succeeding examination, it is evident that the offer of £250 a-year, with a bonus of £1,000 at the end of ten years, has failed, and that, if the short service scheme is to be continued, an increase must be made either to the yearly pay or to the retiring bonus. Such increase could not, without becoming absurdly disproportionate, exceed £50 a-year to the pay, or £500 to the bonus, which comes practically to the same thing, and makes the annual stipend £300 a-year, or the bonus £1,500. Here arises the question, "would such increase succeed in obtaining candidates?" or, in fact, "is it possible that the complete rejection of the short service system at the present rates of pay is caused solely by the students holding out and haggling for £50 a-year more?" Does not all experience go to prove that they will gladly serve for a much lower rate of pay in early life if secured a fairly compensating pension for their later years? Now, were it shown that candidates could be attracted, the life of the department restored, and an efficient reserve provided for the contingency of war by a different distribution of the money which would be required to make a further experiment of the short service system at increased rates of pay, it ought on public grounds to receive a fair consideration. It is beyond dispute that compulsory retirement at ten years' service has been unhesitatingly rejected, and that such retirement at five years would be impracticable in consequence of the frequent and expensive changes to and from foreign stations that would be necessitated thereby. The limit of service must, therefore, for all reasons, be increased. If, accordingly, twenty years be fixed as the time of compulsory retirement, and, in lieu of a bonus, a pension of £300 a-year, which is less than that now offered to those who are retired from sickness, be given, this—rendered optional to those already in the Service, and compulsory to those who join hereafter—would, on the scale of pay which existed prior to the introduction of the short service scheme, make the department hopeful and efficient, since it would be in the power of the Director-General, subject to the approval of the Secretary of State for War, to select annually from those who had completed twenty years' service such as were deemed by him of sufficient ability to be worthy of being retained for subsequent promotion to the administrative grades as vacancies occurred. Of those not so selected all would receive a pension of £300 a-year, and so many as enrolled themselves in a medical reserve, liable for service under certain conditions in time of war, would also be held eligible for such half pay and other State appointments as should from time to time be in the gift of the Secretary of State. Thus, there would be an active competition during the entire twenty years' service, each hoping to merit retention for subsequent elevation to the higher grades, while by enrolment in the reserve a certain amount of half-pay employment might still be secured, and to all would be assured a pension of £300 a-year at a time of life when it would not be too late to attempt to add something thereto by seeking practice in the colonies, or in civil life at home. That this would be a most popular proposal, and capable of ensuring good competition for Army medical appointments, there can be but little doubt. And now as to its cost to the State. Assuming that £300 a-year, with a bonus of £1,000 at the end of ten years' service, must be offered, if the short service experiment be continued, it is plain that in twenty years £6,000 will have been disbursed to two medical officers in yearly pay, and two bonuses of £1,000 each, making in all £8,000, but £1,000 had to be paid on the completion of the tenth year of service, and consequently interest and compound interest thereon is lost for ten years, amounting to £637 10s., making a grand total cost for twenty years' service, under the short service rules, of £8,637 10s.; whereas, a medical officer who serves twenty years on the existing rates of long service pay, even allowing him the boon of promotion at twelve years' service, will draw in twenty years only a total of £5,383 15s., leaving thereby a balance in the exchequer of £3,253 15s. towards purchasing the annuity which is to form his pension of £300 a-year at forty-five years of age and upwards, few of the applicants being first-class lives. Now, as it is shown in the English life tables (Farr) that of males between the ages of twenty-two years and thirty-seven years, and thirty-seven and fifty-five years, the death-rate equals 9·27 and 17·15 respectively per 1,000, and as the "death-rate of medical officers is 44 per cent. greater than that of males in civil life of all classes," it is but fair to assume that of two bodies of medical officers, one serving from the age of twenty-five years to thirty-five years, and the other from the age of twenty-five to forty-five years, the mortality of the latter must, during the prolonged period, be twice as great as that of the former; consequently, for every one (£1,000) bonus, which will by death lapse into the exchequer, two of the more valuable (£300 a-year) pensions must fall in, owing to the death of the claimants before completing the required service, and thus the long service system with pensions becomes actually cheaper than the ten years limit with one bonus. Finally, as the average expectation or probability of English life amongst males who have attained the age of twenty-two years is 60·5 years, the relative rate of expectation of medical officers, taking their proportionate mortality, would be fifty-four years. Therefore, calculating that a medical officer joins at twenty-four years of age, and serves to forty-four years, the average number of those pensioned will not draw the £300 a-year for more than ten years. Thus the balance of £3,253 already shown in favour of the long service system has only to go towards purchasing a ten years' annuity of £300, and proves still further the economy of this proposal.

When it was first proposed to build a college for Naval Cadets and to abolish the training-ship, considerable opposition was offered to the scheme, both on the ground of expense, the outlay being considered unnecessary, and because it was thought that a boy could have no better school for the sea than on board ship. As regards the matter of expenditure, there is no denying that when the first expense of building has been overcome, a shore establishment can be maintained at far less cost than a floating house, yet it was on the ground of economy, partly at least, that the original intention of Mr. Hunt to erect a college at Dartmouth was set aside for a time. That scruple has, however, been now lost sight of, and the proposition to send cadets to a school instead of a ship has received support from an unexpected source. When "the father of the ill-used cadet" first asked for an inquiry into the treatment his boy had suffered at the hands of his fellow cadets, he probably did not anticipate that anything more than the punishment of the offending youngsters was to be expected. That end was not attained to his satisfaction, apparently, and he thereupon took to writing to the papers. Such letters as he wrote, and such a leader as one of the dailies wrote upon it, were undoubtedly quite enough to bring some member of the House of Commons to his feet, and the First Lord of the Admiralty was accordingly called upon to give some explanation of the matter. The line taken by Mr. Hunt was about the best he could have chosen, for no one can doubt that it is the desire of the Admiralty to check the spirit of the bully amongst the young gentlemen who will become the Captains of the future. Indeed, he might have reminded the House that in his zeal to make these boys what they should be he had once ordered the troublesome ones to be birched, and for that the House came down upon him as though these youngsters were officers who were being flogged, instead of mere schoolboys who were best kept in order by a pointed appeal to their feelings. This case has also been made a peg whereon to hang an argument for the abolition of the ship by a Naval Instructor, who has written to the papers on the subject. But, reading between the lines, it would almost appear that the writer had more than a passing object in penning his remarks, for in abusing the present system he attacks the authority of the executive, and plainly wants more power himself. Why he should have drawn the officer of the day as a beardless boy sitting on the table sipping a glass of beer, unless it were to endeavour to make the outside world believe the ship is anything but what she should be, and, indeed, what she is, it is difficult to understand. His cry is for a school on shore, because there the schoolmaster would have the greatest sway, especially if backed up with the powerful birch, as he advocates. While we cannot see things in the same light as he does, we agree as to the advisability of a college for Cadets, provided proper measures are also adopted for teaching them the discipline of the Service before casting them adrift in a gun-room mess of a regular sea-going man-of-war. It is conceded on all sides that bullying to a certain extent exists in every school of importance, and why so very great a storm should have been raised because one cadet in the training-ship had, unhappily, to suffer an experience of this nature, is not quite plain. We know for a fact that the very same gentleman who has been doing his best to blacken the character of the Britannia as an educational establishment, was remarkably loth to take home the identical cadet who has been held up as a martyr when requested by the Admiralty to withdraw him from the ship and Service, notwithstanding he had agreed, as is usual on cadets being admitted, to remove his son should their Lordships be of opinion that he was unsuitable for the Navy from any cause. Against this decision the father appealed. Nay, more, he begged that he might be given a nomination for another son in the event of this one being removed! Whether their Lordships will comply with this request remains to be proved, but it will be acknowledged that the charges laid against the character of the Britannia and the cadets generally do not come well from one who still displays such anxiety to have one of his sons brought up in that school.

The importance and interest attaching to the Report of the Departmental Committee on theMilitia are so great that we do not feel called upon to make any apology for recurring to the subject. One of the matters of investigation was the effect of Militia enrolment on recruiting for the Army. There is a strong feeling in the latter that the Militia competes with the Army in recruiting, and we believe that there is some foundation for that feeling. Indeed, it stands to reason that, where one Service offers ten shillings down and the other absolutely nothing, the bounty should turn the scale if the man is otherwise careless on the subject. We are convinced, moreover, from personal observation, that a very large number of men join the Militia in order to get the enroment and training bounty, and fraudulently enlist in the Line at the close of the training. Assuming a man to have no principle—and there is, we are sorry to say, very little principle where Government is concerned—this is the best arrangement he can make. Many others join the Militia just to see how they like soldiering, with the deliberate intention, if they find it unpleasant, of enlisting in the Line without repaying the eighteen shillings and sixpence required of them by regulation. The testimony of Militia officers is to the effect that recruiting for the Militia does not interfere with recruiting for the Line. They almost, without an exception, assert this. No doubt it is true that there is a considerable number of good men who, if there were no Militia, would not join the Army. They are not induced by the pay, for as Captain Hill, of the Worcestershire Militia, stated, "even agricultural wages are better." We also learn that many of the Militiamen from Liverpool who enrol men can earn by work on the quays eight shillings a-day. Such men join the Militia from love of change, and for an outing, just as a large number of men annually go into Kent for hop-picking. They like the out-door life, and feel that what they lose in money by attending the training they gain in health. On the other hand, there is abundant testimony to prove that thousands of men are driven by temporary destitution to enter the Militia. If there were no Militia, these would, it is reasonable to suppose, enlist in the Line. Indeed, many of them do enlist in the Line either after receiving the enrolment bounty, or at the close of the first training; at least, there are fair grounds for the suspicion that such is the case. Colonel Blundell, of the Lancashire Militia, says in a written statement, "I suppose about a third of the recruits who enlisted for this training have never shown up at all." Lieutenant-Colonel Aikman, Royal East Middlesex Militia, gave it in evidence that, of 270 men enrolled for his regiment in 1875, only 181 appeared for the recruit training. Lieutenant-Colonel Maxwell, of the Queen's Own Royal Tower Hamlets Militia, informed the Committee that out of every 200 men enrolled, from eighty to eighty-five take the bounty without the slightest intention of joining. Lord Norreys, of the Berks Militia, says that his annual loss by men who take the enrolment bounty, and do not join, is about forty—that is to say, 5 per cent of the actual strength of his regiment. This is pretty much the experience of most regiments, and, considering how difficult it is to detect fraudulent enlistment, it is not to be wondered at that the crime should be prevalent. On this point we would call attention to a statement of Lieutenant-Colonel Maxwell, who when asked, "Have you any means of checking that fraudulent enlistment into other regiments?" replied, "We are almost powerless. In the first instance, the police have tacit instructions not to interfere unless it is forced upon them." If this apathy of the police is general, we can only say that it is very discreditable to the force. Indeed, till the police are compelled to do their duty, with respect to desertion and fraudulent enlistment, the War office will be powerless to check those evils. If fraudulent enlistment became a crime which could rarely be committed with impunity, then the bounty given for enrolment in the Militia would not be objectionable, for money's worth would be given for money. As matters stand now, not only does the soldier who enlists in the Line obtain indirectly by fraud a bounty, but he becomes thereby demoralized, and is apt to desert, sell his kit, and afterwards enlist in another Line regiment. Those who maintain that the Militia does not compete with the Line urge that many men who otherwise would not join the Regular Army enrol in the Militia, and taking a fancy to a soldier's life, afterwards enlist in the Line. There is, probably, some force in this argument, and, at all events, it is very certain that the Militia is so popular a force that the country would not willingly consent to its abolition. We now come to the question whether the Militia should be looked on and treated as a force valuable in itself, or only useful in so far as it acts as a feeder to the Line? We have no hesitation in saying that the efforts of the authorities ought, in the first place, to be directed to making it a force valuable in itself, and the feeding of the Line by its means as only secondary. With a proper system of Army Reserves there ought to be no difficulty about a rapid and effectual expansion of the Line, and volunteering on a large scale from the Militia ought only to be had recourse to in cases of extreme emergency. The contrary course has hitherto been adopted, and, by means of high bounties, the Line has always during a war obtained a considerable number of men from the Militia. From 1805 to 1814, both years inclusive, the total number given by the Militia was 113,388, but during the first two years the bounty for Militiamen volunteering for unlimited service was £10, during the last eight years £14, and during the whole ten years for limited service £10. Besides, officers who obtained commissions in the Line on condition of bringing a certain quota from the Militia added out of their own pockets largely to the Government bounty. It is very questionable whether, now that the bounty has been abolished, such results would be repeated. Even with the high bounties above mentioned, and although the Militia was embodied during the last eight years of the war, the numbers wanted to complete the establishment of the Army averaged 22,500 men. As to the Militia Reserve, it does not at the present moment exceed 26,000 Infantry on paper. It is very doubtful whether any large proportion of these would obey the summons. As was observed by one of the witnesses, they know that they have never yet been called up, they hope they never will, and they take their chance. Besides, it cannot but interfere with the efficiency of the Militia if their best men are, at the very moment when they are most needed, taken away. It would, therefore, appear both useless and undesirable to rely upon the Militia for a large supply of recruits for the Regular Army. That, however, is no reason why, constituted as the force is, we should not place facilities for transferring their service to the Line in the way of those Militiamen who wish to become regular soldiers. It would be better if the Militia contained none but those who would, under no circumstances, become professional soldiers, but under existing circumstances there are many men whom a very slight inducement would bring into the Line. These we may as well utilize, and a very good suggestion made by one of the witnesses examined by the Committee is that the recruit and training service of any Militiamen who may enlist in the Line should be counted towards good-conduct pay; we would add towards service generally. Leaving the Regular Army out of consideration altogether, we come to the difficult question of what is to be done to fill up the ranks of the Militia, in which at present there is a distressingly large number of vacancies? We agree with the Committee that there is no reason why the principle of expansible cadres should not be applied to the Militia as well as to the Regular Army, and that a small efficient force is preferable to one that is larger but less efficient. The Committee assert that there would be, in the event of a war, no difficulty in obtaining quickly sufficient recruits to bring up Militia battalions to their full strength. There has not, it is true, been any such difficulty in the past, but who can tell how it may be in the future? Besides, wars are now so quickly over—there is so little time for preparation—that it will be necessary to raise our men within a few weeks, if they are to be of any use. It is, therefore, quite possible that, objectionable as the ballot undoubtedly is, we may be compelled to have recourse to it. Once granted the possibility of an emergency rendering the adoption of so extreme a measure imperative, it is clearly our duty to make all our arrangements for carrying it out beforehand. This is the view of the Committee, who recommend that "the raising of recruits by ballot should be regarded as a civil duty up to the time when the recruits are brought to head-quarters, or elsewhere, to be clothed and equipped." This is obviously sound counsel, for as the military authorities could not apportion the number of recruits to be raised by each parish without the aid and support of the civil authorities, it is preferable that the entire task should be undertaken by the latter. The result of adopting this suggestion would be that the Secretary of State for War would from time to time notify to the civil authorities what number of men were required to make up the quota of a district or county, and would not further concern himself with the matter till the men were handed over to his agents, the commanders of Sub-Districts. We have serious doubts whether the ballot could be imposed with advantage, save for the raising of local Militia; but it is quite evident that if it is to be adopted for any other purpose, the machinery should be perfected and thoroughly understood by all concerned before it is required to make use of it. Without substitutes the ballot, we may observe, would be a serious hardship, and with it the recruiting of the Line without bounty would become impossible. Surely this is an argument for enlisting no men for the Regular Army at any time save through the Militia. Yet, as we have pointed out, such a proceeding would be very detrimental to the efficiency of the latter. As to the merging the Militia into "Territorial" regiments, the answers of several of the witnesses show that such a step would have to be taken with caution, as it is liable to lead to an idea that the Militia was only a trap for the Line. Indeed, the whole question of the connection of the Militia with the Line is one surrounded with difficulties, and we fear that the Committee have by no means succeeded in solving the problem presented to them.

It has been suggested to us that, as the present unsettled state of affairs renders it desirable that England should have as many as possible of her best ships available, the Hydra, Hecate, and Cyclops, turret-ships, a small type of Devastation, now thoroughly efficient, should be kept so by becoming tenders to the Coastguard ships at Hull, Kingstown, and Queenstown, which would give the crews of those ships a good opportunity of becoming acquainted with ironclads of the turret class. Again, the ironclad Iron Duke is ordered to Devonport to prepare for flagship in China as soon as the new ironclad Shannon (small type of the Nelson class) can be ready to take her place, which will be in June, when the Penelope will be nearly ready to receive her crew from the Challenger. But by directing the Challenger to relieve the Iron Duke the Shannon would be free as a sea-going cruiser. The Agincourt is also named for service at Greenock as Coastguard ship. She has new boilers and almost new engines, and last month was thoroughly tried on the measured mile, and easily made nearly fourteen knots an hour. Her armament is increased to seventeen 12-ton guns. She has Harvey torpedoes and the fish or Whitehead torpedoes, steam steering engine, and all new appliances, and it appears very unwise to put her into the Coastguard and keep in the Channel Squadron the Resistance, which has been nearly four years in commission, and is much less powerful in armament, has thinner armour, and is a less efficient ship in many ways.

Mr. E. J. Reed, C.B., in a lecture on the modifications which ships of war have undergone during the last twenty years, delivered before the Society of Arts, strongly urged that more attention should be paid to torpedoes, with the view not only of utilising them, but also of constructing men-of-war, so that they would suffer as little injury as possible from them.

The return called for by Captain Pim of the number of Naval Cadets who have been trained on board the Britannia since that ship has been stationed at Dartmouth up to January 1, 1877, has been issued, and it appears that the total number entered on board the Britannia from January 1, 1864, to January 1, 1877, has been 1,337. The present rank of those remaining in the Service on January 1, 1877, is:—Lieutenants, 274; Retired Lieutenants, 11; Sub-Lieutenants and Acting Sub-Lieutenants, 293; Retired Sub-Lieutenants, 39; Midshipmen, 211; and Cadets, 173. The total number who have died is 38; total number killed, including deaths by drowning, 10; retired or discharged as physically unfit, 110. The discharges have been as follows:—Resigned, 36; dismissed, 63; failed for Lieutenant, 25; and failed in Britannia, 48.

The Good Service Pension of £150 a-year rendered vacant by the retirement of Captain Norman B. Bedingfield has been conferred on Commodore George W. Watson, naval officer in charge at Hong Kong.

A Greenwich Hospital Pension of £150 a-year, vacant by the death of Admiral Sir Edward Belcher, K.C.B., has been conferred on Vice-Admiral James Willcox, C.B.

The order for an examination of candidates for Engineer students has been countermanded pending the revision of the regulations for their admission. Notification has been received at Chatham Dockyard that there will be no further entry of Engineer students this year.

Three months' rest on half pay, after more than ten years' almost continuous full-pay service, has been as much as the Admiralty has permitted Rear-Admiral the Hon. Fitzgerald Foley to experience, he having now been appointed Admiral-Superintendent at Portsmouth.

Orders have been given for the Thunderer to be commissioned on May 1 for "particular service."

On the recommendation of the Admiralty, the bronze medallion of the Royal Humane Society was unanimously voted at the last meeting to Joseph Lancaster, ordinary seaman of the Sapphire, and the bronze clasp to Sub-Lieutenant Langdale—who had already received the bronze medal for a former act of gallantry—for jumping overboard from the gangway and rescuing Sydney Martin, who accidentally fell overboard at sea at Auckland, New Zealand, striking the maintop and rigging in his fall, and being thereby rendered insensible, on January 16 last; the bronze medallion was also voted to Sub-Lieutenants R. O. Polwhele and F. G. M'Kinstry, of the Swiftsure, for jumping overboard to the rescue of George Robinson, who fell overboard in the Gulf of Salonica on the 15th ult., the ship at the time going at the rate of six knots. The bronze medal was also given to Joseph Shapter, of the Achilles, for saving Charles John Crocker, who was capsized from a boat at Rock Ferry on February 1 last.

We regret to hear that the health of Mr. Herbert Jollye, R.N., Secretary to Rear-Admiral Rice, has so broken down as to necessitate his being invalided home from Malta. Mr. George W. Mackey, Assistant Paymaster, has been appointed Acting Secretary.

Major Sir Rose L. Price, of the Royal Marines, has made a statement in his book, "The Two Americas," which affects not alone the honour of the naval Service, but also the relations of this country with a foreign State. He asserts that owing to the heavy impost placed upon all silver leaving Mexico, the people having dollars or bars which they wish shipped, smuggle them on board our men-of-war, "which seem to cruise in Mexican waters for no other purpose than that of aiding and abetting the subjects and residents of the country to break her laws." The gravity of this accusation is very great, and it is increased by the fact that Sir Rose Price was a guest on board one of her Majesty's ships, and may therefore be supposed to have obtained the information from personal observation. The statement has no doubt been made in perfect good faith, but it is one deserving of inquiry.

There is some probability that the Naval Cadets to be entered on board the Britannia at the July examination will be rather in excess of the number admitted in January, as the supply has hardly been found sufficient to meet the waste which takes place from withdrawals and unfitness for the Naval Service.

The words of Admiral Sir Alexander Milne, in returning thanks for the Navy at the annual dinner of the Institution of Civil Engineers, ought to bring comfort even to the most confirmed grumbler against the management of the Navy. The gallant Admiral alluded to the successful efforts of Mr. Hunt to improve and increase the Fleet of England, and remarked there never was a period when we had a more efficient or able body of officers and of seamen than at present, and he attributed the satisfactory state of things as regarded the character of our sailors to the system which had been pursued of training them up from boyhood. The British Fleet was admirable and efficient in every way, and, whenever it might be called on to act, would prove that it was worthy of the country. From so competent an authority as Sir Alexander Milne such a statement is eminently satisfactory.

In another column will be found the pith of a Parliamentary paper concerning the removal from the Navy of Captain the Hon. A. Hobart and his reinstalment in the Service. It would seem that we have not yet heard the last of the matter, for Mr. Mundella has given notice that on an early day he will call attention to the correspondence, and move a resolution, and the Earl of Camperdown has also promised to ask Lord Derby to state the reasons connected with Imperial policy which induced him in 1874 to recommend the reversal of the course advised by him in 1868, and also whether there is any precedent for replacing upon the "Navy List" the name of an officer removed for having accepted employment under a foreign Government in defiance of orders from the Admiralty; and whether Admiral Hobart has now permission from the Admiralty to serve under the Turkish Government.

A Greenwich Hospital Pension of £50 a-year, vacant by the death of Deputy Inspector-General Peter Suther, has been conferred on Staff-Surgeon John Wilson.

On Thursday next, the Pelican, 6, screw composite sloop of 1,124 tons, will be launched at Devonport. It was originally intended that she should be provided with engines on the "Perkins principle," but owing to the failure of the builders to carry out their contract, the machinery which was constructed for her sister ship, the Cormorant, was transferred to her.

Commander Annesley Denham writes to suggest that the shoal referred to last week as a recent discovery off the coast of Brazil is the "Victoria," discovered in 1852 by H.M.S. Herald, Captain Denham (now Vice-Admiral Sir Henry Denham), when on her outward passage on a voyage of exploration and survey. The deep-sea lead was kept constantly going both out and home, and when in latitude 20° 45 S. and longitude 37° 47 W. from no soundings, nineteen fathoms was suddenly got; the ship was anchored and remained there several days, while the bank was ascertained to spread eighty miles by twelve.

We are glad to hear that a fund is being raised by the medical officers of the Navy for a testimonial to perpetuate the memory of the late Dr. Alexander Eugene Mackay, Deputy Inspector-General of Hospitals and Fleets, the intention being to raise a suitable monument over his grave, to place a memorial slab in any church that may be agreeable to the family, and to employ the surplus in presenting to his family some testimonial to mark the regard and esteem in which he was held by his brother officers. The following officers have consented to act as a central committee in London:— Inspector-General Thomas Nelson, M.D., Deputy Inspectors-General James Vaughan and D. J. Duigan, M.D.; Fleet-Surgeons G. J. Willes, M.D., Seaton Wade, and Alexander Fisher, M.D. Fleet-Surgeon Andrew Graham, M.D., of the Army and Navy Club, acts as Honorary Secretary. Subscriptions will be received by Messrs. Stilwells and Co., 22, Arundel-street, Strand, W.C.

The committee appointed to consider the grievances of the Royal Marines has, we understand, concluded its sittings, but no immediate action will be taken upon their recommendations. We pointed out a short time since that injustice would be done to the corps in question by delaying attention to its urgent requirements until the approval of an Army scheme, drawn up by a commission which was not called upon to take its wants into consideration; but it appears that the Treasury still adheres to its decision that no steps shall be taken with regard to the Marines until the Army scheme is also ready. The corps is raised for the Admiralty, paid by the Admiralty, and serves the Admiralty; and surely it is not too much to ask that the Admiralty should have power to attend to its wants. If this power be not at present vested in them, the sooner they obtain it the better for a body of fourteen thousand men who have earned their laurels and served their country in every part of the globe. When the senior subalterns on the list are in their eighteenth year of service it is no time for dallying with questions of "red tape."

If it be true that an Engineer of the Orontes has positively so burnt his feet by standing upon hot metal while attending to his duties that it has been necessary to amputate one of his legs, it is plain that by this event the Service has lost an officer of unexampled zeal. The necessity for exposing himself to such torture and injury is not explained in the brief notice of the "sad accident" which has been going the rounds, and we are hopeful that there is some mistake about the affair. The latest information from this ship which has come under our notice says not a word about this amputation, but the name of the officer who is now reported to have been so injured is mentioned as having been sent to hospital on account of a chronic complaint.

Mr. Pole, Instructor of Mathematics at the Royal Naval College, has placed his resignation in the hands of the Admiralty.

Commanding officers of Coastguard ships have been authorized to accept eligible candidates who may offer themselves for the rating of engine-room artificer, instead of necessitating their proceeding to the home ports with the view of offering their services.

The Admiralty has modified Clause 14 of the Circular of October 3, 1876, respecting navigating and pilotage duties, thereby placing Acting Navigating Sub-Lieutenants who may elect transfer to the executive on a more equal footing with other Sub-Lieutenants. Formerly it was laid down that if they elected the Executive List they would be placed at the bottom of it as it existed at the time of completing the College examination, subject to the effect of any deprivation of time on account of undue delay in passing in pilotage; and, should loss of time consequent on delay in passing in pilotage or other cause make their seniority of the same date as that of any Sub-Lieutenant who had always been on the Executive List, they would be placed on the list below such Sub-Lieutenant. Now, however, if they elect the Executive List they will be placed upon it with the seniority which they would have obtained had they remained on the Navigating List. Under these circumstances, it may be taken as certain that all Acting Navigating Sub-Lieutenants will elect the Executive List.

An admirable arrangement for keeping, corrected up to date, the constantly-changing rules and regulations by which the Navy is governed, has been introduced in the new dockyard instructions which have engaged the attention of Mr. Arthur Price, R.N., for some years past. On the issue of any order cancelling or altering a clause in these instructions slips are printed and distributed for insertion in the book, by which means corrections in ink or the publication of addenda is rendered unnecessary. It is to be hoped that the same system may be followed with the revised edition of the Queen's Regulations and Admiralty Instructions, now in the hands of Mr. Fegen, R.N., and anxiously looked for by the Service to supersede the present nearly obsolete volume with its addenda and mass of circulars. We have reason to believe that the issue of the revised Regulations will not be much longer delayed.

Admiral the Hon. Sir James Drummond, on hauling down his flag on Friday last, may be said to have taken leave of active service, for age will necessarily retire him six months hence. The gallant Admiral could not have wound up his career in the Navy under happier circumstances, for his popularity during his last command is indisputable, and the Blue-jackets did not forget to give their late chief a hearty farewell as he left the ship for the shore.

Rear-Admiral John Corbett, C.B., who has been selected for the command of the East Indies Station, entered the Navy in 1836. As Midshipman he served in the Carysfort throughout the operations of 1840 on the coast of Syria, including the bombardment of St. Jean d'Acre and the blockade of Alexandria, for which he received the war medal with clasp and the Turkish medal. Passing his examination in June, 1842, he was appointed in 1843 to the Queen, in the Mediterranean. He was promoted to Lieutenant May 4, 1846, being next appointed in July, 1847, to the Vengeance. After obtaining his Commander's commission, February, 1852, he served some time as Admiralty agent on board a contract mail vessel, and while acting as such received injuries for which he is now in receipt of a special pension. In 1854 Commander Corbett was appointed to the Wolverene on the North American and West Indian Station, and in July, 1856, to the Inflexible, which he commanded with distinction in the Canton River against the Chinese in 1857, and was promoted to Captain August 10, 1857, for his services in the war. Since that time he has commanded the Scout in the East Indies and China, and was last employed in command of the Britannia, training-ship, from September, 1867, to August, 1871. Rear-Admiral Corbett was appointed a C.B. in June, 1869, and was Naval Aide-de-Camp to her Majesty from April, 1870, until promoted to flag rank.

The inquiry into the collision between the Triumph and Benjamin Whitworth has apparently fully satisfied their Lordships that it arose through the stupid bungling of those on board the merchantman, as we understand that the Admiralty has declined to recognise any claim for compensation. As a rule, the Admiralty readily admits liability for damage done by her Majesty's ships and is never too hard upon a trading vessel if she happens to fall foul of a man-of-war. We are therefore the more inclined to believe that the position of the Triumph must be very secure.

The Committee recently appointed to inquire into the strength of the Staff and expenditure of the Royal Naval College has made a final report, and has received the thanks of the Admiralty for the careful manner in which the duty imposed upon the members has been carried out. The report is now in the hands of the President of the College, Admiral Fanshawe, C.B., who has been directed to take the recommendations and suggestions offered into consideration with a view to putting them in practice.

A Russian officer has received permission to make a tour of inspection of all our dockyards and such Government establishments as he may desire to visit.

A pension of £120 per annum has been awarded by the Admiralty to Mr. Whillier, Paymaster-in-Chief, in consideration of injuries received by him in the Service.

A Lieutenant studying at the Royal Naval College having displayed some eccentricity in the manner in which he answered questions put before him, his examiners were led to believe that he was treating the examination rather as a joke, and they therefore brought the officer under the notice of the President. On the strength of this it was decided to discharge the student, but we are glad to hear that so forcible a measure has been rendered unnecessary by the readiness of the Lieutenant to admit his error, and the Admiralty have sanctioned his remaining at the College.

A gratuity of £1,000 has been awarded by the Admiralty to Mr. Bristow, late Admiralty solicitor, on his office being abolished and the duties transferred to the Treasury. Their Lordships also took occasion to express their satisfaction at the manner in which the business of this office had always been conducted.

The most complete and exhaustive system of "conventional signs" we have ever seen has been issued in Vienna for the new military route map of the Austrian Empire, which has been published in fifty-six sheets. It is a perfect topographical narrative, and may well be taken as a model by our Intelligence Department officers, but the labour of preparing it must have been enormous. It was the result of a conference of officers *ad hoc.*

Sir A. Horsford has returned to the Horse Guards from Dresden, and has been engaged in transacting business which had grown in his absence and in that of the Duke.

A short time ago there was a paragraph giving an account of a very rapid march made by a detachment of the Russian Army towards Odessa by way of testing their condition for work. But a force of two sotnias of Cossacks, a squadron of Hussars, and a squadron of Lancers (600), which made a raid from Petrokoff under the orders of Colonel Roubachefsky during the Autumn Manœuvres last year, far exceeded that achievement. Their mission was to destroy the Warsaw and Terespol Railway between Loukoff and Novominsk. They marched at 10 a.m. on September 15, and between that and 6 a.m. of September 17 (forty-four hours) they covered 160 versts = 171 kil.; the advanced-guard having done 187 kil. and the flankers 213 kil. in torrents of rain. The horses remained twenty-four hours without being unsaddled, and were on the ordinary allowance and very little corn. The men had only biscuits and water. Only one horse was destroyed. That certainly was very good work, and we are told that the force was not selected.

There is, we are told, among the engravings and drawings which were collected by "the Great Duke" one which may be known to our American friends, but which is very probably unique in this country. It is a coloured lithograph at Strathfieldsaye described as—"General Zachariah Taylor (old Rough-and-Ready) as he appeared at the battle of Palo Alto, from a sketch taken by a Lieutenant of Artillery." It represents a stout, ungainly man mounted on a white horse. The General is dressed in an ordinary black hat, set at one side and rather on the back of his head, a blue blue dress-coat with gold epaulettes, open in front, showing a turned-down shirt-collar over a white tie with a large bow, white shirt, and grey vest. The coat is fastened round the waist with a white leather belt with a brass buckle in front. There is no lace on the cuffs. One arm, the left, is extended, as if Rough-and-Ready were giving an order; the reins are on the horse's neck. In the right hand the General is holding a huge pencil, which is pressed on a piece of paper extended on his right thigh, for he is represented not in, but on his saddle, his left leg being cocked over the horse's neck towards the right side, so as to show the sole of the boot, both heels being decorated with enormous spurs, and the legs being encased in baggy white trowsers strapped tightly down. A straight sword, not unlike the sham articles seen at stage coronations, decorates his right side! The horse, which is represented in the act of neighing, is provided with a blue saddle-cloth with a heavy gold fringe, and altogether the attitude and attributes of the steed and his rider are very quaint and curious, and the print is, in some respects, like that famous fly in amber.

A short time ago, Mr. Hardy stated, in reply to Lord Elcho, in the House of Commons, that Adjutants of Volunteers would receive their Line pay from July 1 last. Better late than never; but we are under the impression that Parliament voted the money from April 1. Why, then, should these officers be paid from July 1 only?

It has been ruled by the War Office that Chaplains of Volunteer corps are not entitled to wear any uniform. We wonder what will be the result of this extraordinary decision. Will those officers who have always worn uniform be deprived of the privilege, or will the authorities sanction the use of some appropriate dress?

In confirmation of a statement we made some months ago, it is recommended that all existing regiments of Rifle Militia should in future be clothed and armed as Infantry, and that only those regiments affiliated with the 60th Rifles and Rifle Brigade should wear the Rifle uniform—viz., the Royal London, 2nd Royal Middlesex (Edmonton Rifles), and 1st and 2nd Tower Hamlets Regiments. This is a most sensible proposal, but we question whether it will give satisfaction to those officers who will be called upon to provide themselves with a complete change of outfit, and who will henceforward be only "red soldiers."

The following promotions take place in the Army consequent upon the death on the 14th instant of General W. Wylde, C.B., R.A., whose services at Court after a long career in the field have been acknowledged by a notice in the Circular by Royal command:—Lieutenant-General Sir F. Warde, K.C.B., R.A., to be General; Major-General W. H. Askwith, R.A., to be Lieutenant-General; Colonel H. P. Goodenough, R.A., to be Major-General; Major G. F. Macdonald, half pay, late 16th Regiment, Staff Officer of Pensioners at Toronto, to be Lieutenant-Colonel; and Captain G. E. Perryn, 90th Regiment, to be Major. The promotions resulting from the death of Lieutenant-General Sir Burke Cuppage, K.C.B., R.A., which occurred on Thursday, will be:—Major-General C. J. Dalton, R.A., to be Lieutenant-General; Colonel J. Turner, C.B., R.A., to be Major-General; Major R. Lacy, 59th Regiment, to be Lieutenant-Colonel; and Captain A. B. Morgan, 19th Regiment, to be Major.

The vacancy among the Colonels Commandant of the Royal Artillery, caused by the death of General W. Wylde, C.B., will be filled by Major-General W. H. Askwith, an officer who, previous to joining the "establishment," performed the most excellent service which earned for him lately a Distinguished Service Reward. General Askwith entered the Army December 18, 1829, and became Major-General January 1, 1868. He wears the decorations of the 1st Class St. Fernando, Commander Isabella the Catholic, and Knight of Charles the Third.

Provided Captain W. C. Wolseley, the senior Captain, gets the Majority in his regiment, the 6th Foot, vacant by the death, which we lately announced to have occurred in India, of Major J. N. Colthurst, Captain A. B. Morgan, 19th Regiment, and not Captain Perryn, of the 90th, will obtain promotion as Brevet Major, in succession to General Wylde, deceased. Captain Morgan heads the list of Captains of 1863. The list includes sixty-three officers eligible for promotion, including sixteen who are senior Captains in their regiments, and who might at any time succeed to substantive Majorities, viz., the seniors in the 5th Lancers, and 6th, 8th, 21st, 22nd, 26th, 29th, 36th, 39th, 49th, 51st, 66th, 94th, 95th, 99th, and 100th Foot.

By the death of General Wylde, General Sir Richard Dacres, G.C.B., becomes the senior General officer of the Royal Artillery, and by virtue of that position will succeed to the £456 per annum, the pension which has been for some years allowed as compensation for the loss of the Gun House in St. James's Park, which was long the official residence of the "Master Gunner of England."

Major-General C. J. Dalton becomes Colonel-Commandant of the Royal Artillery, vice Lieutenant-General Sir Burke Cuppage, K.C.B., deceased. General Dalton has no war service. He entered the Royal Artillery December 18, 1829, and became Major-General April 23, 1868.

The command of the Royal Artillery at Aldershot is falling vacant by the promotion of Colonel J. Turner, C,B.

The Brigade-Majorship of the Royal Artillery at Aldershot, which is falling vacant, was offered some months ago to Captain Henry Knollys, Royal Artillery, now on the Staff of the Intelligence Department, who will leave the Horse Guards and enter upon the duties of the appointment at once. Captain Knolly's selection has occasioned the greatest satisfaction throughout the regiment.

It is fair to the 90th Light Infantry, one of the best ordered and most highly disciplined regiments in the Service—an opinion expressed by all those who have ever met it either in the field or in quarters—to state that it had been decided, before the recent unfortunate circumstances at Limerick, to move it to England; and though the disturbances to which attention has been drawn have had the effect of hastening the withdrawal of the corps from Ireland, it is to the exigencies of the Service alone that the original decision is to be attributed. Nevertheless, we think it doubtful whether a measure which may be attributed by the disorderly population of a city not much distinguished for its love of peace and quietness to dread of provoking their wrath should have been so hastily executed. If the case be made a precedent, it offers temptations to the men of regiments which do not like Irish quarters to create disturbances for the sake of a removal to towns containing less excitable populations.

It is well known that Captain the Hon. G. P. H. Villiers, Grenadier Guards, will be provided with other employment before long. In a few weeks' time Captain Villiers will obtain promotion in his regiment, and, as Lieutenant-Colonel, he will be disqualified for the appointment he at present holds as Aide-de-Camp on Lord Lytton's Staff. As the holder of a Staff College certificate, it may reasonably be supposed that he will be allowed to put in the service necessary for promotion; but a contemporary is premature in announcing that he will succeed Lieutenant-Colonel Owen Burne, as Colonel Burne, we have reason for believing, will be induced to continue for a further period at Calcutta, and already Captain Villiers' name has been associated with another important appointment which is just now disposable to which his junior rank, no less than certain obstructions which may have led to the resignation of the officer who lately held it, perhaps may prove barriers.

Adjutants of Engineer Volunteers will in future be drawn from among the officers of the Corps of Royal Engineers, and not from the Line, as has been the case since the introduction of the five years' system. This change cannot fail to be advantageous, and will give satisfaction alike to the officers of the Engineers and to the Volunteers. It is some time since we advocated the change, and we are glad to find that our remarks have not been allowed to pass unnoticed.

Colonel Hamley, it is understood, will relinquish his appointment as Commandant of the Staff College in July next, by which time he will have passed seven years in the position. As to his successor, there is yet some doubt, but it is hoped at Sandhurst that the appointment may be offered to an officer now absent from England who has had a long experience of Professor's work, and who has lately added greatly to his reputation in other fields of usefulness.

Those interested in the Royal Artillery will be glad to learn that arrangements are now in progress in the office of the Deputy Adjutant-General for the gazetting of a number of promotions on the Imperial Establishment, which has been, so far as the Captains are concerned, in a stagnant condition for twelve months and more. Some of these promotions are announced in last night's *Gazette*, but this is only a first instalment.

Major-General W. Payn, C.B., has arrived home from India on vacating command of a brigade of the Bengal Army, having served there since April, 1871, when he landed at Bombay in command of the 72nd Highlanders.

Staff-Paymaster A. Ewing, who has been for some years past employed at Aldershot, has been selected to succeed Staff-Paymaster E. Courtenay in charge of the military chests in the Manchester District. Mr. Ewing will be much missed at *Aldershot*, where he has taken a leading part in the direction of the musical entertainments which have been given from time to time at the Camp.

The Distinguished Service Reward vacant by the death of Lieutenant-General H. W. Whitfeild has been given to Colonel E. Newdigate, commanding the Brigade Depôt at Winchester. Colonel Newdigate served with the 2nd Battalion Rifle Brigade during the Eastern campaign of 1854, and up to July, 1855, including the battles of Alma and Inkerman (wounded), and siege of Sebastopol (medal with three clasps, Brevet of Major, Knight of the Legion of Honour, 5th Class of the Medjidie, and Turkish medal). He entered the Army May 29, 1842, and became Colonel October 23, 1867.

Lieutenant A. R. Hampton, 2nd West India Regiment, has been appointed Fort Adjutant on the Gold Coast, vice Lieutenant A. B. Ellis, 1st West India Regiment, proceeded to the West Indies.

Brevet Lieutenant-Colonel E. D. Smith, half pay, late 95th Regiment, Town Major of Jersey, has been selected to succeed Lieutenant-Colonel E. W. Sargent, half pay, late 18th Royal Irish, whose period of service has expired, as Assistant-Adjutant and Quartermaster-General in the West Indies. Colonel Smith served with the 95th Regiment in the Eastern campaign of 1854, including the battles of Alma and Inkerman, siege of Sebastopol, and sortie on October 26—wounded in the head in the trenches, October 17 (medal with three clasps and Turkish medal). Served in 1858 at the siege and capture of Awah and Kotah, battle of Kota Ka Serai, general action resulting in the capture of Gwalior, and recapture of the fortress of Chandaree, in May (medal with clasp). He entered the Army April 22, 1853, and became Brevet Lieutenant-Colonel August 22, 1875.

Lieutenant Warren Hastings, 2nd West India Regiment, has been appointed Fort-Adjutant at Sierra Leone, vice Lieutenant S. Fletcher, 1st West India Regiment, vacated on the withdrawal of his regiment to the West Indies.

Colonel R. M. Laffan, Royal Engineers, is to be granted local rank as Brigadier-General whilst employed as Governor of Bermuda.

As far as we can learn, a good deal of difficulty is experienced in France in procuring officers for the Territorial Army, which consists of men between twenty-nine and forty years of age. The War Minister has modified the examination in order to "facilitate recruitment," but still the cry is—"they won't come." A French military critic, alluding to this subject, says that "the nation was by no means for the considerable military changes which have recently been operated. The well-to-do classes have always been accustomed to enjoy the right of exoneration by paying men to replace them, and they have consequently remained in ignorance of the details of military life. In order to procure a grade it is necessary to undergo an examination on subjects which are not to be picked up in books." The authorities have endeavoured to smooth over these difficulties by organizing practical lessons and special drills for candidates for the rank of officer in the Territorial Army; but this system, tried in the large towns, has not met with any success. One reason given for this breakdown is plausible enough. The candidates are not allowed to wear uniform, and there appears to be a great objection to marching about in mufti. Until a short time ago candidates had to appear before a court composed of three Generals, one of Cavalry, one of Infantry, and one of Artillery, to whom were added an officer of the Administration. The courts are now to be composed of one field and two other officers belonging to that branch of the Service to which the candidate desires to belong. These military juries, as they are called, are to sit permanently in all garrison towns. The sittings are not to be public, as before, and the candidates designed alone are to be admitted. The War Minister, in a Circular, says:—"The candidates should be questioned with kindness, and their good-will, zeal, various aptitudes, and intelligence should be taken into account." All the terrors of a formal examination have been removed, and candidates will only be subjected to a friendly conversation with the officers charged to inquire into their capabilities. We may add that when the present system of compulsory service has been in force some years longer there will be no difficulty in finding officers well up to all their duties for the Territorial Army. In the year 1892 all the men in the Territorial Army will be old soldiers, compulsory service having commenced in 1872, and the period of service being twenty years.

A correspondent has written to us pointing out a slight error in the statement of service of Lieutenant-General Henry Smyth, C.B., the new Colonel of the 2nd Queen's, which appeared last week in our columns. General Smyth, it appears, has four, not *three*, clasps for the Crimea, and was *one of* three regimental Lieutenant-Colonels upon whom the Legion of Honour was conferred, the other two being Colonels W. M. Wood, of the Coldstream Guards (now Lieutenant-General Wood), and J. T. Mauleverer, C.B., 30th Regiment (since deceased). Our correspondent bears testimony to the excellent character the 68th ever bore during the time General Smyth had it under his command, and thinks "it right that the young soldiers of the regiment should know something of what a former Lieutenant-Colonel did and the honours he won whilst maintaining the reputation of the good old corps in face of his country's enemies."

Our Paris contemporary, *L'Avenir Militaire*, publishes a comparative statement of the Russian and Turkish Armies, now almost within striking distance. To commence with the Russians, it says that the Army of the South, which was formed last September, has been reduced to four army corps, two having been told off for the defence of the littoral. The Grand Duke Nicholas, who has perfectly recovered his health, has had plenty of time to organize his forces. Each of the army corps is composed of two divisions of Infantry and one of Cavalry, with Artillery, &c., to correspond; or, twenty-four battalions, eighteen squadrons, and fourteen batteries, two of which are Horse Artillery. The regulation effective of an army corps, which was easily attained on mobilization, and has since been kept up, amounts to 36,000 men; or, 28,000 Infantry, 2,500 horse, 108 guns, and 4,000 non-combatants. Independently of the four army corps, the Grand Duke Nicholas has under his orders four battalions of Chasseurs, two divisions of Cossacks of the Don, four regiments of scouts, composed of men from Kuban and Zerek, two batteries of Cossack Horse Artillery, twelve mountain batteries, three battalions of Sappers, and a siege train. The Grand Duke has, therefore, under his orders a force of 200,000 men, not including the two army corps detached to protect the coast. It appears that preliminary operations have been rather hampered by want of railway accommodation, and by only one line existing where two are absolutely necessary. Besides this, the obstinacy of the old Russian party has been found to have created difficulties. That party insisted that Russia should have a gauge of her own, and consequently the Russian carriages cannot run over the Roumanian rails. It will be necessary to lay down a third rail, so that the delay of changing carriages may be avoided. The reserves of the Army of the South, consisting of about 80,000 men, lie in Padolia and Bessarabia, and will be easily moved to the front when required. The Army of the littoral will have to protect the Crimea and a number of other places on the shores of the Black Sea, where Hobart Pasha and his fleet will have it much his own way. The entire Transcaucasian Army is composed of 68 battalions, 82 squadrons, 35 field batteries, 3 battalions of Sappers, and siege train. The effective is set down at 75,000 Infantry, 10,000 Cavalry, 280 guns, &c. The reserve is composed of two divisions of Infantry, stationed in the Kazan district, and on the move to the front, and in a short time the Army will be reinforced by Mahommedan Volunteers and Irregular Cavalry. Turkey is, therefore, menaced by 500,000 men, or by two-fifths of the military force of her redoubtable antagonist. At the same time, nine new army corps are in course of formation, and Infantry regiments have been ordered to constitute their reserve battalions, and this measure, when executed, will give Russia as a second line 164 battalions; regulation effective, 3,772 officers and 179,272 men. It is said that forty-six of these battalions will shortly be concentrated in Bessarabia. All the Infantry regiments have completed their depôt battalions, and numerous local detachments are being formed into regiments. As regards the Turkish Army not so much is known, but the *Avenir* considers that the Mussulman forces in Europe are not strong enough to cross the Danube and to attack the Russians. *Nous verrons.* On their own ground, however, it is supposed that the Turks will offer a most determined resistance, and French opinion is much divided as to which side will gain the first advantage. The Porte, it is remarked, possesses an immense advantage in holding the command of the Black Sea, but it is feared Russian numbers will prevail in the end. The Army of Anatolia, consisting of eighty-two battalions, eighteen squadrons, and twenty-three batteries, is concentrated in a quadrilateral, under the command of Achmet Moukhtar Pasha, and, at Batoum, Polish, Hungarian, and English Artillery officers are teaching the young Turks how to shoot with Krupp guns. According to the *Avenir*, the places along the Danube have been armed with extraordinary activity. Varna has been provided with eight detached forts, and the place possesses 200 siege guns, twenty-four being Krupps. There is an Egyptian contingent at Varna, and the garrison is under the orders of Blum Pasha, who is one of the instructors which Prussia sent to Turkey some twenty years ago, after the visit which Von Moltke paid to that country. The *Avenir*, which gives a few further particulars, is evidently of opinion that the Turks will make a most desperate resistance, first along the line of the Danube, and then at the Balkans, across which Diebitsch managed to scramble in 1829, to the great annoyance of Prince Metternich and the Duke of Wellington, who then interfered in behalf of the Porte. Russia then had command of the sea, for the Turkish Fleet had been destroyed at Navarino, and in getting to Adrianople she lost 150,000 men. Turkey has so often been on the verge of ruin, and Russia so often on the point of getting to Constantinople, either unaided or with the assistance, now of Prussia, now of Austria, that should she fail again it would be time for her to give up the object of her cupidity in despair.

There are 17 candidates for commissions in the Army Medical Service, 27 for the Indian, and 13 for the Naval Medical Service attending the Army Medical School at Netley this session, and one surg.-major of the Bengal Medical Service.

The two scholarships recently offered by the Oxford Military College have been awarded as follows:—1st, Mr. W. J. Underwood, of Newark Grammar School; 2nd, Mr. A G. Davidson, of the Oxford Military College.

In reply to Major-Gen. Shute, Mr. Hardy said on Tuesday that it was the intention of the Government to carry out the regulation limiting the command of a regiment to five years, and that it was also intended to carry out the regulation limiting Staff commands and Staff appointments for fixed periods, except in special circumstances.

A fire occurred in the North Camp, Aldershot, on Friday last about midnight, when the officers' stable in P Lines was totally destroyed, together with a Government horse in charge of Assist.-Comy. Allen, Army Service Corps, and three horses the property respectively of Lieuts. Michell, Wylie, and Miles, 60th Rifles.

A new branch line connecting the North Kent portion of the South-Eastern Railway with the Royal Dockyard, Woolwich, was opened on Saturday last. An engine, guard's van, and some trucks passed over, and the permanent way was found to be satisfactory. This line will greatly facilitate the embarkation or disembarkation of troops and stores, owing to the attendant advantages in comparison with the railway stations, there being extensive (ordnance) storehouses adjacent—also sufficient space of ground for parading troops, and thus neither the public business nor traffic will be interfered with. It is proposed to extend the line to the basins, which will thereby add to its utility, and, at the same time, tend to reduce the use of horse transport.

The fourth annual inter-regimental rifle match between the officers of the Brigade Depôts and the battalions of Infantry on the home establishment or stationed in Nova Scotia or the Mediterranean commenced on Monday, and will be continued till Sept. 15. The prize is a cup or piece of plate of the sum total of the entrance moneys (£5 per battalion), which becomes the absolute property of the officers' mess of the battalion or brigade to which the winning team belongs. The weapon used is the Martini-Henry; ranges 200, 500, and 800 yards. Ten shots at each; any position; targets and scoring as at Wimbledon last year. The match is being carried out under the superintendence of a committee, consisting of Col. Bray, 96th Regt.; Capt. Barton, 7th Fusiliers; Capt. Dening, 20th Regt.; and Capt. R. T. Thompson, D.A.A.G. (secretary). The match among the sergeants also commenced on Monday, the teams being composed of six men each, and three prizes awarded. The conditions in other respects are the same as the other match.

Col. F. F. Warden, Madras Infantry, is placed on the list of major-gens., and Major C. T. Hitchins, Bengal S.C., on the list of lieut.-cols. on the Indian Gradation List, in consequence of the death of Col. (Major-Gen.) P. W. Luard, Bengal S.C., on Dec. 21, 1876.

The Army.

1st (Royal) Dragoons have arrived in Aldershot from Norwich, Ipswich, and Colchester, and occupy the west Cavalry barracks, vacated by the 5th Lancers.

3rd Hussars. Private Chinnock was hung at Mhow early on Saturday morning. The execution took place in private within the fort, no one being present, except the officers on duty of his regiment, and the chaplain, the Rev. Mr. Davis. His remains were interred afterwards in the cemetery.

5th Lancers. The regiment has arrived at Norwich—head-quarters and six troops, and Ipswich two troops—from Aldershot.

Royal Artillery.

Gen. W. Wylde, C.B., senior col. commandant, died on Saturday evening at his residence in Onslow-square, South Kensington, in his 90th year. He was Equerry to H.R.H. the Prince Consort, and afterwards Groom of the Bedchamber to the Prince. The following is an epitome of his services taken from the "Foreign-office List":—He entered the Royal Artillery Sept. 8, 1803, and was promoted to be first lieut. Dec. 6, 1803, and capt. March 16, 1812. He served in Holland in 1813 and 1814, and commanded a battery before Antwerp and the attack on Bergen-op-Zoom. He was attached to the Horse Artillery with the Army of Occupation in France; was promoted to be brevet major July 22, 1830; succeeded the late Lord W. Russell as military commissioner at the head-quarters of Don Pedro's army in Portugal in April, 1834, and continued with them until the convention of Evora Monte; was employed at the head-quarters of the Queen of Spain's army from Sept. 20, 1834, till Dec. 28, 1838; was in all the general actions during that period, including the raising of the siege of Bilbao, for which he received the thanks of the Spanish Cortes. Was promoted to be brevet lieut.-col. Aug. 19, 1836, and lieut.-col. Nov. 20, 1839; was granted, March 24, 1838, her Majesty's Royal license and permission to accept and wear the Cross of the Royal and distinguished Order of Charles III., the cross of the 2nd Class of the National and Military Order of San Fernando, and the insignia of the Royal Order of Isabella the Catholic, which the Queen Regent of Spain was pleased to confer upon him in testimony of her Royal approbation of his service in the operations undertaken for raising the siege of Bilbao, and also in the action before Sebastian, Oct. 1, 1836; was made a C.B. Dec. 11, 1840; was promoted to be brevet-col. Nov. 9, 1846, and col. Jan. 8, 1849; was employed to keep the English Government informed of the military events which took place during the civil war in Portugal from Oct. 30, 1846, till Aug., 1847, and signed the Convention of Oporto; became a major-gen. June 20, 1854; was appointed col.-commandant Royal Artillery, Feb., 1863; was promoted to be a lieut.-gen. Feb. 22, 1863; and a gen. Sept. 24, 1866. The following appeared in the *Court Circular* on Wednesday:—"Gen. W. Wylde, C.B., Royal Artillery, whose death has been announced to the Queen, was attached to the household of the Prince Consort soon after his Royal Highness's arrival in England, and continued in it up to the Prince's death. He was greatly respected and esteemed both by her Majesty and by his Royal Highness." The remains of the deceased were deposited in their last resting-place in Brompton Cemetery on Thursday. The funeral procession consisted of a hearse and four mourning coaches, the first coach being occupied by the chief mourners, Mr. W. H. Wylde (Foreign Office), Mr. R. G. Wylde, and Mr. C. Wylde, sons of the late general, and Col. du Plat, Equerry to the Queen, who represented her Majesty. One of her Majesty's carriages and a number belonging to private friends followed.

Lieut.-Gen. Sir Burke Cuppage, K.C.B., died at his residence in Cranley-place, Onslow-square, on Thursday, after an illness of several weeks. The deceased general, who was son of Lieut.-Gen. W. Cuppage, R.A., was in his eighty-first year. He was educated at the Military Academy, and entered the Royal Artillery as second-lieut. in Dec., 1812. He served in the Peninsula under the Duke of Wellington from Feb. to August, 1814, and was present at the repulse of the sortie from Bayonne, and served also in the campaign of 1815, including the battle of Waterloo. He was adjt. and brigade-major of the Royal Horse Artillery from 1831 to 1849, and afterwards served at Gibraltar and in Ireland until 1857, when he was placed in command of the Royal Artillery in the South-Eastern District till 1863, when he was appointed Governor of Jersey, which post he vacated in 1868. He was appointed colonel-commandant Feb. 2, 1868. He obtained his commission as first-lieut., June 20, 1815; capt., July 20, 1834; brevet major, Nov. 9, 1846; lieut.-col., Jan. 8, 1849; col., Jan. 6, 1855; major-gen., March 1, 1864; and lieut.-gen., Feb. 2, 1868. The late Sir Burke Cuppage was of the same family as the celebrated Right Hon. Edmund Burke.

Major-Gen. J. Pottinger, C.B., col. on the Retired Full-Pay List (late Bombay), died on the 12th inst., at Mount Pottinger, Carrick-on-Shannon. Gen. Pottinger entered the East India Company's service in June, 1831, as second lieut. in the Bombay Artillery, and served throughout the Persian campaign of 1856-57 as brigade-major of Artillery, including the storm and capture of Reshire, surrender of Bushire, the night attack and battle of Kooshab, for which services he received the medal and clasp. He commanded the Ahmednugger field force during the Indian mutiny, from Oct., 1857, to Feb., 1858. For his last-mentioned services he was made a C.B. His commissions bore date as follows, viz.:—Lieut., Feb. 20, 1841; capt., Feb. 4, 1850; major, April 26, 1859; lieut.-col., May 13, 1859; col., June 27, 1862; and major-gen., Sept. 1, 1869, on retiring upon full pay.

Col. G. Colclough, 5th Brig., has been appointed to the command of the Royal Artillery in the Dublin District, vice Major-Gen. C. B. Fuller (late Bombay). Col. Colclough has been for some time past in command of the Field Artillery at Woolwich.

Capt. H. M. Moorsom vacated his appointment as D.A.Q.M.G. on the Staff of Ireland on the 13th inst., on the completion of his five years' appointment.

Lieut.-Col. J. F. Raper, 11th Brig. (late Bengal), has been granted leave from India to England, on medical certificate.

Vet.-Surg. W. B. Spooner, 2nd Brig., has been appointed to do duty at Kirkee.

Lieut. F. Beaufort, 1st Brig., has had a serious fall from his horse at Kirkee. The horse slipped while cantering over some rocky ground, and losing his feet came over his head, pitching his rider heavily against a curb stone. Two ribs were broken and wrist dislocated, but the officer, from latest accounts, was doing well.

We are glad to learn from Mean Meer that Capt. T. Walker, who lately meet with a serious accident at that station by a fall from his horse, is making satisfactory progress.

Lieut. J. A. L. Coker, 9th Brig., has left for Hong Kong to join the 9th Brig. at that station.

Royal Engineers.

Major A. U. Brandreth (late Bengal) has been selected to succeed Major A. M. Lang (late Bengal) as Principal of the Thomason College, Roorkee, when the latter officer proceeds on furlough.

Capt. R. J. H. Parker has been appointed adjt. of the London Engineer Volunteers.

3rd Buffs. Miles writes:—"Having read in a newspaper published last week in London (enjoying a large circulation) an article reflecting on the character of the 2nd Batn. of the Buffs, now serving at Natal, I am induced to trouble you with a few lines on the subject, which I hope you will kindly publish in your valuable journal. The paragraph I allude to is as follows:—'I hear from Natal the regiment of Buffs consists almost entirely of raw recruits, who know little of drill and discipline. Bad that, with a war against the Zulus almost a certainty. Cetways expects to be annexed, and means to fight first.' That the Buffs should consist of recruits is surely not their fault, and the same may be said of almost every regiment in the Service, owing to the system of short service introduced by the late Secretary of State for War; but I do not hesitate to give the most unqualified contradiction to the accusation brought against them of want of drill and discipline. It will be in the recollection of your readers that on Nov. 8 last the hired transport St. Lawrence, conveying the 2nd Batn. of the Buffs to the Cape, was totally wrecked on the Paternoster Rocks. On their arrival at Cape Town they were inspected by Lieut.-Gen. Sir A. Cunynghame, K.C.B., who passed a very high eulogium on the steadiness and discipline displayed by them under such trying circumstances, to which it was mainly due that not a single life was lost, and that a large proportion of the regimental baggage was saved. Sir Arthur made such a report of the circumstances to the Field-Marshal Commanding-in-Chief as to elicit from his Royal Highness a most complimentary letter, dated Horse Guards, Dec. 18, 1876 (which was ordered to be read at the head of both battalions) 'conveying the expression of his Royal Highness's approval of their exemplary conduct on the occasion in question, affording as it does a further instance of discipline, steadiness, and obedience to orders under what are, perhaps, the most trying circumstances in which it is possible for soldiers to be placed.' This, I think, will afford a sufficient refutation of the charge so unjustly brought against the regiment of want of drill and discipline, and as I know that your journal is always ready to uphold the character of the soldier when unjustly assailed, I cannot do better than leave the vindication of the old Buffs in your hands."

5th Fusiliers. Paymr. (Major) Forster, 1st Batn., has left for India to rejoin from leave.

6th Regiment. The depôt companies have moved from Dover to Warwick and joined the 28th Brigade Depôt.

7th Fusiliers. Capt. Savage, 2nd Batn., has leave, on private affairs, in India from April 1 to Sept. 30, and Lieut. Daunt from April 15 to July 15. Lieut. Whistler, 2nd Batn., a probationer, wing officer 5th Hyderabad Infantry, is to be admitted to the Bengal S.C., with effect from Feb. 11, 1876.

10th Regiment. Capt. Glen, 2nd Batn., sailed for Singapore on Thursday, to take up his new appointment as brigade-major on the Staff of the Straits Settlements.

11th Regiment. The 2nd Batn. arrived at Poona on the 22nd ult. from England, and was played into cantonment by the bands of the 2nd Queen's and 5th Bombay N.I.

16th Regiment. Surg.-Major Collier has been transferred to the Staff from medical charge of the 1st Batn., and has left England for Malta for duty in that garrison.

17th Regiment. Lieut. Buller, 1st Batn., sailed for India on Tuesday to rejoin head-quarters.

21st Fusiliers. Capt. Salmond has recently made the following score in shooting regularly with his company through the annual course of musketry, the officer being the first man to fire at each range, which is a disadvantage:—Third class, 63 points; second class, 63 points; first class, 70 points; total, 196 points. His score at 800 yards was an outer the first shot, and then nine consecutive bull's-eyes.

23rd Fusiliers. Orders have been received in Ireland from the Horse Guards for the depôts of the 1st and 2nd Batns. to be held in readiness to proceed to Wrexham to form the 23rd Brigade Depôt, which is on the point of being formed.

33rd Regiment. Lieut. Thatcher is a candidate for the Indian S.C., and has been appointed to the 30th Bombay N.I. on probation.

Royal Marines.

On Friday last week the officers of the Plymouth Division of Royal Marines gave a dinner to the newly-appointed Commander-in-Chief of the Western District, Major-Gen. the Hon. L. Smyth, C.B. All the officers of the corps were present to welcome the guest of the evening, and besides him Major-Gen. Sir Henry Freeling, Bart., Col. Hamilton, C.B. (depty. adjt.-gen.), Col. Hunter, 36th Regt., Col. Law, Depty. Comy.-Gen. Palmer, and other heads of departments were present.

Capt. Collins is under orders for embarkation in the Defence, and Lieut. Eagles in the Black Prince.

50th Queen's Own. Surg.-Major N. Ffolliott has sailed for India, for duty on the Staff in Bengal.

55th Regiment. Major Morgan has been appointed major of the brigade depôt at Carlisle.

60th Rifles. Several steps may be expected in the regiment before long. Major Milligan sent in his papers lately, but withdrew them in order to see whether the expected promotion Warrant would obtain him a better price for his commission. It is believed that Major Dundas will retire as soon as he becomes a regimental lieut.-colonel, or perhaps even sooner. Capt. Pauli contemplates retiring, it is said, as soon as he becomes regimental major.

65th Regiment. Lieut. Dennys, a probationer, officiating wing officer, 28th Bengal N.I., is about to be admitted to the Bengal S.C., with effect from Jan. 4, 1876.

66th Regiment. Capt. W. Saunders died in London on the 13th inst., whilst on leave from India, aged thirty-six years. He entered the Army March 26, 1858; became lieut., March 9, 1860; and capt., Nov. 18, 1868.

68th Light Infantry. Major Tucker has been granted leave from India to England for fifteen months, on urgent private affairs.

77th Regiment. Capt. White has been appointed Staff Officer of Pensioners at Newry.

82nd Regiment, from Buttevant, has replaced the 90th at Limerick.

88th Connaught Rangers. Mr. C. Browne asked the Secretary of State for War on Tuesday whether it was true that the officers of the 88th Regt., now quartered in the West of Ireland and under orders to embark for the Cape of Good Hope on May 11 next, had been peremptorily refused by their colonel a week's leave of absence to visit their friends and to provide themselves with an outfit before proceeding abroad; and, if true, if he would explain to the House the reason of such refusal. Mr. Hardy said that he had ascertained that leave was granted to officers from April 15 to 30, but it was refused to two officers who had only returned from leave on March 14. Those two officers had been away on a long leave during the winter, and as they then knew perfectly well that the regiment was ordered abroad they might have made the necessary preparations. He might say that the answer to this application was approved by the general officer commanding in Ireland. Major Hall, having completed two years' duty at the depôt, has been ordered from Galway to Castlebar, pending the embarkation of the service companies for the Cape. Lieut. Jeffreys is a candidate for entrance to the Staff College.

89th Princess Victoria's. Capt. Richmond is to join the depôt.

90th Light Infantry. The regiment has been moved in H.M.S. Assistance from Kingstown (*en route* from Limerick) to Gosport, where it will remain until moved to Aldershot for the drill season.

93rd Highlanders. Lieut. Campbell has applied for permission to retire.

Rifle Brigade. Capt. Maberly has sailed for India to join the 4th Batn., on promotion from the 1st Batn.

Commissariat Department. Depty. Comy.-Gen. A. Crowder Crookshank, C.B., died on Sunday last at Dublin, to which he recently returned from London after a very short indisposition. He was an officer of great ability, zeal, and experience. Served throughout the Eastern campaign of 1854-55 in Commissariat charge of the Cavalry Division from the landing in the Crimea; was present at the affairs of Bulganac and M'Kenzie's Farm, battles of Alma, Balaklava, Inkerman, and Tchernaya, and siege of Sebastopol (medal with four clasps, 5th Class of the Medjidie, and Turkish medal). He also served on the China Expedition of 1857-58 in Commissariat charge of the expeditionary field force, and was present at the capture of Canton (medal with clasp). Mr. Crookshank entered the Commissariat as treasury clerk Jan., 1844; became depty.-assist. comy.-gen., Dec., 1846; assist. comy.-gen., Jan., 1856; entered the Control Department Jan., 1870; became depty. comy.-gen., Dec., 1872; and was made a C.B. in Jan., 1873. He served in Canada, the West Indies, England, Ireland, Scotland, Ionian Islands, Malta, and Gibraltar from 1844 to 1867; in Ceylon from 1867 to 1870; in London from 1870 to 1872; and has been doing duty in Ireland since Dec., 1872. He was nearly related to the Chief Baron, Sir Fitzroy Kelly, and had a large circle of friends in and out of the Service. The department to which he belonged will lose a very strenuous champion and advocate, and the Service generally an officer of much distinction. He had at the outset of his career in the Crimea many of what are called "rows" with intemperate officers, but in the end he carried the day. The funeral took place on Thursday with military honours.

THE AUXILIARY FORCES.

MILITIA.

1st Stafford. Col. Harrison succeeds Col. Chambers as lieut.-col. commandant, Major Talbot obtaining command of the 2nd Batn.

Royal Dublin City. The detachment assembled at the Curragh for preliminary drill consists of 2 subalterns, the adjt., surg., 19 sergts., 8 drummers, and 233 rank and file.

Royal South Down. The following are assembled for two months' preliminary drill at head-quarters, Downpatrick, viz.:—Two lieuts., the adjt., assist.-surg., 23 sergts., 7 corpls., 8 buglers, and 127 privates.

The following officers joined the Dublin School of Instruction on Thursday, viz.:—Lieuts. Beamish, South Cork; Dobbin, Limerick County; Fitzgibbon, Roscommon; and Moore, 2nd Tower Hamlets; Sub-Lieuts. Wilson, Armagh; Whitty, Dublin Artillery; Thacker, Kilkenny; Quin-Harken, Leitrim; Darcy, Louth; Woodwright and Woodwright, Monaghan; and Stanwill, Westmeath.

The following extracts from the Annual Reports for 1876 of Lieut.-Col. T. B. Strange, R.A., Inspector of Artillery in Canada, and Lieut.-Col. G. J. Maunsell, Depty. Adjt.-Gen., commanding Militia, New Brunswick (late capt. H.M. 15th Regt.), may prove of interest, the Canadian active Militia being by no means an unimportant part of the Auxiliary Forces of the Empire:—New Brunswick Brigade of Garrison Artillery.—Col. Strange states that—"The gun drill and practice of the brigade was very good; and I am of opinion that, with the exception of the men of the two gunnery schools, who practically are regular soldiers, the New Brunswick Garrison Artillery is unsurpassed among those I have seen in the Dominion. I have less hesitation in paying this tribute to their efficiency, because I can claim no part of the credit of their instruction, which must be given to my late assistant, Lieut.-Col. D. Jago, late Royal Artillery, and to Lieut.-Col. Foster, who has for many years commanded them and laboured for their efficiency, no doubt assisted by the commanding officers of batteries, and by his adjt., Major Underhill, who has a first class certificate from the Kingston Gunnery School. Major Cunard's (No. 3 Bat.) was not drawn for drill this year, but they performed their duties without pay, which marks the *esprit* that exists in the New Brunswick Artillery." Col. Maunsell reports that—"On May 19 last the resignation of Lieut.-Col. D. R. Jago, Assist.-Inspr. of Artillery, was accepted, and he was permitted to retain rank upon retirement. As regards the resignation of this officer, I, personally, am unable adequately to express my sense of regret. The Artillery force of the province, for whose improvement he had worked most assiduously, in conjunction with its officers, for many years past with marvellous success, has lost the services of a true friend, and the community generally, I may add, much regret the departure from our midst of an excellent citizen. We rejoice to know, however, that Col. Jago has the strongest ties to this country as a Canadian, and I have his assurance that should his presence be required in New Brunswick in the hour of danger, or to assist in the training of the force thereof, no time will be lost on his part in placing his services at the disposal of the major-general commanding." Col. Maunsell adds:—"Before concluding my report, with respect to the Artillery of New Brunswick, a force highly commended by inspecting officers, I think it due to Sergt.-Major Hughes, late R.A., to bear testimony to his indefatigable efforts in imparting instruction to the different corps, efforts that have produced excellent results."

VOLUNTEERS.

1st London Engineers. Capt. R. J. H. Parker, Royal Engineers, has been appointed adjt.

3rd. Adm. Batn. Aberdeenshire Rifles. Capt. and Adjt. Blair has resigned his commission, and has accepted a majority in the battalion, which he has been doing duty with since May, 1867.

40th Middlesex Rifles. The officers entertained Major Were at dinner in their mess-room at the Gaiety Restaurant, on Tuesday evening, on his retirement after fifteen years' most honourable service. Advantage was taken of the opportunity for presenting the major with a massive silver salver, subscribed for both by the present and late officers, as a mark of the high esteem in which he has always been held.

A paper by Mr. C. H. Hoste, of the Civil Service Volunteers, on the "Further Development of the Volunteer Force," was read at the Royal United Service Institution on the 16th inst. Col. Fletcher, C.M.G., Scots Guards, occupied the chair. The lecturer said it would be out of the question for him to detail in the limits of a paper all that might be done to promote the development of the force or to sketch out a complete scheme of reorganization. He, therefore, intended only to suggest a method by which, at no extra cost, the value of the Volunteer Force might be decidedly increased, and to confine his remarks to the Infantry, that arm being the easiest to handle, and, so to speak, the central figure about which the others were grouped. Having glanced at the mode in which the War Office authorities contemplated employing the Volunteer Infantry, should their services be needed, Mr. Hoste gave an outline of his proposals. He considered that the Volunteers would not be qualified to take part in field manœuvres until the battalions had been reconstructed, a system of brigades organized, and until adequate camp equipment was provided. There were now in existence 205 battalions of Volunteer Infantry of an average enrolled strength of 690, and, adding the trained men who had passed through the ranks, we should be able to reckon on a fighting field force of 225,000 riflemen, supposing the standard attained of physical and technical efficiency was equally high in each individual. But, unfortunately, this supposition could not be entertained for a moment. In one corps we found, perhaps, a company or an entire battalion rivalling the Guards in physique and steadiness, in another about as ill-conditioned a lot of men as were seen in Gambetta's levy; in one perfect discipline, in another scarcely the semblance of military virtue. This state of things demanded a remedy, and the one which commended itself to him was that of sorting like with like and devoting each class to the range of duties for which it was best fitted. First was required a marching, and, if necessary, hand-to-hand fighting force, to stand the wear and tear of field duty, for which he thought four-fifths of the present minimum strength would be available; secondly, the garrison, or sedentary battalion, to be employed in defending fortresses, to which might be relegated the one-fifth "cast" at the inspection parade when the field army was called out, the efficients who did not appear at the parade, and the cream of the unenrolled reserve; thirdly, a reserve or depot battalion, to comprise inefficient Volunteers, those numerous individuals who would clamour for admission to the ranks as soon as invasion became imminent, and the other three-fourths of the "net unenrolled reserve." With the battalions thus reconstructed we should have—in the first line 206 battalions, averaging 680 of all ranks, ready to step up into the places, or otherwise to supplement the efforts of the Regular or Militia regiments in the mobilized army corps; next an organized force, consisting of an equal number of battalions, averaging 300 of all ranks, especially well suited for the discharge of the duties required of sedentary troops; and, lastly, as many depot or reserve battalions, averaging 350 of all ranks, and daily swelled by ardent if untrained recruits, ready to fill up gaps or to strengthen weak points in a line of battle. The other main question that presented itself was that of brigade organization. What was now especially needed in the Volunteer Infantry was frequent exercise in brigade movements in the field; for example, that three or four battalions should be grouped under one command, and manœuvred as representing the advanced guard of an army corps, or told off to defend or attack a half-mile breadth of difficult country; that they should go under canvas together, and learn by constant use the relative duties of the component parts of a brigade in camp; and that they should practise time marches by cross-roads, and encumbered with all their baggage. Taking the strength of the average field army battalion of the first line as 680 of all ranks, a brigade of three battalions would have a total of about 2,050; and it was undeniable that 70 such units would be of far more value for tactical purposes than 206 isolated battalions. That either of these schemes could with advantage be adopted in its entirety and at once he did not believe, but little by little they might both be engrafted on the existing system. A discussion followed.

Mr. J. W. Malcolm, capt. of the "Scottish Eight," has nominated the following gentlemen to represent Scotland in the ensuing international rifle match at Wimbledon, viz.:—

Messrs. Boyd, Clews, Dunlop, Ferguson, M'Vittie, Mitchell, E. Ross, and Whitelaw.

The annual march-out and brigade drill of the City Volunteers takes place to-day. The corps will muster at Finsbury-circus at 4 o'clock, from whence they proceed by way of Morgate-street, Queen Victoria-street, Thames Embankment, Pall-Mall, St. James's-street, and Piccadilly to Hyde Park. The 2nd and 3rd London Rifles will fall in on the Embankment.

THE INDIAN ARMY.

15th Bengal Cavalry. Lieut. F. R. Ditmas, squadron officer, has been granted leave to England for nine months.

1st Bengal N.I. Col. F. J. Craigie, commandant, has met with a serious accident at Benares, by being thrown out of a phaeton, and was lying in a very precarious state.

36th Bengal N.I. Capt. J. Hotham, qrmr., has been granted a six months' extension of furlough in England.

43rd Bengal N.I. Capt. A. I. Iles, wing officer, has been granted furlough to England for one year.

1st Punjab Infantry. The regiment left Dehra Ghazee Khan for Khelat on March 10, to form part of Major Sandeman's escort.

3rd Goorkhas. Capt. E. D. Smith, wing officer, has been granted furlough to England for one year on medical certificate.

2nd Hyderabad Infantry. Capt. H. F. H. Sewell, second in command, has qualified for promotion to substantive major.

3rd Sind Horse. Capt. W. Reynolds, second in command, has arrived home from India, having been granted furlough for eighteen months on medical certificate. Lieut. E. V. P. Monteith, squadron subaltern, has also been granted eighteen months' furlough to Europe on medical certificate.

16th Bombay N.I. Lieut.-Col. A. P. Chesshyre, second in command 4th Rifles, officiates as commandant in the absence of Col. Cahusac, on leave in England.

17th Bombay N.I. Lieut.-Col. A. G. Plemer, second in command, officiates as commandant during the absence of Col. Pogson on leave in England.

26th Bombay N.I. Col. A. Becher, commandant, has arrived home from India on furlough. Lieut.-Col. J. Harpur, Bombay S.C., officiates as second in command, vice Col. Miles, officiating as commandant.

30th Bombay N.I. Lieut. J. F. C. Thatcher, 33rd Foot, a candidate for the Staff Corps, has been appointed to officiate as wing officer on probation.

4th Madras Light Cavalry. Lieut. A. B. Fenton has been confirmed in his appointment as squadron officer, vice Brevet Major Galloway, appointed commandant of his Excellency the Governor's Body Guard.

6th Madras N.I. Lieut.-Col. R. C. Lavie, wing commander, has been granted furlough to England for two years on private affairs.

7th Madras N.I. Lieut.-Col. D. Standen, second in command, has been appointed an assist. adjt.-gen. on the Staff of the Madras Army from the 14th inst.

8th Madras N.I. Capt. R. N. Hesketh, wing subaltern, has qualified for promotion as substantive major.

14th Madras N.I. We have to record the death from dysentery of Col. A. W. Drayner, commandant, which melancholy event took place at Vellore on March 16. The following are the dates of his commissions:—Ensign, Feb. 17, 1841; lieut., Aug. 21, 1843; capt., Feb. 17, 1856; major, Feb. 18, 1861; lieut.-col., Feb. 12, 1867; and col., Feb. 17, 1872.

34th Madras N.I. Capt. Q. S. A. Jamieson, qrmr., has qualified for promotion as substantive major.

INDIA.

The *Englishman* considers that the result of the retirement scheme for field officers of the Local Army and Staff Corps has not been satisfactory. Our contemporary says:—"*Of* the two hundred and seventy officers who have retired from the Army, ninety accepted the capitalised value, and one hundred and sixty-eight the annuities representing their prospective colonel's allowance. The largest lump sum accepted by a single officer was by Col. T. Clerk, Madras Army, whose capitalised value amounted to £6,890." The *Englishman* contends that the object for which the scheme was originally sanctioned has not been attained; and secondly, that the Government has spent over half a crore of rupees unnecessarily. Nearly double the number of employed compared to unemployed officers have left the armies of the three Presidencies. "The original intention was to rid the Service of the useless or unemployed officers; but the table shows the effect to have been the reverse, as many of the most distinguished and useful officers have retired, while the large majority of the unemployed are still left to burden the revenues of the country. In other words, a large number of general doing duty officers continue on the rolls of the Indian Army."

The Lieutenant-Governor of Bengal has appointed a committee to make rules and regulations for purchasing certain stores in India. Major-Gen. J. E. T. Nicholls, R.E., president, and Mr. A. Mackenzie secretary.

The *Times of India* says the report that colonels' commutation allowance would not be given again is premature.

Major-Gen. Sir Henry Norman left Calcutta on the 18th ult. in the s.s. Japan for England. Nawab Ali Khan Bahadoor entertained Sir Henry at dinner on the previous evening. A large company was invited.

Major-Gen. A. Macdonnell, C.B., left Rawul Pindee on the 16th ult., and after his inspections of Jhelum and Sealkote was to have gone on to Bombay to catch the homeward mail of the 9th inst. Major-Gen. F. F. Maude, C.B., V.C., had proceeded to Rawul Pindee to take up his command.

Major-Gen. Sir E. B. Johnson, K.C.B., Royal (late Bengal) Artillery, took his seat on March 19, under the usual salute, as ordinary member of the Governor-General's Council.

Lieut.-Col. D. Standen, Madras S.C., has been appointed an assist. adjt.-gen. on the Staff of the Madras Army from the 14th inst., vice Lieut.-Col. G. A. Arbuthnot, Madras Cavalry, whose period of Staff service has expired. Col. Standen served with the Kamptee movable column, and was present at Sonaar river, the Imleea, Neem Khera, Bhutgaon, and Sleemanabad in 1857-58 (medal). He joined the Army Feb. 25, 1848, and became lieut.-col. Feb. 25, 1874.

The following brevet promotions are about to be made in the local Army:—Major B. R. Branfill, Bengal Cavalry, to be lieut.-col. from Dec. 19, 1876, vice Gen. R. Hawkes, Bengal Cavalry, deceased; Capt. D. C. S. L. Carnegé, Bengal Cavalry, to be major from Dec. 3, 1876, vice Gen. W. Prescott, Madras Infantry, deceased; Capt. R. Morris, Bengal Cavalry, to be major from Dec. 16, 1876, vice Major-Gen. D. Hodson, C.B., Madras S.C., deceased; Capt. A. R. Kenney-Herbert, Madras Gen. List. Cavalry, to be major from Dec. 22, 1876, vice Col. (Major-Gen.) P. W. Luard, deceased.

Major-Gen. H. W. Mathews, Bengal Infantry, is placed on the list of lieut.-gens., and Col. A. R. Thornhill, Madras S.C., on the list of major-gens. on the Indian Gradation List, in consequence of the death of Gen. W. Prescott, Madras Infantry, on Dec. 2, 1876.

Col. J. C. Brooke, Bengal S.C., is placed on the list of major-gens. on the Indian Gradation List, in consequence of the death of Major-Gen. D. Hodson, C.B., Madras S.C., on Dec. 15, 1876.

Major-Gen. C. T. Chamberlain, C.S.I., Bengal S.C., is placed on the list of lieut.-gens.; Col. R. Woolley, Madras S.C., on the list of major-gens.; and Capt. C. A. Baylay, Bengal S.C., on the list of majors on the Indian Gradation List, in consequence of the death of Gen. R. Hawkes, Bengal Cavalry, on Dec. 18, 1876.

Depty. Surg.-Gen. C. M. Smith, Bengal M.S., is about to retire from the Service on a pension of £550 per annum, with the additional pension of £250, from March 31, 1877.

Surg.-Major W. T. Martin, Army Medical Department, has, at his own request, vacated his appointment as Medical Officer to his Grace the Duke of Buckingham and Chandos, Governor of Madras.

Major C. H. Harrison, Bombay S.C., Political Agent at Khelat, is about to retire from the Service.

Major J. S. Irvine, Bengal Cavalry, brigade-major at Mooltan, has arrived home on furlough.

Mr. Benett-Stanford asked the Under Secretary of State for India on Thursday if he would lay upon the table a return showing the number of Mohammedan soldiers of the Native Army, Infantry, Cavalry, and Artillery (regular or irregular), now serving under her Majesty in India; and whether in such return he would separate the Sunnites, or those who looked to the Sultan of Constantinople as the head of their religion, from the Shiites, who did not acknowledge him as such. Lord G. Hamilton said he had no objection to state that a very considerable proportion of the Native Army in India was composed of Mohammedans, and that they were almost exclusively Sunnites, but it was not necessary to lay on the table the returns asked for. It had always been the desire of the Indian Government to soften the religious animosities which existed in India.

PARLIAMENT.

Marine Mutiny Bill.

On Monday, the House having gone into committee on the Marine Mutiny Bill, Capt. Pim proposed a clause with the object of allowing persons on trial by court-martial to have the assistance of counsel.

Mr. Ward Hunt promised to consider before next year with the Secretary for War whether such a proposition, or something like it, could be introduced, and thereupon the amendment was withdrawn.

Mr. Monk proposed in clause 28 an amendment abolishing corporal punishment in the Navy.

Mr. Ward Hunt opposed, and, on a division, the amendment was negatived by 103 to 80; majority, 33.

Mr. O'Connor Power moved to reduce the maximum number of lashes from 50 to 25. A discussion followed, ending in a division, by which the amendment was negatived by a majority of 22; 64 voted in its favour, 86 against it.

Mr. Parnell moved the reduction of the limit of consecutive solitary confinement under clause 29 from fourteen days to seven days, and pressed his amendment to a division, which resulted in its rejection by 81 votes to 51. An amendment by Mr. Parnell to reduce the number of lashes from 50 to 25 was rejected by 86 to 53.

Mr. Parnell next moved that the interval between the terms of solitary confinement should be increased from seven to fourteen days. This was negatived by 96 to 147.

A proposal by Mr. Sullivan that the cat used for corporal punishment should be uniform, and stamped by the Admiralty, elicited a promise from Mr. Ward Hunt that uniformity should be provided for by Admiralty regulations. Mr. Sullivan substituted the word "approved" for "stamped," and the amendment so amended was agreed to.

In clause 37, which permits eighty-four days of solitary confinement in a year's imprisonment, Mr. Parnell moved to substitute 49 for 84 days, but was defeated by 159 to 53. The remaining clauses were agreed to, and the Bill was ordered to be reported.

Last night Sir O'Loghlen gave notice that he would on Friday next move for a Select Committee to consider the Mutiny Act and the Articles of War, with a view to the improvement of the Military Criminal Law.

The Suez Canal and Russian Ships of War.

Mr. Gourley asked the Under Secretary of State for Foreign Affairs if he could inform the House what, in the event of war between Russia and Turkey, would be the position of neutral ships of the mercantile marine in the navigation of the Dardanelles, the Bosphorus, Danube, and Suez Canal, and what measures her Majesty's Government intend adopting for the protection of British shipping navigating those waters; and, if Turkish or Egyptian ships of war or troops will have the right of impeding the navigation of the Suez Canal against Russian ships or those of other nationalities.

Mr. Bourke said he could not tell what might happen, but certainly the passage of neutral vessels would not be impeded.

Nominations of Officers from the Militia to the Line.

Col. Naghten asked the Secretary of State for War whether he was aware that there were several officers now gazetted to and serving in the Militia who joined that Service on the faith of promises made them by their commanding officers that they should receive nominations from the Militia to the Line in 1879 or 1880; and, whether having regard to such promises, he will grant these officers nominations from the Militia to the Line as heretofore.

Mr. Hardy said the promises made by commanding officers would not be binding, as they had no power to make such promises, inasmuch as two trainings qualified. He had left two years for those already in the Service, and he was afraid he could not undertake to exceed that time.

"LOAVES AND FISHES."

There is a levying of "black-mail" by moral torture which its perpetrators may excuse by the plea, miserable as it is, that they are obtaining some advantage for themselves, and that they succeed in their purpose. Unfortunately for the Press, there have been instances in this country in which, for a brief space, certain discreditable journals trafficked in that way, and extorted money from those who were weak enough to yield to menace. But it was in America that the practice of demanding "hush-money" succeeded most largely, and one New York paper, now esteemed respectable, laid the foundations of its fortune deep in such filth and mire. It is not wonderful if there should be found among Americanised writers in England imitators of the *exploiteurs* of these disgraceful sources of income, for "poverty obliges" as well as nobility, and when to the hard mother of invention there are added native malignity and the desire of notoriety at any price, "the outcome," as the phrase goes, may be bought for sixpence every week by those who like it. There are many people who lay out their sixpences, however, without liking what they buy. They exclaim, "How shameful! how scandalous! how shocking!" But they buy, all the same. When, however, it comes to this, that mere stupid, offensive malignity and unjust and scandalous insinuations are indebted to these sixpences for their diffusion, we think that a little self-denial in the indulgence of a love of gossip and of enjoyment in the misfortunes of others may be recommended to what is called "Society." For it is to what is called and what calls itself "Society" that the organs which propagate these venomous and pestilential articles especially appeal. In one of these papers last week there appeared certain lines in rhyme which were intended to hurt and insult, as far as they could, the Duke of Cambridge. If his Royal Highness were not supposed—may we not say known?—to be, if not peculiarly, at least very much afraid of being what is termed "attacked in the Press," these and such articles as these would never be written; but on the supposition that a kindly, generous nature can be cut to the quick and tortured by the basest insinuations, which cannot be answered or resented, the panderers to a vile taste, who seek their "loaves and fishes" in the literary gutter, delight to gratify their malice by assaults which have not even the excuse, such as it is, which can be alleged by the *condottieri* who use the Press as an instrument to levy black-mail, that they may make money by it. The Duke of Cambridge is held up to ridicule and scorn as a sordid mercenary creature, who submits to every order of the War Office, and who carries out a policy he detests, and which he believes to be in the last degree hurtful to the Army over which, in the Queen's name, he presides, in order that he may draw so many pounds a-day! The names of "Horsford and Airey" are included in the imputation, the latter having ceased for some time to have any connection with the Horse Guards; and it is implied that these officers and gentlemen a the scapegoats of the Duke of Cambridge, on whom Royal Highness habitually places the odium of acts of which he has not the courage to assume the responsibility. The article in rhyme to which we refer was not a *jeu d'esprit* certainly. By certain allusions it seemed to be associated with other attacks in other papers on the Field-Marshal Commanding-in-Chief, and we regret to say that there is reason to believe that some of these attacks can be traced to men who would be excessively indignant if they were told that they had been guilty of conduct subversive of discipline, and unbecoming officers and gentlemen, either for the sake of "loaves and fishes" in the shape of newspaper pay, or the gratification of personal spite. If the Duke of Cambridge, relying on his character and conduct, on his position in the regard of the Army, and on the confidence of his Sovereign and of the country, were to show he had the courage of his convictions, and if he were to dissipate the vulgar error that he is "afraid of being attacked" in the Press, we should have no more of these malignant and spiteful emanations; and if "Society," especially that part of it which is related to and represented by "officers and gentlemen," resolved never to allow one of the organs which are at once the offspring and propagators of corruption to soil their fingers, there would be an end of an infamo "literature."—*United Service Gazette.*

The Queen has been pleased, on the nomination of the Earl of Shrewsbury and Talbot, to appoint Lieut.-Col. Charles Cooch, unattached, late 62nd Regiment, one of her Majesty's Honourable Corps of Gentlemen-at-Arms, vice Major C. J. Lindam, resigned. Dated March 14, 1877.

From the Army Medical Department report, issued this week, we find that the average annual strength of the non-commissioned officers and men serving in the United Kingdom during the year 1875 was 88,147. The admissions into hospital in this number were 73,279, being at the rate of 831·3 per 1,000 of the strength, the average number of men in hospittal daily thoroughout the year was 3,568, being at the rate of 40·47 per 1,000 of strength; 783 deaths occurred among the men present with their corps, in addition to which 87 deaths occurred among men detached, the average number of whom is given as 4,655; the death-rate of non-commissioned officers and men in 1875, therefore, is 9·36 per 1,000 of strength. The admission rate is 9·4 lower, the constantly sick rate is 1·88 higher, and the death-rate is ·57 per 1,000 of the strength higher than the corresponding ratio of the preceding year.—*Lancet.*

With reference to the paragraph which appeared in our last issue with regard to the "Thayer Rifle," we are requested to state that the invention is that of Dr. Thayer solely; also that that rifle can be examined at the office of Thayer and Co., No. 1, Leadenhall-street, E.C.

APOLLINARIS.

The Queen of Table Waters."—British Medical Journal.

Incomparable for mixing with Wines and Spirits."—H. Vizetelly, "Wines of the World."

Army & Navy Gazette.

LONDON, SATURDAY, APRIL 21, 1877.

We published last week a letter from Mr. Inches, a Retired Chief Engineer of the Navy, showing that he, at least, was extremely hurt by our innocent comparison of the Engineer on board ship with a man who loads and keeps in order a gun which he neither constructs or directs towards an object. We thought at the time, and still think, that the simile was substantially accurate, making due allowance for the complicated nature of "the gun" which it is the duty of the Engineer to keep in order; but we are obliged to Mr. Inches for pointing out to what extent the Engineer is expected to be capable of constructing as well as repairing the marine engines in his charge. That "he doth protest too much," even on this point, we will endeavour to show; and when he proceeds to claim for the naval Engineer the sole authority over his own men, regardless, even, of the "entire Board of Admiralty," and utterly ignoring that both he and they must form a portion of that complicated machine, a modern man-of-war, we are reminded of Sydney Smith's ironical advice to servants to find out the amount of their master's gross income, and to consider it as solely applicable to the purposes for which they are individually engaged. Evidently Mr. Inches has a grievance, and we can well believe that it would take him two months to ventilate it in our columns. If we take him at his word, his grievance is that an "accursed system," which he states to exist in the Navy, has driven him out of a Service where he was receiving £350 a-year and had good prospects before him. Assuming him to have been a valuable officer, we must regret that he has retired from the Service; but it is not easy to see how any other system than the one he has declared "accursed" could be made to work at all smoothly. The independence claimed by Mr. Inches for the Engineers and their own men amounts to neither more nor less than a sort of unionism in the Engineer department, caring only for the interests of their own trade and that part of the machine immediately in their charge, and ignoring the world outside it. To pursue such a proposal to its logical conclusions, we should have a sailing Captain and an engineering Captain in each ship, and similarly, of course, two Admirals, till we got to the Japanese system of dualism in perfection. If we descend to details—and we do not attempt to be logical, notwithstanding our correspondent's disclaimer—it is easy to point out that in all such cases as coaling, getting under weigh, entering harbours' docks or basins, and, above all, going into action

—including, naturally, the general quarters—the arrangements must include, not alone special orders to the engine-room, but details as to the disposal of the Engineers and stokers. That the responsibility for these details must rest with the Captain appears obvious, and whatever may be Mr. Inches' experience, we may point out that the balance of obligation between the engineering branch of the ship and the rest of the ship's company is by no means always in favour of the latter. But we decline to view a ship or the naval Service from this extremely narrow point. The attempt to compare a man-of-war with one of the steamers of the large steamship companies is misleading, if only for the difference that the mercantile steamers are always employed in making regular voyages, while men-of-war may have months in harbour, alternating with an equal portion of time practically at sea; consequently, any hard-and-fast rules for division of labour which may be possible in the merchant service become impracticable in the Navy. We believe that some such notion as that favoured by Mr. Inches was prevalent a few years ago, but, if we are not mistaken, since the loss of the P. and O. steamer Malacca—due, if we recollect aright, to some difference between the Engineer and the Captain as to the necessity for steam being available—the large steamship companies have given up the idea of the entire independence of the engine-room, which is now claimed. Without wishing to retaliate on Mr. Inches, we venture to think that his ideas on this point are really more antiquated than our own, and that the present generation of naval Engineers who have been brought up in the Service take no such narrow view of their duties as he appears to, and that they have a pride in giving a helping-hand whenever their services can be of use, feeling that—

> " Never anything can be amiss
> When simpleness and duty tender it."

Turning back to our original comparison, which provoked Mr. Inches' wrath, we give the following extract from the Regulations for " Practical Qualifications for Engineer Officers," required on passing and promotion:—" He must be able to keep accounts and make rough working sketches of engines and boilers; he must understand the general principles of the engine, and be acquainted with the names of the various parts and their uses, and be willing to exert himself as a mechanic and workman in the several contingencies which may arise in the engine-room." This is a fair summary of what is required, and though they now remain for six years as Engineer students at the dockyards "for practical training in the factory workshops *and to receive instruction in iron ship building*," as detailed in paragraph 9 of Admiralty Circular, May 5, 1873, it would be as reasonable to deduce from these facts that the naval Engineer is the maker of the marine engines as that the ship's carpenter, who should know the details of construction and repair of a ship, is the builder of the ship. On this point, however, we may admit that Mr. Inches has a good deal to say in favour of the naval Engineer, and we trust that as time moves on, from the increasing proficiency of the class, his case may become a stronger one than it now is; but, in taking leave of our critic, we may warn him that he is mistaken if he supposes that, although the increasing efficiency and responsibility of the naval Engineer may possibly on some future day render him equal to be advanced to direct executive command in the higher ranks, no amount of improved position will give him that independence of the executive which he appears to look upon as his due. We are not likely to repeat in the Navy the exploded fallacy of a department divorced from the executive, like the French Intendance or our Army Control, and there is no more reason for the Chief Engineer to be independent of his Captain, than the Paymaster, the Surgeon, or any other heads of important departments.

In the *Gazette* of last night the whole of the Militia medical officers are transferred from their regiments and appointed to a Militia Medical Department, in accordance with the terms of the recent Warrant.

It is to be hoped that his Royal Highness the Duke of Cambridge will try and do something for the Captains who, in 1870, accepted unattached Majorities. All the Lieutenants who, at the same time, obtained half pay companies have been brought back to regiments, but not one of the unattached Majors has yet been taken off the shelf. Many of these, nay, almost all of them, are old officers, and a large proportion have seen active service. They have, therefore, claims for employment, and if it be impossible to bring them all on to full pay again permanently, they ought, at all events, be gazetted in and out, in order to get their over-regulation money. There are, also, several Staff appointments which they would probably accept with gratitude. As matters stand now, they are simply ruined; they can neither get employment nor complete the thirty years' full-pay service for retirement.

The judgment of Lord Waveney has never stood as high as his personal character, but he has rarely evinced such an utter want of the power of appreciating fair play and the principles of justice as he did on Thursday night in his speech in the House of Lords. It would be deplorable if Lord Waveney represented on that occasion any considerable section of public opinion. But he did not. He represented himself, and did it very well.

It is almost a fatal thing to a veteran to receive a decoration or honour under certain circumstances. The Field-Marshal's bâton, for instance, is almost equivalent to a death-warrant. Lieutenant-General Sir Burke Cuppage, R.A., an old officer of the nearly extinct Irish type, died on Thursday last, aged eighty-one, having survived the effects of his K.C.B., which he received when he was over seventy-nine years of age, nearly two years. A gallant, fine soldier, with plenty of service.

In the letters of various correspondents from Constantinople mention has been made of " the Order of the Osmanli." There is no such Order. The name of the Turkish Order is " Osmanieh " or " Osmanié," and it was instituted as an Imperial distinction by the Sultan Abdul Aziz in 1861. The other Turkish Orders are " Nischan Iftikar " (of Glory), founded by Mahomed II. in 1831, and of the " Medjidieh" or " Medjidié," founded by Abdul Medjid in 1852.

The patterns for the new helmets for our Infantry are all but " signed, sealed, and delivered." They are black felt, with brass spike, badge and scales, and are by no means close imitations of the *pickel haube*. Indeed, it is not quite certain if the spike will be retained.

If we thought that the terrors which Mr. Reed's lecture on " Ships " must excite in the minds of those who followed his remarks on the agency and influence of torpedoes could be alleviated by the movement inaugurated for an international crusade or union against such infernal machines, we should rejoice in the interesting and philanthropic proposals which have appeared in the columns of the leading journal. The lecturer, however, furnished the very strongest arguments against the chances of success of such a movement when he showed that torpedoes are the cheap defence of weak nations at sea. It is not likely, indeed, that any Power, weak or strong, would, for the love of humanity, consent to forego the use of these formidable inventions. *Apropos* of this subject, let us recommend to our military readers the new edition of " Les Machines Infernales " of Lieutenant-Colonel Wauwermans, of the Belgian Engineers, published in the *Bibliothèque Militaire* of Muguardt, of Brussels.

The attempt to bribe England to join in a spoliation of Turkey by offering her " the suzerainty " of Egypt, whatever that may mean, or the possession of Crete, will, if it be made, meet, we trust, with indignant refusal. It would be a great point gained if this country joined in a scheme for the plunder of the Sick Man's property. Such participation in a crime would effectually stop the mouths which cried " shame " on the spoilers of Poland, and would justify the ancient guilt of the seizers of Silesia, and many another act of aggrandisement. But it would be a reversal of all the traditions and policy of this country in her dealings with Europe, and it would be a complete *bouleversement* of the principles which actuated her statesmen at the settlement of Vienna.

Elsewhere our readers will find an article from our contemporary the *United Service Gazette* headed " Loaves and Fishes," which expresses, in rather forcible language, very much our own sentiments in reference to the attacks which have been, with some appearance of design and system, directed against the Field-Marshal Commanding-in-Chief in various papers, some, we are bound to admit, of a respectable character and of a very different stamp from the paper in which the lines on which our venerable contemporary comments so strongly and sharply appeared.

We are informed that there is now lying at the War Office a complete scheme prepared by the Army Medical Department for all that relates to the medical charge, transport, field service hospitals, &c., of an army corps of 50,000 men ordered to take the field. How long it may remain at the War Office under consideration we do not know, but it will not be fair to subject the Army Medical Department to any censures for want of fore-thought should the Treasury raise objections, or time be consumed in " considering."

" Mistakes will happen in the best regulated families"—and departments, public and private. There have been some curious instances of the truth of that remark recently discovered in connection with the pay of certain field officers, some of whom have been drawing too much, and some of whom have been receiving too little, in entire ignorance of their rights and their wrongs, and taking the goods the gods and Messrs. Cox and Co. provided them with meekness of spirit. But when those who have been drawing too little find out that somebody has made a mistake, and demand their arrears, there is a considerable emotion of a departmental character and a general disposition evinced to stand on the defensive, whilst in order, perhaps, to establish a just middle, aggressive demonstrations indicate a desire to squeeze the overplus from the gentlemen who have been spending half-a-crown out of sixpence a day. Mr. Hardy is a just man, we believe, and he will not sanction this attempt at establishing a *juste milieu* between the plusses and the minusses.

We hear that the Royal Warrant which is to be the complement of the Royal Warrant of 1871 is actually ready, and, if that be so, it may be expected in the *Gazette* at any moment, always saving and excepting delays at the Treasury. Thus it seems that Mr. Hardy will follow Mr. Cardwell's example in the way of dealing with the promotion and retirement of officers of the Army. It may be remembered that the Royal Warrant of 1871 applied only to the Cavalry and Infantry of the Line. The Household Cavalry and the Brigade of Guards were expressly excluded from its operation, and there was in the explanatory memorandum accompanying the Warrant an express announcement that the question of retirement and promotion in the Household Cavalry and Guards was under consideration, and would be made the subject of future regulations.

The statement in one of the gossiping weekly papers respecting the serious nature of the accident to Lieutenant-Colonel Knox, whom our contemporary is pleased to designate " Curly," is only well founded in so far as the bursting of the gun is concerned, for all the detail about the shattering of the arm and the consequences expected to ensue is, we hear, exaggerated. No doubt, however, can be entertained that there was no medical assistance at hand, for when gentlemen go sporting in the wilds of Abyssinia they cannot be surprised, in case of accident, to find that the nearest practitioner lives a long way off.

We are told that the portrait of General Ignatieff, which appeared in last week's *Vanity Fair*, was generally taken to be that of Mr. Edmund Yates, who is said to belong to the *World*, and it is, indeed, far more like him than it is like the Russian diplomatist.

Major-General W. G. Owen, Madras Infantry, will arrive in England in the course of a few days from India, on vacating command of his brigade of the Madras Army, his successor, Colonel A. C. Silver, Madras Infantry, having left London some weeks ago to relieve him.

Orders have been issued for Cavalry regiments first for foreign service—viz., the 1st, 4th, 5th, and 6th Dragoon Guards, 1st, 2nd, and 6th Dragoons, 8th Hussars, and 17th Lancers—to make inspections of the whole of their saddlery and equipment, all articles unfit for field service being ordered to be at once returned to store.

Staff Paymaster G. W. Rippon, lately employed in the Cork District, left England on Thursday for Ceylon, where he relieves Paymaster E. F. G. Greenwood.

Only two officers are in future to be provided for as temporary Instructors on the Staff of the School of Military Engineering, Chatham, the saving effected being £91 per annum, the amount of extra pay drawn by the officer whose services are dispensed with.

A committee of inquiry on barrack accommodation for the troops in Ireland has been convened. " Not a moment too soon!" those will observe who have been quartered in Ireland, and know what miserable places most of the barracks in that command are, and how constantly moves are carried out in consequence of some of the buildings having to serve double purposes.

Captain F. C. H. Clarke, R.A., Deputy-Assistant Quartermaster-General, has completed the translation of Section 10 of the official account of the Franco-German war of 1870-71, which will shortly appear from the Intelligence Department.

The announcement we made months since as to the probable extension of Lieutenant-General Sir Henry De Bathe's period of command of the Northern District has been officially confirmed.

Lieutenant-Colonel C. E. Cumberland, who has been in command of the companies of Royal Engineers at Aldershot since the late Colonel C. C. Chesney's transfer from the station to the Home District, has been appointed to the Staff at Malta, vice Colonel A'Court Fisher, C.B., who has been obliged to proceed home owing to illness; and Major R. Grant, lately Deputy-Assistant Adjutant-General at head-quarters, who has been at Aldershot since January last, employed as second in command of the Royal Engineer Train, also embarks for Malta, in relief of Major E. R. James, who returns to England.

REVIEWS.

Journal of a Residence at Vienna and Berlin, 1805-6.

By the late Henry Reeve, M.D. (Longmans.)

We doubt very much if Mr. Reeve would have published these letters had they not been written by his father. In the introduction he says that he was led to print the fragments "by the reflection that time gives some value to contemporary impressions, however slight, of great historical events, and that social intercourse with men who have left a name in arts or letters is never wholly devoid of interest." Dr. Reeve "saw the great conqueror on the morrow of Austerlitz, he had the good fortune to be introduced to Haydn, to be present when Beethoven conducted 'Fidelio,' to hear Humboldt relate his travels, and Fichte lecture on his philosophy," &c. There is a biographical sketch of Dr. Reeve, who died at thirty-five, from which it would seem that he was an amiable, accomplished man, with the gift of making friends; but he certainly was not the master of a clear or agreeable style, and his descriptions are very bald and common-place. If we are to take Dr. Reeve's account of Vienna and of Austria in 1805 as accurate, it is wonderful that there was not a Conference to sit upon them. The police were brutal and ferocious, the Government were to match, the population degraded, vicious, and trodden into the dirt. "Count Purgstall furnished 700 men during the last war from his estates in Styria, and only about thirty remained alive at the conclusion." And these men were taken by force! The most interesting "bits" in this journal are accidental side-lights, mostly relating to the opera and drama, for Dr. Reeve never missed a play when he could go to one; but there are, here and there, plums in the dumpling of another sort. While Reeve was philandering in Vienna in 1805 the Emperor Napoleon was on his way to Austerlitz. The theatres went on as usual in the midst of all the troubles. It was only on October 26 that the news of Mack's capitulation at Ulm, which occurred on October 17, reached Vienna, and it was believed there that it was the result of a great battle and of a complete defeat; and Dr. Reeve relates how he went to see "Othello" at one of the great houses on November 12, and how next day the French Army marched through the city "with glee and victory." He speaks in the highest terms of the conduct of the officers and men, and of their admirable behaviour. One of the officers said "he had been twenty-four days on board a vessel at Boulogne, when the Emperor arrived, and said, 'Mes enfans! Je vous menerai à Vienne!' 'Et voila! Nous sommes ici!' They would prefer being at London, for nothing is to be got at Vienna. The Austrian soldiers believe they have been sold." The French commandant issued orders for payment of all debts by soldiers and officers of the Army. "Numbers of wounded are brought in, the poor French soldiers *having their ears cut off* by the savage Russians." "Few prisoners are made, they are so furious, and it is said they cut and maim the French they take most maliciously." On November 23 the news of Nelson's great victory and of his death arrived, but it was mingled with the echoes from the fields outside Vienna. The *mot* attributed to so many Generals is assigned by Dr. Reeve to a French officer, who, when he heard of Oudinot being wounded, exclaimed, "Ma foi! que voulez vous? on ne peut pas faire les omelettes sans casser des œufs." There are all through the diary small entries bearing on the state of the city, and on the social life of the people. "Fidelio" was played at the Wieden Theatre. "The story and plan are a miserable mixture of low manners and romantic situations." Beethoven, "a small, dark-looking young man, wears spectacles," directed at the pianoforte. A few nights after "Romeo and Juliet," by Zingarelli, was given, and Dr. Reeve, who was a very fair judge, gives such a high character of the opera that it is wonderful it has been quite lost to our stage—"the music is above all praise, the chorus and every part well filled up." Meantime the French were quite at home at Vienna. On December 2, as the world knows, Austerlitz was fought, but it was not for five days that the details were known in the city so near to the scene of the great battle. "The scepticism of the people" (on December 11) is "beyond all conception. They would not believe the armistice, they would not believe the French had gained the victory, and the prisoners marched in were said to be French soldiers dressed in Russian rags"—and all this even when Napoleon was at Schönbrunn, where Dr. Reeve saw him at Mass on December 22.

> He was alone in the Emperor's tribune on the one side of the altar on high, his pages and attendants in adjoining seats. His countenance struck me as very remarkable, fuller, broader, and fatter than I had expected to have seen it, and his person stouter and older than usually represented. He has the usual marks of the sanguine, melancholic temperament, dark hair, small dark eyes, rather fixed than animated, and a very piercing countenance (!), the forehead high, nose somewhat Grecian rather than aquiline, and cheek-bones and chin rather prominent; his physiognomy is striking, and there is a deal of character displayed in his countenance (!) His hair is cut short, like the present mode. He was simply dressed in the regimentals of the Guards or Chasseurs à Cheval, very dark green with red collar with gold epauletee, and a small star on his left side. After chapel he reviewed the Imperial and Royal Guards and an immense train of Artillery. He came out of the palace, accompanied by four pages in scarlet and gold, eight servants in green and gold liveries, and many generals, officers, and attendants. Four grooms held a fine grey horse, which he mounted, and every person uncovered. He galloped up to the line and then passed slowly along. His profile is very different from the front view of his face, and to me appeared more unfavourable; he sits badly on horseback, stooping, and is distinguished by the great simplicity of his dress—a simple small cocked hat without any lace, while his attendants are all glitter and gold. The pomps and equipage of the army are certainly great beyond all conception. The different regiments of Guards are superb troops, consisting of eight or ten squadrons, the greater part of them mounted upon fine black horses, which seem to betray their birth and breed at Hanover! The Mameluke Guard of about fifty or sixty men produces a striking effect; it attended Gen. Berthier to-day. Prince Murat, Prince Borghese, Gen. Berthier, Gen. Clarke and all the principal officers were at the review. The whole sight was magnificent. Almost all the officers and many of the men wear the badge of merit; this red ribbon is the mark of their having signalised themselves, and as belonging to the "Legion of Honour." This honorory distinction is of infinite service: it gratifies particularly the national character. The impression left on my mind, after looking at Bonaparte attentively for a considerable time, was that of increased admiration. There is a great deal of mental activity in almost every feature, though not vivacity; acuteness, quickness, and severity seem to be the predominant qualities. The lower part of the face appears constantly in action, revolving on itself and its complicated concerns; and Lavater would fix upon such a face in a crowd as bearing the marks of a superior and most extraordinary man. To enable one to judge more accurately it is necessary to see him and observe him when speaking.

Further on he says:—

> December 28.—This morning the signature of a treaty of peace at Presburg yesterday between their Majesties the Emperors of France and Austria was announced; and *Te Deum* was sung in the cathedral by order of the magistrates, who went in great form. All the bourgeois were under arms, and the church was crowded with the citizens of Vienna and the French soldiers mixed among them; the magistrates and what noblemen are here were on one side, while Gen. Clarke and many French general officers were seated on the other. Friends and foes all met together to celebrate the return of peace. It is somewhat ridiculous that prayers have been daily offered up in St. Stephen's for peace for three months past, even before war was fully declared, and now the people return thanks for being most severely beaten by the Lord's anointed. Never was a country so completely subdued, never was a conqueror who used his victory and triumph with such moderation; never did a numerous and victorious army behave with more forbearance and moderation. Some excesses and irregularity in the country could not be prevented, among such an infinite number of *traineurs*, but these were punished severely, and the conduct of officers and men in Vienna deserves all praise. Mildness, gentleness, and affability and activity are the general characters; that excessive gaiety and vivacity, so much talked of, did not appear in any degree; great good humour among all ranks, but no frivolity. It is said that part of the national character of the French is lost since the revolution; it might easily be lost with advantage. The common soldiers are affable and amiable, most of them very intelligent, and as a body superior to the officers, their active and enterprising character strongly portrayed in their countenances when compared with the *dummheit* of the modern Scythians.

In February, 1806, Dr. Reeve left Vienna for Saxony and Prussia. He went to the play at Dresden with his usual zeal, and on February 19 set out for Berlin.

> The approach to Berlin resembles more the entrance to an Indian wigwam than anything else; the roads are quite neglected, and are filled with black mud; but on entering the town the eye is struck with the beauty and magnificence of the buildings, and the general splendid appearance of the houses.

There are *obiter scripta* in the course of the diary which give to reflect on the change in the situation. "The King" (of Prussia) "has sent Talleyrand the Order of the Black Eagle and a star set with brilliants worth 17,000 dollars—nearly £3,000." "The head of the figure opposite the palace (at Berlin) was knocked off the day Hanover was seized" (pp. 207, 208). Dr. Reeve went from Berlin to Hamburg and on to Cuxhaven, and gives an account of the difficulties of his voyage to Harwich which ought to make us hold up our hands and bless the worst steamer that ever was made; but he arrives safely in England, and there his diary ends.

The Edinburgh Review.

The most important paper in the current number of the *Edinburgh Review* is "Wellington and Gentz on Eastern Affairs." So far back as last autumn, the similarity that existed between the Eastern Question of 1828 and that of the present day was sufficiently striking. Since then, however, the sixth volume of the "Wellington Despatches" has appeared, and affords most interesting and authentic information on the subject. "We are unable to follow day by day every step in the negotiations of 1826 and 1827; and it is not without astonishment that we trace in these parallel passages of history, at an interval of half a century, a resemblance amounting to identity: the same efforts on the part of the Christian Powers to obtain from the Porte the recognition of the rights of its Christian subjects, the same claims to interference on their behalf, the same indignant remonstrances against acts of cruelty and oppression, the same attempt to combine the action of Russia and England on the basis of a common Protocol; and, on the side of Turkey, the same unbending resistance, expressed in the same language, and defended with the same diplomatic ingenuity, and resolute indifference to the most formidable consequences." Having pointed out how valuable these Despatches are as an instructive commentary on the present state of affairs, and as an exponent of the views entertained by statesmen of the highest order, the reviewer draws attention to the great variety of subjects that occupied the attention of the Government of England at that period, how completely they were laid bare in the vivid language of contemporary correspondence, and how through them all "we mark the grand sagacity, courage, and common sense of the Duke of Wellington. There have been many statesmen more subtle, more accomplished, more eloquent, more liberal, more enlightened; but in honesty, patriotism, plain dealing, and plain speaking, he stands without a rival." By way of contrast to the sixth volume of the "Wellington Despatches," the reviewer places beside it the collection of the reports on the current affairs of Europe, from 1812 to 1828, which were addressed to the Hospidars of Wallachia by Chevalier Gentz, who held a high position in the Service of Austria, and subsequently acquired influence and power almost equal to that of Prince Metternich. The details given by him of Austrian policy after the peace may, therefore, be regarded as authentic. "But what a picture of selfishness, timidity, false views, false predictions, and reactionary fanaticism he has left behind him!" The Gentz correspondence, with all its multiplicity of details, is regarded by the reviewer as a most important contribution to the secret history of the times, and becomes additionally interesting when it throws light on the transactions in which the Duke of Wellington was engaged. The following quotation is from a report of November 2, 1824, and is offered as an illustration of the extraordinary applicability of Chevalier Gentz's remarks to the present state of affairs:—

> We are constantly reminded of the insurmountable difficulties opposed to the pacific intervention of the Powers at Constantinople'; yet I am persuaded, notwithstanding all that is said of the inflexible character of the Sultan and some of his advisers, that these difficulties would perhaps entirely vanish if the Porte could be persuaded of the *perfect disinterestedness* of those who offer this intervention. If England and Austria, acting alone, offered their aid, would it be rejected? I cannot admit it. The Divan has frequently invited the friendly interference of foreigners in even less critical circumstances. If I am told that the case is different, that they are asked to make concessions and sacrifices contrary to the fundamental laws of their religion and their empire, I reply that everything must yield to necessity, and that no laws, either religious or political, can oblige a Government to perish rather than capitulate. No. I shall ever declare that this is not the real difficulty. That proceeds entirely from *the share taken by Russia in these transactions*, from the distrust, from the extreme repugnance, from the horror—to express it in one word—which that Power inspires to the Porte; and who would be clever enough to persuade even the least prejudiced Turk that Russia only desires the preservation of the Ottoman Empire, the peace of Eastern Europe, and a little more liberty for her fellow Christians; that none of her measures, none of her declarations, are dictated by hostile sentiments, by ambitious views, by schemes of dismemberment, of conquest, and of dominion? Even if all these suspicions were false and fanciful (and they would be so if the Emperor Alexander were himself all Russia) no one could eradicate them in a country which has suffered so much in the last half century from the preponderance of so formidable a neighbour. That is what casts an irremediable shade over all the efforts of the Powers to bring the Porte to pacific and conciliatory terms. The Porte will listen to everybody else, but nothing but the last extremity of danger will induce it to listen to Russia.

There can be no doubt of the pertinence of these remarks. The transactions of the last three months point out, most forcibly, how true it is that the Porte retains the same frame of mind that was hers fifty years ago as regards her relations with Russia, and that it is as true now as it was then that nothing but the last extremity of danger would cause her to listen to the overtures of that hated country. The reviewer proceeds to point out that every one of the diplomatic campaigns opened by Russia, from the Treaty of Bucharest, in 1812, to the persent day, is directed to one end—namely, to assert the right of Russia to interfere in the government of the Christian subjects of the Porte, and to enforce that right by coercive measures if necessary. Moreover, that with equal consistency the British Government opposed the right of Russia to enforce any such protectorate. In M. Gentz's volumes an account is given of the Duke of Wellington's famous Protocol, which his Grace regarded as the instrument that secured the peace of Europe, but which caused such dissension afterwards between him and the Minister acting with the Russian Ambassador. This and the matters connected with it are detailed at considerable length in the article in the *Edinburgh*, but we do not find any further notice of M. Gentz's volumes, the remainder of the paper treating exclusively of the "Wellington Despatches," and the various interesting and important matters of which they are conversant, and which have been recently fully noticed in these columns.

The Chinese Ambassador and suite visited the Royal Arsenal at Woolwich on Wednesday. He proceeded first to the torpedo range at the canal, where they witnessed some trials of the Whitehead fish torpedo, several very successful "runs" being made. They were then taken to the butts to see one of the 38-ton guns fired, and the method of measuring the rate of flight of the projectile, both within and without the gun, was explained by Col. Younghusband, Capt. Owen, and other officers. One of the arsenal locomotives next conveyed the party to the Royal Gun Factories, where the operations of rolling, coiling, and welding were illustrated.

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea."—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices, 9, Southampton-street, Strand.

The Navy.

GAZETTE.

Admiralty, April 14, 1877.

Lieut. Francis Romilly has been promoted to the rank of Commander in her Majesty's Fleet, with seniority of this date, in the haul-down promotion of Admiral the Hon. Sir James Robert Drummond, K.C.B., late Commander-in-Chief of her Majesty's ships and vessels on the Mediterranean Station.

April 17.

Nav.-Lieut. J. Jesse Dixon has been promoted to the rank of Staff Commander in her Majesty's Fleet, with seniority of March 30 last.

April 18.

The following promotions have been made this day:—Coms. Edmund Hope Verney, Henry Hand, to be Capts. in her Majesty's Fleet.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1872, Lieut. Walton Drake has been this day placed on the Retired List of his rank.

April 19.

Engineer John Charles Weeks has been promoted to the rank of Chief Engineer in her Majesty's Fleet, with seniority of April 6, 1877.

In accordance with the provisions of her Majesty' Order in Council of July 21, 1876, the undermentioned officers have been allowed to assume the rank and title of retired Capt. from the 16th inst.:—Retired Coms. Charles Gibbons, James Wood Armstrong.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Lieut. Ralph Willian Jones has been this day placed on the Retired List of his rank.

The undermentioned Surgs. have been promoted to the rank of Staff Surg. in her Majesty's Fleet, with seniority of the 14th inst.:—Donald MacIver, M.D., Alfred William Whitley, John Thomson Comerford, M.D., Robert Hay, M.D., Matthew Trevan, Alexander McDonald, M.D., Alexander Goodall, M.D., Thomas D'Arcy Bromlow, M.D., James Dear Smith, M.D., Peter Burgess, M.B.

APPOINTMENTS.

Rear-Admiral the Hon. Fitzgerald A. C. Foley, to be Superintendent of Portsmouth Dockyard, vice Sir F. Leopold M'Clintock, whose period of service has expired.

Captain—William S. Brown, to the Valiant, vice Nowel Salmon, whose period of service has expired.

Commander—Thomas P. W. Nesham, to the Defence, vice Dolphin.

Lieutenants—Frederick Maitland, to the Osprey; and W. P. L. Heyland, to the Resistance; G. M. Richardson, to the Elk.

Navigating-Lieutenant—John Edwards, to the Rupert.

Navigating Sub-Lieutenant—C. S. Eeles, to the Cygnet.

Fleet-Surgeon—Belgrave Ninnis, M.D., to the Active.

Surgeons—Thomas Crichton Mugliston, to the Black Prince; and Henry Lawrence Crocker, to the Active; Robert F. Yeo, to the Elk; and Henry G. Strickland, to the Swallow.

Paymaster—Henry N. Scaife, to the Wolverne, additional, in charge of stores at Sydney, N.S.W.

Chief Engineer—Edward D. Dooley, to the Cambridge, additional.

Engineers—Richard T. Rundle, to the Swallow; John Swanson and Edward Sine, to the Osprey.

Assistant-Engineer (First Class)—Benjamin J. Barnes, to the Swallow.

Active, Capt. C. F. Boxer, was commissioned at Portsmouth for the North America and West Indies Station on the 13th inst.

Alexandra, Capt. R. O'B. FitzRoy, bearing the flag of Vice-Admiral G. T. P. Hornby, was at Malta on April 10.

Antelope, Lieut.-Com. E. Wingfield, arrived at Villa Franca on the 13th inst. She has been ordered to relieve the Rapid at Constantinople.

Argus, Capt. E. J. Jermain, was to sail from Bermuda on March 24 for Halifax, to bring down mail from England due on March 30.

Assistance, Capt. Prattent, arrived at Kingstown on Saturday evening to convey to Portsmouth the 19th Regt., which was recently in collision with the people of Limerick. The regiment arrived in Dublin by train from Limerick, and at once embarked. She arrivod at Portsmouth on the 19th.

Audacious, Capt. P. H. Colomb, flagship of Vice-Admiral Ryder, was at Yokohama on April 13.

Avon, Com. L. C. Keppel, was at St. Paul's de Loanda on Dec. 27, about to visit Congo, after taking the consul to various ports.

Barracouta was paid off in the Medway on Saturday morning, the paying off having been delayed owing to the court-martial on her late captain. The Barracouta is ordered to be placed in the Medway Steam Reserve, and in all probability she will remain in one of the basins at Chatham Dockyard until she is broken up, as she is in a very rotten state.

Bellerophon, Capt. J. A. Fisher, flagship of Vice-Admiral Sir A. C. Cooper Key, was at Bermuda on April 3. She left Havana on March 6 with the Encounter and Dryad, and reached Bermuda on March 14. The Bellerophon was docked on March 23.

Danae, Capt. J. C. Purvis, was at Madeira on April 4, and would leave next day for St. Vincent, Cape de Verde.

Defence, Capt. R. P. Cator, is having her defects made good at Devonport Dockyard.

Dryad, Com. J. E. Stokes, left Bermuda on March 25 for Halifax, to fetch a mail.

Egeria, Com. A. L. Douglas, has been ordered to Nagasaki.

Elk, Com. Tupman, was commissioned at Portsmouth on Wednesday for the Brazil Station.

Encounter, Capt. R. Bradshaw, was taken into the Camber at Bermuda on March 17, to make good defects.

Euphrates, Capt. W. H. Cuming, left Bombay on the 12th inst.

Foam, Lieut.-Com. R. W. Hope, was, in company with the Volage and the Beacon, at Colonia in February. The thermometer remained at 100 deg. under the awnings. She left Colonia for Buenos Ayres and Monte Video, which latter place she reached on Feb. 19.

Fox, Staff-Com. J. G. Dathan, sailed from Plymouth on the 18th inst. at 7.55 a.m. for Queenstown.

Growler, Com. C. E. Wilcox, was paid off on Feb. 17, and recommissioned on Feb. 18 at Hong Kong.

Hercules, Capt. Bowden-Smith, Admiral the Hon. Sir J. Drummond, K.C.B., struck his flag on Friday, last week, having previously visited her Majesty at Osborne. On his arrival Admiral Drummond addressed the ship's company from the after-bridge. He remarked, says the *Portsmouth Times*, that he had had great reason to be pleased with the officers and men during the time they had been together, and particularly complimented the petty-officers on the manner in which they had supported their superior officers. He had applied for extra leave for the officers and men, in consideration of the monotonous duty they had performed in Besika Bay, and he was pleased to inform them that he had been successful in obtaining an extra week, making thirty-five days in which to enjoy themselves. Speaking to the men, he observed that he hoped when they returned to their respective ships they would carry with them their good name, and support the character and discipline which the greater part of them had preserved during the time he had sailed with them. The admiral shortly afterwards left the ship, the men manning the yards, and (as cheering is against the orders) clapping their hands in a sincere adieu. The admiral leaves his vessel amid the most sincere regrets of the men and officers, to whom he had endeared himself by his kind, considerate, and even paternal treatment of them. The Hercules will be paid off on the 30th inst., when she will be dismasted, her decks ripped up, and she will receive three new boilers.

Hornet, Com. H. N. Hippisley, was paid off on Feb. 24, and recommissioned on Feb. 25 at Hong Kong. The paid-off crew comes home in the Himalaya.

Immortalite, Com. Gerard Noel, arrived at St. Helena on March 20, left on the 23rd, was at Ascension on March 29, and was to leave on April 1 for England, calling at St. Vincent.

Industry, Staff Com. Dyer, left Portland on the 13th inst., at 10.30 a.m., and arrived in Portsmouth Harbour early on the 14th inst.

Jackal, Lieut.-Com. H. A. Digby, arrived at Devonport on the 14th inst.

Jumna, Capt. J. D'Arcy, arrived in Plymouth Sound early on the morning of the 13th inst. from India, and went alongside Devonport Dockyard, where she landed the 1st Batn. 11th (North Devon) Regt., under the command of Col. John Roe, consisting of 17 officers, 584 men, 40 women, and 83 children. The troops marched to the Raglan Barracks, where they are quartered, and the Jumna left in the evening for Portsmouth, where she arrived on Sunday.

Magpie, Com. C. V. Anson, is reported to have returned to Singapore, having been unsuccessful in her search for the pirates who attacked the schooner Kin Hap Hin, or the four missing men of her crew. The Magpie will probably proceed to the north on the arrival of the Juno.

Midge, Capt. H. Salmond, was paid off on Feb. 17, and recommissioned on Feb. 18 at Hong Kong.

Modeste, Capt. A. Buller, C.B., has been ordered to Kagoshima. On her return from Kagoshima she will remain at Nagasaki, sending another ship to Kobé.

Narcissus, Capt. Lord Charles Scott, flagship of Rear-Admiral Lambert, C.B., left the Cape on March 8, with the Newcastle, Immortalité, and Topaze; arrived at St. Helena on March 20; arrived at Ascension on March 29, and would leave again on April 1.

Newcastle, Capt. R. G. Douglas, arrived at St. Helena on March 20, left on the 23rd, was at Ascension on March 29, and was to leave on April 1 for England, calling at St. Vincent.

Orontes, Capt. E. H. Seymour, was in Simon's Bay on March 19, having arrived there on March 14. She would leave on March 23 for Table Bay, to embark military drafts for England, and will call at St. Helena about March 31 for any passengers, and at Ascension.

Orwell, Lieut.-Com. R. H. Cornwall, left Plymouth on the forenoon of the 18th for Queensferry.

Opal, Capt. F. C. B. Robinson, has been ordered to Iquique on account of a disturbance which had there broken out, and the illegal arrest and imprisonment of Mr. Rowland, the administrator and representative of the English bondholders, whose release was afterwards ordered. During the passage the ill-luck which has attended her since she left England again befell her, the engines, while the vessel was steaming at nine knots per hour, breaking down, on this occasion from a defect in the eccentric-rod which had previously been repaired at Valparaiso.

Osborne, Com. H. L. Pearson, having embarked Mr. Layard, the British ambassador to the Porte, at Brindisi, left for Constantinople, where she was expected to arrive early yesterday morning.

Pallas, Capt. H. H. Beamish, was at Smyrna by last accounts.

Pert, Com. H. C. Aitchison, rejoined the flag of Admiral Key on March 18 from Havana.

Raleigh, Capt. G. Tryon, C.B., will rejoin the flag at Malta from Salonica.

Rapid, Com. E. C. Drummond, will relieve the Raleigh at Salonica.

Resistance, Capt. C. W. Hope, is in the hands of Devonport Dockyard for repairs, cleaning and coating bottom, &c.

Royal Adelaide, Capt. J. O. Hopkins. Admiral Sir T. Symonds, K.C.B., struck his flag on the afternoon of the 17th inst., and proceeded on a week's leave; and Rear-Admiral Willes shifted his flag from the Indus to the Royal Adelaide.

Rover, Capt. T. Barnardiston, was to proceed to the Jamaica Division from Bermuda on April 7.

Shah, Capt. F. G. D. Bedford, was at Monte Video on March 10, about to proceed to Valparaiso. The *Buenos Ayres Standard* reports an entertainment given by Capt. Bedford and the officers to the Hon. Lionel Sackville West and a large party. Capt. Bedford showed his guests the manœuvre of firing a broadside by electricity. Some Gatling guns were also fired from the maintop. The Shah is furnished with Whitehead and Harvey torpedoes, in which the visitors took special interest. As the Ministers left, salutes were fired to the British, Brazilian, and United States' representatives, the flags of the respective countries being successively hoisted to the peak.

Sirius, Capt. G. L. Sulivan, was at Whydah on March 17. Arrangements for meeting the mail steamers at Quittah will occasionally be altered, and the gunboats will intercept them at Lagos.

Sultan, Capt. H.R.H. the Duke of Edinburgh, arrived at Villa Franca at 7 a.m., on the 13th inst. The Sultan will await the arrival of the Prince of Wales at Villa Franca, and remain in attendance on him as long as he is cruising in the Mediterranean.

Supply, Staff Com. F. Inglis, was at Ascension on March 29, embarking stores for England; she left Elmina on March 8, and will come to Plymouth.

Swallow, Com. John B. Warren, was commissioned at Portsmouth on Wednesday for the Cape of Good Hope and West Coast of Africa.

Swinger, Lieut.-Com. Oswald Tudor, was paid off on Feb. 17, and recommissioned on Feb. 18 at Hong Kong.

Tamar, Capt. W. H. Liddell, arrived at Trincomalee on the 16th inst.; she will sail on the 19th.

Terror, Capt. Somerset, was paid off on Dec. 31 at Bermuda and recommissioned on Jan. 1.

Thetis, Capt. T. Le Hunte Ward, will not be ready to proceed to England from Malta much before the end of the month. Rear-Admiral Rice has presided at a court of inquiry into the cause of the accident to the screw of the Thetis. Capt. Culme-Seymour, of the Monarch, and Capt. T. W. Richards, of the Devastation, being members of the court.

Thistle, Com. E. B. Pusey, was at Nagasaki by last accounts.

Thunderer, Capt. J. C. Wilson, is now ready for the pendant, and will be commissioned on May 1. On Friday, the 13th, steam was got up in the new boiler, and the hoisting gear was tried by raising a boat from the water and putting it into its place on the hurricane-deck, and then lowering it again into the water. A trial was also made of the centrifugal pumps for relieving the ship of water in case of leakage from any cause. Water was let into the engine-room bilge to a depth of 17in., and was thrown out by the pumps in a satisfactory manner. The ventilating arrangements were likewise found to be in admirable working order. The ship is expected to be commissioned on May 1.

Topaze, Capt. A. T. Thrupp, arrived at St. Helena on March 20, left on the 23rd, was at Ascension on March 29, and was to leave on April 1 for England, calling at St. Vincent.

Tourmaline, Commodore F. W. Sullivan, C.B., was in Simon's Bay on March 19.

Valiant, Capt. N. Salmon, V.C., while in dock at Devonport has had the fore part of the starboard side and the after part of the port side coated with Sim's composition, and the fore part of the port side and the after part of the starboard side with Hay's composition. The bottom of the vessel has also been scraped and washed down.

Valorous, Capt. L. F. Jones, arrived in Plymouth Sound on Wednesday from Birkenhead, with the Frolic, Forward, Foxhound, and Griffin, new gunvessels, which steamed in harbour, and the Valorous into Barn Pool.

Volage, Capt. H. Fairfax, left Monte Video under steam on March 10, and steamed down the River Plate for the Falkland Islands.

Wye, Staff-Com. W. W. Vine, arrived at Portsmouth on the 19th inst., to embark a new crew for the Argus at Bermuda.

A JAPANESE IRONCLAD.

The first ironclad for the Japanese Navy, named the Foo-so, was launched on Saturday from the yard of Messrs. Samuda. The ship, which represents the most advanced type of a vessel combining high speed with thick armour, heavy armaments, moderate size, and great handiness, has been built from the designs and under the supervision of Mr. E. J. Reed, M.P. Her principal dimensions are:—Length between perpendiculars, 220 feet; breadth, 48 feet; depth in hold, 20 feet $4\frac{1}{2}$ inches; burden in tons, 2343 20-94; draught of water, mean, 18 feet; height of port from load water-line, 7 feet 6 inches; height of upper deck at side, from load water-line, 13 feet; displacement in tons, 3,700; total weight of armour and backing, 776 tons. She has a main-deck battery, protected by armour 3 inches thick, in which will be placed four of Krupp's long 24-centimetre breech-loading guns. The weight of these guns is $15\frac{1}{4}$ tons, and their calibre $9\frac{1}{4}$ inches. An upper-deck battery amidships, in which is placed two of Krupp's long 17-centimetre guns, unprotected by armour, the weight of these guns being $5\frac{1}{2}$ tons, and their calibre 7 inches. The main-deck battery projects beyond the side somewhat, and by that means great training is given to the guns. The sides of the upper deck before and abaft the midship battery are slightly recessed, and the guns on each side are so arranged that they may be fought from three ports, from one of which they can fire right a-head in line of the keel, from another on the broadside, and from the third right astern in line of the keel. The ship is provided with a powerful ram and a running-in bowsprit. The Foo-so is armoured on the belt system, the thickness of the armour on the water-line amidships being 9 inches; and it is maintained at this thickness for the whole of the magazine, engine, and boiler spaces. The engines, which will be twin screw, are to indicate 3,500-horse power; they are compound surface condensing, the working pressure in the boilers being 60lb. They will be fitted with separate engines for driving the circulating pumps, starting and reversing the main engines, fire service, donkey pumps, &c. The estimated speed of the ship when fully laden is 13 knots. She will be barque rigged, and will have a total area of plain sail of 12,000 square feet, the total spread of all sail being 17,000 square feet.

Lieut. H. Sandeberg, of the Royal Swedish Navy, who last year explored the regions of the White Sea, will, during the course of the summer, proceed on a voyage of exploration to the peninsulas of Kola and Kanin, as well as the island of Kolgnzev.

The valuable observations made by the Challenger expedition having rendered it desirable that more attention shall be given to ocean meteorology, we hear that a branch to deal with this subject is likely to be added to the office of the Admiralty Hydrographer.—*Standard.*

Throat Irritation.—The throat and windpipe are especially liable to inflammation, causing soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use glycerine in the form of jujubes. Glycerine, in these agreeable confections, being in proximity to the glands at the moment they are excited by the act of sucking, becomes actively healing. Sold only in 6d. and 1s. boxes (by post for 14 stamps), labelled "James Epps and Co., Homœopathic Chemists, 48, Threadneedle Street, and 170 Piccadilly, London."

HOBART PASHA.

A Parliamentary paper has been printed, entitled "Correspondence respecting the Removal from her Majesty's Navy of Capt. Hobart, and his subsequent Reinstatement." From this correspondence we learn that in Dec., 1867, the Greek Minister informed Lord Stanley, then, as now, Secretary of State for Foreign Affairs, that he believed an English officer, Capt. Hobart, R.N., had taken service in the Turkish Navy to direct the blockade of Crete. On inquiry at the Admiralty, Lord Derby was informed that "My Lords had no such intelligence," but would inquire. On Jan. 13, 1868, Capt. Hobart, who had been communicated with, informed the Admiralty that the report referred to was not true. Six days afterwards Sir Henry Elliot wrote home that Capt. Hobart had told him that he had had an offer from the Turkish Government so advantageous that he meant to accept it. The Ambassador told him that if he did such a thing without the sanction of the Queen's Government, which he was not likely to obtain, he must not be surprised if his name was struck off the list of her Majesty's Navy, "a contingency for which," added Sir Henry Elliot, "he now seems prepared." On Jan. 24 Capt. Hobart placed his commission in her Majesty's Service at the disposal of the Admiralty, in a letter to its Secretary, requesting to be placed on the Retired List. On Feb. 15 he was officially told that he could not be placed on the Retired List, and that should he adhere to his determination to serve the Turkish Government his name must be struck off the list of her Majesty's Navy. On Feb. 28 Capt. Hobart addressed a letter to the Admiralty, asking for time to consider the line of conduct he should pursue. On March 18 Lord Stanley informed the Lords of the Admiralty that he saw no reason why Capt. Hobart's resignation should not be accepted, and on the following day his name was struck off the list of British officers. On May 26 Capt. Hobart, trusting their Lordships would consider he had been sufficiently punished, applied to the Admiralty to reinstate him. He was told that his request could not be considered until the Cretan question had been settled. In Dec. of the same year Capt. Hobart, who had been made a Turkish Rear-Admiral, took command of the blockading squadron on the coast of Crete. In March, 1869, Capt. Hobart again requested the Lords of the Admiralty to take his case into consideration—urging, besides his long service as a British officer, his services on the Cretan coast, which he hoped would count in his favour. Lord Clarendon, who had become Foreign Secretary, observed upon this application that he did not think the reinstatement of Capt. Hobart called for by the public interests. In the following May Capt. Hobart, acknowledging a letter from the Admiralty, notifying that his request could not be complied with, intimated that that decision was neither liberal nor fair; he could not think that his conduct in taking foreign service without permission was unpardonable; though "it might," he said, "have interfered with some pet scheme of persons in high authority." In Oct., 1874, when Lord Stanley, now become Lord Derby, was again Foreign Secretary, Capt. Hobart renewed his application, this time to the Foreign Office direct. In sending the application to the Admiralty, Lord Derby repeated the opinion that "the reinstatement of Admiral Hobart Pasha would be of material advantage in supporting him in the position which he holds at the Porte," and might properly be accorded as "a matter of Imperial policy." Hobart Pasha had said in his letter to the Foreign Office that he "felt the importance of his position politically and otherwise," and desired his reinstatement on that account. Hobart Pasha was reinstated in his former rank as captain in the Royal Navy, and placed on the Retired List from the date of his restoration. In a letter of Jan. 6, 1875, Hobart Pasha thanks the Secretary of the Admiralty, observing that "his position is one in which the support of her Majesty's Government is of the greatest importance." The last letter of the series is from the Secretary of the Admiralty, informing Hobart Pasha that he will rise by seniority to the rank of retired admiral, and that directions have been given for him to be allowed to draw retired pay, £1 per diem, from the date of his reinstatement.

THE PERAK EXPEDITION.

In reply to Mr. Serjeant Simon, Mr. Hardy said, on Monday, that, while giving every credit to the troops for the gallantry they had displayed in the late campaign in the Malay Peninsula, it was not intended to grant a medal in recognition of it.

The Royal London Yacht Club has arranged the following programme for the season 1877:—Opening cruise, May 12; yachts will rendezvous off Erith, and start at twelve noon, under the orders of the commodore. First match, May 24, first-class cutters, exceeding twenty tons, first prize £75; second prize (provided five yachts start), £25; course—from Erith round the Nore Light-ship, and back to Rosherville; second-class cutters, eleven to twenty tons, prize £30; course—from Erith round the Nore Light-ship, and back to Rosherville. Second match, June 9, yawls, prize £75; course—from Rosherville round the Mouse Light-ship, and back to Rosherville; schooners, prize £75; course—from Rosherville round the Mouse Light-ship, and back to Rosherville. Third match, June 21, third-class cutters (not exceeding ten tons), prize £20; course—from Erith round the Middle Bligh buoy, and back to Erith.

During a heavy gale on Wednesday morning the Volta foundered in the Medway. She is a wooden corvette, fitted for torpedo experiments under the direction of the Royal Engineers. For several years she has been lying in the river between Chatham Dockyard and Folly Point, and was in charge of a number of Royal Engineers, who fortunately escaped in the boats before the vessel foundered. Rear-Admiral Fellowes, C.B., despatched the Firefly to the assistance of the Volta as soon as her dangerous position was noticed, but the vessel went down in mid-stream just before the arrival of the steamer. Divers have commenced operations on the Volta, and it is thought she can be raised bodily.

We have been requested by Captain Thompson to notify that, consequent upon the falling off in the number of entries this year for the Inter-Regimental Rifle Matches, 1877, both for officers and for sergeants, he has obtained the sanction of the Committee to keep them open until the 30th inst., in the hope that others may enter in the interim. Should they not be better supported, this will be the last year that the present secretary will undertake the arrangements connected with them.

THE COMMISSARIAT DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have no objection to accept the figures of your correspondent "L'Union fait la Force," and to admit that a larger proportion of the Commissariat was employed abroad than of other departments; but, arranging his figures fairly under the proper heads of rank, according to the following table, let me ask whether the reduction of the Commissariat, about which your correspondent seems to be so confident, would have taken the shape of a transfer to the Military Store and Purveyors' Departments, and whether, but for the Control lottery, we should now have a purveyor-in-chief a commissary-general with the rank of major-general, and three principal purveyors assistant commissaries-general with the rank of lieutenant-colonel:—

	Major-General.	Major-General.	Colonel.	Lieut.-Col., and, after five years, Colonel.	Major.	Captain.	Lieutenant.	Ensign.	Total.
COMMISSARIAT.	C.G.-in-C.	C.G.		D.C.G.	A.C.G.	D.A.C.G.			
At Home…………	1	1		5	25	38	Nil.	Nil.	70
Abroad …………	—	1		10	38	81	Nil.	Nil.	130
MILITARY STORE.			P.S.	S.	D.S.S.	A.S.S.	D.A.S.S.		
At Home…………	Nil.	Nil.	3	5	11	25	72	Nil.	116
Abroad …………	Nil.	Nil.	—	2	6	19	41	Nil.	68
PURVEYORS.				P.-in-C.	P.P.	P.	D.P.	A.P.	
At Home…………	Nil.	Nil.	Nil.	1	7	12	18	16	54
Abroad …………	Nil.	Nil.	Nil.	—	4	7	12	9	32
BARRACK.			Prin. B.M.*		Dist. B.M.*	B.M.*			
At Home…………	Nil.	Nil.							34
Abroad …………	Nil.	Nil.							18

(* Number of each rank not known.)

I am quite prepared to allow that the amalgamation of the Commissariat with the Barrack Department and the Military Train was rather beneficial than otherwise to the Commissariat, because it extended the sphere of employment. Such, however, was not the case as regards the Purveyors' Department, and it would be difficult to indicate any advantage that has accrued to the officers of the Commissariat, Military Train, or Barrack Department in consequence of the annexation of the Purveyors' Department. The fact is, the amalgamation of departments under the Control system was a regular muddle, and should never have been attempted so far as the existing cadres were concerned. The departments were so diverse in constitution and composition that any satisfactory incorporation of the establishments was impossible, and if Mr. Hardy wishes now to master the real merits of the case he must begin before Control. It will be a tedious business, but most of the grievances are so personal and peculiar that no general consideration of them under their present condition will remove the prevailing dissatisfaction.—I am, &c.,

C. DE G.

March 27, 1877.

P.S.—I have just had the *Times* put into my hand with the answer of the Secretary of State for War to Sir Henry Havelock. If Mr. Hardy will take the trouble to see a certain number of representative officers from each cadre and get his information at first hand, I believe more good will result from his personal inquiry than even from investigation by a committee.

SIR,—I have seen many growls lately inserted in your paper from the officers of the Commissariat and Transport Department. Now I detest growlers without a cause, and, looking through the "Army List" for April, I see that in the year 1876 the following promotions were made:—Deputy commissary-general, 0; assistant commissary-general, 1; commissary, 0; deputy-commissary, 0; assistant-commissary, 1. Now what can be more cheering to the officers generally, and to the assistants in particular, than knowing that promotion is not stagnant, as asserted by the growlers, and that they have a good, kind friend in the senior commissary-general, who has now had his brother, the senior assistant-commissary, promoted, and will, in good time, promote them all, if they will only live long enough? Assistant No. 104 may have a poor chance; but, then, he must know that some must die in the next 100 years. Why, the Commissariat and Transport are now as bad as the doctors with their growling. So, Mr. Editor, can you or some kind life insurance actuary not give some word of comfort to poor 104?—I am, &c.,

NO GROWLER.

The Army Gazette.

◆

WAR OFFICE, PALL MALL, APRIL 20, 1877.

Where not otherwise specified, the following commissions and announcements bear date April 21, 1877:—

3rd Dragoon Guards—Sub.-Lieut. L. C. Parker to be Lieut.; Feb. 11, 1876.

1st Dragroons—Lieut. H. H. Perkins, from the 20th Hussars, to be Capt., vice R. M. S. Maunsell, retired.

3rd Hussars—Lieut. J S. R. Scott, from the Northumberland Militia, to be Second Lieut., in succession Lieut. H. F. Berkeley, promoted.

10th Hussars—Capt. W. Chaine, from half pay, late 10th Hussars, to be Capt., vice A. Hunt, retired on half pay.

17th Lancers—Lieut. the Hon. J. Pleydell-Bouverie to be Cap., vice F. W. Blumberg, retired; March 28, 1877.

20th Hussars—Major A. W. J. Montgomerie remains Supy. whilst serving as a Professor at the Royal Military College; April 1, 1877.

Royal Artillery—Lieut.-Col. and Brevet Col. J. E. Thring, from the Supy. List, to be Lieut.-Col., vice Brevet Col. N. O. S. Turner, C.B., placed upon the Supy. List; March 1, 1877. Lieut.- Col. and Brevet Col. O'B. B. Woolsey, from the Supy. List, to be Lieut.-Col., vice W. N, Waller, placed upon the Supy. List; April 1, 1877. Major C. P. Roberts (late Bombay) to be Lieut.-Col., vice A. R. Hoskins (late Bombay), who retires upon a pension; Feb. 28, 1877. Major H. Le G. Geary, from the Supy. List, to be Major, vice R. C. W. Campbell, deceased; Feb. 4, 1877. Major E. Maitland, from the Supy. List, to be Major, vice H. Bond, placed upon the Supy. List; April 1, 1877. Major M. F. Downes, from the Supy. List, to be Major, by augmentation; April 1, 1877. Capt. E. V. Boyle, from the Supy. List, to be Major, by augmentation; April 1, 1877. Capt. P. H. Greig (late Bombay) to be Major, vice C. P. Roberts (late Bombay), promoted; Feb. 28, 1877. Lieut. H. J. O. Walker to be Capt., vice W. R. Fox, placed upon the Supy. List; Feb. 1, 1877. Capt. W. H. Sandham (late Bombay), from Adjt., Supy. to the Establishment, to be Capt., vice P. H. Greig (late Bombay), promoted; Feb. 28, 1877. Capt. J. M. Douglas, from Adjt., Supy. to the Establishment, to be Capt., by augmentation; April 1, 1877. Capt. R. P. Hare, from Adjt., Supy. to the Establishment, to be Capt., by augmentation; April 1, 1877. Capt. T. R. Disney, from Adjt., Supy. to the Establishment, to be Capt., by augmentation; April 1, 1877. Lieut. J. F. Bally to be Capt., vice S. H. Toogood, placed upon the Supy. List; April 1, 1877. Lieut. S. Rudge to be Capt., vice M. L. Porter, placed upon the Supy. List; April 1, 1877. Lieut. A. G. Dugdale to be Capt., vice H. Knollys, placed upon the Supy. List; April 1, 1877. Lieut. R. W. O'Grady to be Lieut. upon the Supy. List. Lieut. P.A. MacMahon to be Lieut. upon the Supy. List Lieut. H. T. Faithfull to be Lieut. upon the Supy. List, on appointment as a Probationer for the Indian S.C. Lieut. E. A. Smith to be Lieut. upon the Supy. List. Col. B. W. Phillips has been permitted to assume the surname of Treby, in addition to and after that of Phillipps.

1st Foot—Lieut. E. S. Masters, from 2nd West India Regiment, to be Lieut., vice W. M. Longfield, who exchanges.

6th Foot—Lieut. H. D. Thomas to be Instr. of Musketry, vice Lieut. J. R. Gibbs, promoted; March 15, 1877.

9th Foot—Lieut. H. S. Massy has been appointed a Probationer for the Indian S.C.

17th Foot—Capt. C. E. G. Burr retires upon temporary half pay. Lieut. S. B. Beatson has been appointed a Probationer for the Indian S.C. Sub-Lieut. C. J. L. Stuart to be Lieut.; June 27, 1874.

20th Foot—Lieut. W. Randolph to be Instr. of Musketry, vice Lieut. F. W. Birch, promoted; March 2, 1877.

24th Foot—Sub-Lieut. F. R. W. Stainforth to be Lieut.; June 13, 1875.

33rd Foot—Lieut. A. E. R. Curran to be Adjt., vice Lieut. C. Conor, who resigns that appointment; Feb. 19, 1877.

36th Foot—Capt. H. J. de B. Smart, from the 54th Foot to be Capt., vice T. M. Maxwell, who exchanges.

37th Foot—Lieut.-Col. R. C. Watson retires from the Service, receiving the value of his commission.

41st Foot—Sub.-Lieut. M. K. M. Power resigns commission.

47th Foot—Paymr. and Hon. Major J. Dunlop retires upon half pay; April 1, 1877.

54th Foot—Capt. T. M. Maxwell, from the 36th Foot, to be Capt., vice H. J. de B. Smart, who exchanges.

57th Foot—The appointment as Adjt. of Lieut. G. C. Denton is antedated to Sept. 25, 1876.

60th Foot.—Lieut. R. C. Davies to be Capt., vice P. A. J. Johnstone, retired; March 28, 1877. Sub-Lieut. Lord F. H. FitzGerald to be Lieut.; Feb. 11, 1876.

63rd Foot.—Lieut.-Col. and Brevet Col. H. R. Browne retires on half pay.

64th Foot.—Capt. E. J. Jekyll (Supy. List), retires from the Service, receiving the value of his commission.

65th Foot.—Lieut. A. W. Rendle has been appointed a Probationer for the Indian S.C.

66th Foot.—Lieut. T. G. Barclay, who has resigned his appointment as a Probationer for the Indian S.C., from the Supy. List, to be Lieut., vice H. Fosbery, retired; Feb. 24, 1877.

67th Foot—Capt. J. S. G. Smith retires on temporary half pay.

75th Foot—Lieut. D. L. Baynes to be Adjt., vice Lieut. A. E. A. Cross, who resigns that appointment.

78th Foot—Lieut. T. à B. Sargant to be Capt., vice D. Hay, retired; March 28, 1877.

83rd Foot—Lieut. W. Cooke-Collis to be Capt., vice R. O. De Montmorency, made Supy. on being appointed an Instr. at the Royal Military College.

94th Foot—Capt. C. French, Supy. List., Adjt., Louth Militia, retires from the Service, receiving the value of his commission.

96th Foot—Capt. and Brevet Major C. E. Wright retires from the Service, receiving the value of his commission.

98th Foot—Capt. J. A. Stanford retires from the Service, receiving the value of his commission.

105th Foot—Major C. F. Bond retires on a pension.

Rifle Brigade—Lieut. C. H. St. Paul to be Capt., vice FitzRoy Wilson, made Supy. on being appointed Adjt., 2nd Adm. Batn. Suffolk Rifle Volunteers; Feb. 27, 1877. Sub-Lieut. N. R. K. F. Kingscote to be Lieut.; dated March 8, 1876, but his commission as Lieut. in the Army to bear date Feb. 11, 1875.

1st West India Regiment—Major K. R. Niven to be Lieut.-Col., vice W. H. P. FitzM. Strachan, deceased; March 24, 1877. Capt. F. B. P. White to be Major, vice Niven; March 24, 1877. Lieut. T. Bell to be Capt., vice White; March 24, 1877. Sub.-Lieut. F. W. N. W. Browne, from the Supy. List, to be Sub.-Lieut., in succession to Lieut. Bell; March 24, 1877.

2nd West India Regiment—Lieut. W. M. Longfield, from the 1st Foot, to be Lieut., vice E. S. Masters, who exchanges.

Medical Department — Surg.-Major J. H. West, M.D., retires upon temporary half pay; March 1, 1877. Surg.-Major R. W. Meade retires upon temporary half pay; March 7, 1877. Surg.-Major H. B. Franklyn, M.D., retires upon half pay; March 20, 1877. Surg. J. M. Davis, M.D., to be Surg.-Major; March 18, 1877. Surg. J. V. T. Malcolm, M.D., to be Surg.-Major; March 28, 1877.

Veterinary Department.—Vet.-Surg. W. S. Adams, Royal Artillery, to be Vet.-Surg. of the First Class. Daniel Chambers Pallin, gent., to be Vet.-Surg. on probation. Lieut. J. A. Nunn, from the Royal Monmouth Militia, to be Vet.-Surg. on probation.

BREVET.

Lieut.-Col. and Brevet Col. A. Butcher, retired Royal Marine Light Infantry, to have the hon. rank of Major-Gen.; March 10, 1877.

Lieut.-Col. A. R. Hoskins, Royal (late Bombay) Artillery, retired upon a pension, to have the hon. rank of Col.; Feb. 28, 1877.

Major and Brevet Lieut.-Col. T. D. Baker, C.B., 18th Foot, an Assist.-Adjt.-General at head-quarters, to be an Aide-de-Camp to her Majesty, with the rank of Col. in the Army.

Major C. F. Bond, 105th Foot, to have the hon. rank of Lieut.-Col. upon retiring on a pension.

Paymr. and Hon. Major J. Dunlop, 47th Foot, to have the hon. rank of Lieut.-Col. upon retiring on half pay; April 1, 1877.

Surg.-Major H. B. Franklyn, M.D., who retires upon half pay, to have the hon. rank of Deputy Surg.-Gen.; March 20, 1877.

The following promotions to take place consequent on the death, on March 14, 1877, of Gen. J. Spink, Col. of the 2nd Foot:—Lieut.-Gen. Sir C. H. Doyle, K.C.M.G., Col. of the 87th Foot, to be Gent.; March 15, 1877. Major-Gen. T. Brooke to be Lieut.-Gen.; March 15, 1877. Brevet Col. the Hon. F. A. Thesiger, C.B., from Lieut.-Col., half pay, late 95th Foot, and Aide-de-Camp to her Majesty, to be Major-Gen.; Nov. 10, 1868, such antedate not to carry back pay prior to March 15, 1877. Major A. Templeman, 21st Foot, to be Lieut.-Col.; March 15, 1877. Capt. J. H. Culme-Seymour, 82nd Foot, to be Major; March 15, 1877.

The undermentioned officers, having completed the qualifying service, to be Cols. in the Army, viz.:—Lieut.-Cols. C. Nedham, Bengal S.C., Feb. 28, 1876; W. H. Hawes, Bengal S.C., Jan. 7, 1877; B. W. Ryall, Bengal S.C., Jan. 14, 1877; E. Dandridge, Bengal S.C., Jan. 14, 1877; E. L. Taverner, Bombay S.C., Jan. 17, 1877; J. N. Maclean, Madras S.C., Jan. 26, 1877; P. J. P. Wetherall, Madras S.C., Jan. 26, 1877; G. M. Miller, C.B., 79th Foot, March 25, 1877; W. H. R. Simpson, Royal Artillery, March 30, 1877; and H. Renny, Royal Artillery, April 1, 1877.

MEMORANDA.

Capt. and Hon. Major W. Clements, late 51st Foot, has been permitted to commute his retired full pay; March 26, 1877.

Paymr. E. Courtney, late of the Control Department, to retired pay from April 15, 1877.

The Militia Gazette.

WAR OFFICE, April 17, 1877.

Where not otherwise specified, the following commissions and announcements bear date April 18, 1877:—

ARTILLERY.

Durham—Walter Charles Smithson, gent., to be Sub-Lieut.

Kent—William Nichols, gent., to be Sub-Lieut. (Supy.).

Limerick City—Richard Rose O'Grady, Esq., late Capt. 44th Foot, to be Capt.

Sligo—Capt. and Hon. Major J. E. Knox resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement. Capt. H. W. J. Hubback, Royal Artillery, to be Adjt.; April 5, 1877.

Wicklow—Lieut. R. T. Welch to be Capt.

INFANTRY.

1st Derby—Sub-Lieut. A. L. Ussher, from the Queen's Own Royal Tower Hamlets Militia, to be Sub-Lieut.; April 4, 1877.

Dorset—Capt. F. J. A. Dunn, from the King's Own Royal Tower Hamlets Militia, to be Capt.

2nd or North Durham—Sub-Lieut. G. W. Freckleton to be Lieut.; April 14, 1875. Sub-Lieut. A. Reid, to be Lieut.; June 9, 1875. Sub-Lieut. the Hon. T. H. A. E. Cochrane resigns commission.

The Essex Rifles—Major S. G. Savill is granted the hon. rank of Lieut.-Col.

Royal Flint—Capt. A. P. Roberts resigns commission.

West Kent—Capt. J. C. Moore resigns commission.

3rd Royal Lancashire—Sub-Lieut. W. S. Stewart-Savile resigns commission; March 31, 1877.

6th Royal Lancashire—Arthur De Salis Hadow, gent., to be Sub-Lieut.; April 3, 1877.

Royal South Lincoln—Lieut. G. C. Downing to be Capt.

Royal East Middlesex—Sub-Lieut. C. G. F. Edwards, from the Louth Militia, to be Sub-Lieut. (Supy.).

Royal Montgomery—Sub-Lieut. H. G. Forbes resigns commission.

2nd, or East Norfolk—Hugh Paston Mack, gent., to be Sub-Lieut.; April 4, 1877.

Nottingham or Royal Sherwood Foresters—Capt. D. A. D. Kennedy resigns commission. Sub-Lieut. C. S. P. Clinton, from the Royal Perth Militia, to be Sub-Lieut.

Shropshire—Major J. V. Lovett resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement. Capt. A. G. B. Whitmore resigns commission.

The (King's Own) 1st Stafford—Lieut.-Col. Commandant and Hon. Col. F. Chambers resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

1st Royal Surrey—William Harry Derville Rich, gent., to be Sub-Lieut. (Supy.). Alexander Clement O'Donnell, gent., to be Sub-Lieut. (Supy.).

2nd Royal Surrey—Sub-Lieut. R. F. M. F. M. Synge resigns commission; April 4, 1877.

1st Warwick—Cecil Francis Harrison, gent., to be Sub-Lieut.; April 9, 1877.

1st West York—Lieut. C. H. Bill resigns commission.

4th West York—John Parkinson, Esq., late Cornet 18th Hussars, to be Capt., vice J. Snepp, resigned; April 4, 1877.

6th West York—George Hall Ringrose, Esq., late Capt., 4th Dragoon Guards, to be Capt.

Edinburgh Light Infantry—Lieut. W. G. Campbell resigns commission.

2nd Royal Lanark—Major L. W. M. Lockhart to be Lieut.-Col. Capt. and Hon. Major J. C. Robertson to be Major.

Armagh—Thomas Wilkinson Lumley, gent., to be Sub-Lieut. (Supy.).

Carlow—Capt. W. S. Butler resigns commission.

YEOMANRY CAVALRY.

Warwickshire—Frank Osborne, Esq., late Capt. 13th Hussars, to be Lieut. (Supy.). James Broughton Dugdale, gent., to be Sub-Lieut. (Supy.).

FOREIGN MILITARY.

The *Times* states that "several conscripts of the Prussian Army, who are on a visit to or are permanently located in this country, during last week received peremptory summonses to join at once their respective regiments in Germany, and a large number of young men left London in obedience to the summons."

The death of Gen. von Voigts-Rhetz, who took a prominent part in the latest Franco-German war, occurred at Wiesbaden last week. He was a member of the German Federal Council.

The *Times*' correspondent telegraphs from Vienna, under date April 19:—"To-day and yesterday Archduke Albrecht has been celebrating the 50th anniversary of his entrance into the Army, or, rather, it is the Army which celebrates this anniversary. In reality, the Archduke has only completed forty-seven years' service in the Army, having entered it in 1830; but as three of these years, spent in active service, count, according to rule, double, he has the benefit of this. It was the will of the Emperor that the whole Army should partake in the celebration of the anniversary. All the generals commanding the military districts have come up in person, while all the different branches of the Service—the regular Army, the Austrian Landwehr, and the Hungarian Honveds—and all the different military institutions and establishments have sent up representatives, and yesterday morning the Minister of War, by order of the Emperor, presented the Army to the Archduke. According to programme, this presentation was to be made in the open air, on the terrace extending before the Archducal Palace; but the weather interfered with this intention. It had been raining and snowing incessantly for two days, and the presentation was made in the long corridor which adjoins the Archducal Palace. Besides the Austrian, the German and Russian Armies likewise sent their representatives—the former in the person of Major-Gen. von Los, General *à la suite* of the Emperor William, and a deputation of the 2nd East Prussian Regiment of Grenadiers, of which the Archduke is colonel; while the Russian Army was represented by a deputation from a Lithuanian regiment, of which the Archduke is colonel. Yesterday evening there was to have been a great *Zapfenstreich*, or military serenade, by torchlight, and this morning a great review; but both had to be postponed on account of the bad weather, the first indefinitely, the second till Saturday next. Ever since Archduke Albrecht entered the Army as a boy of seventeen he has identified himself so thoroughly with it, that no one could well deny him the title of the first soldier of the Austrian Army after the Emperor. The brilliant general of 1849 at Mortara and Novara, and the victor of Custozza, is not only the most illustrious representative of the Austrian forces in the field, but has had, after the Emperor, probably the greatest share in the work which has reorganized the Austrian Army. But, more than all this, he is a sort of good angel to every officer in the Army who is in trouble and need, and endless are his donations and subscriptions to all those institutions intended to promote the intellectual advancement and the material comfort of officers and men."

THEATRES.

GAIETY.—The new burlesque here, *The Babes in the Wood*, is not a good specimen of Mr. F. C. Burnand's work, nor is it likely to rank among the number of Mr. Toole's successes, hard as that indefatigable comedian works to render it amusing. In his praiseworthy efforts he is ably seconded by Miss Farren, Miss Vaughan, Miss West, Miss Muir, and Mr. E. W. Royce, but there is a plentiful lack of fun upon the stage and of laughter among the audience. *Artful Cards* remains the chief piece.

ST. JAMES'S.—The revival of Massinger's play, *A New Way to Pay Old Debts*, has proved successful to some extent, chiefly on account of the excellent acting of Mr. Hermann Vezin, who adds Sir Giles Overreach to an already lengthy list of dramatic impersonations. Mr. Flockton's acting as Marrall is also an admirable performance. Of the rest of the cast the less said the better.

OLYMPIC.—The latest production here has been a drama from the pen of Mr. Charles Reade, called *The Scuttled Ship*, founded upon "Foul Play." The subject has already been dramatically treated by Mr. Reade in conjunction with Mr. Boucicault at the old Holborn Theatre, but the piece in its present guise is substantially a new work. If the feeling of the community be as much on Mr. Plimsoll's side as is said, the public should certainly support Mr. Neville's latest venture, particularly as the play of *The Scuttled Ship* is capitally placed upon the stage and admirably acted. The worthy manager himself represents the persecuted hero, Robert Penfold, with great earnestness, and Miss Bateman, as the lady of his love, secures another step in the favour of British audiences. Arthur Wardlaw, by Mr. Forbes Robertson, is an able performance, and so is Mr. Charles Ashford's interpretation of Welsh, the ship's carpenter. Mrs. Seymour gives a most amusing rendering of an irate landlady, and the various subordinate parts are ably filled. The play is long, but is well worth witnessing to the very end.

PRINCE OF WALES'S.—*London Assurance* has been revived here with some amount of success, and the bill has just now special attractions from the fact of Mrs. Bancroft's return after an absence of nearly a year. With characteristic modesty she appears as Pert, and plays the small part splendidly. Miss Madge Robertson's Lady Gay is disappointing, and so is the Charles Courtly of Mr. Kendal, but the Sir Harcourt of Mr. Arthur Cecil and the Cool of Mr. Sugden are excellent, and the Mark Meddle of Mr. George Honey is beyond praise. Boucicault's comedy is preceded by a new adaptation of Octave Feuillet's *Village*, already known upon the English stage as *A Cosy Couple*. This trifle is of a dull and clerical order, but it is made absolutely delightful by Mrs. Bancroft's charming impersonation of an English matron. Mr. Arthur Cecil is the Vicar, and Mr. Kendal the restless visitor who all but ruins the happiness of the vicarage, from which the piece takes its name.

CRITERION.—Every new work of Mr. James Albery is anticipated with eagerness as a possible equal in success to the *Two Roses*; but people are generally disappointed, and *The Pink Dominos* is not likely to prove an exception to the rule. It is a version of a French piece, *Les Dominos Roses*, transferred to the English stage in the boldest fashion, and endowed with dialogue of exceeding brilliancy; but the subject is course, and the suggestions coarser, despite the skill with which they are wrapt up in a cloak of apparent innocence and explanation. The author has splendid stuff in him, and has no superior in the art of writing stage conversation, but here he has simply wasted himself upon rubbish. The best played parts in the piece are those in the hands of Mr. Ashley and Miss Maria Davis. Mr. Standing and Miss Fanny Josephs are also fair, and Mr. C. Wyndham and Mr. J. Clarke tolerable. The piece is noisy, boisterous, and funny, but it hardly contains any of the elements of real success.

FOLLY.—*Robinson Crusoe* has been succeeded by another burlesque of the same wildly comic order, written by Mr. Robert Reece and Mr. H. B. Farnie. It is called *Oxygen; or, Gas in Burlesque Metre*, and is founded on the opera-bouffe of Offenbach, which has for a basis Jules Verne's story of "Doctor Ox." The notion is that a young prince and his tutor come, in the course of their travels, upon a sleepy Flemish town, which, by the aid of laughing gas, they galvanise into an unnatural life. Of course, it will be at once seen how many opportunities are afforded the famous Folly company of indulging in their multifarious funniments. Miss Lydia Thompson once more sings, acts, and dances with her excellent taste and grace, Mr. Lionel Brough and Mr. Willie Edouin again revel in uncontrollable eccentricity, Miss Ella Chapman repeats her banjo solos, and Miss Violet Cameron looks as pretty as usual. The Folly audience seem to ask for nothing more than this sort of thing, and it would be idle for any one to blame Mr. Henderson for omitting to provide an entertainment of a higher class. We are sorry to see in a French paper a direct statement that the piece was *pirated* without the leave of M. Verne, or even without asking for his consent.

A leather case expressly designed for the use of officers and sportsmen when travelling, to carry top-boots, trees, brushes, blacking, &c., has been patented by Messrs. Sparkes Hall, of Regent-street. The case will doubtless be found of great use to those for whose benefit it has been brought out.

BIRTHS.

FREEMAN.—April 12, at Gladstone House, Southsea, Hants, the wife of T. A. Freeman, Esq., 70th Regiment, of a daughter.

FELLOWES.—April 12, at Landguard Villa, Southsea, the wife of Lieutenant Charles J. Fellowes, of a daughter.

FREEHOLD MANUFACTURING PREMISES, in full working order, FOR SALE. Sound investment for a gentleman with about £9,000. Also a partnership in a small manufacturing business, about £1,500, For particulars, apply to "Business," Willing, jun., Advertising Office, 301, Strand, London.

TO LADIES.—TO BE SOLD, two new COURT DRESSES, and several others. Apply to Madam Roberts, 8, Catherine Street, Buckingham Palace Road, Pimlico, S.W.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND-STREET,
HAS REMOVED TO 173, PICCADILLY,
Opposite Burlington Arcade

THOMAS WHITE'S
CELEBRATED CAMPAIGNING KIT,
CONSISTING OF
BEDSTEAD, BEDDING, BLANKET, PILLOW, BATH, WASHSTAND, BASIN, CAMP-STOOL, BUCKET, LANTERN, POLE-STRAP, LOOKING-GLASS, PYJAMAS, AND SLEEPING CAP.
ALL OF WHICH ARE CONTAINED IN HIS
LOCK-UP WATERPROOF BAG.

Which, when packed with the above articles, supplies room for clothing and other necessaries. The chief feature in this Kit is T. White's FOLDING BEDSTEAD (recently improved), weighing 16lbs., price 30s.; or his larger sized ditto, 18lbs., price 35s., intended for officers entitled to carry extra weight. Also his CANTEENS for company messing, to cook for and dine three or more officers, as supplied and thoroughly tested during the Manœuvres of 1871, 1872, 1873, 1874, and 1875. This Canteen was used by Sir Garnet Wolseley, G.C.M.G., K.C.B., his Staff, and the 42nd Highlanders (the Black Watch), and other regiments during the Gold Coast campaign, and is recommended and patronized by the highest military authorities.

The above Campaigning Kit, or Canteens, and in most instances both, have been supplied to his Majesty the Emperor of Germany; H.R.H. the Duke of Cambridge, K.G., &c.; H.R.H. the Duke of Connaught, K.G., &c.; H.S.H. Prince Edward of Saxe-Weimar, C.B.; the late General Sir Hope Grant, G.C.B.; Generals the Right Hon. Sir John Michel, G.C.B.; Sir R. Walpole, K.C.B.; Sir Charles Ellice, K.C.B.; Major-Generals Sir Charles Staveley, K.C.B.; Sir Alfred Horsford, G.C.B., Military Secretary; J. S. Brownrigg, C.B.; Henry Smyth, C.B.; Lord Mark Kerr, C.B.; D. Lysons, C.B., Q.M.G.; Sir Thomas MacMahon, Bart., C.B.; Sir E. Greathed, K.C.B.; G. V. Maxwell, C.B.; Hon. A. Hardinge, C.B.; C. Shute, C.B.; W. Parke, C.B.; A. J. Herbert, C.B.; and Sir Garnet J. Wolseley, G.C.M.G., K.C.B., besides some thousands of officers of nearly every branch of and regiment in the Service.

THOMAS WHITE,
CAMP AND BARRACK FURNISHER,
Begs leave to inform Commandants of Corps, Presidents of Messes, and Officers generally, that he
IS PREPARED TO SUPPLY ON HIRE
EVERYTHING NECESSARY FOR OFFICERS' MESSES,
Including
MARQUEES, FURNITURE, BOARDED FLOORS, PORTABLE KITCHENS,
WHITE'S CELEBRATED FIELD RANGE,
Cooking Utensils, Cutlery, Electro-Plate, Crockery, China, Glass, &c.

The same will be securely packed and forwarded, accompanied by an experienced assistant, if desired, to any part of the United Kingdom.

THOMAS WHITE'S
STANDING CAMP TENT KIT,

As supplied by him for 12 years to the National Rifle Association at Wimbledon, and to Officers at Aldershot when under canvas, consisting of the following articles:—

Wood Folding Camp Bedstead
Hair Mattress
„ Pillow
Folding Chair
Sponge Bath
Water Can
Tent Pole Strap
Strip of Matting
Tripod Washstand.
Looking Glass
Basin
Lantern

Can be had on hire, in any number, to meet the requirements of regiments or County Rifle Meetings. The weight of each Kit complete is about 80lbs. The Kit includes everything necessary for camping out, and is looked upon by the large number of officers who have used it in England Ireland, and Scotland as a great convenience, saving them the trouble and annoyance of looking out, packing, and conveying their own goods (which are often unfitted for the purpose) to the camping ground.

P.S.—The Campaigning Kit is for Sale, and not for Hire; the Standing Camp Tent Kit is for Hire only.

Full details, Illustrated Price Lists, and Estimates for Officers' Messes, may be had post free on application to

THOMAS WHITE, CAMP FURNISHER, ALDERSHOT.

A CORRECT IMPRESSION

Prevails among the public that Silks are generally dearer, and that they cannot now be bought at former prices; but this idea will be removed, as far as MESSRS. JAY'S transactions are concerned, by an inspection and comparison of the under-mentioned BLACK SILKS, which are:—

3s. 9d.	per yard	...	...	worth 5s. 3d.
4s. 6d.	„	...	...	worth 5s. 9d.
5s. 3d.	„	...	...	worth 6s. 9d.
5s. 9d.	„	...	...	worth 8s. 3d.
6s. 9d.	„	...	...	worth 9s. 6d.

FOREIGN VELVETS, from 4s. 6d. per yard.

MESSRS. JAY, having had consigned to them before the rise in the price of Silk, a very large stock of these elegant Dress Materials, they are enabled to sell Black Foreign Velvets at 4s. 6d., 5s. 6d., 6s. 6d., and 7s. 6d. per yard. Patterns free.

JAY'S,
THE LONDON GENERAL MOURNING WAREHOUSE, REGENT STREET, W.

DR. J. COLLIS BROWNE'S
CHLORODYNE.
THE ORIGINAL AND ONLY GENUINE,
Which is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever Croup, and Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout Cancer, Toothache, &c.

From Lord FRANCIS CONYNGHAM, Mount Charles, Dec. 11, 1868.

Lord Francis Conyngham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half-a-dozen bottles sent at once to the above address.

⁂ Earl Russell communicated to the College of Physicians that he had received a despatch from her Majesty's Consul at Manilla, to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, Dec. 31, 1864.

CAUTION.—BEWARE of PIRACY and IMITATIONS.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. COLLIS BROWNE was, undoubtedly the INVENTOR of CHLORODYNE; that the story of the Defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See *Times*, 13th July, 1864.

Sold in Bottles, at 1s. 1½d., 2s. 9d., and 4s. 6d. None is genuine without the words "Dr. J. COLLIS BROWNE'S CHLORODYNE" on the Government stamp. Overwhelming Medical Testimony accompanies each bottle.

SOLE MANUFACTURER
J. T. DAVENPORT, 33, Great Russell Street, Bloomsbury,
LONDON.

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.—Chairman, the Duke of SUTHERLAND, K.G.—Communications to be addressed to T. Gibson Bowles, Esq., Hon. Sec., 2, Harriet Street, Lowndes Square, S.W.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON-SEA, near Ramsgate, in 1 hour and 45 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE."
"The situation of the palatial establishment on a cliff somewhat removed from the town, though conveniently proximate thereto, is an advantage greatly augmented by its superb suite of ozone and various other health-giving baths, its well-constructed rink, its excellent and cheerfully appointed table d'hôte, and all other liberal additions of comfort, luxury, and amusement since the hotel has come into the present enterprising hands."—"Daily Telegraph," March 29.

THE "GRANVILLE" HOTEL.
The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL.
"Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

Address the Manager, Granville Hotel, St. Lawrence-on-Sea, Ramsgate.

COLT'S NEW GOVERNMENT ARMY REVOLVER,

after a severe competitive trial by the U. S. Ordnance Department in 1873 and 1876, has been exclusively adopted by the United States Government, and the whole of the United States Cavalry is now armed with them. It is now made to take the English Government Boxer cartridge. Length of barrel 5½ and 7½ inches.

In the trial of 1869, advertised by another maker, the Colt's pistol used was a muzzle-loader adapted to the use of metallic cartridges, which pistol has not been made or sold after that year.

COLT'S NEW 41-CAL. FIVE-SHOT DERINGER REVOLVER,
Weight 12 ozs.

COLT'S NEW 38-CAL. POLICE REVOLVER,

HOLLOWAY'S PILLS.—The changes of temperature and weather frequently upset persons who are most cautious of their health, and most particular in their diets. These corrective, purifying, and gentle aperient Pills are the best remedy for all defective actions of the digestive organs. They augment the appetite, strengthen the stomach, correct biliousness, and carry off all that is noxious from the system. Holloway's Pills are composed of rare balsams, unmixed with baser matter, and on that account are peculiarly well adapted for the young, delicate, and aged. As this peerless medicine has gained fame in the past, so will it preserve it in the future by its renovating and invigorating qualities, and its incapacity of doing harm.

PURE AERATED WATERS.

ELLIS'S RUTHIN WATERS.

CHLORODYNE.—FREEMAN'S is the original and only true.—Lord Chancellor Selborne, Lord Justice James, and Lord Justice Mellish decided in favour of R. Freeman and against J. C. Browne and J. T. Davenport; see "Times" of July 24, 1873. Thousands of medical practitioners testify that there is no substitute for it in the treatment and cure of asthma, bronchitis, coughs, and other chest affections, neuralgia, fevers, cholera, dysentery, spasms, and all nerve pains. Bottles 1s. 1½d., 2s. 9d, 4s. 6d., 11s., and 20s. Sold by patent medicine dealers in all parts of the world. See that "Freeman's Original Chlorodyne" is engraved on the Government stamp.

W.C

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall.—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO, 283, Strand, London, W.C.

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

ESTABLISHED 1864.

TIMEWELL,
SPECIAL TAILOR & MILITARY OUTFITTER TO GENTLEMEN WHO REQUIRE NO CREDIT
8, SACKVILLE STREET,
PICCADILLY, LONDON, W.

A large private trade of highest class and character, yielding to its patrons the full advantages of their position.

E. LAZENBY and SON'S PICKLES, Sauces, and Condiments.—E. Lazenby & Son, sole proprietors of the celebrated receipts and manufacturers of the pickles, sauces, and condiments so long and favourably distinguished by their name, beg to remind the public that every article prepared by them is guaranteed as entirely unadulterated.—92, Wigmore Street, Cavendish Square (late 6, Edward's Street, Portman Square), and 18, Trinity Street, London, S.E.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated sauce are particularly requested to observe that each bottle prepared by E. LAZENBY and SON bears the label used so many years, signed, "*Elizabeth Lazenby.*"

In consequence of Spurious Imitations of
LEA and PERRINS' SAUCE, which are calculated to deceive the Public, LEA and PERRINS have adopted A NEW LABEL, bearing their Signature—
LEA AND PERRINS,
which signature is placed on every bottle of
WORCESTERSHIRE SAUCE,
and without which none is genuine.

Sold Wholesale by the Proprietors, Worcester, Crosse and Blackwell, London; and Export Oilmen generally.

Retail, by dealers in Sauces throughout the World.

COCKS' READING SAUCE
Is the best and most economical Sauce ever manufactured for
FISH, ENRICHING SOUPS, GRAVIES, &c.

ROYAL SCHOOL FOR DAUGHTERS OF OFFICERS OF THE ARMY.

The daughters of all officers in her Majesty's Army, inclusive of the Royal Marines, on full or half pay, or who may have died in the service, are eligible. The ages of admission are from ten to fifteen.

The next election will take place on June 20, 1877.

Pupils elected by votes of subscribers pay only £12 per annum.

With a view to afford the advantages of a good education to the daughters of officers of competent means at a moderate cost, and at the same time to aid the primary object of the Institution, a limited number of pupils are admitted on payment of £80 a-year, which includes all extras. The new form of application can be obtained at the office.

Each donation of £5 5s. entitles to one life vote. Each annual subscription of 10s. 6d. entitles to one vote at all elections during the current year.

Further contributions to meet the current expenses are earnestly solicited by the Committee.

By order,
G. W. FORSTER, Secretary.
No. 22, Cockspur Street, London.

NAVAL CADETSHIPS, &c.

"EASTMAN'S" ROYAL NAVAL ACADEMY, BURGOYNE HOUSE, SOUTHSEA.
Principal, since 1860, G. EASTCOTT SPICKERNELL.

At the last two Naval Cadet Examinations pupils took the *First* Place. More than 1,000 pupils have entered her Majesty's Service.

The House is situated close to and directly facing the sea. Pupils have good Bathing and Boating, under careful superintendence.

Pupils are received from Nine years of age and upwards. To make the School specially adapted for Junior Pupils intended for the Royal Navy and the Public Schools, Senior Pupils are not now received.

NAVAL CADETS, ASSISTANT CLERKS, HOPE HOUSE, SOMERSET-PLACE, SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.

At the competitive examination in November, 1875, and at the recent examination in June, of candidates for Assistant Clerkships, all the pupils sent up from this Establishment were successful.

MALVERN COLLEGE.

The SECOND TERM will begin on MONDAY, May 7th.

HOME FOR INDIAN CHILDREN, MALVERN.
Fees, from 100 Guineas. CLERICAL, MEDICAL, and MILITARY references.
Address—Rev. A. S. RICHARDSON, Castle House, Malvern.

NAVAL CADETS EXAMINATIONS.—A Retired Naval Instructor can prepare young gentlemen for the above. Address, T. S. Crockford, 37, Cranfield Road, Brockley, S.E.

PARIS.—French HOME offered, in a Clergyman's family, to young gentlemen, for acquiring the French language. Address M. Pasteur Lalot, Military Chaplain, 265, Boulevard Pereire.

BOURNEMOUTH.—ANGLO-GERMAN COLLEGE for YOUNG LADIES. Principal, Mrs. SCHOLEFIELD (geb. M. Macat). The house is pleasantly situated, overlooking the pleasure-grounds and Pine Woods, and is within a few minutes' walk of the sea. Special arrangements, with partial study for delicate children.—For prospectuses, &c, apply Villa Beulah, Crescent Road.

EDUCATION (First Class) for the Sons of Gentlemen, requiring pure country air and home comforts, within twelve miles of London. Limited to 25 pupils. Healthy situation, 17 acres of grounds, cricket and football field, &c. Thorough English, classics, mathematics, modern languages, &c. A good table is kept, and dairy farm attached. Fees, 50 and 60 guineas per annum. North Cheam House, near Sutton, Surrey.

ELIZABETH COLLEGE, GUERNSEY.

Preparation for the Universities, Army, Navy, and Civil Service. Six Scholarships at Oxford. Valuable school exhibitions and prizes. French and German have the same time and attention as Classics and Mathematics. There is a Modern Department, where Classics are not obligatory.

Terms for Boarders (ages from 8 to 16), from 50 to 65 Guineas, inclusive of school fees.

Next term commences May 1st.

LITTLE ST. JOHN'S, Hurstpierpoint, in connection with St. Nicolas College, Lancing, and St. John's College, Hurstpierpoint, is established with the sanction and under the inspection of the Provost and Fellows of St. Nicolas College, for the EDUCATION of LITTLE BOYS, from six years of age, preparatory to their entering either of the above or other public schools. For particulars apply to the Lady Principal, Little St. John's, Ditchling, Hurstpierpoint, Sussex. Boys are prepared to pass the examination for Naval Cadets.

WELLINGTON COLLEGE.—DURAND SCHOLARSHIP.—There will be an election in June to a Scholarship on this Foundation. It is of the annual value of about £80, and is open only to boys between the ages of 12 and 14 who are sons of an officer who was in the service of the late H. E. I. Company, or of an officer in H. M. Army, who has served in the India Staff Corps or in any way attached himself permanently to the military service of her Majesty in the East Indies. For particulars apply to Rev. the Bursar, Wellington College, Wokingham.

ARMY EXAMINATIONS. — Gentlemen preparing for the Staff College, Woolwich Academy, Cadetships, Aides-de-Camp, &c., are respectfully informed that Professor J. Poirand, 49, Sydney Street, Brompton, S.W., has a few hours disengaged of which candidates may avail themselves. Subjects—French, Geometrical Drawing, Perspective, and Surveying (theoretical and practical).

DETECTOR'S LETTERS, REPRINTED
From the "Medical Circular."
Now Ready, Twenty-seventh Thousand, price 1s. 6d., post free 1s. 8d.

REVELATIONS OF QUACKS AND QUACKERY.

"'Detector' has done his work well. We advise the public to purchase these 'Revelations,' and see how the disgusting tribe of sham doctors are pilloried and their doings related."—Public Opinion.

London: BAILLIERE, TINDALL, and Co., King William Street, Strand.

ARMY AND NAVY CO-OPERATIVE SOCIETY, LIMITED.

Established for the advantageous supply of
PROVISIONS AND GOODS OF ALL KINDS
TO ITS MEMBERS,
Comprising
Officers and Non-Commissioned Officers serving, or who have served,
The Widows, Sons, and Daughters of Officers, and Friends introduced by the above;
Also, the Secretaries of Naval and Military Clubs, and the Representatives of Regimental and Naval Messes and Canteens.

For further particulars address the Secretary, 117, Victoria-street, Westminster, S.W.

EMANUEL,
3, THE HARD, PORTSEA,
By appointment to H.R.H. the Duke of Clarence, 1827; H.R.H. the Duke of Edinburgh, 1872.

New Designs in High Class Jewellery at Moderat Prices.
Bridesmaids' Lockets from Three Guineas.
Bracelets from Five Guineas.
English and Foreign Watches and Clocks,
Regimental, Presentation, and Prize Plate.
Old Plate, Jewels, Epaulets, &c., bought.
Foreign Money exchanged.
Miniature Copies of all Medals and Decorations;
Field, Race, and Opera Glasses, and Nautica Instruments.
Rare China, Bronze and Curios.
Collections Valued and Purchased.
Cheques payable to EMANUEL EMANUEL

SOLE ADDRESS, 3, THE HARD, PORTSEA

LAWRANCE D. PHILLIPS AND CO.,
MILITARY, COURT, AND GENERAL
TAILORS AND OUTFITTERS,
13, GEORGE STREET, HANOVER SQUARE, LONDON, W

Established for upwards of half a century on the Credit System, but now conducted exclusively for Ready-Money Payment and supplying

UNIFORMS AND MUFTI
Of precisely the same high-class quality as heretofore
AT GREATLY REDUCED PRICES.

ESTIMATES ON APPLICATION.

OVERLAND ROUTE and SUEZ CANAL. Under Contract for the conveyance of the Mails to the Mediterranean, India, China, Japan, and Australia. The Peninsular and Oriental Steam Navigation Company dispatch their Steamers from Southampton, *via* the Suez Canal, every Thursday; from Venice every Friday; and from Brindisi, with the Overland Mails, every Monday.

Offices—122, Leadenhall-street, E.C., and 25, Cockspur-street, S.W.

HALL LINE.—STEAM from LIVERPOOL to BOMBAY, via SUEZ CANAL.—Average passage, 26 days, including all detentions. Sail punctually as advertised.

Passengers booked at through rate from London, via Genoa, Naples, and Alexandria (Rubathino Line), joining the "Hall" steamer at Suez. Full particulars on application.

The magnificent fast steamship CITY OF BALTIMORE, 2,292 tons, 300 horse-power nominal, sailing 30th April. This steamer has been specially adapted for the East India trade. Her saloon and state-rooms are spacious, well-ventilated, and all on the upper deck. The accommodation is unsurpassed. Only first class passengers taken. Fare from Liverpool, 45 guineas. Surgeon and stewardess carried.

Succeeding steamers:—

Childwall Hall	19th May.
Trentham Hall	30th May.
Branksome Hall............	To follow.

For passage apply in London to Henry S. King and Co., 65, Cornhill, and 45A, Pall Mall; for freight, to J. H. Wackerburth, 18, Cullum Street, E.C.; or for freight and passage to ALEXANDER and RADCLIFFE, 8B, Liverpool and London Chambers, Exchange, Liverpool.

H.M. TROOPSHIPS, PORTSMOUTH DOCKYARD

OFFICERS' BAGGAGE cleared through Customs, Warehoused, Shipped or Forwarded, by CURTISS and SONS, Railway and Shipping Agents, 88 to 94, Broad Street, Portsmouth.

Letters and telegrams for passengers promptly delivered free of charge.

CURTISS and SONS' rates for Warehousing or removing Furniture, &c., are exceedingly low.

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER STREET BAZAAR, W.

The warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.
Store Warehouses Baker Street Bazaar, W.

NAVAL AND MILITARY CLUB.—The ANNUAL GENERAL MEETING of this Club will be held at WILLIS'S ROOMS, 26, King Street, St. James's, on MONDAY, the 28th of May, at 2.30 p.m.

April, 1877.

FURNISH YOUR HOUSE or APARTMENTS THROUGHOUT on MOEDER'S HIRE SYSTEM. The original, best, and most liberal. Cash prices; no extra charge for time given. Large useful stock to select from. Illustrated price Catalogue, with terms, post free. 248, 249, and 250, Tottenham Court Road. Established 1862.

Printed by JAMES MELDRUM and published by EDWARD O'BRIEN PALMER for the Proprietors, at the Office, No. 16, Wellington-street, Strand.—SATURDAY, April 21, 1877.

☞ *It is particularly requested that applications for copies of the* Army and Navy Gazette, *and Advertisements, shall* not *be sent to the Editor, but to* Mr. Richard James Wood, AT THE OFFICE, 16, WELLINGTON STREET, STRAND, W.C., *to whom all business communications shall be addressed and remittances made payable.*

The subscription to the paper is 7s. per quarter, or 28s. per annum payable in advance, *inclusive of postage to any part of the United Kingdom; to India, £1 10s. 4d. per annum;* viâ *Brindisi, £1 14s. 8d.*

IN calling attention to the case of Hobart Pacha last week, Lord Camperdown had a good opportunity, of which he failed to avail himself, of pointing out the anomalous position in which naval officers are placed with regard to the State when on the Reserved or Retired Lists, or even when only temporarily on half pay. As an ex-Lord of the Admiralty, he could not help drawing up some definition of the position of the half-pay naval officer, which he assumed to be that of an officer simply "waiting for orders," who might "at any time be called upon by her Majesty to resume service;" but he soon broke away from this view of the case, and after several times referring to Captain Hobart as Admiral Hobart, he followed Lord Derby's lead in the correspondence cited, in accusing Captain Hobart of having committed a "breach of discipline" in accepting service with the Sultan of Turkey against the wishes of the Admiralty. His name was consequently removed from the "Navy List" on account of his disregarding these wishes; but he was not the first British naval officer who had served the Turkish Government, and it is notorious that his real offence was not that he accepted service with a foreign Power, but that he took the place of another naval officer who had been selected by our Government for the post he has since held. That Lord Derby was fully justified under the circumstances in insisting on his removal from the "Navy List" is undoubted; and, as a rule, it would seem well not to reconsider the propriety of a course which has once been adopted without very strong reasons for so doing. But it may happen that although the officer has been justly removed from the List in the first instance, he may subsequently have rendered such services to his country as to render his reinstatement a matter of public policy; and such, undoubtedly, were the grounds on which Lord Derby recommended that Captain Hobart's name should be restored to the "Navy List." That Lord Camperdown and a majority of the Liberal party differ from Lord Derby in his appreciation of Hobart Pacha's services to this country is evident; but what we insist upon is that the question should be viewed entirely as one of policy, and that it has technically, at least, nothing to do with discipline. We now learn that the Government have practically dismissed Captain Hobart once more, as it can not be expected he will give up his command of the Turkish Fleet. Such a case as that of Captain Hobart's should, however, direct attention to the curiously independent position of the half-pay naval officer. An officer on half pay is not subject to the Articles of War, and cannot, in consequence, technically commit any breach of discipline. The half-pay Lieutenant may knock down his former Captain, whether the latter is on full or half pay, and he cannot directly be called to account by court-martial or otherwise. This is one side of the question, but the Government give a retaining fee to the half-pay officer, and his future prospects in the Service are dependent on the good opinion of the Admiralty, while her Majesty has the power of removing him from the List of the Navy at pleasure. Hence, indirectly a half-pay officer is really nearly as amenable to Admiralty wishes as the officer on full pay; but if he should decide to give up his retaining fee and his future prospects in the Navy, he is as free as a civilian to do what he pleases. Practically, half-pay naval officers are not in the habit of asking the Admiralty for leave to accept such employments as may be offered them, and there is no rule laid down on the subject. It is generally understood that officers should not accept service with foreign Powers without Admiralty leave, and the same thing holds good about officers going abroad; but this leave is easily granted, almost as a matter of course, during peace time. Recently we had a Captain on the Active List commanding a ship in the Chinese Navy, and Commanders taking out gun-boats for the Chinese Government, other officers in Japan, and so on. It is all very well to talk of "waiting for orders," but no one knows better than the Admiralty officials that even with the present reduced lists officers must frequently, in the ordinary course of service, wait years for employment, and that the amount of half pay received by naval officers renders it impossible for married men without considerable private means to continue in the Service without turning their talents to account. It is said that a gallant Admiral on the Active List at one time derived a considerable income from the sale of his paintings. If we look to the Retired List we shall find that the officers, whether reserved or retired, are theoretically in precisely the same position as those on the Active List or half pay; though as the retired pay may fairly be taken as a pension for previous service, and not a retaining fee, there clearly should be some defined distinction between the two. It is not even distinctly apprehended by retired officers whether they are liable to be called upon to serve in case of war or not. Such is the curiously anomalous situation in which the country stands with regard to its officers. From what we have said above it is evident that in many cases the Admiralty have hazy notions as to what the men on half pay are doing, and we see the inconvenience of this in the astonishing appointments which are occasionally made. Some years ago a Captain who was notoriously not answerable for his actions was appointed to a ship and actually joined and attempted to do duty for a few weeks; and we need only refer to a recent court-martial to show that "what all the world knows" does not always reach the ears of the authorities at Whitehall. We ask them for some more definite position for naval officers on half pay. Let "half pay" be abolished, and "waiting orders" on two-thirds of full pay without allowances be substituted for it. Let all officers "waiting orders" be under martial law, and forbidden to accept any employment whatever without Admiralty leave. The Admiralty should then lay down certain courses of conduct for officers to adopt, and insist upon their acquainting themselves with all the new questions bearing on their profession whilst waiting orders before being eligible for first appointments. On the other hand, officers on the Retired List should be free from all interference, and should only be liable to such restrictions as other British subjects. That in good time it will be found necessary to do something towards more strictly defining the positions of half-pay officers we cannot doubt, and the Service and the country will be great gainers when waiting for orders from the Admiralty is substituted for the present "happy-go-lucky" system of half pay. Mr. Childers, when First Lord of the Admiralty, described the length of time naval officers rested on half pay as the "first and greatest" of the evils under which the Navy was suffering, and, though matters have somewhat improved since then, he might even now repeat his assertion without fear of contradiction.

A French military critic observes on the difference existing between the German and French armies, as regards their composition. After pointing out that the number of officers in the French Army is far superior to that in the German Army, he remarks that Germany has eighteen army corps, and that France has eighteen army corps, with a 19th in Algeria. But France has this advantage, none of her corps, like those of Bavaria, Saxony, and Wurtemburg, belong to independent States, and she has no Guard. Now, in the idea of a Republican critic, a Guard is a source of weakness, because in order to recruit it other corps are weakened. But surely the Old Guard of Napoleon, the Middle Guard, and the Young Guard proved a moral and material addition to the force of the whole army. As long as this *corps d'élite* could stand the shock of battle, the other troops remained firm, and it was only when, as at Waterloo, the cry went up that the Guard was broken, that the Line regiments lost confidence and fled. In the way of unity, the 15th German Army Corps sins to a frightful degree. This Alsace-Lorraine Corps, in addition to Prussian troops, comprises a Bavarian brigade, a regiment of Saxon Infantry, a regiment of Wurtemburg Infantry, a regiment of Bavarian Cavalry, a regiment of Saxon Foot Artillery, and a battalion of Bavarian Foot Artillery. But, as the writer remarks, if the unity is greater in France, what a difference is to be seen in the composition of the Staffs, and he takes the 5th French Army Corps, commanded by General Bataille, and the 5th German Army Corps, commanded by General Von Kirchbach. The French commander has two field officers as Aides-de-Camp, and two orderly officers. The German commander has none. The French army corps has no central hospital or veterinary service. The Chiefs of the Staff of the two French divisions composing the 5th Army Corps are Colonels; in the German Army they are Majors. In the French corps there is one division and three brigades for six regiments of Cavalry; in the German corps, two brigades for five regiments. With the Artillery it is much the same. It is, therefore, reckoned that the Staff of each French army corps possesses twenty-five more officers than the German army corps, and this accounts in a great measure for the difference which exists in the War Estimates of the two countries—France, £22,000,000; Germany, £16,000,000. It is remarked that the Germans have three Inspectors of the Forces and an Inspector-General of Cavalry, but Generals and officers only form a grand total of eleven. On the other hand, the Governor of Paris, General Ladmirault, has a Staff of twenty-one officers, with twenty-five Intendants and Sub-Intendants; and it is nearly the same with the Governor of Lyons, General Bourbaki. The military government of Paris gives employment to sixty-six officers, of whom six are Generals. Berlin, which is neither so large nor so turbulent, has only eight officers to watch over its safety, two of whom are Generals. The difference is certainly enormous. The 19th Army Corps, in Algeria, commanded by General Chanzy, has forty-seven Staff officers. The Emperor of Germany has seven Aides-de-Camp, one of whom, the Prince de Reuss, is a Colonel; six are Majors, two of whom, Major Von Bulow and Major Von Stulpnagel, are detached, the first being Military *Attaché* at Paris, the second at Munich. The President of the French Republic has the same number of Aides-de-Camp—one General, three Colonels, one Captain, and three Lieutenants. Three of these belong to the Staff Corps, whilst all the Aides-de-Camp of the Emperor William are drawn from the Cavalry and the Infantry. The German War Minister, General Von Kameke, has only two Captains for Aides-de-Camp. The French War Minister, General Berthaut, has eleven Aides-de-Camp, three of them field officers. The permanent Staff in France is composed of forty Colonels, forty Lieutenant-Colonels, 120 Majors, 205 Captains, and forty-seven Lieutenants, which, together with orderly officers and officers detached, makes a grand total of 1,200. The whole number in Germany only amounts to 190, this including the Staffs of Saxony, Bavaria, and Wurtemburg.

The modified regulations respecting navigation and pilotage duties to which we alluded last week, have certainly greatly improved the position of Navigating Sub-Lieutenants who have the good fortune to be "acting" at this moment and can be immediately transferred to the executive. But the lift thus given to the most junior of the navigating class only makes those who have already passed the College, and are now mounting well up their list, feel more than ever neglected. The position of the senior Navigating Sub-Lieutenants is not cheerful, for, if they join the executive on promotion, their chances of reaching the rank of Commander are rather remote. To begin with, they will be about four years longer on the Junior List than those who now are enabled to join the Sub-Lieutenants' List on passing, and it is quite possible that an "acting" Navigating Sub-Lieutenant of to-day may go over the head of a brother officer who has been some three years confirmed, but will not come on the Lieutenants' List for another four years. The average age of a Navigating Lieutenant on reaching that rank is about twenty-eight, while the Lieutenant is quite four years his junior in age. This, it must be admitted, is a remarkably bad start in a new line, and it is not surprising that many who are approaching the top of the Navigating Sub-Lieutenants' List, and may shortly expect to be selected for promotion and be given the choice of electing transfer to the executive or of remaining in the expiring navigating line, scarcely know how to act, feeling that they are placed at a disadvantage in comparison with their brother officers; whichever course they may adopt. If they accept the transfer to the executive they must be content to be placed at the bottom of the list of Lieutenants, although they have far more service and seniority as commissioned officers than the majority of those whose position on the list of Lieutenants is three or four years senior to them, and, at the same time, they suffer a reduction in their pay and can see no reasonable chance of reaching the higher grades of the Service. On the other hand, should they decide to remain navigating officers, they fear there will be a considerable amount of half pay in their future career, for as the number of Lieutenants and Commanders qualified for navigating duties increases, the Admiralty will not necessarily look to the navigating class for navigators. There will also be a feeling that, by appointing an executive for these duties, who will also be qualified in gunnery and equal to any executive work that might be thrown upon him by unforeseen circumstances, the efficiency of a ship will be increased. Commanding officers, too, may naturally be expected to prefer officers of the original executive when the combination of navigating duties with their own is in full working order, and those qualified in navigation who belong to that line will be brought into direct competition for employment with the original navigators. The Admiralty, in introducing the present scheme for the ultimate extinction of a separate navigating class, has done its best to ensure the claims of the navigating line being respected, and it would be impossible to work so radical a change without treading on somebody's toes. But as there is now reason to believe that the new system of providing for the efficient navigation of our ships will be successful, we would suggest that the seniors of the distinct line which is to be allowed to die out should be given an opportunity of assisting at hastening its end by offering them a slightly increased retirement. Should their position not be as unwelcome and unpromising as we have been led to believe it is thought to be by a large number, those who accepted the extra retirement would be comparatively few. But if, on the other hand, the intended absorption of their particular branch has been the means of placing them in an unenviable position, nothing can be more just than to give them a loophole by which they may escape. It is particularly galling for a Navigating Sub-Lieutenant, let us say at the head of the 1874 List, to find a junior who is "acting" in 1877 walking right ahead of him, becoming an executive officer immediately, and reaching the Lieutenants' List before he has a chance of being placed at the bottom of that list. An increased retirement might therefore be offered in all fairness to the senior Navigating Sub-Lieutenants.

It is only natural that every word uttered and every act done by those who have influence over the armies of Germany should excite the profoundest interest, if not produce the most favourable impression, on all the countries of Europe. The remarks of General Von Stosch on the occasion of the entry of the second son of the Imperial Crown Prince into the naval Service indicate a great ambition—one, indeed, which those who are acquainted with the intimate thoughts of Prussians, if not of Germans, know to be the outcome of a deep-seated hope and the expression of a future policy. It is quite legitimate to aspire to be a great naval Power, and the display of the German flag in all the ports of the world where German subjects are pursuing their various callings is, no doubt, an object for which German statesmen may legitimately strive. But, unfortunately, notwithstanding the construction of the great canal, the possession of a great river, and the acquisition of a fine port communicating with our own lines of navigation, or giving access to the ocean which washes our own coasts, geographical conditions rather impair the full development of the maritime idea of Germany; and, therefore, it is no secret that her more eager and patriotic counsellors have been for years directing their attention to the outlying fringe between them and the ocean, which, inhabited by a race connected with the Germans by origin and by language, offers them a sea-board provided by the efforts of man and by natural accidents with the most excellent harbours and extensive inland navigation. This may be a dream to come true in a future more or less remote; but the hard naked fact of an increase of 122 Captains to the German Infantry, the demand for which is based upon the fear of attack from France, and on the natural repugnance of the German people to the sight of a country in which military reforms and preparation have made enormous progress, is of immense present interest. If the addition of one Captain to every regiment of Infantry were to be taken as meaning a corresponding increase of rank and file, we should have 250, the number of men in each company, multiplied by 122, to denote the augmentation which Field-Marshal Von Moltke is aiming at. But, although his proposal is made, of course, to increase the efficiency of the German Army, it by no means follows that this augmentation of Captains is coextensive with the increase of the companies, or of the cadres of the battalions; and, notwithstanding the explanations given by the great strategist of the motives which led the Government to make the demand, we are at a loss to understand the drift and scope of the measure. It was quite unnecessary to tell the French people or the German Chambers that there was a watchful and a jealous eye upon the preparations of France to resist aggression. It is preposterous to suppose that France means to aggress at present; and, notwithstanding the great encomiums which have been lavished upon her vast improvements and upon the great progress she has made in attaining a high standard of military efficiency, recent observation, as well as the reports of others, lead us to affirm that France is in no condition to make an aggressive movement against her formidable neighbour, and that she is ill-prepared, indeed, even to resist instant attack. Some have pretended to find in Field-Marshal Von Moltke's words only a sort of parade of exaggerated alarm to terrify the German Parliament into compliance with his wishes, but there is no ground for believing that his demand would have been successfully resisted had it been put forward upon his authority as a measure necessary for the greater efficiency of the German Army. At all events, the French nation is to be congratulated on the tact and temper with which the ominous announcement has been received. The Press and the people have learned a useful lesson in a terrible school; but it is something to have had such a "sweet use" extracted from their adversity as to bear menaces and threats with dignified self-control. Prudence—and, indeed, the instinct of self-preservation—may have contributed to such a result; for, shame to say, such is the state of Europe, that no possible combination in the interests of right and justice could be effected which would bar the will of the great central Power to effect any object it had in view by force, unless it could be shown that ultimately the consequences might be injurious to its own best interests. The disposition of every man, and horse, and gun, from one end of France to the other, is not only known in Berlin, but is narrowly watched, and we cannot but think the apprehensions expressed by Field-Marshal Von Moltke were not only exaggerated, but that they must have been known by those best informed on the subject to rest on no solid foundation. The words and acts of the great strategist have added one to the factors of the calculation of force which are about to operate so powerfully on the future of the world.

It is with much regret we have to announce the death of Mr. Herbert H. Jollye, R.N., Secretary to Rear-Admiral Rice, at Malta Hospital, on the 14th inst. His death is universally regretted in the Fleet, and his funeral was attended by Admiral Rice and the Captains of nearly all the ships in the harbour, as also by a large number of officers from the Fleet and military officers.

Commander Clayton Mitchell, lately in command of the Flora, has returned to England in the Orontes on being relieved by Commander H. J. F. Campbell.

The Royal Medal of the Royal Geographical Society has been awarded to Captain Sir George S. Nares for having commanded the Arctic Expedition of 1875-6, during which the ships and sledge parties respectively, reached a higher northern latitude than had previously been attained, and a survey was accomplished of 300 miles of coast-line, facing a previously unknown Polar sea; also for his geographical services in command of the Challenger Expedition. A gold watch, with an appropriate inscription, has also been awarded to Captain Albert Markham for having commanded the northern division of sledges in the Arctic Expedition of 1875-6, and for having planted the Union Jack in 83 deg. 20 min. 26 sec. N., a higher latitude than had ever been reached by any previous expedition.

On Monday the Hibernia, flag-ship of Rear-Admiral Rice, will be paid off and will recommission on the following day.

The orders for the Active to be recommissioned immediately on paying off appear to have been given under a misapprehension, for a more searching inquiry into her condition revealed the fact that she was not nearly so fit for a further term of service as was thought. She is ordered to be out of the dockyard hands to-day, but will not leave England for some time. Her orders at this moment are to proceed to the West Coast of Africa to meet Commodore Sullivan, C.B., who will shift his pendant to her should the Tourmaline be as unfit for service as is currently reported.

Rear-Admiral the Hon. Fitzgerald Foley will hoist his flag in the Asia on Monday as Superintendent of Portsmouth Dockyard.

We alluded last week to the conclusion of the sittings of the committee appointed to inquire into the working of the Royal Naval College, and stated that the members had received the thanks of the Admiralty. We may now add that Mr. Loveless, Superintendent of the Greenwich Hospital branch of the Accountant-General's Department, who acted as Secretary, has been awarded a gratuity of £50 for the services he rendered.

The censure passed upon Mr. Rudge, Assistant-Paymaster, one of the witnesses called before the court-martial assembled for the trial of the late Captain of the Barracouta, for the manner in which he gave his evidence, has not been unnoticed by the Admiralty. It was suggested at one time that the officer in question would also be put on his trial, but the Admiralty has taken a more summary course by ordering him to be discharged to the shore. This order has been accompanied by an official expression of dissatisfaction at his conduct, and a notification that he need not anticipate being called upon for further service. By this it would appear that the officer is not removed from the "Navy List," but as he is not entitled to half pay and it rests with their Lordships whether they will permit him to retire, he is now enjoying no greater privilege than having his name retained on the Active List while he draws no pay. Still he is not "dismissed the Service," as has been stated.

Orders have been given for some gas-check experiments to be made by the Gunnery Staff of the Excellent. The gun to be used is a 64-pounder, Mark III.

It would appear that the abolition of Assistant-Professor of Fortification at the Royal Naval College has not been found to work satisfactorily, as it is now contemplated to appoint a subaltern of the Royal Marine Artillery to assist Captain Needham, R.M.A., in his duties. There are at present fifteen Marine officers studying at the College.

An addenda to the Dockyard Instructions has just been issued in a form that might well be adopted with respect to the Admiralty Instructions, so as to avoid the possibility of their ever again becoming so hopelessly confused as they are at this moment. The Dockyard Instructions were issued in 1875, and two years later care has been taken to ensure all alterations being correctly noted. The clumsy method of issuing a supplementary volume, as has been done with the Admiralty Instructions of 1862, necessitating numerous corrections and references in ink, has not been followed, for the alterations and additions have been printed in exactly the same form as the instructions and on one side of the paper only, so that the revised articles can be inserted in the volume at their proper places. We are well aware that there is every desire to hasten the issue of the new Admiralty Instructions; but should the delays which have so far attended the work be likely to continue, we would strongly advise some provisional addenda being issued to the Fleet to remedy the confusion now existing, and which has become well-nigh unbearable.

The India Office has consented to the reception of naval officers at the sanitarium at Bombay on the same terms as officers of the Army.

The amount required to provide for the commutation of officers' half pay has been growing gradually less since the first rush was made on the introduction of the scheme. Many have doubtless learned to their cost that it is better to have a small certainty than to try to start in a new line of life as a limited capitalist, and, of course, the number retiring has been reduced since the lists have reached the strength required by the Service. Thus it happens that in 1870 nearly £25,000 was paid to officers commuting, but during last year only £9,000 was appropriated to that purpose.

The orders for the Nassau to pay off and recommission have not been given too soon, for from a recent letter from the ship we learn that scarcely a dozen men remain of those who fitted out in her at Malta in October, 1873, and three of the surveying staff were not in the best of health, and will be glad to come home. There were many vacancies for petty officers, and the only men available for rating were those who had joined the ship as boys. The crew will now be readjusted on the arrival of the Tamar, and it is to be hoped that the repairs the Nassau will undergo at Hong Kong may enable her to complete another commission, though there seems to be some cause for doubt on this head.

To punish a man twice for the same offence is so entirely opposed to the rules of the Service and to a sense of justice that we are surprised to hear of one, if not two, such cases occurring on board a ship on a foreign station. The Commander seems to have given such punishment as was in his power at the time, and then, on meeting his senior officer, the offender has been again brought forward and has received an additional and more heavy sentence. The fact that the list of offences entered against a man always accompanies a punishment warrant should be sufficient to prevent such an irregularity from passing unnoticed; but the Commander in question must surely be ignorant that he is committing a grave error in first punishing a man himself and then inducing his superior officer to follow suit for one and the same offence. It may be true that the gravity of the offence was not satisfactorily met by the first punishment, but if a commanding officer cannot deal satisfactorily with an offender, he should wait until the opportunity arrived for bringing him under the notice of a senior officer.

Provided the present struggle in the East is confined to the two Powers which have just entered upon active operations, it may be accepted as doubtful whether there will be much opportunity for naval warfare. It is freely admitted by the leading Russian service journal that there is little prospect of the Black Sea Fleet coping successfully with Turkish ironclads. But torpedoes, in the use of which the Russians have been perfecting themselves, will be largely used, and already all accessible points are being protected by these weapons. Submarine mines have been laid at several points along the Black Sea coast, between the roadstead of Poti and the mouth of the Tcholsk, and the Turkish Fleet may find its action terribly hampered by these means. Russian torpedo boats may also be expected to do effective work. Hobart Pacha is now reported to be at Rustchuck on board an ironclad, and must force his way past Ibraila and Galatz in front of the Russians in order to return to the Black Sea. All who know this officer are well assured that he will lose no opportunity of making the power of his Fleet felt, and the bombardment of a town is already reported. The rumoured movement of the Russian Baltic Fleet to the Mediterranean is scarcely to be credited, for the majority of the turret-ships are by no means adapted for making the voyage. Glancing at the preparations being made by other Powers in the event of national interests being imperilled, we find Italy ordering her Fleet to be ready for immediate service. Germany, it is understood, proposes to commission several additional men-of-war for sea service. The American squadron in the Mediterranean is also being reinforced, and, as for ourselves, we may fairly be stated to be as "ready for anything" at this moment as we should ever be. The majority of the ships in reserve at the home ports are well forward, and although the Fleet in the Mediterranean has been slightly reduced since it left Besika Bay, the British flag will be strongly represented at the Piræus, where the ships are about to assemble.

We feel sure that the announcement that the Queen has been pleased to desire that the Albert Medal shall be extended to those who may perform gallant actions on land will not cause the slightest feeling of jealousy on the part of those for whom this decoration was first established. By the Warrant of 1867 it was set forth that taking into consideration that great loss of life is sustained by reason of shipwrecks and other perils of the sea, and the many daring and heroic actions performed by mariners and others to prevent such loss, and to save the lives of those who are in danger of perishing by reason of wrecks and perils of the sea; and taking also into consideration the expediency of distinguishing such efforts by some mark of Royal favour, the decoration should be instituted and created. Already there exist two classes of this medal, and the design will have to be so altered to make it a suitable award for acts of gallantry on shore that little of the original decoration will remain except the name.

Their Royal Highnesses Prince Albert Victor and Prince George of Wales will be specially examined, at an early date, for admission as naval cadets, and will not wait until the next periodical examination.

The Admiralty has adhered to the intention of sending the Urgent to Port Royal. She will be commissioned on Tuesday by Commander R. H. Boyle.

Captain George Parkin, late of the Triumph, will, it is reported, succeed Captain Waddilove as Captain of the Steam Reserve at Portsmouth, and Flag-Captain to Admiral Foley.

Rear-Admiral Corbett has left England by mail for Bombay to relieve Sir Reginald Macdonald as Commander-in-Chief in the East Indies.

It is satisfactory to know at this moment that the works long in progress in the principal sea batteries at Malta were some time since completed, and that the new armament has already been fully mounted. The alterations at Gibraltar are being proceeded with, though it will be three years at least before the new ordnance is all in position there.

The military saddle, the invention of Captain the Hon. H. G. L. Crichton, 21st Hussars, has been issued to four Cavalry regiments—the Royal Dragoons, 17th Lancers, and 18th and 21st Hussars—for trial.

Captain B. M. Dawes, 100th Regiment, takes up duty as Local Inspector of Army Schools at Malta, in addition to his appointment as Deputy Assistant-Adjutant and Quartermaster-General.

The Distinguished Service Reward left vacant by the appointment of Lieutenant-General C. A. Edwards, C.B., to a regimental Colonelcy, has been given to Major-General W. L. Ingall, C.B. General Ingall served the Sutlej campaign of 1845-46 with the 62nd Regiment, including the battles of Ferozeshah (wounded) and Sobraon (medal and one clasp). Served also in the Crimea from November 13, 1854, to June 18, 1855, including the siege of Sebastopol, the sortie of April 6, and attack on the Quarries on June 8—wounded (medal with clasp, C.B., Knight of the Legion of Honour, Sardinian and Turkish medals, and Fifth Class of the Medjidie). Entered the Army December 27, 1842, and became Major-General October 26, 1873.

It has been decided to allow Captain C. C. Brooke to retain his appointment as Ridingmaster of the Royal Military College, on the revision of the establishment of that institution. Major Nicolls has, however, lost his appointment as Paymaster, and Dr. Andrew Maclean is relieved in his duties as senior medical officer.

The Establishment Committee at the War Office, generally known as the Committee on Friction, which has had numerous sittings with a view of reporting on and adjusting the grievances of the Commissariat and Ordnance Departments, has been suddenly dissolved without having arrived at any conclusions, or, at any rate, conclusions to suit the views of a certain clique. The Committee is to be replaced by another, the composition of which will, we understand, be as follows, viz.:—Earl Cadogan, Under Secretary of State for War; Major-General D. Lysons, C.B.; Major-General Sir J. M. Adye, K.C.B., Royal Artillery; Major-General F. A. Campbell, C.B., Royal Artillery; Lieutenant-Colonel R. Home, C.B., Royal Engineers; Sir J. W. Drake, K.C.B.; and Mr. A. L. Haliburton. The only fault which can be found with the constitution of this Committee seems to be the absence of any representatives of one of the departments which its decisions will naturally affect—the Ordnance. Sir John Adye, the present, and General Campbell, the late Director-General of Artillery and Stores, are officers in whose integrity the greatest confidence is placed; but they are not departmental officers, and cannot be expected fully to appreciate the grievances which the Ordnance officers have brought forward ever since the conditions of their Service were revised on the introduction of Control.

Early in the spring of next year, if not before, the oft-rumoured invasion of England is, it is said, to be attempted; with what success will entirely depend on ourselves. We may allay apprehension by adding that the invasion will be under the immediate direction of "General" Barnum, and will come from America. The "General," over whose head seven and sixty summers have passed, considers that he has at length obtained sufficient experience to enable him to transport his "wonders of creation" to our midst. It is not surprising to hear that "at least twelve large and powerful steamers will be required." Now, there is a branch of the War Office known as the Intelligence Department, and we should imagine that some useful information on sea transport of animals might be obtainable from this expedition, as we may yet require a Royal Elephant Artillery, and at present little is known as to how far the elephant, or any other wild animal, may be rendered available for war purposes. If note is being taken, or will be taken of the American live animal ships, we still have Cavalry, we still may require to send it beyond the sea. To return to the "General," we sincerely trust he will not forget his celebrated trotting horses, and we further hope he will be met by as good, if not better, here.

The decision which the War Office has arrived at with regard to Adjutants of Engineer Volunteers will have the effect of robbing those Line Captains who have already accepted the employment of 1s. 7d. a-day of their pay, 10s. being the sum fixed upon to be drawn by Engineer Adjutants, whilst those of Rifle regiments are to receive 11s. 7d. It is not easy to see on what principle the amount has been fixed, as the duties of an Engineer Adjutant surely are as onerous—they should be even more so—than those of a Rifleman.

Captain A. N. Pearse, Royal Artillery, who has been for some time past in the Indian Ordnance Department, has arrived in England, having accepted the Adjutancy of the School of Gunnery, Shoeburyness, which Captain H. H. Goodeve is vacating for the appointment of Brigade-Major, held by Major H. L. Mitchell, whose five years are expiring.

A double-barrelled breech-loading pistol is to replace the present antiquated weapon as part of the armament of Lancer regiments.

Steps are being taken to substitute a carbine on the Henry-Martini principle for that now in the hands of our Cavalry.

Report says that a very distinguished Greek scholar has lately devoted considerable time and study to the construction of a perfect set of Grecian arms and armour, for display at the Tournament Club.

Surgeon-Major W. S. Oliver, M.D., will exhibit his magazine equipment in the theatre of the Royal United Service Institution on Monday next.

Colonel C. K. Pearson, 3rd Buffs, has succeeded Lieutenant-Colonel R. B. Montgomery, 13th Light Infantry, as Commandant of Natal.

Is the Imperial game of Partition again to be played? One hundred years ago, exactly the same scene as now was before Europe—Russia at war with Turkey, and Austria and Germany spectators. The Imperial eagles enjoyed a *repas délicieux* in the then partition of Poland. Russia is not the nation to fight in the interests of Christianity. "*Eh, ma foi*, but the world is very wicked."

Steps are being taken for a memorial to the late Captain Clayton, 9th Lancers. Captain R. J. Barton, Coldstream Guards, who served in the 9th Lancers previous to joining the Brigade of Guards, has kindly undertaken the duties of Honorary Secretary, and the friends of the deceased officer desirous of subscribing to the fund should communicate with Captain Barton at 4, Cleveland-square, S.W., or with Messrs. Cox and Co.

The 60th Rifles and Rifle Brigade are favoured corps. The commanding officers of most regiments have made it a subject of complaint that their regiments are so under-officered that the ordinary routine duties can only be performed with difficulty. But in the case of the 60th Rifles the "Army List" for April shows that there are three Sub-Lieutenants on the Supernumerary List, and that the Rifle Brigade has four over the number provided for in the Estimates.

It may be taken for granted that the Cavalry Brigade at Aldershot next winter will consist of the 1st Dragoons (Royals), 17th Lancers, and 18th Hussars, the two former now at the station, the latter regiment moving to the camp from Colchester, in time for the summer drills. Instead of proceeding North, it is arranged that the 20th Hussars shall be given another year of Brighton, where the regiment's popularity is unbounded—so great, that the Mayor and Corporation have memorialised the Horse Guards to allow it to continue among them. The 21st Hussars, from Hounslow, will thus be done out of the pleasant station they had been anticipating orders to prepare for, and will have to content themselves with one of those dingy manufacturing centres in the North, the abomination of Cavalrymen. The 8th Hussars, from Aldershot, relieve the 21st at Hounslow, and there is some talk of the Scots Greys taking over York. The Carabiniers will, of course, proceed to Colchester, to prepare for embarkation for India; the 5th Lancers will continue at Norwich, and the Inniskilling

Dragoons will go to Edinburgh, from which they have been absent for a quarter of a century—since early in 1853. Such, we believe, are the prospective arrangements. Great secrecy has to be observed in these matters in the Quartermaster-General's Department, because officers will not understand that allowances have to be made for unforeseen contingencies; they take houses at the places to which rumour assigns their regiments, and then blame the Quartermaster-General because at the last moment he finds it necessary to make changes in his programme.

Under the Empire the name of M. Paul de Molènes was very well known among military men, and we welcome a new edition of his "Commentaires d'un Soldat," just published by Calmann-Levy, of Paris. The new edition is preceded by a preface due to the pen of M. Paul de St. Victor, one of the most eloquent of French writers. The funeral of Lord Raglan is thus described:—"The first soldiers drawn up along this funeral route were the Highlanders, leaning on their reversed arms. These tall, athletic, and well-built men, both by attitude and form, made one dream of the bas-reliefs of antiquity. They evoked the idea of a calm and imposing grief—of the sorrow which weighs on the heart of a powerful nation. One felt greatly moved at the sight of these figures, not by a sadness which suddenly bursts into sobs, but by a feeling as august and solemn as the temple to which a people accompany the remains of a great man. What finished by giving this ceremony a character at once lugubrious and triumphal was the nature and form of the funeral car. The coffin which contained the late General-in-Chief of the English Army was placed upon a gun-carriage and drawn by an Artillery team, and the cloth which covered this coffin was the flag of Great Britain. Never did men throw upon a corpse a more splendid winding-sheet. There was in this patriotic and warlike pomp something which deprived it of the derisive vanity of opulent funerals. The Standard appeared to communicate its life to the dead man it enveloped in its martial folds. What we saw passing by was not something destroyed and deformed, but a living being, a soldier going to find his God in the flag of his country."

The rigid rules relating to the punishment of drunkenness in the Army have, we are glad to say, just been modified by a General Order. It is perhaps wise, considering the fallibility of man, that commanding officers should in certain defined cases be restricted as to the maximum of punishment; but, as far as the minimum is concerned, that should be left to their own discretion. Frequently the award of punishment is a mere matter of routine, but occasionally there are extenuating circumstances which cannot be anticipated by those who draw up regulations. At the same time, we should be glad to see the practice of the Scots Fusilier Guards adopted throughout the Army. In that corps there is, or was, a scale of punishment giving the minimum and maximum considered applicable to each of the more ordinary offences. For instance, "five minutes late for tattoo, from half an hour to an hour's drill; from five minutes to half an hour, from so much to so much." The commanding officer's hands were by no means tied by this scale, but it helped him to preserve uniformity and equality of punishment. As matters stand in the Army at large, there is the greatest inequality in the awards for identical offences committed by men of equally good or bad character, as the case may be. This proceeds from many causes. No two officers take the same view of particular acts of misconduct. The temporary commanding officer, therefore, is much more lenient or severe than the Lieutenant-Colonel. Neither is it in the nature of things that the same man should always be consistent. His memory may fail him, and he may forget that he is giving B a much heavier sentence than he awarded A a week previously, though both offences were of equal degree and the character and service of the offenders the same. Besides, the Lieutenant-Colonel may occasionally suffer from liver, or have been annoyed about something, which circumstances will certainly make him more severe than usual. A suggested scale of appropriate punishments, issued by the Horse Guards as a guide only, would be of great value. With regard to the subject of the General Order above alluded to, it is laid down that it is to be optional with the commanding officer whether a case of drunkenness punished by fine is or is not to be entered in the Regimental Defaulters' Book. This is decidedly a change for the better.

A French writer, who signs himself "Ingotus," has recently written a series of sketches of eminent men. In one published yesterday he describes Marshal von Moltke, telling us, amongst other things, that when the war with France broke out M. de Moltke had been ready for two years. However, he was by no means so sure of victory as in 1866. He had visited on foot what he considered would be the future field of battle—that is to say, Prussian territory. His opinion was that the French Army, not nicely balanced, would march rapidly like a tipsy man who runs because he is not steady enough on his legs to walk. He counted on his famous system of renewing the battle twice, for he said, "The French Army will not have wind enough to beat us twice in a day." He manœuvred behind a curtain, and, contrary to all military principles, he wished to employ the Guard first. The Emperor William objected. The Field-Marshal insisted on the necessity of winning the first battle, at no matter what cost, so as to destroy the French moral. The writer then remarks that "the conqueror of France was a collective being composed of the body of the Emperor, the chest of Bismarck, the arms of the Imperial Prince and Prince Frederick Charles, and the head of Von Moltke;" adding, "that the last successes, by their slowness, will create more astonishment in history than the rapidity of the first triumphs over the Army of the Rhine." As Victor Emmanuel said, "Von Moltke is a topographist of genius. Assuredly M. de Moltke does not belong to that divine race of Generals spoken of by Bossuet. The colossal Krupp cannon has in the Field-Marshal a gunner well suited to its size. In some things he resembles Frederick the Great, but what he hates most in France is Voltaire." In conclusion, "Ignotus" says that Von Moltke wished to decapitate France, but only succeeded in cutting her hair, which has begun to grow again.

Our opposite neighbours, at first very much startled by the speech of Field-Marshal Von Moltke, appear to have recovered in a great measure from their alarm, most of the newspapers aiding to allay apprehension. In one of our Paris contemporaries we find the following observations:—"M. de Moltke would not esteem the people upon whom he has inflicted such defeats were they not to love their Army. Yes! the Army is the pride and hope of France, because in the midst of party struggles and ambitious conflicts it is the refuge of disinterested devotion. One can doubt of France, when reading what is written, when listening to what is said; but one is consoled when looking at the Army, for a nation where there are so many brave hearts slaves to patriotic duty cannot be condemned to moral decadence. France loves her Army, but, for all that, she is not bellicose, and the Army knows how to ally love of country with love of peace, which is necessary for her regeneration. She has not forgotten her defeats, and she has derived a lesson from them, and not that blind thirst for revenge of which she is accused." M. Henri de Pène adds that France would be glad to listen to any proposals on the part of Germany for a mutual disarmament. It is feared, certainly in Paris, that the Cabinet of Berlin, before many weeks are over, intends to call upon France to disarm, and in a way so authoritative that it will be impossible for Marshal MacMahon and his Government not to refuse. There are several facts to which one cannot be blind. There is a good deal of Ultramontane agitation going on in France just now, which has alarmed Italy and offended Germany. In 1874 a similar agitation was on the point of producing war, and the Germans would no doubt have then invaded France but for the remonstrances of Russia. Now Russia has her hands full, and Germany may feel perfectly tranquil on her northern frontier. In case of necessity she could let slip Austria on Russia and Italy on France. Austria will not be able to tolerate Russian conquests on the Danube, and Italy wishes to put down Ultramontrane agitation, and to get back Savoy, if not Nice. In 1874 the underlying complaint made against France was that she was preparing for a war of revenge, and that her Army Estimates were excessive—ruinous for Germany to keep pace with. Here the situation has not changed. France continues with unabated vigour to labour at the reorganization of her Army and the replenishment of her stores. It is all very well for a Paris wit to say that France is only putting on an indispensable toilette—the toilette looks more like a coat of mail than a silk dress. We have always considered it a political error on the part of France to have plunged so deeply into Army reorganization to the neglect of other things. Such a course was sure to awaken the suspicion and ill-feeling of Germany. As Field-Marshal von Moltke remarked, "The French people refuse the Army nothing," and it cannot have escaped the observation of the acute statesmen at Berlin that French declarations in favour of absolute neutrality in the present crisis simply mean, "We have another object in view." The *Blackwood* reviewer has recently given a very detailed account of the progress accomplished by the French War Minister in the way of reorganization, and the French authorities have felt highly flattered at the way in which their efforts have been treated; but it was hardly politic, on the part of a friend of France, to over-estimate her capabilities, and make her out more formidable than she is. M. Henri de Pène talks in high-flown language of the devotion and patriotism of the French Army; but as a French officer complained to us the other day, the men dislike the Army, and neither soldiers nor non-commissioned officers will remain in the Service a day longer than they are obliged. We find the military scribe, M. Saint-Genest, writing:—"Young men prefer commerce, industry, agriculture, to the Army. Charles declares that he does not wish to serve his country, and obtains 1,500 francs from his family. As his intelligence is very limited, the whole canton imagine he will not pass. But, the examiners having simply asked him what the Loire is, and what a gander is, and the candidate having replied without hesitation—'The first is a river, and the second the husband of [a goose' (*sic*) he is accepted as a one-year volunteer, to the great astonishment of the whole country round about." M. Saint Genest, after complaining of the way in which the volunteers are accepted, denounces the manner in which old soldiers have been treated. When it was a question of reorganizing the Reserves, the veterans naturally considered that they would be nominated, but when the *Gazette* appeared it was seen that it was not ex-Sergeant-Major or ex-Colour-Sergeant Z. who had been appointed officers in the Reserve, but young T., of the neighbouring town, who had never served in the Army. It was not an old Captain who was given the command of a Territorial battalion, but the proprietor of the château who had been in the Mobiles, and one of the Deputies of the department was named Colonel. The consequence of this state of affairs is to create two categories of officers—the hard-working officers of the Regular Army, and the wealthy and brilliant officers of the Territorial Army. "And," adds M. Saint-Genest, "how can one wonder that military *esprit* is disappearing, that engagements diminish, and that Sergeants prefer returning home to wearing the epaulette?" M. Saint-Genest proposes several remedies, but the evil lies deeper than he chooses to admit. It lies in the fact that France is entirely devoid of *l'esprit militaire* (as a French military writer recently pointed out), a quality which is quite distinct from combativeness. The restraint imposed by discipline is intolerable to most Frenchmen, who also sin against *l'esprit militaire* in other matters. The proof of this is to be seen in the complaints brought forward by M. Saint-Genest—the married classes shirk the Army as much as possible, and the non-commissioned officers and men get rid of their uniform as soon as they can. Ardour and enthusiasm may be wanting in the French Army, but these would be forthcoming if France were attacked and under a successful commander.

Are the leaders of the great Liberal party so intensely absorbed in the sufferings and wrongs of the interesting Bulgarians and Montenegrins that they have not a thought for India, where the people are wasting to death in the "famine camps" at the rate of 900 out of every 1,000? The accounts which we have seen in the Indian papers of the state of the miserables who are just kept alive to meet the almost inevitable death which is the result of "famine diarrhœa," as it is termed—a slow but sure choleraic epidemic—are heartrending and appalling. There is one plea put forward for the reduction of the food wages to the "just keep them alive" average—the absolute exigencies of the Indian Government. But when we reflect that it is the money of the Indian people that the Government has got to deal with, the plea, we think, must be set aside. It is the duty of Government to prevent starvation, and not only that, but to prevent the spread of disease arising from insufficient food—disease which assumes many forms all destructive of life. That is their duty now. There is, moreover, imposed on them, if they have a conscience or sense of the mission of a Christian people in Hindostan, to lose no time in undertaking as public works of the first necessity such irrigation tanks, anicuts, and canals as will render famines from want of water impossible in future. A "Retired Officer of the Madras Staff Corps" has published a few remarks on the subject called, "What Irrigation Can Do and what it Won't Do for India," which we recommend to those of our readers who think the welfare of India worth consideration. "Irrigation in India means abundance of food, and with it happiness and contentment for the people—progress in cheap traffic and transport on canals and rivers." Sir Arthur Cotton has laboured for years to impress our rulers with the lessons which the works of their predecessors should have imposed on them. Let us hope that out of this terrible adversity will come, among other "sweet uses," the recognition of the truth that above all and before all things a Government in India can do is irrigation.

Doubts are entertained as to the part which the Cabinet of Berlin has played in the Eastern war, it being, of course, suspected that it has rather encouraged than dissuaded Russia to attack Turkey. Prussia certainly had a finger in several previous contests between Czar and Sultan. When Peter the Great determined to declare war against the Grand Turk, who had accorded hospitality to the unfortunate Charles XII., he first of all repaired to Berlin and made matters straight with the King of Prussia and his Potsdam giants. In that war Prussia came to unspeakable grief on the banks of the Pruth. In 1768 the French Ambassador, M. de Vergennes, urged the Sublime Porte to declare war against Russia, while Frederick the Great did what he could to persuade Abdul Hamid from fighting. His Majesty expressed great contempt for Catherine's Generals, who, he said, were totally unacquainted with the art of war; "but those of the Sultan," he added, "are sunk in a more prodigious depth of ignorance." What Frederick dreaded was not to see clumsy Generals at work, but that the conflagration should spread, and that after Austria, Prussia should be dragged into the conflict, and his Majesty had had fighting enough. The Porte, being worsted in this war, called upon Prussia and Austria to mediate at the very moment that the latter Power was complaining of the continual encroachments of Russia, and suggesting combined efforts to put a stop to them. Frederick replied that "he was bound by treaty to the Czarina, and could take no part against her." The two Powers, however, mediated, and peace was concluded, Turkey losing the Crimea and Russia obtaining the protectorate over Wallachia and Moldavia, and the right of erecting a church at Constantinople. In 1784, when Russia and Austria combined, not for the first time, to despoil the Porte, peace, as far as Russia was concerned, was indirectly brought about by Prussia. Austria having signed a separate peace, Catherine was also induced to recall her troops on learning that the King of Prussia was intriguing in Poland. In 1828 the Prussian Ambassador strongly advised the Sultan not to go to war, but Mahmoud, declaring honour and independence to be more valuable than life, plunged into the fatal struggle, which ended in the Treaty of Adrianople.

HELMETS FOR THE INFANTRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As I perceive by your issue of April 21, 1877, that the adoption of the helmet is really decided on for the Infantry, I am led to again express a hope through your columns that the crested helmet may yet have a chance. That worn by the Dublin police is a model of shape and appearance, and, in the opinion of many persons of taste with whom I have spoken, far preferable to the spiked helmet. A small plume might be worn at the side, which gives a light appearance, and serves as a distinction between various classes of troops; not, however, to be worn in marching order. A helmet without either spike or crest would be a curious-looking affair.—I am, &c.,

A. B.

Respecting the difference of opinion existing between the officers of Chatham Dockyard and the officers of Plymouth Yard as to the defective state of the crank shafts of the composite-vessel Boxer, which, it is alleged, were defective when they left Chatham, it is stated by the officers at Chatham that the first set had served the vessel during two commissions, and when the vessel left for the third commission they were precisely in the same condition when first put on board; and the Chatham officers also maintain that the second set were also fit for the Service, although condemned by the officers at Devonport. It is not true, as stated, that the Admiralty have "reprimanded" the Admiral-Superintendent of Chatham Yard, Admiral C. Fellowes, C.B. In their letter upon the matter, their lordships state that while fully aware of the energy and zeal displayed by all the officers of Chatham Dockyard, still their lordships think that in this particular instance sufficient attention was not paid by the engineering and blacksmiths' departments of the yard.

As there has been cause to fear that trading vessels in the Brass River will be subjected to molestation at the hands of the natives, one of her Majesty's ships has been ordered to visit the place, taking the British Consul, and to inquire into the reason of the apparent hostile feeling.—*Standard.*

The result of the inquiry into the cause of the recent accident to the rudder of the Temeraire at Chatham has just been made known. It was suspected that it was caused by the wanton act of one of the men in wilfully cutting the rope which held the weight, but the officers of the court are satisfied that the whole affair was an accident, and exonerated the men from all blame.

The Volta, which sank at her moorings in the Medway last week during a gale, has been floated. A casual examination of the bottom has been made, but nothing has been discovered to account for her foundering, and the belief is that the mishap was caused by the scuttles being left open, in consequence of which, as there was a heavy sea, the water rushed in, and gradually filled her.

A general court of the Marine Society was held on Saturday at the offices in Bishopsgate-street, Lord Romney, president, in the chair. The report of the committee stated that during the last three months no fewer than eighty-seven boys had been admitted to the Warspite, while seven had been sent into the Royal Navy and twenty-eight into the merchant service. The total number of boys sent to sea by the Marine Society since it founded the training-ship system was now 58,330, and it cost but £18 a-year to bring a boy under the influence of the training which produced such results as above mentioned. The report was adopted, and it was resolved that an earnest appeal be made to the public in order that the vacant berths in the new Warspite might be filled.

The thirty-eighth anniversary of the Shipwrecked Mariners' Society was held on Friday at the City Terminus Hotel, Capt. the Hon. F. Maude, R.N., vice-president, in the chair. Com. W. H. Symons, R.N., read the report, which stated that 10,386 widows, orphans, and shipwrecked persons had been relieved during the past year at a cost of £19,839, and that 1,965 widows received annual grants, for which purpose the dividends of the funded property are set apart, but were not sufficient last year by £3,468, which had therefore to be provided by the generosity of the public, to whom the committee appealed for help to meet the increasing claims.

It is understood that the Italian Government has decided to employ steel for the armour of the Duilio and Dandolo, and that the plates will be made by Messrs. Schneider, of Creuzot, in France. Preparations are going forward at Portsmouth for the trial of the steel armour supplied by Messrs. Charles Temple and Co., of London, by the Scottish Steel and Iron Company, of Glasgow, and by Messrs. Cammell and Co., of Sheffield. There is no doubt that these trials will have to be succeeded by others on a larger scale.

We notice that the *London Medical Record* speaks very highly of a new and portable food, Meat-Farina, which is deserving of the attention of the Admiralty, for it has many advantages over the salt meat supplied to our blue-jackets. It is free from the excess of salt which does much to render salt provisions innutritious and unpalatable. As is well known, our seamen are often glad to receive savings for salt meat in preference to eating it, and to use the money for the purchase of potatoes and soft bread as soon as the opportunity occurs. The beneficial effects likely to accrue from the use of Meat-Farina on board ship are obvious.

The Army.

2nd Life Guards. Great regret is expressed at the death of Mr. R. H. Townsley, late lieut., which has occurred at Rome. He joined the Army Feb 26, 1870; became lieut., Oct. 28, 1871; and retired last year.

3rd Dragoon Guards will leave Dublin for the Curragh on the 23rd proximo. The regiment moves to Cahir on the termination of the drill season.

3rd Hussars. Lieut. MacIvor has been appointed a provisional aide-de-camp to Major-Gen. G. S. Montgomery, C.S.I., commanding the Mhow Division of the Bombay Army.

4th Hussars. Lieut. Tuthill has been granted an extension of leave to remain in England from June 1 to Sept. 1 next, on urgent private affairs.

9th Lancers. Capt. Bushman has been granted leave from India to England for fifteen months, on urgent private affairs.

11th Hussars. Major Garnett has applied for leave from India to England on medical certificate.

12th Lancers. Capt. L. Martin is about to retire by sale of his commission.

13th Hussars. Capt. and Brevet Lieut.-Col. Russell, C.B., has been granted leave from India to England for twelve months on urgent private affairs. Capt. Peters has been granted an extension of leave to remain in England from India from the 10th inst. to Oct. 10, on urgent private affairs.

15th Hussars. Lieut. Burke has been granted leave from India to England for fifteen months, on urgent private affairs.

19th Hussars will proceed from Longford and out-quarters to the Curragh next month.

ROYAL ARTILLERY.

The remains of the late Lieut.-Gen. Sir Burke Cuppage, K.C.B., were buried on Monday in Fulham Cemetery, when a number of military and other friends attended at the grave.

Col. H. P. de Teissier, C Brig. R.H.A. (late Bengal), has been transferred from Fyzabad to Rawul Pindee.

Lieuts. G. D. Fanshawe, 3rd Brig.; E. E. Taylor, 11th Brig.; and E. Gunner, 9th Brig., have passed the lower standard examination in Hindostanee.

Capt. C. W. E. Murphy is to rank as captain in India from June 24, 1874, instead of from Aug. 9, 1876, the date of his substantive rank.

Capt. C. F. Dickson, 3rd Brig., has been ordered to Sligo to take up the duties of adjt. of the Sligo Artillery.

ROYAL ENGINEERS.

Satisfactory news has been received from Lieut. Kitchener, in command of the Survey, of the progress of the work. At their first camp, near Haifa, in the Bay of Acre, the survey of the plain was finished, and the detail completely filled in; levels were taken from Mejdel, ten miles from Haifa, to the Mediterranean, in continuation of the levelling begun by Lieut. Conder, in order to ascertain the real depression of the Lake of Galilee. For this purpose a grant of £100 was made three years ago by the British Association. The camp was then moved to Hattin, the scene of the great defeat of the Christians by Saladin, from which place Lieut. Kitchener's last letter was written. The country is reported perfectly quiet and the people friendly. Large numbers of the able-bodied men have been draughted off to Constantinople to join the Army. If the present tranquillity continues, Lieut. Kitchener will finish off the survey of Northern Palestine before the end of the summer, after which little will remain to be done.

Lieut. J. B. Sharpe has passed the higher, and Lieut. F. H. Cameron, J. W. Thurburn, and W. T. Shone the lower standard examination in Hindostanee.

A well-earned tribute is paid, on his retirement, to Col. T. G. Montgomerie, late Bengal, in the Indian Trigonometrical Survey Report. Col. Montgomerie entered the department in 1852. He helped to measure the Chach and Kurrachee base line; he began and finished the Cashmere survey, an area of some 77,000 square miles. Afterwards as captain he directed the survey of Kumaon and Garwhal; and lastly, he won a European reputation by his Trans-Himalayan surveys.

Col. H. Drummond (late Bombay) has been granted furlough from India to England for one year on private affairs.

Major J. T. Twigge has been granted leave from India to England, per troopship, on medical certificate.

Lieut. H. Clarke, assist. engineer at Aden, has been granted six months furlough to England, on urgent private affairs.

"One in Bondage" writes, pointing out the hardship suffered by the men of the Royal Engineer Train, by reason of their being permanently stationed at Aldershot. Our correspondent also refers to the injustice of the arrangement by which the men of the companies draw working pay, whilst those on the establishment of the Train get nothing extra, though employed for more hours and on as "rough duties."

Brevet Col. A. A'C. Fisher, C.B., has arrived home from Malta, invalided.

1st or Royal Scots. The 1st Batn. will arrive at the Curragh on Tuesday next from Mullingar. An exchange has been permitted between Lieuts. Ireland and Moore, the former from the 2nd to the 1st Batn., the latter from the 1st to the 2nd Batn. Lieut. Moore joins the depôt at Greenlaw until required to embark for India.

3rd Buffs. *The Dragon* (*East Kent Chronicle*) is a nice little paper for the men of the Buffs, printed, at present, at Cawnpore, of which the twenty-sixth number is before us, from which we learn that they have been rather enjoying themselves. Roberts has shown them how to play billiards; Dave Carson, whoever he may be, also entertained the station; and there have been several regimental festivities. An account of the inspection of the regiment, by Major-Gen. Maude, concludes with an expression of the good wishes of the officers and men of his old corps for one connected with them so honourably and so long. Brevet Lieut.-Col. Morley, 1st Batn., has been granted leave from India to England for fifteen months, on private affairs.

4th King's Own. The 2nd Batn. will be moved to Dublin on the 17th proximo, and will, it is thought, proceed to England in the autumn.

5th Fusiliers. Lieut. Hackett, 1st Batn., has taken up duty in connection with the famine relief operations in Madras.

7th Fusiliers. Lieut. the Hon. A. Amherst, 2nd Batn., has leave in India, on private affairs, from the 1st inst. to Sept. 30. Lieut. Stuart, 2nd Batn., has passed the lower standard examination in Hindostanee.

8th King's. Capt. Wheeley and Lieut. Oakley, 1st Batn., have applied for leave from India to England, on medical certificate.

9th Regiment. Major Probart, 2nd Batn., has been granted leave from India for six months, on urgent private affairs. Lieut. Weare has passed the lower standard examination in Hindostanee.

10th Regiment. The head-quarters and remainder of the 1st Batn., under command of Lieut.-Col. Lynch, arrived at Portsmouth on Tuesday from the Straits Settlements.

11th Regiment. Major Smyth, 2nd Batn., has been granted leave from head-quarters to Cashmere from April 1 to Sept. 30, on private affairs. Major Corrie, Capt. Toller, and Lieut. Reid, 1st Batn., have been posted to the depôt. Capt. Toller takes command of the detachment at Devonport, the other officers joining at Exeter. Lieut. Browne, 1st Batn., has been declared qualified for promotion. Lieut. Coppinger, 2nd Batn., has passed the lower standard examination in Hindostanee.

15th Regiment. Capt. Thomas, 2nd Batn., has qualified for employment on the regimental, general, or personal Staff in India. Capt. Barr has been appointed to officiate as paymr. of the 2nd Batn., from Jan. 15, vice Paymr. (Major) Hopson, on leave in England.

16th Regiment. Qrmr.-Sergt. Shaw, 1st Batn., is transferred to the Louth Rifles.

17th Regiment. Capt. Brind, 1st Batn., has been assigned local rank as major from March 4, 1877. Capt. Richards, 2nd Batn., is to rank as capt. in India from Feb. 11, 1874, instead of Nov. 27, 1876, the date of his substantive rank. Lieut. Clarke, 1st Batn., has been granted leave from India to England to appear before a medical board.

18th Royal Irish. The 2nd Batn. is expected to move shortly to the Curragh from Fermoy.

23rd Fusiliers. The 1st Batn. will leave Dublin on the 18th proximo for Enniskillen and Londonderry. Brevet Lieut.-Col. Elgee, Capts. Seagram and Knox, and Lieuts. Griffiths and Boddam-Whetham join the depôt of the 1st Batn. at Wrexham.

24th Regiment. Lieut. Curteis, 1st Batn., has arrived home from the Cape in H.M.S. Orontes.

25th Regiment. Major Harvey, 1st Batn., has been granted leave from India to England for fifteen months, on private affairs.

32nd Light Infantry. Lieuts. Cochrane (adjt.) and Sillery have arrived home from the Cape in H.M.S. Orontes.

34th Regiment. Lieut. Martin has qualified for promotion.

37th Regiment. As was some time since stated, Major Glass succeeds to the lieut.-colonelcy.

40th Regiment. Capt. White has been reported qualified for promotion on the termination of a course of garrison instruction in India.

44th Regiment. Major Maguire has been granted leave from India to England for six months, on urgent private affairs. Lieut. Hill has been recommended for the appointment of musketry instructor, vice Churchill.

ROYAL MARINES.

An exchange on the general foreign service roster has been sanctioned between Brevet Major R. W. B. Hunt and Capt. C. W. Carlyon.

Brevet Major W. H. H. West, commanding the Marine recruiting party at Lincoln, will be relieved by Capt. W. N. G. Johnstone on the 30th inst.

Surg. R. Marcarthy, who has been appointed to the Plymouth Division of Royal Marines, vice Griffiths, having reported himself at head-quarters, is borne on the strength of the divisional Staff.

Capt. G. S. Nash will relieve Capt. C. W. Carlyon, recruiting, Gloucester, on the 1st prox.

Lieut. H. de la Poer Beresford will relieve Captain Campbell in charge of detachment R.M., H.M.S. Alexander.

51st Light Infantry. Lieut. Seppings has been granted leave from India to England for twelve months, on private affairs.

54th Regiment. Capt. Phibbs is about to be appointed to the vacant adjutancy of the Kerry Militia.

56th Regiment. In the absence of a qualified officer, Lieut. Ford has been appointed to act as interpreter, vice Lieut. Parker, a candidate for the Indian S.C.

59th Regiment. Lieut. Irwin has been granted leave from India to England for fifteen months, on private affairs.

60th Rifles. Major Henderson, 2nd Batn., has been granted an extension of leave to remain in England from India from July 6 to Oct. 31 next, on private affairs. Capt. Kinloch, having attended a course of garrison instruction, his period of Staff service as D.A.A.G. for Musketry in Bengal has been extended from the 26th ultimo to Aug. 9. Lieut. Wilson, 2nd Batn., is employed in connection with the famine relief operations in Madras.

65th Regiment. Major Byam has qualified for promotion, after attending a course of garrison instruction in India. Brevet Major Gordon has passed the examination qualifying for employment on the regimental, general, or personal Staff in India. Lieut. Ethelston has been recommended for the appointment of musketry instructor. Lieut. Lean, a probationer for the Indian S.C., attached to the 18th Bengal N.I., has passed the higher standard examination in Hindostanee. The death is announced of Lieut. and Adjt. R. St. G. H. Hamilton, which occurred at Denmark Villas, Ealing, on the 23rd inst., whilst on leave from India. The deceased, who only landed in England a few days since, joined the Army Feb. 30, 1871, and was appointed adjt. Oct. 11, 1876.

66th Regiment. Capt. Ready has been assigned local rank as major in India from Sept. 9, 1874, and Lieut. Roberts as capt. from Feb. 8 last.

67th Regiment. The company vacant in consequence of Capt. Smith's retirement is not expected to be given in the regiment.

68th Light Infantry. Major Tucker has been granted leave from India to England for fifteen months on private affairs.

70th Regiment. Capt. Tibbs is to rank as capt. in India from March 16, 1870. Lieut. Montanaro has qualified for promotion.

72nd Highlanders. Capt. Guinness and Lieut. Langton have been reported qualified for promotion on the conclusion of a course of garrison instruction in India.

73rd Regiment. Lieut. Swiny has been recommended for the instructorship of musketry. Lieut. Ravenshaw has passed the lower standard examination in Hindostanee. Lieut. Preston has been granted leave from India to England for twelve months, on urgent private affairs.

75th Regiment will proceed early next month to Guernsey, to relieve the 104th.

78th Highlanders. The regiment is expected to move in the autumn from Edinburgh to Fort George, to relieve the 79th.

79th Highlanders have received orders to send a guard of honour to Ballater on the 14th proximo, her Majesty being expected to arrive at Balmoral on the following day. The regiment will proceed to Dublin in Sept.

83rd Regiment. Capt. Wright has been granted leave to Cashmere for six months.

85th Light Infantry. Lieut. Vivian has qualified for promotion.

86th Regiment. Orders have been received for the move of the regiment to Aldershot, and it is to embark at Kingstown early in May, on board the Assistance. This will be only the second time of the 86th being quartered in England during a period of upwards of forty years. The regiment is somewhat below its strength, and within the next twelve months it will lose upwards of 100 men—principally six years' service men—and by the time its turn for foreign service arrives it will be literally a regiment of recruits. So much for the short service Act.

92nd Highlanders. Capt. Papillon is a candidate for appointment to the Auxiliary Forces as adjt., and will join the 1st Administrative Batn. Aberdeenshire R.V.

93rd Highlanders will proceed from Dublin to the Curragh on the 17th proximo, and will remain in Camp for the winter.

98th Regiment. Lieut. Hyslop obtains the company vacant by the retirement of Capt. Stanford.

99th Regiment is held in readiness to move to Templemore as follows:—Head-quarters at Kilkenny (with depot 62nd Regt. attached) on Aug. 7; detachments now at Waterford, Clonmel, Dungarvin, and Carrick-on-Suir about third week in May.

105th Light Infantry. Capt. Raikes and Lieut. Whitehill obtain the steps in succession to Major Bond, retired upon a pension.

108th Regiment. Lieut. Wapshare, a probationer, officiating wing officer, 1st Bombay N.I., is to be admitted to the Bombay S.C. from Feb. 2, 1876.

109th Regiment. Major Lucas has leave to Cashmere and the hills from April 15 to Oct. 15, on private affairs. Capt. Mackinnon has been declared qualified for promotion on the termination of a course of garrison instruction in India.

Rifle Brigade. The 1st Batn. will leave Dublin for the Curragh on the 24th proximo. Major H. Wood, 4th Batn., has applied for leave to England, on medical certificate. Lieut. C. H. Stopford, 2nd Batn., died at Algiers on the 12th instant. The deceased joined the Brigade Dec. 2, 1874, from the 3rd Royal Surrey Militia.

Commissariat Department. The following District Order has been issued in Ireland:—"Adjutant-General's Office, Dublin, April 19, 1877.—District Order.—It is with deep regret that the major-general commanding announces to the Dublin District the sudden death of Depty. Comy.-Gen. A. C. Crookshank, C.B., and in doing so Major-Gen. Herbert deplores the loss of an officer of great zeal, ability, and promise, one in whom from many years of intimate association he felt that he could repose the fullest confidence.—By order (signed), A. Alison, D.A.G."

Medical Department. Depty. Surg.-Gen. H. Kendall, M.D., assumed medical charge of the Sirhind Circle of the Bombay Army on Feb. 23, vice Surg.-Gen. T. Crawford, M.D., appointed P.M.O. in Ireland. Surgs.-Major J. F. Shortt and J. Middleton and Surg. E. F. Boult have been granted leave from India to England, on medical certificate.

Veterinary Department. Vet.-Surg. J. K. Grainger, Staff, has been granted leave from India to England for six months, on private affairs. Vet.-Surg. G. F. Davis, lately arrived in India from England, has been appointed to do duty with the Royal Artillery at Mooltan.

THE AUXILIARY FORCES.

MILITIA.

Bedfordshire. This regiment assembled for training at Bedford on Monday, and at the parade on the following morning only thirteen men were absent, of which number three are in prison, and two have enlisted into the Line, leaving only eight unaccounted for. The regiment only requires about twenty men to complete its full establishment.

East Kent. Both battalions, to the number of about 800, assembled for training at Canterbury on Monday. The following officers do duty during the training, viz.:—1st Batn.—Col. Pennefather; Major Beales; Capts. Simmons (Hon. Major), Sicklemore, Tatham, Moore, Petley, and Blundell; Lieut. Walker (instr. of musketry); Sub-Lieuts. Wynyard, Knatchbull-Hugessen, Amesbury, Blaydes, and Christie. 2nd Batn.—Col. Howell; Major Monypenny; Capts. Bury, Morrell, Wilkinson, Daniel, Perrot, and Bligh; Lieuts. Sankey and Marten; Sub-Lieuts. Nevill, Chetwynd, and Dolphin; Capt. and Adjt. Knight, Surg.-Major Curtis. Lieut. the Hon. H. C. Hardinge, West Kent Militia, is attached to the regiment for the training.

2nd Royal Lancashire Rifles. The recruits were inspected by Col. Robertson on the 18th inst. at Liverpool, when nearly 400 men were present on parade. In addressing the men, Col. Robertson complimented them on their very satisfactory turn-out, the cleanliness and completeness of their kits, and the uniform good conduct which characterised them during their training; and said that, taking into account the short time that elapsed since they were embodied, they were a credit to the Service. This very satisfactory state of affairs is due to the system of recruiting now adopted in this regiment—viz., a searching inquiry into the character of intending recruits, and also the mild but firm discipline enforced by the officers and instructors. The departure of Major Whiting, the adjt., is regretted by everybody connected with the regiment, his exertions having been never-ending.

Dublin City Artillery. Hon. Major Magill joins the School of Instruction at Woolwich on Tuesday next.

Dublin County. The training will commence at the Curragh on Monday next.

Fermanagh. The detachment assembled for preliminary drill at Enniskillen consists of Capt. and Adjt. Shaw, Sub-Lieut. Barton, Surg. Walsh, 16 sergts., 6 buglers, and 78 men.

Kerry. Capt. Phibbs, 54th Regt., has been selected for the adjutancy, vice Capt. Roberts, placed on the Retired List.

Kildare Rifles will assemble on Monday for its training, which will be undergone at the Curragh.

Queen's County. One hundred and thirty non-commissioned officers and men have assembled at Maryborough for preliminary drill. The officers doing duty are—Capt. and Adjt. Brooke, Lieut. Taylor, Sub-Lieut. Jacob, Qrmr. Murnane, and Surg.-Major Jacob.

Sligo Artillery. Capt. C. F. Dixon, Royal Artillery, is about to be appointed to the adjutancy.

A deputation of the Parliamentary Committee of the British Medical Association waited on Mr. Hardy, at the War Office, on Monday, for the purpose of stating some of the grievances of Militia surgeons occasioned by changes initiated by Lord Cardwell and now coming into effect, and asking that compensation similar to that afforded to Militia adjutants should be given to Militia surgeons, or, at all events, that where *bonâ fide* cases of individual hardship were shown, that such cases should receive pecuniary relief. Amongst those present were Mr. Childers, M.P., Sir H. Wilmot, M.P., Mr. Lusk, M.P., Lord Claud Hamilton, M.P., Mr. Wheelhouse, M.P., Capt. Nolan, M.P., Mr. Arthur Peel, M.P., Mr. O'Sullivan, M.P., Mr. Turner, M.P., Mr. Ripley, M.P., Mr. Johnston, Mr. Buxton, M.P., Mr. Cooper Rose, M.D., and a large number of the medical profession. Mr. Mitchell Henry, M.P., in the absence of Dr. Lyon Playfair, introduced the deputation. Mr. Ernest Hart, chairman of the committee, said that by the instructions of 1873, and by the Warrant of July, 1876, and the Secretary of State's instructions thereon, some of the Militia surgeons had been (and at this moment perhaps all) deprived of the greater part of the income which they had received up to that period as Militia surgeons. So great was the loss, that surgeons formerly receiving from £100 to £300 a-year were now only paid an average of £27 per year. Militia officers were appointed, their duties and salaries fixed under 42 George III., and those who suffered loss looked to the Government for compensation similar to that which had been given to Militia adjutants. The increase of rank which had been given to Militia surgeons they did not ask for, and the increase of pay under the new Warrant had this effect, that a Militia surgeon now received £4 extra a-year and lost £275. Mr. Hardy said that reference had been made to the Act of George III., but pensions ceased in 1829 by Act of Parliament, so that Militia surgeons had no claim on the public purse for pensions from that date. Militia surgeons were not now called on to do the work which they formerly performed for their salaries, and the question raised was whether they should receive compensation for work which they did not do. There was no Act of Parliament and no power in the War Office so to compensate. The only course open to them, therefore, was to appeal *ad misericordiam* to the Treasury, and he was bound to say that he could not hold out very promising hopes of success in that quarter. The scale of payment for work actually performed was increased. The right hon. gentleman having pointed out that Militia surgeons stood on a different footing with regard to compensation to the adjutants, to which reference had been made by Mr. Hart, said he could not hold out any hope that compensation for Militia surgeons would be obtained from any quarter. The deputation then withdrew.

"On the Staff" writes:—"Changes are about to be made to benefit the Militia. I would suggest that those non-commissioned officers of the Army who are serving in that branch should have the same allowances (lodging, fuel, and light) as they would be entitled to were they serving in the same rank in their own regiments. It is a sure sign that the ranks of the permanent Staff cannot be kept complete when we find the qualifying service reduced. I may add that the Auxiliary Forces regulations are little known to non-commissioned officers serving in the Army. When I was requested to join the Militia, I was told that so far as pay and allowances went I should be as well off as if I was serving in my own regiment; but on joining I found out the mistake. I will quote one out of the many things not generally known by non-commissioned officers in the Army. Para. *e.*, Clause 56, A and R Forces Cir., 1874, lays down that lodging allowances, "irrespective of rank," be at the rate of 6d. per diem. This clause should have been altered, sergeants in the Militia (completing their Army service) to have the same rank, pay, and allowances as if serving in the Army; and, if holding superior rank, to have, in addition, such service towards pension of the higher grade. Non-commissioned officers, on completion of their Army engagement, to be sent to their homes or place of enlistment in the same manner as if serving with the colours. They should also receive the usual marching allowance of 20s. Why this is withheld is not apparent."

"Pay List" writes:—"Under the existing system the vindictive or good report of any sergeant-major of Militia has the effect too often of depriving or securing the additional pension to members of the Staff. Is it desirable that this rule should continue in force? I, from experience, think not."

There will be no School of Instruction for officers of the Auxiliary Forces (Infantry) at Aldershot next month.

VOLUNTEERS.

1st Adm. Batn. Aberdeen. Capt. Papillon, 92nd Highlanders, obtains the adjutancy, vice Capt. Blair, resigned.

40th Middlesex Rifles. The Russian Government having refused to allow any foreigners to accompany its Army, Lieut.-Col. Vincent will not proceed to the seat of war, as it had been arranged he should, as a special correspondent.

Mr. C. Allsopp asked the Secretary of State for War on Monday what steps the Government were about to take to increase the pay of adjutants of Volunteers appointed prior to 1871. Mr. G. Hardy stated that a circular was about to be issued which would contain the terms on which Volunteer adjutants would be paid. With certain exceptions the adjutants would be paid at the rate of captains in the Army.

"An Army Chaplain of Twenty-Two Years' Service" writes:—"The result of the extraordinary decision come to by the War Office will be simply this: that very many excellent gentlemen will be prevented making geese of themselves. The commissioned chaplains to the forces are entitled to wear uniform of a certain cut and pattern, designating the rank and service of the wearer. Which rank do the chaplains to the Volunteers intend to assume? Will they vault at once into a colonel's seat, which takes commissioned chaplains twenty years to do, or will they be satisfied with being ranked as captains, which is the relative rank of chaplains to the forces for the first ten years of their service. It is a universal practice amongst commissioned chaplains not to flaunt their uniform before the British soldier, and to be satisfied to appear in the ordinary dress of an English clergyman. In time of war, when, but for the uniform, a chaplain might be taken up as a spy, as once occurred in the Crimea, or in large camps, where the chaplain could not always be recognised except for his distinctive dress, and where, in consequence, he might be seriously incommoded in the discharge of his duties, we put on 'our regimentals,' but not in garrison towns."

THE INDIAN ARMY.

4th Bengal Cavalry. Capt. W. R. Hamilton, squadron officer, is employed on famine relief operations in Madras.

6th Bengal Cavalry. Surg.-Major G. Barnard, in medical charge, has been granted furlough to England for eighteen months.

7th Bengal Cavalry. Lieut.-Col. C. W. Fletcher, officiating second in command and squadron commander, 2nd Cavalry, has been transferred to the 7th in a similar capacity, vice Major Graham, proceeding on furlough.

15th Bengal Cavalry. Lieut. F. R. Ditmas, squadron subaltern, has arrived home on furlough.

18th Bengal Cavalry. Capt. A. P. Broome, officiating squadron commander, is employed on famine relief operations in Madras. Lieut. J. F. D. Fordyce has joined the Staff of Major-Gen. Maude, V.C., C.B., at Allahabad, as aide-de-camp, and is succeeded as squadron officer by Lieut. T. H. Eyre, officiating on probation.

19th Bengal Cavalry. Capt. W. W. Biscoe, squadron commander, is employed on famine relief operations in Madras.

1st Bengal N.I. The *Delhi Gazette* announces the death at Benares, on March 22, of Lieut.-Col. F. J. Craigie, commandant. The deceased officer's date of first commission was Dec. 8, 1848; the date of his first appointment to the 1st N.I. was Jan. 20, 1864, of which regiment he was appointed commandant on March 1, 1876. His war services were as follows:—Present as a volunteer with force under Brig.-Gen. Chamberlain in Meeranzye and Upper Koorum in 1856, skirmishes at Thull, Thorawarrie, and Billundkhel; commanded a party of 2nd Punjab Cavalry and 24th Punjab Infantry in a successful affair against rebels at Nooreah in Rohilcund on Aug. 29, and commanded Cavalry at attack on enemy's position at Seerpoorah on Aug. 30, 1858—received thanks of Government and Commander-in-Chief, *vide* G. O. G. G., Oct. 1, 1858 (medal); commanded 2nd Punjab Cavalry in Brigdr.-Gen. Chamberlain's expedition against Cabul Kheyl Wuzeeree tribe in 1859-60 (medal).

10th Bengal N.I. Col. H. King, commandant, has obtained leave to Nayne Tal from the 10th inst. to Oct. 10, on medical certificate.

29th Bengal N.I. Capt. T. St. Q. Clutterbuck, Bengal General List (on furlough), has been appointed wing officer, to complete the establishment.

35th Bengal N.I. Lieut. F. T. Goodridge, wing officer 13th N.I., has been transferred to the 35th in the same capacity.

39th Bengal N.I. Lieut.-Col. H. W. Wemyss, second in command, officiates as commandant during the absence of Col. Fraser, on furlough in England.

45th Bengal N.I. Capt. R. J. Waller, adjt., has arrived home from India on furlough. Surg. W. W. Galloway, M.B., in medical charge, has been granted leave to Mussoorie from the 10th prox. to Nov. 10, on private affairs.

4th Punjab Cavalry. Major T. C. Underwood, squadron commander (on furlough), has been appointed second in command, vice Major Gillespie, deceased, Capt. T. Shepherd being appointed third squadron commander, Capt. E. A. Money squadron officer and adjt., and Lieut. E. Lloyd adjt.

4th Goorkhas. Lieut. C. A. Mercer, wing officer, is employed in connection with the famine relief operations in Madras.

1st Central India Horse. Lieut. C. E. Money is employed in connection with the famine relief operations in Madras.

1st Madras Light Cavalry. Major A. D. Parsons, squadron officer, has arrived home on furlough.

3rd Madras Light Cavalry. A Madras paper says:—"The disturbances by Rohillas, reported from Kurnool, which have caused the Madras Government to require the 3rd Madras Cavalry at Bellary to hold itself in readiness to march at brief notice for Kurnool, are, doubtless, connected with the report that the collector of the district lately made to Government that a gang of 400 Lombadi dacoits, 200 of whom had muskets, looted and burnt Cherlopalli village, Markapur Talook, on the night of the 7th inst., and passed into Nandicolkur, Talook Raidrug."

14th Madras N.I. Lieut.-Col. R. S. Burge, wing officer, is about to return to duty in India.

1st Bombay Light Cavalry. Col. J. Blair, V.C., commandant, has been granted furlough to Europe for two years.

Poona Horse. Capt. G. C. Hogg, squadron officer, has arrived home on furlough.

1st Sind Horse. Lieut. C. A. de N. Lucas, adjt., is about to be promoted capt. Capt. C. A. Lucas retains his appointment as adjt. on promotion.

2nd Sind Horse. Major J. F. Forbes, commandant, has arrived home on furlough.

5th Bombay N.I. Sub-Lieut. S. D. Giles, 7th Foot, attached, has passed the lower standard examination in Hindostanee.

9th Bombay N.I. Capt. H. C. Morse, qrmr., has been granted furlough to England for two years.

28th Bombay N.I. Lieut.-Col. S. J. Thorp, second in command, has been granted a six months' extension of leave in England.

4th Punjab Infantry. Major A. FitzHugh, wing commander, 5th Goorkhas, has been appointed to officiate as commandant, vice Lieut.-Col. Close, granted furlough to Europe.

The Army Gazette.

WAR OFFICE, PALL MALL, April 24, 1877.

Commissariat and Transport Department—Assist.-Comy. J. Power retires upon half pay with the hon. rank of Capt. from April 25, 1877.

WAR OFFICE, PALL MALL, April 27, 1877.

Corps of Royal Engineers—Lieut. W. J. Galwey to be Capt., vice A. J. Hepper, made Supy., upon appointment as Adjt. to the Royal Anglesea Militia Engineers; April 1, 1877. Lieut. W. H. Haydon to be Capt., vice Sir A. W. Mackworth, Bart., made Supy., upon appointment as Adjt. of the Monmouth Militia Engineers; April 1, 1877. Lieut. J. G. Hall to be Capt., vice K. C. Pye, deceased; April 9, 1877.

BREVET.

Col. R. M. Laffan, Royal Engineers, to have the rank of Brigdr.-Gen. while serving in command of the troops in Bermuda; April 27, 1877.

Lieut.-Col. G. E. L. Walker, Royal Engineers, having completed the qualifying service, to be Col.; April 12, 1877.

The Militia Gazette.

WAR OFFICE, April 24, 1877.

Where not otherwise specified, the following commissions and announcements bear date April 25, 1877:—

Artillery.

Argyll and Bute—Francis Alexander Walker-Jones, gent., to be Sub-Lieut. (Supy.).

Engineers.

Royal Anglesey—Capt. F. J. Baker resigns commission.

Infantry.

Royal Bucks—Alexander Robert Wigram, gent., to be Sub-Lieut. (Supy.).

2nd Royal Cheshire—James William Traill, gent., to be Sub-Lieut.; April 16, 1877.

Royal Glamorgan—Major H. A. Palmer resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

Hampshire—Gilbert Joshua Spencer Smith, Esq., late Capt. 85th Foot, to be Capt.

East Kent—Sub-Lieut. G. G. Whitehead resigns commission.

West Kent—Sub-Lieut. G. M. Williams resigns commission.

1st Royal Lancashire—Lieuts. C. H. Walmesley and W. C. Yates to be Capts. Sub-Lieut. H. L. Lutwyche to be Lieut.; March 20, 1875. Sub-Lieut. the Hon. R. J. Gerard to be Lieut.; May 3, 1875.

3rd Royal Lancashire—Sub-Lieut. J. Bayly, from the Galway Militia, to be Sub-Lieut.; April 13, 1877.

Royal London—Major J. Britten resigns commission, also is granted the hon. rank of Lieut.-Col., and is permitted to continue to wear the uniform of the regiment on his retirement.

Royal East Middlesex—Wilkes Jolliffe, gent., to be Sub-Lieut. (Supy.).

Northampton and Rutland—The Christian names of Major and Hon. Lieut.-Col. D'Arcy are Robert James, and not James only, as stated in the *London Gazette* of April 20, 1877.

Shropshire—Eldred Owen Owen, gent., to be Sub-Lieut.; April 12, 1877.

1st Somerset—Herbert Phelips Batten, gent., to be Sub-Lieut. (Supy.).

1st Warwick—Edmund Molyneux, gent., to be Sub-Lieut.; April 13, 1877.

Armagh—Sub-Lieut. A. J. Nettleship resigns commission.

Royal Dublin City—Lieut. H. W. Phepoe to be Capt. Lieut. H. Perssé resigns commission.

Galway—The Christian names of Lieut.-Col. Daly are John Archer only, and not John Archer Blake, as stated in the *London Gazettes* of July 16, 1872, and March 2, 1877. Major O. Martyn is granted the hon. rank of Lieut.-Col.

King's County—Major T. A. Pierce resigns commission, also is granted the hon. rank of Lieut.-Col., and is permitted to continue to wear the uniform of the regiment on his retirement.

South Mayo—Major D. E. Browne to be Lieut.-Col., vice S. P. Lea, resigned. Capt. and Hon. Major H. Taaffe-Ferrall to be Major, vice D. E. Browne, promoted.

Queen's County—Capt. F. P. Dunne resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

YEOMANRY CAVALRY.

Dorset—Lieut. W. R. Phelips resigns commission.

Gloucestershire—John Hargreaves, gent., to be Sub-Lieut. (Supy.).

Gen. the Earl of Lucan, says the *Morning Post*, has returned to his house in South-street, after a short residence on the Sussex coast, quite recovered from the effects of his recent severe attack of bronchitis.

A dramatic entertainment came off at the Curragh on the 11th inst., when the officers and ladies at the camp performed the comedy of *Caste*, at the Gymnasium Theatre, in presence of a crowded house—no money, of course, being taken at the doors. Mrs. Bray played the trying part of Esther Eccles with great power and pathos; Miss Ryan made a most piquant and lively Polly Eccles; Mrs. Yorke was the Marquise de St. Maur; Colonel Bray, 4th K.O., convulsed the house as Old Eccles; Mr. H. H. Stuart, 86th, made a particularly good D'Alroy; Captain Lonsdale, 75th, a most effective Hawtree; while the *rôle* of the inimitable Sam Gerridge was taken, and very well performed, by Captain Foulcott, 86th, and that of Dickson by Captain Telfer, of the 4th. Altogether the piece was admirably played throughout, and the house was kept for nearly two hours and a half in an almost continuous roar of laughter. Indeed, it is very seldom that a company of amateurs has played a difficult performance so well, and their efforts met with an amount of applause as warm and encouraging as it was well deserved. The piece was capitally set, the tableaux being excellently arranged; and the band of the 86th Regiment, which was in attendance, added materially to the pleasure of the evening by their remarkably well-played music.

THE BRITISH ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Differing essentially, as our country does, both in its political and physical condition, from all Continental nations, especially the German, would it not be well, before we are too far committed in copying, or rather travestying the military organization of that country, to ask ourselves the question, Is it really practicable to model our system upon theirs? Our insular position, the impossibility at present, for many reasons, of introducing conscription, and the fact of our Army being always principally employed on foreign service, are each sufficient impediments in this direction. The tendency of all improvement in military organization is to simplify and render more compact and handy the tactical units. In Cavalry the squadron takes the part in action that the regiment did formerly; in Infantry the company, or double company, acts the part of the former battalion, and we have now, in our Field Artillery, improved upon the unwieldy brigade system by making the battery the working tactical unit. How comes it, then, that we now propose to mass our Infantry in regiments five battalions strong? But what seems still more questionable, in the interest of an army scattered as ours is all over the globe, is the suggestion that three of these five battalions are to be permanently located at home, two of the three serving only twenty-eight days in the year. The commandants of these two will generally be in a position such as that of lord-lieutenant of their county, which will place them rather under the civilian War Minister, who changes with every change of Government, than under the military chief at the Horse Guards; the commandants of the two general service battalions, on the other hand, must look solely to the latter authority. What sympathy or common *esprit de corps* can be expected in a regiment composed of battalions so differently commanded, and some of which never leave home, while the others must pass more than half their time abroad, and be often actively employed against the enemy? Yet, to carry out this unprecedented military amalgamation, the historic war numbers and distinctive badges of our fighting regiments are to be rudely pitched aside and Militia territorial designations substituted! The idea seems too great a mockery to be true. This scheme, it is said, "will at last effectively unite the Militia to the Army, so that both shall be one military body. It will make the Militia more military in feeling, and, therefore, more efficient." Military feeling, which, in its true sense, is discipline, is not so easily acquired. The historian Napier tells us three years of incessant training as a soldier are required to impart it fully, and, however contrary to the opinion of civilians and amateurs in our country, Moltke, the greatest of modern warriors, thinks so too. It is not to be attained by any nominal brigading of Militia with Line battalions in territorial regiments. The minority in all societies is forced to conform to the tone of the majority, and in this case, the proportion against the regular soldier being as three to two, the chances would be rather that he should conform to the Militia in feeling while on home service; thus the natural disinclination to foreign service would be probably increased. "It is essential," say the advocates of this new scheme, "that each battalion abroad should have a sister battalion in England, from which the necessary drafts of men could be annually sent to make good their deficiency." Why, then, is it that we as often as not have in regiments of two battalions both abroad together? Has it ever been stated that they are less readily recruited on that account? In the East India Company's Army there were nine European regiments all single battalion corps, and it is a well-established fact that these regiments, with simply one general depôt, but no sister battalions in England, were never at a loss for recruits. We are told by the friends of this new system that "to us more than to any [European nation] it is essential that regiments should consist of two or more battalions." The very reverse, perhaps, would be more correct, for there is no army so much in contact with unscientific foes, and in which, consequently, single battalions are found so often too large for the service of a single station. In our "Straits Settlements" just now, for example, we have one battalion distributed by companies and double companies in four different stations hundreds of miles apart. Where armies are recruited by conscription the territorial designation of regiments may be appropriate, for each district must supply its quota of recruits for its own army corps, and no foreign service is in the way of Continental armies to interfere with such arrangements, but a glance at the distribution of our Line regiments under the proposed scheme shows how irrespective of proportion to either the "Reserve Forces" or population they are arranged. In England, to eighty-two Militia battalions there are allotted 113 of the Line; in Ireland, to thirty-five Militia there are sixteen Line; and in Scotland, to eleven Militia there are told off sixteen Line battalions. A Line battalion may be in great proportion—both officers and men—Irish; but, because it bears an English county name, it is told off with the Militia of that county. There is another aspect in which this matter may be viewed—viz., in its probable future bearing upon those officers who enter the Service to make it their life-long profession. Such men, as a rule, now enter by competitive examination. Those among them who have not a private income make up their minds to serve abroad, which the rich men will never be content to do; but if Militia and Army officers are all clumped together in battalions of the same regiment, what is to prevent the Militia officer from exchanging, in any rank, into the Line battalions of his regiment, just as Line officers of different battalions in the same regiment now exchange with each other? And thus a man who has passed his service fighting on our north-west frontier in India may be liable to find himself junior in his battalion, on its return home, to one who has simply done twenty-eight days' duty in the year in England. Is this calculated to encourage the professional spirit and education of the Army, and to make the Militia more military in feeling, or would it act as a damper to all soldierly zeal and pride? The Militia is a force valuable in itself, and as distinct from the Regular Army, but it never can be amalgamated in the same sense as Continental Reserves and Landwehr are with their Active Armies, which simply mean with them their former regiments and brigades, in which they have performed all duty as soldiers, and often on active service in the field. The more the proposed changes are looked into, the more clear does it appear they are a mortal blow levelled at the military feeling of our Army, and that their effect must be to magnify the Militia at the expense of the Army. The Army, instead of being solely under its military chief, will soon become influenced by local county magnates, War Office officials, and members of Parliament. The proposed changes appear at once reactionary Tory and advanced Radical. The door of entrance into the Army is apparently being closed against those who have not interest or money, and it will be practically forgotten that a high standard of professional attainment is now necessary for all who aspire to command. So far the scheme is reactionary, and the influence that will again attach to Militia colonels, that is, lords-lieutenants of counties, or county, that is Parliamentary interest, as distinct from the military authority of the Horse Guards directly under the Sovereign, makes the proposed changes radical in their tendency. We even now see a systematic interference on the part of members of Parliament with the details of military discipline, and within the last week the Minister of War was questioned as to why young gentlemen in the Militia who had been promised commissions in the Army by their Militia colonels should be disappointed in consequence of certain new rules made with a view to stop jobbery in this direction. Is there no warning to be taken from the mischief so often caused by civilian interference with military authority within its own sphere? What does history teach us from the interference of the Dutch Commissioners with Marlborough, from the dictation of the French Revolutionary Convention to their Republican generals, and more recently from the interference of Gambetta in the French Army organization? And surely the history of the French National Guard is not so brilliant that we need to imitate it in any respect in England.—I am, &c., C.

PAY OF MAJORS R.A. IN INDIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—With reference to the small article regarding the non-payment of arrears of pay due to majors of Royal Artillery in India which appeared in your issue of March 3, 1877, stating that "the pretext for the non-settlement of the claim is understood to be based on the circumstance that certain contract allowances were granted to some majors to keep gun-carriages in repair, and to renew stable gear and the like," I do not think that the English public, or many who see the justice of our cause, and are ready to advocate it, are aware that when the order transferring these contracts to Government from April 1, 1875, was published, committees or boards were convened at the various Artillery stations to inspect the whole of the gun-carriages and equipments, and to direct that such and such articles be renewed at the commander's expense before handing over to Government. To my personal knowledge many officers were assessed damages at upwards of 800 rupees. This was money which had to be paid down. I also know of instances in which officers, under the contract system, on returning a condemned battery of guns and carriages into an arsenal, had damages assessed at upwards of 500 rupees because the Inspector-General of Ordnance reported such and such portions should have been in better order. You can imagine from this how much an officer could make out of these contracts, or whether he could with safety or certainty put by sufficient money every month to pay himself as a major. I say, to take such a thing as granted, and to imply that, as a rule, it was done, is a slur cast on the regiment, for I know many who expended every penny; and for years there had been a cry to take away these contracts, that we were not a lot of marine store dealers.—I am, &c., Poor Petitioner.

THE 68th REGIMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Having seen a paragraph in the Army and Navy Gazette of the 21st inst., in which your correspondent bears testimony to the excellent character of the 68th Light Infantry while under my command, I think it right to mention that the foundation of that excellent character was laid by my old commanding officer, now Gen. Lord William Paulet, G.C.B. It was an easy task for me to keep up that character, supported as I was by the very good officers who served under me.—I am, &c., H. Smyth, Lieut.-Gen.

TERRITORIAL REGIMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—It appears to me that most of the authors of the letters on the bad effect of territorial regiments on the *esprit de çorps* of British regiments forget, or overlook the fact, that *esprit de corps* was practically done for when the order was given that all men should be enlisted for the brigade. Thus, a man enlists for Brigade 90 and joins the 120th Regiment for about a year, and learns to look upon it as his home, and the finest regiment in the British Army. Suddenly men are wanted for the twin regiment, the 170th, and the man is ordered off to India to join the 170th, taken away from the officers he has learnt to know and respect, and the number he has learnt to believe in, and has to begin again, first to try and lose all *esprit de corps* for 120th, and then to get up *esprit de corps* for 170th, a thing not to be done, and he puts in the remainder of his time without caring what regiment he serves in, or what is its character, if comfortable. Besides, how can an officer take any interest in a man as a recruit when he knows that directly the man becomes a smart and efficient soldier he will be drafted off to a regiment bearing another number, and for which, so far as its character is concerned, the officer cares nothing? Make the two regiments two battalions of one regiment, and call them the "Hampshire Slashers," and the men will always swear by the Hampshire Slashers, no matter whether they are serving with the 1st or 2nd Batn., and the officers will take an interest in the men, for they will always belong to his regiment and be liable to come under his command again as he is promoted or exchanges. I would not have advocated territorial regiments under the old system of long service and enlistment for a particular regiment; but you must cut your coat according to your cloth, and with new regulations for recruiting and service forced upon the Army must come a new system to make it work. I maintain, territorial regiments are more likely to encourage than to destroy *esprit de corps*.—I am, &c., E. J. H.

"Senex" writes:—"I believe an order was last year issued for an increase of pay to lance-sergeants and lance-corporals. Now I am doing duty as a corporal, sometimes as a sergeant, for which duties I receive no extra pay whatever, whilst a lance-corporal employed as billiard-marker in the officers' mess is given the extra sum. Is this the meaning of the order? I may state that my regiment is a Cavalry corps, and occupies quarters in the North of England."

Army & Navy Gazette.

LONDON, SATURDAY, APRIL 28, 1877.

The announcement in the *Globe* last night, that the Sultan will leave Constantinople to-day to inspect the Turkish Army on the line of the Danube, and that he will afterwards proceed to Kars with the object of inspecting his troops in Asia Minor, indicates, if true, a profound conviction that the fortunes of Islam and of the House of Hofman are at stake in the impending contest more immediately and decisively than ever they have been imperilled since the Turks established themselves in Europe. It indicates, too, a return to the old traditions of the house confirming the promise contained in the proclamation of the Sultan to his Army, that he would unfurl the standard of the Kaliphate and of his Imperial house at the head of his troops. But, as the announcement which comes from the Pera correspondent of our contemporary is in the nature of a prophecy, it may be regarded with a certain degree of suspicion—in so far, at least, as the fulfilment of the intention of visiting Asia Minor is concerned. For, even with the free right of transit secured from Varna to Bahtoum, or whatever other port the Sultan may select for his landing, a journey to Kars is no slight matter, and the absence of his Imperial Majesty from Europe might be attended with great inconveniences. It has been stated, and believed by those best informed, the first attack on Turkish territory has been directed against the Turkish outposts in Asia, and it would be rather premature to accept the report of the success in front of Bahtoum as likely to be followed by accounts of successes of a more decisive character. It is well known that the army assembled by Russia, trained in the Caucasus, and kept continually on a war footing in Georgia and Mingrelia, is in a high state of efficiency and strength, and the accounts of recent observers, including Captain Burnaby, do not inspire us with much confidence in the state and force of the Turkish divisions which will have to resist their inroads. Still, we have in black and white a dispatch from the Turkish Divisional General at Bahtoum to state that on Wednesday, the 25th, the advance of the Russians was checked, and that they retreated with a loss of 800 men. But if fighting was going on last Thursday, it would seem as if they had not retreated very far, and it is most likely that it was only a reconnaissance upon Churaksom, which had been encountered by the Turkish troops. That the Russians are coming on in force is plain from the statement that they have crossed the frontier at three points, that Kars is already menaced by a force of Cossacks, who are merely the *eclaireurs* of a regular army, and the fighting has already occurred at Goomri, near Kars itself. Ardhan is believed to be tolerably strong, and Bahtoum, weak on the land side, where it is exposed to attack, now is strong upon the sea side, where the Turkish Fleet can cover it; and, if the Russians are not strong enough to attack the latter place, they may have to undertake a regular siege. The defences of Kars have been greatly improved. The redoubts, of which the works defended by the Turks in 1854 were but the rudiments, now occupy a large area in commanding positions. But it is questionable whether the supplies of ammunition for Krupp guns and breech-loading rifles in the possession of the Turks are adequate for a long campaign, and the difficulties of procuring fresh supplies are considerable. It is with some surprise we hear of an advance of the Turkish troops towards Alexandropol. This would be a counter invasion of Russian territory, and would show that the Turks were much stronger than was generally supposed in that quarter; unless, indeed, they be carried away by warlike enthusiasm and religious fanaticism to excessive hardiness. So far the news would indicate the imminence of serious operations in Asia Minor; but from Bahtoum, Kars, and Erzeroum to the shores of the Bosphorus and the pleasant hills of Scutari, there is many a long and weary march. "It is a far cry to Loch Awe"—more than three times the distance that it is from the present position of the Russians on the European side to the heights over Constantinople on the right bank of the Bosphorus. So far, it appears as if the Russians meditated a wide sweep down both shores of the Black Sea, advancing cautiously towards the Balkans with a force which must be greatly in excess, if the numbers be rightly reported, of those of the Turks. So that they can hold the troops now engaged on the line of the Danube shut up in a line of defensive positions, whilst armies equally large push as fast as they can along the Asiatic Coast towards the common objective points. The occupation of the Isthmus at Gallipoli would not now suffice to check the passage of ironclads, and the swift currents of the Dardanelles would render the use of torpedoes difficult and uncertain. But it seems unlikely that the Russians have either the naval strength or inclination to try any naval experiments in that direction. The main task, and that which presents apparently no ordinary difficulties, is to stay the march of the Russians in the Asiatic provinces. It is in that direction that what are called English interests are most seriously affected. There may be considerable resistance offered by the hordes of Kurds and other wild warriors, but it will not and cannot be of such a nature as to do more than impede to a certain extent the march of regular armies; and, according to what we have heard, the Russians are likely to bring multitudes of the same sort of wild auxiliaries into the field on their side. The occupation of Roumania appears to have been effected judiciously and rapidly, and the Russians are, no doubt, at this time preparing for the passage of the Danube. In this difficult operation the Turkish men-of-war and gunboats present an important factor for the calculations of the invading Generals; but we do not at all share the apprehensions or anticipations of the Pera correspondent of the *Times*, that Hobart Pacha may be caught on his way down the Danube from Rustchuk by the Russians in Ibraila and other points on the river, which is now exceedingly high and flooded. Within the next week, no doubt, the plans of the Russians will be more thoroughly developed. As to the Turks, their strategy will probably be that sort of natural adhesion to strong places which has always characterized them. The active measures which are recommended in the present emergency to the Government of this country are somewhat hazardous if we wish to avoid an immediate involvement in the war, the localizing of which is regarded as of such immense importance. The active and strenuous policy of defending interests by forbidding belligerents to do this or to do that is a policy of war, and no plea of urgency or greatness of these interests justify England or any other Power in endeavouring to curtail the rights of belligerents, which, if insisted upon, must lead us to consider the question whether we shall go to war to protect them or not.

We understand that her Royal and Imperial Highness the Duchess of Edinburgh is only on a short visit to her Majesty the Queen, and that she will, after a brief residence in this country, proceed to Russia, where she will remain with the Imperial family for three months, in accordance with the arrangements long ago determined upon. As the departure of the Imperial Archduchess might very probably give rise to vague rumours and idle gossip, it is as well to forestall them by making this statement, and by letting it be known that the visits were determined upon long before the present unhappy complications.

What a pity that our Army has not such an illustration of life and manners in the ranks as our neighbours possess in Mons. G. Randon, whose sketches enrich the pages of *Petit Journal pour Rire!* "Nos Troupiers" are gems in their way. In the last number there is an enormous Tambour-Major, twirling the end of a formidable moustache, and towering above a smart little non-commissioned officer of the Line, with a soubrette, of course, in the background. He has been arguing the point with his small comrade, and goes on, "I have heard it said that Alexander was little. Frederick, and even Napoleon, were not very fine men either, I grant you that! But if these heroes had been of my size, would they not have been—I say it without flattering myself—far greater still?"

The *Lancet* gives a very favourable account of the Russian Army in Bessarabia and the Reserve of that of the Turks, and there is reason to believe that our contemporary is well informed on the point. However, the health of armies is very soon altered by the result of active operations in the field.

The War Office, by its revival of an obsolete regulation, have raised the question why horses required for the public service should not be provided at the public cost? The country has been fortunate hitherto in obtaining officers who were able and willing to provide horses for the State, and, whether they were their own or the property of brother officers, or of relatives or friends, the State secured their services at the cost of the issue of forage only; but, in looking "the gift horse in the mouth," we have overshot the mark, and in decreeing the withholding of the forage, or the forage allowance, where the charger is not *bonâ fide* the property of the officer using it, a claim has been raised which it will be found difficult to dispute. There is no Warrant for the custom which now prevails of compelling officers to purchase horses for the use of the public, and it is not right that they should be put to the great expense of providing what the State should find for them—an expense not warranted by the largeness of their pay, or on any other ground whatever, and from which it is to be hoped they will ere long be relieved.

The Distinguished Service Reward of £50 per annum, which fell vacant by the death of Lieutenant-Colonel J. Webster, Paymaster, half pay, late 78th Highlanders, has been awarded to Captain-Quartermaster J. Prenger, half pay, late 12th Lancers. Captain Prenger served with the 12th Lancers in the Kaffir war of 1851-53, including the battle of the Berea (medal); served in the Crimea from May 9, 1855, and was present at the capture of Tchorgaun, battle of the Tchernaya, siege and fall of Sebastopol, and at Eupatoria with the Light Infantry Brigade (medal with clasp and Turkish medal). In June, 1856, he was granted an annuity and medal for meritorious services. Served in the campaign of 1857-59 in Central India. He obtained his commission June 10, 1862, and retired upon half pay with the honorary rank of Captain December 9, 1876.

If the indications of the feeling of the country, which are to be found in the speeches of public men, in the decisions of constituencies, and in the tone of the local Press, are to be relied upon, the Government which determines on a bold course of policy will not only be encouraged, but will probably be propelled by a great wave of popular enthusiasm; but we, for one, do not desire to see the hands of Government forced prematurely under the excitement of an ill-considered reaction. There can be no doubt of the existence of a very strong feeling in the country. In the tumult of battle the voice of law is hushed, but Turkey certainly seems to have right on her side in appealing to the clause of the Treaty of Paris of which Russia was a co-signatary. Nothing can be clearer than the language of the 8th Article:—"If there should arise between the Sublime Porte and one or more of the other signing Powers any misunderstanding which might endanger the maintenance of their relations, the Sublime Porte and each of such Powers, before having recourse to the use of force, shall afford the other contracting parties the opportunity of preventing such an extremity by means of their mediation." The 2nd Article of the treaty between the Emperor of Austria and the Emperor of the French, of which the ratifications were exchanged at Paris in April, 1856, also provides that Austria and France, jointly and severally, guarantee the independence and integrity of the Ottoman Empire, and "any infraction of the stipulations of the said treaty will be considered by the Powers signing the present treaty as a *casus belli*." If words mean anything, these clauses have not been worth the paper they were written on.

The sudden subsidence of the pavement in front of one of the entrances to the War Office, which is affected mostly by the military element and by the Horse Guards' Staff, was not due, we understand, to any attempts to open up underground communication with the Intelligence Department on the other side of the way, nor was it due to any machinations of a hostile character, or to the proceedings of the Sanitary Commissioners. Rats, it is said by some, have had something to do with it, and so have gas-pipes. Others think that it was a great attempt on the part of the War Office to demolish itself by falling into its own cellars, and that it might have been successful but for the immense stores of the whitey-brown paper laid in by an economical Administration for the use of the officers and clerks who are condemned henceforth to correspond through this very undesirable medium. The works which have been cast up in front of the office deserve the attention of the military student.

It is natural at a time when war is "lightening up" the air that there should be a little elation among the professional circles of the Service, and that every word at a public dinner spoken by a Minister or by a man of note in relation to the aspect of affairs should be closely scrutinised. There have been several stereotyped speeches made this week at banquets, in which gallant officers have returned thanks for the Army and Navy, but we request our foreign friends not to believe that there is anything more significant than usual in the complimentary phrases indulged in upon these occasions, or that the cheers which greet the assurance that the British soldier is ready to do whatever duty he may be called upon to perform, and that the British Navy is prepared to go wherever it may be sent, are of more than ordinary significance.

The number of retired officers and of half-pays pressing to the front, eager and clamorous for service with sword or pen, is quite wonderful, but as yet the demands for service in the field have not been received with a favourable ear by the authorities. The officers of the Army Intelligence Department have been exceedingly busy, and it is quite right that they should have a little theoretical work, to keep their hands in. Meanwhile amateurs are hovering around the "Seat of War," as it is called, which means generally all the East of Europe, like crows over a newly-sown corn field; and T. G.'s have been haunting the neighbourhood of the hostile hosts. Colonel Stracey has visited the Russian head-quarters and the position at Kischeneff, and it would appear from his reports that the troops are in very good order, and that the transport and other arrangements for the campaign are satisfactory. In view of possible emergencies, the authorities here are counting heads, and generally the arrangements which were sketched out when the Government were rather more inclined for active participation in the present contest have been adhered to. The announcement, made some time ago, that Sir L. Simmons would have an important command, is, we believe, perfectly correct; the decision is said to have been arrived at by a Cabinet Council which sat some months ago, and the names of others are no secrets.

Orders have been issued for the 92nd Highlanders to discontinue wearing the black sword-belt for undress. In future the belt to be worn will be that of other Highland regiments.

The reception by the Secretary of State for War and Mrs. Hardy, on Wednesday night, was very numerously attended, and the list of guests fills a large space in the columns of one of our fashionable contemporaries. Conspicuous amongst them at such a time—or, indeed, at any time—was, of course, Count Schouvaloff, and it was observed that his Excellency was engaged for a considerable time in a very animated, but apparently not unfriendly, conversation with Musurus Pacha, the representative of Turkey, who has throughout these distressing negotiations gained the good will and regard even of his most determined opponents. It is a pity that the two diplomatic gentlemen could not then and there have come to an understanding which might prevent a great deal of trouble along the Danube in the ensuing summer.

REVIEWS.

The Quarterly.

The military position of Russia in Central Asia is made the subject of an exhaustive article in the current number of the *Quarterly*. Some works recently published which have reference to that subject are carefully considered by the reviewer; for example, "Notes of a Journey in Russian Turkestan," by Eugene Schuyler; "A Ride to Khiva," by Captain Burnaby; "Campaigning on the Oxus," by J. MacGahan; "Shores of Lake Aral," by Major Wood, R.E.; and "Clouds in the East," by Valentine Baker. The object of the article in question appears to be that of reassuring the public mind as to any apprehensions that may exist in consequence of the recent annexations of territory effected by Russia in Central Asia. From time to time during the last few years the future of our possessions in India has been made the subject of discussion, and has no doubt caused considerable anxiety. The writer in the *Quarterly* points out how difficult it is, even supposing that Russia entertains hostile intentions towards England, to feel any real alarm as to a possible invasion, or even threat of invasion, of India. "When we consider the great strength of our own position in India—strength not only derived from the geographical features of the country, but from the vast military resources at our disposal, from the energy of our character, and the justice of our rule—it seems quite remarkable that feelings of uneasiness should from time to time arise as to the supposed designs or capability of Russia to injure us. May we not with far more reason feel that the real power in that part of the world is in our hands — that should war arise it rests with us to march out to the attack, and that we could do so as from a citadel sending forth great armies highly-equipped, and strengthened not only by all the appliances of modern warfare, but by a conviction that the sympathies and interests of the races are on our side?" Some few years ago Central Asia was a *terra incognita* rarely, if ever, visited by travellers. Its political and military changes were subjects of supreme indifference to the general public, who regarded the matter with indifference, as one not yet of practical concern for English statesmanship. But of late years all this has been changed; the traveller in search of some new sensation, and the explorer bent on scientific enquiry, have penetrated the entire region, and have yielded the most interesting information as to the inhabitants, their mode of life, and general condition. Having rapidly reviewed the progress made by Russia in Central Asia during the last few years, the writer in the *Quarterly* regards the military aspect of the question, and points out the great changes that have of late years taken place, and the consequent uneasiness that has been occasioned. The material point of difference between the present and the past lies in the fact that the military forces of a great Power are in comparative proximity to our Indian Empire, and hold ground until lately in possession of Governments which, though usually antagonistic, had no real means of executing their evil designs. These are, no doubt, important changes in themselves, but they become infinitely more so as involving the serious question whether the presence of Russia is the harbinger of danger to England in India, whether great military precautions on her part are necessary, and, in fine, what may be the result on our own position. In considering these questions the reviewer adopts the maxim that "war is a science which depends for its success not only on the courage of well-armed, disciplined hosts, but on the means of rapid concentration of force in given points," and proceeds to show, from the evidence of Mr. Schuyler and others, that although a vast extent of country has been absorbed by the Russian invasion, no increase of military power has been obtained. The population of Central Asia is extremely sparse, the people are nomadic in their habits, they differ from their conquerors in race, religion, and language, and consequently fail to supply the conditions which would alone render extended dominion productive of increased military power; moreover, the power of conducting warlike operations on a great scale against a distant and formidable foe depends very much on facilities of communication and transport for bringing up reserves and munitions, and therefore these elements must be taken into consideration when discussing the possible event of future danger to our Eastern possessions from the southward march of Russian columns. Several writers bear testimony to the hardships that must be endured in winter travelling through Russia. Captain Burnaby describes the cold of the Kirghis desert as a thing unknown even in the Arctic regions. Mr. MacGahan enlarges upon the fatigues and dangers of the desert, of the fiery glare, of the heated atmosphere, and of the intense sufferings of himself and his animals from want of water, while Mr. Schuyler corroborates these statements by his own experience. The writer in the *Quarterly* continues to point out the vast difficulties that must be overcome in order to carry out successfully any military operation in Central Asia, and the consequent difficulty that exists in accounting for the indefinable alarm as to the advancing conquests by Russia that from time to time arises in England. Having left Central Asia, the reviewer considers the position of England in Hindostan, for the purpose of pointing out how, notwithstanding the entirely opposite character of the conditions presented by Hindostan and Central Asia, still the difficulties of Russian advance are even greater in the former than in the latter. It must be admitted that the facts relied upon by the writer in the *Quarterly* and the evidence adduced by him in support of his conclusions should go far to reassure the public mind against apprehension of the consequences arising from the progress that has been recently made by Russia in Central Asia; but it is as equally clear that this will be but partially effected, and that, as far as this question is concerned, the pessimists will remain in strong force.

Questions and Answers for Mounted Men and Drivers of Field Artillery. By Lieut. E. T. D. Cotton, R.H.A. (Boddy and Co., Woolwich.)

We have perused this unpretending little work with pleasure and profit. It is simple and practical, and will certainly prove useful. Furthermore, it is unique, being the only work of its kind, unless our memory fails us. Question 3, Section I., suggests a question on which our Cavalry and Artillery are at issue with the Germans. "Scurf," as Mr. Cotton says, "naturally forms on the surface of the skin of the horse." If this scurf be allowed to accumulate beyond a certain point, the pores of the animal's skin become choked, and his health suffers. If, on the other hand, this scurf, provided by nature, be reduced below a certain point, the horse is unduly exposed to the effects of cold and wet, and his health will suffer still more. The practical question is, where are we to draw the line; or, in other words, what should be the number of stable hours? Were we to discuss this question with a German officer, he would in effect say:—"Too little grooming is a smaller evil than too much. You groom too much; you rely too much on Art, too little on Nature. Three stable hours of one hour each is too much in the day. In general, we have only one stable hour of one hour, and the experience of 1870 has convinced us that that is enough. If your horses, which are kept in so much higher condition than ours, could be transported in glass cases to the battle-field, no doubt they would acquit themselves during the action as well, if not better than ours. But, in point of fact, battle-fields are only reached after long, trying marches, in all sorts of weather, and, undoubtedly, our horses are better adapted for such marches than yours. We care less for appearance than you. Our horses are worked harder and groomed less, and they are, consequently, healthier and hardier than yours." These opinions may seem revolutionary to some of our readers, yet they are worthy of consideration, being conclusions drawn from the results of active service. In Question 66, p. 15, we cannot but think that Mr. Cotton has somewhat overshot the mark. We should say that feeds should always be carried in ordinary peace marches for distances of fifteen miles and over. No one can foresee the accidents that may occur, and, by carrying feeds, one is master of the situation. In Question 106, p. 24, we would suggest the additional test of drawing the nail over the surface of the leather, to see if it be clean. All is not gold that glitters; and if this test were applied, it might perhaps sometimes be found that the glitter of the harness, in some batteries famous for their "leather-work," was due to daubing harness-paste plentifully over dirty leather. In Question 116, p. 27. Mr. Cotton hits upon a blot in our system of carrying shoes. The wooden discs he proposes are necessary to preserve the shoe-pocket, and should be served out by Government. In conclusion, we heartily recommend Mr. Cotton's little work to every officer and non-commissioned officer of the Field Artillery. No one can fail to profit by perusing a book the only fault of which is that it is too short.

The *Memorial de Ingenieros* of Madrid contains an interesting paper of the experiments between Algesiras and Sutar in optic telegraphy. They seem to have obtained very considerable results.

We have received an interesting *brochure* on the organization of the Austro-Hungarian Army, published by Hartleben, of Vienna, Perth, and Leipzig, which at the present moment conveys much useful information.

ADMIRALTY CIRCULAR.

The following Fleet Circular, No. 9, dated April 11, 1877, respecting forfeiture of good-conduct medals, has been promulgated for general information:—

With reference to Article 27, page 31, and Article 18, page 54, of the Revised Pensioned Regulations of July 1, 1876, my Lords Commissioners of the Admiralty are pleased to direct that if a petty officer or leading seaman, R.N., or non-commissioned officer, R.M., in receipt of a good-conduct medal, should be disrated or reduced for misconduct, he is to be absolutely deprived of his medal; but if "very good" character is given for the year in which the deprivation takes place, the medal may be restored after ten years of continuous "exemplary" character after the year in which the medal was taken away.

By command of their Lordships,

ROBERT HALL.

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea. —"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company — Offices, 9, Southampton-street, Strand.

The Navy.

GAZETTE.

ADMIRALTY, April 20, 1877.

Paymaster Stephen Henry Moore, who was placed on the Retired List on July 1, 1876, has been allowed to assume the rank and title of Paymaster-in-Chief from the date of his retirement.

April 21.

Royal Naval Artillery Volunteers, Liverpool Brigade—Sir Llewelyn Turner, Knt., to be Honorary Lieut.; April 21, 1877. Edward Humphreys Owen, Esq., to be Sub-Lieut.; April 21, 1877.

April 24.

Staff Surg. Frederick Augustus Brice has been promoted to the rank of Fleet Surgeon, with seniority of March 31, 1877.

APPOINTMENTS.

Commanders—William H. C. Selby, to the Vestal, vice Henry Hand, promoted; Lord Charles Beresford, to the Thunderer.

Lieutenants—Herbert W. S. Gibson, Lenox Napier, Robert H. Stewart, and Hon. C. A. Denison, to the Thunderer, when commissioned; Charles J. Reddie, to the St. Vincent; S. G. Bourke, to the Lord Warden; and H. D. Law, to the Lily; E. B. Fletcher, to the Duncan, additional, for Naval Barracks; R. F. Yonge, to the Fly; Samuel A. Johnson, M. L. Kelham, and C. G. W. Aylen, to the Urgent.

Sub-Lieutenant—John A. M. Fraser, to the Thunderer.

Navigating-Lieutenants—W. H. Hayward, to the Urgent; and Charles H. Hopkins, to the Thistle.

Paymasters—Richard Williams to the Thunderer; and W. H. Richards, to the Hector.

Assistant-Paymaster—George B. Long, to the Penelope.

Chief Engineer—James Wootton, to the Cambridge, additional for the Gorgon.

Fleet-Surgeon—James Flanaghan, to the Thunderer.

Surgeons—John Norris Browning, to the London; Lawrence W. Corcoran, to the Thunderer; Charles F. Newland, to the Defence; Eugene V. De Meric, to the Monarch; and Frederick W. Laslett, to the Salamis.

Naval Instructor—J. D. Paul, to the Britannia.

ACTIVE, Capt. C. F. Boxer, was docked at Portsmouth on Wednesday, and is being hastened forward for service on the West Coast of Africa, where she will relieve the Tourmaline.

ALACRITY, Lieut.-Com. W. U. Moore, would leave Sydney on March 15, to survey the Fiji Group.

ALBERTA, Staff-Capt. D. N. Welch, was docked at Portsmouth on Saturday for the purpose of being surveyed to ascertain her condition. Her boilers are in a weak condition, and the hull, which was built at Pembroke some sixteen years ago, has recently shown signs of decay.

ALEXANDRA, Capt. R. O'B. FitzRoy, flagship of Rear-Admiral G. T. P. Hornby, while practising in Malta Harbour with the Whitehead struck a Dutch gunboat, the Princess Marie, with the torpedo some feet below the water line. No damage was done. The Alexandra remained at Malta on the 20th inst., but was to leave shortly for the Pirœus.

ARAB, Com. F. S. Broughton, would leave Trincomalee on April 10 for the Madine Islands in search of a brig called the Briton.

ASSISTANCE, Capt. Prattent, on coming alongside the jetty at Portsmouth last week, came into collision with the stern of the Minotaur, damaging the latter's poop, the accident being attributed to a slight delay in reversing the engines.

BITTERN, Com. G. J. Anstruther, arrived at Malta on April 18 from Constantinople, Smyrna, and the Pirœus; she would refit.

CHARYBDIS, Capt. T. E. Smith, was at Shanghai on March 3, doing duty as senior officer. She was to proceed to Hong Kong to be refitted for further services, and on the arrival of the new crew in the Tamar will be paid off and recommissioned, the paid-off crew returning to England in the Tamar.

CONFLICT, Lieut.-Com. J. G. Musters, would be ready for sea by March 10; she would remain at Sydney till the arrival of the Beagle, then expected, and will then cruise amongst the Pacific Islands.

CRUISER, Com. J. Hext, was at Corfu, according to latest accounts.

DIAMOND, Capt. G. S. Bosanquet, was cruising off the coast of Madagascar, and in the Mozambique Channel.

EURYDICE, Capt. Hare, has been docked at Portsmouth, and is nearly ready for sea.

FLY, Com. J. Bruce, was at Hong Kong on March 8, having just returned from a visit to Foochow, where she has been relieved by the Sheldrake.

FLYING FISH, Com. H. F. Crohan, left Zanzibar on Feb. 1 for the Seychelles, calling at Mombaza and Melinda.

GROWLER, Com. C. E. D. Wilcox, which was recommissioned on Feb. 18, left Hong Kong for Singapore on March 8, for service in the Straits of Malacca, and to relieve the Magpie, which vessel will then proceed North.

HART, Com. Hon. H. N. Hood, was at Yokohama on March 1.

HELICON, Lieut.-Com. R. W. Stopford, was at Malta.

HERCULES, Capt. Bowden-Smith, late flagship of Admiral the Hon. Sir J. Drummond, K.C.B., will be paid off, all standing, on Monday into the first division of the Steam Reserve. Her boilers are much worn, but she could be temporarily repaired for a short commission.

HIMALAYA, Capt. E. White, will leave England about September next with new crews for the Audacious, Vigilant, Fly, Lapwing, and Egeria, all on the China Station, and will bring home the paid-off crews.

HORNET, Com. H. N. Hippisley, was paid off at Hong Kong on Feb. 24, recommissioned on Feb. 25 and was still refitting.

HOTSPUR, Capt. T. M. Jones, returned on April 12 to Malta from the Coast of Barbary.

INDUSTRY, Staff-Com. Dyer, left Devonport on Sunday for the West Coast of Africa, where she will be stationed.

JUMNA, Capt. J. D'Arcy, has had her complement reduced, and is placed in the extension basin at Portsmouth.

LYNX, Com. F. M. Ommanney, was at Zanzibar on March 7.

MARTIN, Lieut.-Com. E. Hicks, has been docked, and will soon be ready for the summer cruise, with boys of the St. Vincent.

Modeste, Capt. A. Buller, C.B., was at Nagasaki on Feb 28, watching the progress of the insurrection in Kinsin. She had just arrived from Kagoshima with British subjects.

Myrmidon, Com. the Hon. R. Hare, arrived at Sheerness on the 24th inst., to pay off.

Nassau, Com. R. H. Napier, was, by last advices, still surveying in the Haitan Straits.

Netley, Lieut. Heane, was paid off at Sheerness on Tuesday.

Nymphe, Capt. S. P. Townshend, was at Albany, W.A., on Feb. 20, on her way to Fremantle.

Orontes, Capt. E. H. Seymour, left Simon's Bay on March 23 for Table Bay; left again on March 24, and arrived at St. Helena on March 31; left on April 1 for Ascension, and arrived at Portsmouth on Tuesday, and left the following day for Tilbury to land troops.

Osprey, was commissioned at Sheerness on the 19th inst. by Com. the Hon. H. H. A'Court for the Pacific Station.

Pallas, Capt. H. H. Beamish, was at Smyrna on April 5.

Philomel, Com. Henry H. Boys, returned to Zanzibar on March 4.

Raleigh, Capt. G. Tryon, C.B., has been ordered to join the flag at Malta, calling at Smyrna, Rhodes, and the Piræus.

Rapid, Com. E. C. Drummond, was at Constantinople on April 2; when relieved by the Antelope she will come to Malta, calling at the Piræus.

Renard, Lieut.-Com. H. J. Pugh, was at Auckland, and would remain there.

Rifleman, Com. F. S. Clayton, senior officer in the Persian Gulf, was at Kurrachee on March 30.

Sapphire, Capt. E. H. Murray, was in New Zealand, according to the latest intelligence.

Sappho, Com. Noel N. S. Digby, left Sydney on Feb. 24, arrived at Wellington on March 5, and would leave for Samoa when coaled, &c.

Sealark, Lieut. F. H. Haygarth, has been docked at Devonport, and has had defects made good.

Spartan, Capt. R. E. Tracey, was at Bombay on April 2.

Sultan, Capt. H.R.H. the Duke of Edinburgh. On Saturday the Prince of Wales arrived at Villefranche to embark in the Sultan. The inhabitants assembled *en masse* to witness his arrival, and are said to have been surprised to see him in the full uniform of a naval officer. A boat from the Sultan was in attendance. A salute was fired and the rigging manned as the Prince went on board. He was visited by Admiral Jaureguiberry and Rear-Admiral Warden, of the American squadron. Their visits were returned by the Prince and the Duke of Edinburgh. The principal authorities of Nice were in the evening entertained at a dinner given on board the Sultan. The Duke of Edinburgh proposed a toast to the Queen of England, and the Prince of Wales one to Marshal MacMahon and the French and American Navies. The Princess of Wales and the Duchess of Edinburgh and their families were then toasted, the Prince expressing thanks and the hope that the friendship between England and France would be of long duration. The Sultan will leave Naples to-morrow for Marseilles, and on landing the Prince of Wales will leave for the Eastward to join the flag.

Sylvia, Capt. B. W. Bax, having been refitted for a new commission, left Hong Kong on March 8 for Japan, to resume surveying. She will shortly return to Hong Hong to pay off and recommission, the paid off crew returning to England in the Tamar.

Swinger, Lieut.-Com. Oswald Tudor, recommissioned at Hong Kong on Feb. 18, was still at Hong Kong refitting on March 8. She will shortly proceed to Singapore, for service in the Straits of Malacca, and to relieve the Sheldrake, which vessel will then proceed to Hong Kong to refit.

Swiftsure, Capt. J. K. Baird, was undocked at Malta on April 16, and was to be ready about April 25.

Teazer, Com. C. Wodehouse, was to leave Bushire on March 31 for Bombay.

Thetis, Capt. T. Le Hunte Ward, will remain longer at Malta than was expected, as she will not be ready for sea until next week.

Tourmaline, Commodore F. W. Sullivan, C.B., was in Simon's Bay on March 26.

Triumph, Capt. G. H. Parkin, was paid off into the fourth division of the Steam Reserve at Portsmouth on Thursday. The boilers of the ship are beyond repair, and she will be provided with new ones.

Undaunted, Capt. H. W. Brent, flagship of Vice-Admiral Sir R. Macdonald, K.C.S.I., was at Bombay on April 2.

Vestal, Com. W. H. Selby, was at Aden on April 1.

Vulture, Com. H. H. Washington, was spoken on April 1 in the Straits of Babel-Mandeb, on her way to Aden.

Wizard, Lieut.-Com. Doxat, was at Malta.

Wolverene, Commodore Hoskins, was at Sydney on March 7. He would leave that day for a cruise, and visit Melbourne and Hobart Town.

Wye, Staff-Com. W. W. Vine, arrived at Plymouth on the 24th inst., and left the following day for Bermuda with a new crew for the Argus. The paid-off crew will return to Portsmouth in the Wye.

On Monday evening, at the meeting of the Royal Geographical Society, Dr. Carpenter, late of the Challenger Expedition, delivered a lecture on the temperature of the deep-sea bottom and the causes on which it depends. He referred to the geological and geographical causes of the distribution of temperature of the ocean, and stated that one of the most interesting portions of the subject was the effect of the temperature on the biology of the ocean, for the same types were found near the surface and at a depth of 2,000 fathoms, the distribution of life in the ocean being regulated, not by space or depth, but by temperature. The distribution of the temperature was regulated by the distribution and configuration of the land, which caused the changes and movements in the greatest body of matter on the surface of the globe.

Epps's Cocoa — Grateful and Comforting. — " By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.* Made Simply with Boiling Water or Milk.—Sold only in Packets labelled—"James Epps & Co., Homœopathic Chemists, London.'

STATIONS OF HER MAJESTY'S SHIPS IN COMMISSION.

Vesuvius, double-screw torpedo-vessel, Capt Singer, Portsmouth tender to Vernon.

Victoria and Albert, 2, Royal paddle-yacht, Capt. Frank J. Thomson Portsmouth. Recommissioned Jan. 1, 1870.

Victory, 26, tender to Duke of Wellington, Portsmouth.

Victor Emanuel, 2, screw receiving-ship, Commodore G. Watson, Hong Kong. Recommissioned Dec. 1, 1874.

Vigilant, 2, paddle despatch-vessel, Lieut.-Com. H. C. Ryder, China. Commissioned at Portsmouth Sept. 1, 1874.

Vivid, paddle-vessel, Staff-Com. Edwin Wise, tender to Royal Adelaide, Devonport.

Volage, 18, screw corvette, Capt. Henry Fairfax, South-East Coast of America. Commissioned at Portsmouth July 6, 1874.

Vulture, 3, double-screw gun-vessel, Com. H. Washington, East Indies. Commissioned at Sheerness Dec 28, 1876.

Warrior, 32, armour-plated iron screw-ship, Captain W. H. Whyte, Coast-guard service, Portland. Commissioned at Portsmouth April 1, 1875.

Wildfire, paddle-vessel, Staff-Com. R. L. Cleveland, tender to Duncan, Sheerness.

Wizard, 2, screw-gunboat, Lieut.-Com. C. Doxat, Mediterranean. Recommissioned Malta Feb. 1, 1875.

Wolverene, 17, screw-corvette, Commodore Hoskins, Australia. Commissioned at Sheerness Aug. 1, 1876.

Wye, iron screw storeship, Staff-Com. W. W. Vine, particular service, Commissioned at Chatham April 15, 1875.

Zephyr, 4, composite gunboat, Lieut.-Com. W. G. Le Cocq, North America and West Indies. Recommissioned at Halifax Sept. 27, 1876.

INDIA.

Brigdr.-Gen. Sir C. H. Brownlow, K.C.B., Bengal S.C., has been granted furlough to England for one year and six months.

Col. C. C. Drury, Bengal S.C., has been granted permission to reside and draw pay in England.

Brigdr.-Gen. M. A. S. Biddulph, C.B., Royal Artillery, has been transferred from the Sealkote to the Rohilcund District, vice Major-Gen. W. Payn, C.B., who has vacated on promotion.

Brigdr.-Gen. J. E. Michell, C.B., Royal Artillery, on appointment to a brigade command, has been posted to Sealkote.

Lieut. J. F. D. Fordyce, Bengal S.C., has been appointed aide-de-camp to Major-Gen. F. F. Maude, C.B., V.C., commanding the Allahabad Division of the Bengal Army.

Major G. L. K. Hewett, Bengal S.C., has been appointed to officiate as assist. adjt.-gen. of the Sirhind Division, from the 20th ult., vice Col. A. G. Forsyth, Bengal S.C., granted furlough to England.

The following officers having passed Parts I. and II., Examination B, have completed the qualification for appointment on the regimental, general, and personal Staff of the Army:—Majors F. C. St. John, Madras S.C.; J. Jopp, Bombay S.C.; and G. Rowlandson, Madras S.C. Capts. A. K. Abbott, Bengal S.C.; A. Currie, 2nd Bombay Cavalry; H. C. Greenaway, 10th Bombay Lancers; J. J. Kennedy, Madras S.C.; T. S. Magan, Madras S.C.; M. H. Nicolson, Bombay Infantry General List; F. C. Singleton, Bombay S.C.; M. W. Stevens, Bombay Infantry General List; D. M. Strong, 10th Bengal Lancers; J. T. Watling, Bombay S.C.; and G. Young, 1st Goorkhas.

Capt. A. A. Kinloch, 60th Rifles, D.A.A.G. for Musketry in Bengal, having attended a course of garrison instruction, his period of Staff Service has been extended from March 26 to August 9, 1877.

The following officers, attending the twenty-first course of garrison instruction in Bengal and Burmah, have qualified in Part II. Examinations A and B (G. O. 275 of 1873), viz.:—Majors G. N. Channer, V.C., 1st Goorkhas; E. R. C. Wilcox, Bengal S.C. Capts. G. M. Abbott, 19th Bengal Lancers; R. Atkins, 15th Bengal Cavalry; T. R. Bynn, 6th Madras N.I.; F. A. S. D'Acosta de St. Laurent, 28th Bengal N.I.; H. S. Elton, 16th Madras N.I.; A. Gaselee, 1st Sikhs; B. H. S. Gower, 17th Bengal Cavalry; J. Hay, 4th Goorkhas; J. E. P. Mosley, 3rd Bengal N.I.; R. H. Salkeld, 16th Bengal N.I.; A. I. Shepherd, 4th Bengal N.I.; D. M. Strong, 10th Bengal Lancers; J. E. Waller, 19th Bengal N.I.; H. W. Webster, 30th Bengal N.I.; and H. R. Young, 4th Bengal Cavalry. Lieuts. A. de V. Alexander, 4th Bengal Cavalry; G. Gaisford, 5th Bengal N.I.; L. B. Irwin, 20th Bengal N.I.; C. G. Mansel, 4th Punjab Cavalry; J. E. Porteous, 4th Madras N.I.; R. K. Ridgeway, 44th Bengal N.I.; B. Smith, 4th Bengal N.I.; and C. H. Des Vœux, 4th Bengal N.I.

The undermentioned sub-lieutenants, recently gazetted to be supernumeraries to regiments of the Bombay Army, as probationers for the Indian S.C., are posted as follows:—1st Light Cavalry, L. A. Gordon, 59th Foot; 10th N.I., J. S. Ashby, 1st Battalion 12th Foot; 12th N.I., F. Whittuck, 1st Battalion 17th Foot; 15th N.I., F. C. Stayner, 1st Battalion 5th Foot; 18th N.I., H. M. Prior, 54th Foot; 21st N.I., H. Melvill, 44th Foot; 22nd N.I., J. C. Francis, 62nd Foot; 23rd N.L.I., R. I. Scallon, 72nd Foot; 25th N.L.I., E. Inglis, 73rd Foot; and 28th N.I., C. H. Seddon, 92nd Foot.

The Government of India has sanctioned the publication of a revised edition of the standing orders for native Cavalry regiments.

Major-Gen. J. M. Primrose, C.S.I., on arrival in India to assume command of a division, has been posted to Poona.

Major J. Bennett, Bombay Invalid Department, has been appointed Commandant of Sion Fort, vice Major Candy, deceased.

The Commander-in-Chief has sanctioned the following transfers from the 1st inst.:—Depy. Surg.-Gen. H. M. Cannon, M.B., from the Lucknow to the Umballa Circle, vice Depty. Surg.-Gen. J. N. Tresider, retired; Depty. Surg.-Gen. J. C. Bow, M.D., from the Dacca to the Meerut Circle, vice Depty. Surg.-Gen. C. M. Smith, retired; Dr. J. A. C. Hutchinson, depty. surg.-gen. with temporary rank, to the Meerut Circle, temporarily, during the absence, on furlough, of Dr. Bow.

Lieut.-Gen. Lord Mark Kerr, C.B., left Poona for Bombay on the 28th ult. for England, on relinquishing his divisional command. The following was issued on the 21st ult.:—"Farewell Order—I say farewell with sorrow to my comrades of every rank in the Poona Division of the Bombay Army. I leave you, I hope, in equal discipline and contentment. I trust I have done something towards fostering, both among British and Native troops, an affectionate comradeship from general to private soldier. Without this feeling of comradeship the strictest discipline and more perfect drill fail to secure good conduct in peace, or to achieve great deeds in war. I need not remind British-born soldiers of the division of their glorious history throughout the world. But I say to you—soldiers of all ranks, Cavalry and Infantry of the Native Army—remember the glorious traditions of your ancestors. Never forget. Let this be a religion to you—it has been under British leading alone you have gained victories, from Plassy to Assaye, from Koregaum and Kirkee to the courageous endurance of Kahun and Meanee; against amazing odds your countless enemies, sometimes trained and led by distinguished European officers—victories than which history, ancient or modern, records no brighter examples. Let these memories, I repeat, be a religion to you, and in peace you will be happy and soldierlike; and if called on to battle in India or elsewhere, you will act—always with a sure trust in God—in a manner worthy of your place in line beside the famous British soldier, worthy of your old renown, and worthy of the gracious Empress of India whom you serve.—MARK KERR, Lieut.-Gen., Commanding Poona Division."

The following appears among the Commander-in-Chief's Orders:—"Before leaving India, in 1874, Col. Sir Frederick Fitzwygram, Bart., C.B., placed £10,000 sterling at the disposal of the Commander-in-Chief in India, to provide accommodation in the hills for the benefit of British Cavalry soldiers and their families. With the concurrence of the Supreme Government, this donation was accepted, plans and estimates for suitable buildings were approved of, and Rhanikhet and Dugshai were selected as the stations where the barracks could most conveniently be built. Accommodation for forty families has now been completed, and sufficient funds remain to erect twenty more quarters. Sir Frederick Haines has much pleasure in making this generous gift known to the Army in India, and his Excellency congratulates the British Cavalry especially in having found in Sir Frederick Fitzwygram a friend through whose munificence shelter for sixty of their families has been secured in a hill climate."

It has been announced that his Excellency the Governor of Bombay in Council "desires to place on record the high appreciation of the manner in which for many years Col. A. T. Etheridge, C.S.I., Bombay S.C., has performed the duties of Alienation Settlement Officer, Southern Division, and which has on different occasions received the marked approval of her Majesty's Secretary of State as well as of the Government of the Presidency."

The *Englishman* hints that the Government of India contemplate making further military reductions in the Madras Presidency. It is proposed to merge the Northern District Brigade in the Centre district, and the Malabar and Canara Brigade in the Mysore divisonal command. There will thus be but four Madras Brigade commands in future, instead of six. Present incumbents may, however, comfort themselves with the reflection that their interests will not be affected by the measure, which is only to be carried into effect as vacancies occur.

The *Times of India* says:—"The money for the Napier of Magdala memorial has nearly been subscribed in Bengal, in which presidency no objection was offered to the circulation of the subscription lists. We have no doubt an equal amount would easily have been raised in Madras and Bombay had the many friends and admirers of Lord Napier the same opportunities, but objections were taken by the chief military authorities. Lists are however, now being distributed freely through the civil authorities, and it is to be hoped some response will be made. The committee want about another 20,000 rupees to enable them to do even scant justice to the memorial. And considering Lord Napier's distinguished services, and that all the advantages recently given to the native Army were the result of his labours, some recognition from the public is due to him. As many object to the form of the memorial, it is in contemplation to change it from a statue to a home, or houses, in the hills for soldiers' children in the three presidencies."

Major J. G. E. Griffiths, Brigade Major at Nusseerabad, has arrived home on furlough.

INDIA GOOD SERVICE PENSIONS.

The following appears in the *Times of India*:—

No. 274 of 1877, dated March 23, 1877.—It is hereby announced that, on the recommendation of the Government of India, H.M.'s Government has been pleased to confer good service pensions on the undermentioned officers, with effect from the dates specified:—Col. C. P. Keyes, C.B., Madras S.C., Brigadier-General Commanding Punjab Frontier Force. Dates of commission:—Ensign, April 4, 1843; lieut., Nov. 30, 1848; brevet capt., April 4, 1858; capt., Feb. 2, 1860; brevet major, April 16, 1861; major, April 4, 1863; brevet lieut.-col., Aug. 5, 1864; lieut.-col., April 4, 1869; brevet col., Aug. 11, 1869. Appointments:—Adjt., 1st Punjab Infantry, May 18, 1849; second in command, 1st Punjab Infantry, June 6, 1850; *commandant, Kemidi Rifle Corps*, July 8, 1854; commandant, 1st Infantry Punjab Irregular Force, May 9, 1860; officiating commandant, Corps of Guides, Punjab Frontier Force, March 19, 1869; commandant, Corps of Guides, Punjab Frontier Force, June 23, 1869; brigdr.-gen. commandant, Punjab Frontier Force, April 19, 1870. War services:—In Feb., 1850—Present as second in command of the 1st Punjab Infantry with the force which accompanied the late Sir C. Napier, G.C.B., Commander-in-Chief in India, into the Kahot Pass—received the thanks of his Excellency and of the local Government. March, 1850—Present with the regiment in the relief of a body of Mooltanees in a town on the Kohat-kotul, which was surrounded by the Pass Afreedees, on which occasion the regiment was unaided and sustained heavy loss—received the thanks of Government. October 1851—On field service as second in command of the regiment. May, 1852—On field service when the regiment, owing to treachery in transmission of orders, made a forced march of seventy miles into action; present at Prangghar, Tsha-Kote, Errosha, and several other minor affairs, in the Eusufzie and Ranazai valleys—received the thanks of Government. Dec., 1852—On field service in command of two companies of the regiment in a secret expedition against the Omerzie Wuzeeres in the Kaffir-kote Hills—services acknowledged by Government. March, 1853—In command of a wing of the regiment on field service against the mountain tribes in the Salimanee ranger—services acknowledged by Government. Dec., 1853—On field service with the 1st Punjab Infantry. 1854—On field service in command of Scinde Rifle Corps. 1855—On field service in the Meranzie Valley in command of the Scinde Rifle Corps. In April, 1860, commanded 1st Punjab Infantry in the expedition against the Wuzeerees, marched through their hills to their head-quarters at Kanagoorum—received the special thanks of Supreme and Local Governments and of the Secretary of State for India, and brevet majority. Aug., 1863—On field service in command of the 1st Punjab Infantry and Hazara Mountain Battery to watch the Hindustani fanatics at Satana. Joined Kinteyla Field Force in October, and served throughout the Umbeyla campaign—severely wounded. Received the special thanks of the Commander-in-Chief and of the Supreme and Local Governments, brevet lieut.-colonelcy, and the Order of the Bath. Feb., 1869—Organised and commanded a secret expedition against the Bezoties, a turbulent tribe on the Kohil border—received the special thanks of the Supreme and Local Governments, and of the Secretary of State for India, and brevet colonelcy. April, 1869—Commanded a field force against the Cabul Kheyl and Taza Kheyl Wuzeerees—received the thanks of the Supreme and Local Governments, medals and two clasps. Organised and commanded an expedition against certain villages in the Lower Dour Valley—received the hearty thanks of the Local and Supreme Governments. From Sept., 30, 1876, in room of Col. A. Stewart, R.A., deceased.

Col. E. J. Lawder, Madras S.C., Commandant, 1st N.I. Dates of commissions:—Ensign, June 18, 1839; lieut., Aug. 17, 1844; capt., May 1, 1854; brevet major, July 20, 1858; major, Feb. 18, 1861; lieut.-col., June 18, 1865; brevet col., June 18, 1870. Appointments:—Qrmr., 44th N.I., April 21, 1843; adjt., 44th N.I., Oct. 15, 1844; depty. assist. qrmr.-gen. of the army, Oct. 9, 1849; assist. qrmr.-gen., Dec. 6, 1851; depty. qrmr.-gen., Feb. 17, 1863; officiating 2nd in command and wing officer, 28th N.I., Feb. 27, 1866; 2nd in command and wing officer, 24th N.I., April 1, 1867; officiating commandant, 14th N.I., July 24, 1868; officiating commandant, 24th N.I., June 6, 1871; commandant, 24th N.I., Feb. 18, 1873; commandant, 1st N.I., Feb. 15, 1875. War Services:—Served as acting depty.qrmr.-gen. of the army with the Saugor Field Division the whole time it was in the field in 1858-59; was present at the attack on Jheeghum, April 10, 1858; the affair of Kubraie, April 17; the battle of Banda, April 19; the relief of Kirwee, Dec. 25, when division head-quarters with the Horse Artillery and Cavalry marched eighty-four miles in thirty-seven hours; storming of the heights of Punwarree, Dec. 29, 1858—brevet major, medal and clasp. From Dec. 1, 1876, in room of Col. J. E. Mayne, retired.

Col. T. C. Longcroft, Madras S.C.—Dates of commissions: Ensign, Aug. 20, 1839; lieut., Aug. 16, 1842; brevet capt., Aug. 20, 1854; capt., Nov. 28, 1854; major, Feb. 18, 1861; lieut.-col., Aug. 20, 1865; brevet col., Aug. 20, 1870. Appointments:—Acting adjt., 16th N.I., Aug. 23, 1844; acting paymr., Southern Division, Bombay Army, Jan. 5, 1845; acting qrmr. and interpreter, 16th N.I., Dec. 15, 1845; qrmr. and interpreter, 16th N.I., Feb. 18, 1851; adjt., 16th N.I., May 7, 1851; assist.-engineer, Public Works Department, Aug. 4, 1856; brigade-major, Thyetmyo, Nov. 30, 1856; assist. adjt.-gen., British Burmah Division, April 11, 1862; assist. adjt.-gen., Head-quarters, Sept. 28, 1866; officiating depty. adjt.-gen., Dec. 16, 1868; officiating adjt.-gen., Nov. 9, 1869; depty. adjt.-gen., Sept. 29, 1871; officiating adjt.-gen., Aug. 16, 1872. From Dec. 12, 1876, in room of Major-Gen. Sir A. T. Wilde, K.C.B., C.S.I., succeeded to the colonel's allowance.

This week a subscription has been opened with the view of raising a fund which will enable the committee of the French Hospital to increase the accommodation it at present affords, and generally to extend its usefulness. It is stated that this hospital, which is almost entirely dependent on voluntary contributions, was opened on Dec. 15, 1867, at the corner of Lisle-street and Leicester-place, in the heart of the French quarter of London. The French Government granted an annual subsidy to the institution, and the French Embassy took it under its protection. It received, besides, shares of the Sunday and Saturday Hospital Funds, and the gratuitous assistance of a numerous medical staff, thanks to whose disinterested efforts it has been possible to state that at the hospital more good is done at less expense than in any other institution of the same kind in London. In eight years assistance has been given to 1,252 in-patients and to 26,604 out-patients, without regard to their religious or political opinions. The in-patients relieved included 705 Frenchmen, 153 Belgians, 86 Englishmen, 89 Swiss, 97 Italians, 28 Germans, 27 Dutchmen, 12 Poles, 11 Austrians and Hungarians, 17 Spaniards, four Swedes, six Americans, one Greek, one Russian, five Brazilians, five Egyptians and Turks, three Persians, and two Indians. It is, of course, the needy French population of London who form the great majority of the applicants for relief, and since 1866 it has increased so rapidly that the present hospital is no longer sufficient to meet daily requirements. Want of space is constantly felt, and, besides, the linen and furniture, which have been in use since the foundation of the institution, require to be renewed. Under these circumstances the committee have thought the time has come to make an appeal to public generosity, directed specially to the people of France, but also those of all the nations who have enjoyed the benefits of the institution. Subscriptions will be received by M. Fernand Sorel, the assistant secretary, 40, Lisle-street, Leicester-square.—*Times*, Feb. 20, 1877.

The Committee of the Royal School for Officers' Daughters have presented their annual Report. In the course of this they remark:—"The balance-sheet attached to the present Report does not show the desired improvement, and the Committee cannot but view with great anxiety the continued falling off in the subscriptions and donations. Nevertheless, they have such firm faith in the goodness of the work, in its just appreciation by a generous and discerning public, and in the continuance of the Divine blessing upon it, that they believe no such sweeping measure of retrenchment as would curtail the operations and diminish the usefulness of the school need at present be contemplated. The present numerical state of the Royal School is as follows:—At Bath (Lansdowne and Rashleigh together) there are 80 pupils; at Roehampton (Clarence House) there are 45. The age of those at Bath ranges from 14 to 18 years; of those at Roehampton from 11 to 16. Taking the Institution as a whole, there are 125 pupils from 11 to 18 years of age receiving education. Since the date of the last Report, the numbers at Bath have been reduced by 7, and at Roehampton increased by 5—upon the whole there has been a reduction of 2. It is intended that for the future the numbers shall be, at Bath 70, and at Roehampton 50, making a total of 120, which is to be considered the mormal limit of the Institution. To estimate rightly the value of these figures in an economic sense, and in relation to the finances, it must be borne in mind that there are two classes of pupils (treated alike in the school in every respect save the payment of fees)—viz., the elected pupils—that is, elected by the whole body of subscribers, or presented by purchase or otherwise, who pay £12 per annum—and the admitted pupils—that is, admitted by the governing body, who pay £80 per annum. It will be observed at once that the proportion kept up between the numbers of these two classes has a very material bearing on the income of the institution. Of late years, the proportion has been allowed to become too much in favour of the former class; hereafter, it is determined to make it, if possible, as 70 paying only £12 a-year to 50 paying £80, and thus proportionably to assist the finances. And when this measure is carried out, then, with 70 pupils, paying £12 each, and 50 paying £80 each, there will be an income of £4,840 per annum, to set against an expenditure (supposing the average cost of the 120 pupils to be £70 per head) of £8,400 per annum; leaving £3,560 to be made up by subscriptions and donations and other means; but this calculation, it must be carefully observed, applies only to the bare expenses of each recurring year. The committee cannot too strongly repeat that if the institution is to be maintained in its present scale, it must be supported far more largely, so that in time the debt may be paid off, and a reserve fund be formed, without which, as was said in the former report, there can be neither security nor stability in its resources."

THE WAR IN THE EAST.

The Czar arrived at Kischeneff on Saturday. Col. Mansfield, our Consul at Bucharest, telegraphed on Monday night that a small body of Russian sappers had arrived in that city. The manifesto of the Czar to his troops was promulgated on Tuesday, and the Army was at once put in motion. The Roumanian Government has offered a weak protest; but there has been no direct opposition to the entry of the Russian troops into Moldavia. A large body crossed the Pruth on Tuesday at various points. The Russians have armed the bridge at Barboschi, and have 12,000 men encamped close by, lest the Turks should attack it from the river, and cut the main railway line between Galatz and Bucharest. According to report a considerable force of Cossack Cavalry has advanced to Kalafat, which the Turks are said to have seized. The first move of the Russians seems, from all accounts, to have taken the Turks by surprise. The latter would appear to have expected to have been attacked on the line of the Danube, between Tchernavoda and Rustchuk. But the Russians, though they are with a certain force occupying Roumania, and possessing themselves of the great lines of railway, are, it is said, directing their main body upon Ismail, with the view of advancing into the Dobrudscha, and thus turning the right of the first line of the defence. It is said that the Turks are hurrying troops from Rustchuk to the Dobrudscha to meet this unexpected attack. Besides the operations in Europe, Russia has already invaded the Turkish dominions in Asia Minor, issuing from the Georgian frontier, and threatening Kars and Erzeroum. It is reported, however, that the Russians have been defeated by the Turks between Kars and Batoum, and have lost 800 men. The spirit of the Turks is said to be most warlike everywhere. Meanwhile, the diplomatists have not been idle. Prince Gortschakoff has sent a circular to the Powers, and Turkey has appealed to them to protect her under the Treaty of Paris.

We are requested to state that the medical examination of candidates for the next admission to the Royal Military Academy, Woolwich, will take place at that Institution on Monday, July 2, 1877, and the literary examination will commence on Tuesday, July 3, in the southern galleries of the Old Exhibition Buildings at South Kensington, the entrance to which is in the Exhibition-road. Previous to the first-named date candidates will receive from the Military Secretary a table showing the dates and hours fixed for examination in the several subjects, with other instructions. Candidates who wish to compete on this occasion should apply to the Military Secretary not later than the 15th prox.

"Soldiers' Well-Wisher" writes:—"Having had occasion to pass the Hulme Barracks, Manchester, about 7.15 a.m on the morning of March 14, curosity led me to the barrack-gate. Just as I was leaving the barracks I heard a cry, and, turning round, saw a man in officer's uniform flogging a boy of the band in an unmerciful manner with a heavy riding whip. The child cried most piteously, but there was no chance of escape. Can the commanding officer be aware of this unmanly outrage? It is surely a matter for investigation."

The following officers join at Aldershot on Tuesday for attachment under Staff College Regulations, viz.:—Capts. G. E. Grover, R.E.; Lynch, 3rd; Milner, 18th; Morgan, 19th; Currie, 41st; Fife, 65th; Lloyd, 76th; Bengough, 77th; Money, 87th; and Clarke, 103rd; and Lieuts. Milner, 18th; Marshall, 20th; Brunker, 26th; Fraser, 33rd; Du Vernet, 56th; and Hon. W. F. Elliot, 93rd Foot.

The statement in the *Globe* as to Major Waller Ashe, the Governor of Perth Gaol, we are requested to state, has no foundation whatever.

We have frequently urged the military authorities to improve, or rather to rebuild, the officers' quarters at the Curragh Camp. The huts, constructed of wooden planks, were raised about twenty years ago, and it was at that time calculated that with constant overhauling they might last for ten years. The officers' huts, except in Staff quarters, are miserably small. Indeed, a china closet in a moderately-sized house would be longer, wider, loftier, and much more cheerful. Mr. C. H. Spencer, C.E., London, who recently visited a friend at the Curragh, gives us the result of his experience:—"The quarters are disgraceful, and unfit for human habitation. The cold of them is intense, and it is no uncommon thing for a lighted candle to be blown out by gusts of wind rushing through the chinks and apertures of the woodwork." Darkness is to be added to the dismals of cold and wet, for during the last week the gas lamps have not been lighted. Surely the officers of her Majesty's Army deserve to be housed somewhat better than a Scotch herd in a mountain bothy. During the last five months of inclement weather the discomfort and cold of the officers' quarters in the Camp were fearful. The purity of the air alone saved many valuable lives. The Camp season is about to commence, and the huts, as usual, will be painted a dull, reddish brown, and a piece will be nailed on here, and a sound plank substituted for a rotten one there, and the Camp will look neat and trim, and delightfully cozy, to those who do not live in officers' quarters. Officers always keep their huts tidy, and contrive to pack many pretty ornaments into them. When the paper rots off the planks they renew it. When the wind whirls up through the floor they cover the latter with oilcloth or matting. In summer and parts of autumn the huts are tolerable. They have abundance of thorough air. But when rain falls, the officer's servant has enough to do to preserve the leather accoutrements from mould. As the summer is supposed to be at hand, there will be time to urge the War Office to amend the existing state of things before the coming winter. Possibly the Duke of Connaught, whose battalion will be quartered in K lines, would look to the accommodation thought to be sufficient for an officer and a gentleman to live in.—*Irish Times.*

The new forts at Cologne, on the left bank of the Rhine, are to be completed by next autumn. The new fortifications on the right bank will then at once be taken in hand.

The following officers arrived home from India a few days ago in H.M.S. Jumna, viz.:—Capt. Combe, 10th Hussars; Capt. Grissell, 11th Hussars; Lieut.-Col. J. F. Raper, Major M. M. FitzGerald, Lieut. W. Martin, Royal Artillery; Lieuts. Pitt, Royal Engineers; O'Beirne, 6th Regt.; Clarke, 17th Regt.; Lieut.-Col. Fanshawe and Lieut. Conor, 33rd Regt.; Capt. Mansergh, 40th Regt.; Qrmr. Jones, 66th Regt.; Capt. Bevan, 81st Regt.; Capts. Grant and Atkinson, and Sub.-Lieut. Gibbings, 108th Regt.

PARLIAMENT.

THE LATE ARCTIC EXPEDITION.

On Monday, in reply to Capt. Pim, Mr. A. Egerton said that the First Lord of the Admiralty was waiting for the report of the medical authorities on the outbreak of scurvy on board the ships of the late Polar Expedition. As soon as it was completed the papers would be laid upon the table.

THE VANGUARD.

In reply to Col. Naghten, Mr. A. Egerton said that regulations were laid down by the Admiralty with regard to the amount of compensation to the officers for losses of clothing and equipments incurred by the sinking of their vessel. Compensation had been allowed under those regulations, but representations had been made that the amount was insufficient, and the subject was still under inquiry.

ADMIRAL HOBART PACHA.

On Thursday Mr. W. Cartwright asked the First Lord of the Admiralty whether Hobart Pacha, the present commander-in-chief of the Turkish naval armaments, still retained in her Majesty's Navy the commission restored to him by an Order in Council of Nov. 28, 1874, after he had forfeited the same by breach of discipline, and if it be the case that Hobart Pacha had been permitted to retain in her Majesty's Service the rank thus restored to him by an act of special grace, whether it is the intention of her Majesty's Government, in view of the grave aspect of political relations with the Turkish Empire to intimate to Hobart Pacha that, in the event of hostilities ensuing between Turkey and Russia, he will not be permitted any longer to combine the character of an officer licensed to hold her Majesty's commission and of an admiral in command of armaments engaged in active operations against a State with which her Majesty is in friendly relations.

Mr. A. Egerton said that Hobart Pacha was still a captain on the Retired List of the Royal Navy. An intimation had, however, been sent to him that war having been declared between Turkey and Russia, he could no longer be permitted to combine the character of an officer licensed to hold her Majesty's commission and of an admiral in command of armaments engaged in active operations against a State with which her Majesty was in friendly relations.

CAPT. ROBERTS' COURT-MARTIAL.

Last night Mr. E. Jenkins said: I beg to give notice that on this day month I shall make the motion of which I have given notice with respect to the court-martial on Capt. Roberts.

Major O'Gorman asked the Secretary of State for War whether it is intended that Lord John Taylour, who was in command of the 94th Regt. at Belfast while the court-martial on Capt. Roberts was being proceeded with, is to be placed in command of a Brigade Depot; and, if so, whether, considering the evidence given before the court-martial in question, relating to the noble lord's conduct as commanding officer, his appointment to a Brigade Depot will be delayed until the motion of the hon. member for Dundee has been discussed by the House of Commons.

Mr. Hardy, in reply to the question of the hon. and gallant gentleman, said: I have to inform him that Lord John Taylour, not being on half pay, is not qualified to be appointed to the command of a Brigade Depot, and no such intention has been entertained. (Laughter.)

INSPECTION OF DOCKYARDS BY FOREIGN OFFICERS.

Mr. O. Lewis: I beg to ask Mr. Chancellor of the Exchequer if it is the case that "a Russian officer has received permission to make a tour of inspection of all our dockyards and such Government establishments as he may desire to visit?" If he considers it advisable, under present circumstances, that such unlimited access to these establishments should be granted to foreigners? If similar facilities are afforded to Englishmen in Russia and other Continental countries? And, if he has any objection to communicate the Russian officer's name to the House?

The Chancellor of the Exchequer: I am sorry my right hon. friend the First Lord of the Admiralty is unable to be present to answer the various questions. I understand that three weeks ago a Russian officer, a lieutenant, was recommended by the Foreign Office to the Admiralty to receive permission to see the dockyards at Sheerness, Chatham, Portsmouth, and Devonport. It is the practice of the Admiralty to grant permission to persons so recommended; and, moreover, I may mention that it is the practice to allow naval *attachés* to the Embassies to visit the dockyards without any special permission. These facilities are given reciprocally by different nations—(hear, hear)—and I believe it is certainly the case that the same facilities are given by the Russian Government to English officers. (Hear, hear.) Under these circumstances the permission was given, and, so far as I understand, this gentleman is about to visit those establishments. I do not see that there is any object at present in making an alteration in the existing practice. (Hear, hear.)

OFFICERS' COMMISSIONS.

Mr. Callan asked the Secretary of State for War, whether, in view of the present critical position of foreign affairs, her Majesty's Government have taken into consideration the advisability of taking the necessary steps to enable officers who had purchased their commissions previous to the Abolition of Purchase Act, 1871, the value of which was guaranteed to these officers by the Act of Parliament, to bequeath or otherwise assign the value of their commissions, to which they would be entitled were they now to sell out.

Mr. Hardy: As I understand the Act for the Abolition of Purchase, officers were to be secured the same rights as they enjoyed before that Act came into operation. Therefore, officers and their families would be treated in this matter in the same way as they would have been if purchase had never been abolished. It is not the intention of the Government to make any alteration in that respect.

Gen. the Right Hon. Sir J. Michel, G.C.B., having proceeded to England, the command of the troops in Ireland has devolved upon Major-Gen. A. J. Herbert, C.B.

We have been requested by Capt. R. T. Thompson, 56th Regt., D.A.A.G. for Musketry at Aldershot, to notify that consequent on the falling off in the number of entries this year for the Inter-Regimental Rifle Matches, both for officers and for sergeants, he has obtained the sanction of the Committee to keep them open until the 30th inst. Should they not be better supported, this will be the last year that the present secretary will undertake the arrangements connected with them.

THEATRES.

Haymarket.—Mr. C. M. Rae's comedy, *Fame*, having finished its short and successless career, the management have fallen back upon their old stay and support, Mr. W. S. Gilbert. Thus it came that *The Palace of Truth* was revived last Saturday, and proved so successful with the audience then present, that we are likely to see it continued for some time. It is idle now to enter upon the merits or demerits of the play which the distinguished cynical dramatist has founded upon the story of the famous Frenchwoman. Most playgoers know that the comedy is well put together, well written, and, if at all well played, never fails to be exceedingly amusing. The present cast cannot be pronounced an improvement upon that of a few years ago. Many of the old names remain in the bill, but all are not quite up to their previous mark. The veteran manager, Mr. Buckstone, has done so much good work in his time that few people will be disposed to blame him for any lapses he may make in the year of grace 1877; but it is none the less a fact that the representation suffered considerably from his obliviousness of the text. Miss Marion Terry made a distinct success as the Princess Zeolide, and the scenes in which she took part would have been even better had she associated with an abler representative of Prince Philamir than Mr. W. Herbert. Nothing could be better than the Chrysal of Mr. F. Everill, and the Aristaens of Mr. Howe was excellent. Mrs. Chippendale, Miss Caroline Hill, Mr. Braid and Mr. Clarke remain, and all did well in their several tasks, and Miss Lafontaine did better than usual as Azema.

Adelphi.—*Peep o'Day* seems to be a standing stock-piece with Mr. Chatterton, and has been once more revived at the Adelphi. There is little now to be said about the old play beyond that it is exceedingly well placed upon the stage, and that special attention has been this time devoted to the stage management. The various exciting scenes are carried out in the best manner and with the best effect, and the scenery is worthy of all praise. Mr. Edmund Falconer, the author, resumes his original *role* of the comic Irishman, Barney O'Toole, and Mr. S. Emery gives weight and importance to the part of Father O'Chlery, and Mr. W. M'Intyre once more repeats his powerful impersonation of Black Mullins. Miss Edith Stuart is somewhat weak as Kathleen, but the Mary Grace of Miss Hudspeth is excellent. Mr. H. Sinclair is an earnest Harry Kavanagh, and Mr. J. G. Shore a capital Stephen Purcell. Taking the Irish drama in conjunction with the children's pantomime, which has been running since Christmas, the Adelphi programme may be well said to suit all tastes.

Opera Comique.—The present engagement of Mr. Charles Mathews at this house is of more than ordinary interest, since, in the ordinary course of events, his retirement from the stage cannot be far distant. To say that he is as good, as light, and as youthful-looking a comedian as ever is sheer nonsense, of course, but even now he can hold his own with the best of our own time. He has recently been playing in his own version of Foote's comedy, *The Liar*, and his rendering of Young Wilding has been bright enough to satisfy everyone. He is in the main well supported, notably by Mr. Maclean, Mr. J. H. Barnes, and Miss Litton. As an afterpiece he has played Plumper, in *Cool as a Cucumber*.

St. James's.—This evening will be produced *The Wandering Heir*, by Mr. Charles Reade, in which Mrs. John Wood will appear in her original character of Phillipi Chester.

Folly.—A benefit in aid of the rescued miners will be given on Thursday, May 3, when the burlesque of *Oxygen* will be performed. Miss Lydia Thompson, as well as the whole staff, have offered their services.

Strand.—The first benefit of Monsieur Marius in England is announced for this day, when a special programme will be provided. It may be remembered that this actor first made his appearance before a London audience with Monsieur Hervée at the Lyceum, but was recalled to France on account of the late Franco-Prussian war.

QUARTERMASTERS—ARMY AND MILITIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Amongst the recommendations of the Committee on the Brigade Depot system will be found one in which it is proposed to retire quartermasters of five years' standing, with a total of twenty years' service in the Regular Army, on conditions that they join the Militia for ten years more, with a view to give the Militia the benefit of their experience. A more one-sided view on Army, or any other form of legislation, it would be difficult to imagine. Irrespective of the enormous expense such a scheme would entail, one cannot help wondering if the fact struck any of the members of the Committee that it takes about five years to make an efficient quartermaster; therefore, if it is essentially necessary to have thoroughly experienced officers of this class in the Militia, it surely must be in the Regular Army, where so much depends upon the department over which they preside, and this not only for a few weeks annually, but all the year round and under all circumstances, at home, abroad, and particularly on active service.—I am, &c., Bo-Peep.

RAISING THE VANGUARD.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Allow me to suggest a plan for raising a ship without having recourse to the very difficult operation of passing chains in several places under her bottom, which, I think, could only end, in the case of the Vanguard, in disappointment and failure. It seems to me that it would be comparatively easy to place a girdle of chains passing under the ship's stem and round under her stern. I do not consider it necessary to do so, but, to preclude the possibility of their slipping, they might be passed in through one of the ports amidships and out again through another some three ports nearer the stern. I presume a man-of-war has four such cables, which ought to be sufficient to make a triple, if not a quadruple, girdle, as described. I think any practical engineer will agree with me that a ship of any size could be raised with far greater facility by means of such a girdle, and with much greater certainty. In fact, I am of opinion that the Great Eastern might be so brought up from the bottom of the sea.—I am, &c., Spectator.

ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—It appears that since the Warrant of 1876 (although not stated therein) Indian service has become an essential to promotion to the administrative grades. Ought not, in all fairness, the period of this essential qualification be limited to what is absolutely necessary to secure efficiency? This would be found to be a period nearer to one year than three. Tropical diseases are not confined to India, and if an officer cannot master the details peculiar to Indian service in less than three years he will never master them. To say that the able and intelligent medical officer, whose case is now under consideration, is not as capable of Indian medical administration, after two years and four months' Indian service, as he will be after a further period of eight months, is simply absurd. That an officer's career should be irretrievably damaged for the letter of an unwritten and hitherto disregarded law is cruel; the more so if the law in its present extent can be shown to be unnecessary.—I am, &c.,

Common Sense.

BIRTH.

Austen.—April 22, at Wroxall, Isle of Wight, the wife of Captain H. A. Austen, 49th (Princess Charlotte of Wales's) Regiment, of a son.

MARRIAGE.

Hunting—Arthur.—April 19, at St. Mark's, Ballysillan, Belfast, by the Rev. James Marshall, A.M., Charles S. Hunting, second son of Charles Hunting, Esq., South Hetton, Durham, to Agnes Mona, second daughter of Captain Arthur, her Majesty's 11th Regiment.

Advertisements.

A. J. BODDINGTON, Secretary.
17 Prince Albert Street, Brighton.

HOLLOWAY'S PILLS are the medicine most in repute for curing the multifarious maladies which attack humanity, when wet and cold weather gives place to more genial temperatures. In short, these Pills afford relief, if they fail of being an absolute remedy in all the disturbances of circulation, digestion, and nervous energy, which at times oppress a vast portion of the population. Under the wholesome, purifying, and strengthening powers exerted by these excellent Pills, the tongue becomes clean, the appetite improves, digestion is quickened, and assimilation rendered perfect. Holloway's medicine possesses the highly estimable property of cleansing the whole mass of blood, which, in its renovated condition, carries purity, strength, and vigour to every tissue of the body.

W.C

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO, 283, Strand, London, W.C.

ESTABLISHED 1844.

DINNEFORD'S FLUID MAGNESIA.

The best remedy for ACIDITY of the STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION; and the safest aperient for delicate constitutions, ladies, children, and infants.

DINNEFORD & Co.,
172, New Bond Street, London, and all Chemists

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer.

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

ESTABLISHED 1864.

TIMEWELL,
SPECIAL TAILOR & MILITARY OUTFITTER TO GENTLEMEN WHO REQUIRE NO CREDIT
8, SACKVILLE STREET,
PICCADILLY, LONDON, W.

A large private trade of highest class and character, yielding to its patrons the full advantages of their position.

E. LAZENBY and SON'S PICKLES, Sauces, and Condiments—E. Lazenby & Son, sole proprietors of the celebrated receipts and manufacturers of the pickles, sauces, and condiments so long and favourably distinguished by their name, beg to remind the public that every article prepared by them is guaranteed as entirely unadulterated.—92, Wigmore Street, Cavendish Square (late 6, Edward's Street, Portman Square), and 18, Trinity Street, London, S.E.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated sauce are particularly requested to observe that each bottle prepared by E. LAZENBY and SON bears the label used so many years, signed, "*Elizabeth Lazenby.*"

In consequence of Spurious Imitations of
LEA and PERRINS' SAUCE,
which are calculated to deceive the Public, LEA and PERRINS have adopted A NEW LABEL, bearing their Signature—
LEA AND PERRINS,
which signature is placed on every bottle of
WORCESTERSHIRE SAUCE,
and without which none is genuine.

Sold Wholesale by the Proprietors, Worcester, Crosse and Blackwell, London; and Export Oilmen generally.

Retail, by dealers in Sauces throughout the World.

COCKS' READING SAUCE

Is the best and most economical Sauce ever manufactured for
FISH, ENRICHING SOUPS, GRAVIES, &c.
It only requires a trial to convince the purchaser of its excellence.

CAUTION.—The genuine is protected by Trade Mark, viz., CHARLES COCKS' Signature on a white ground across the Reading Arms.

JOHN BURGESS AND SON'S
ORIGINAL & SUPERIOR ESSENCE OF
ANCHOVIES AND ANCHOVY PASTE
Have been Manufactured only by them
FOR MORE THAN 100 YEARS AT
107, STRAND (Corner of Savoy Steps),
LONDON.
Order of your Grocer, but see that you get
"JOHN BURGESS & SONS'."

LIEBIG COMPANY'S EXTRACT OF MEAT.
Finest Meat-Flavouring Stock for Soups, Made-Dishes, and Sauces. Caution.—Genuine ONLY with facsimile of Baron Liebig's signature across Label.

KINAHAN'S LL WHISKY.
UNIVERSALLY
RECOMMENDED BY THE MEDICAL PROFESSION. A pure old spirit, mild, mellow, delicious and most wholesome. Dr. Hassall says, "The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The whisky must be pronounced to be pure, well matured, and of very excellent quality." Wholesale—20, Great Titchfield Street, London, W.

FALKNER'S "REAL MALT" WHISKEY.
The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only.
LONDON 40, CHARING CROSS.
DUBLIN, 83, GRAFTON STREET.

SCHWEPPE'S MALVERN SELTZER.
SCHWEPPE'S SODA WATER.
SCHWEPPE'S LEMONADE.
SCHWEPPE'S POTASS WATER.
Consumers are particularly requested to ask for SCHWEPPE'S, and observe Trade Mark on Labels (a Fountain), as many imitations are offered to the Public.—To be obtained from the leading Chemists, Wine Merchants, and Grocers.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3, ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

WILLIAM S. BURTON,
39, OXFORD STREET, W.

THE PERFECT SUBSTITUTE FOR SILVER.—The REAL NICKEL SILVER introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs. Elkington and Co., is the best article next to silver that can be used as such, either usefully or ornamentally, as by no test can it be distinguished from real silver.

Patterns.	Fiddle or Old Silver	Bead or Thread	King's or Shell.
	£ s. d.	£ s. d.	£ s. d.
Table Forks or Spoons, per doz.	1 10 .	2 1 .	2 5 .
Dessert do., per doz.	1 2 .	1 9 .	1 11 .
Tea Spoons „	. 14 .	1 . .	1 2 .

These are as strongly plated, and are in every respect at least equal to what other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern:—Table Spoons and Forks, 23s. per doz.; Dessert, 17s. per doz.; Tea Spoons, 12s. per doz.

Tea and Coffee sets, in white metal, from £3 15s, to £7 7s.; Dish Covers, beaded pattern, £11; Ditto, ditto, fluted, £15; from £9 to £24 the set of four; Corner Dishes, from £7 10s. to £18 18s. the set of four; Warmers, £7 2s. 6d. to £15 15s.; Biscuit Boxes, 14s. to £5 10s.; Cruet and Liquor Frames, &c., at proportionate prices.

The largest stock in existence of Plated Dessert Knives and Forks, and Fish-eating Knives and Forks, and Carvers.

All kinds of re-plating done by the patent process

WILLIAM S. BURTON, General Furnishing Ironmonger, by appointment to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled Stock, with Lists of Prices and Plans of the 30 large Show-Rooms, post free.—39, Oxford-street, W.; 1, 1A, 2, 3, and 4, Newman-street; 4, 5, and 6, Perry's-place; and 1, Newman-yard; Manufactories, 84, Newman-street and Newman Mews, London, W.

NAVAL CADETSHIPS, &c.

"EASTMAN'S" ROYAL NAVAL ACADEMY, BURGOYNE HOUSE, SOUTHSEA.
Principal, since 1860, G. EASTCOTT SPICKERNELL.

At the last two Naval Cadet Examinations pupils took the *First* Place. More than 1,000 pupils have entered her Majesty's Service.

The House is situated close to and directly facing the sea. Pupils have good Bathing and Boating, under careful superintendence.

Pupils are received from Nine years of age and upwards. To make the School specially adapted for Junior Pupils intended for the Royal Navy and the Public Schools, Senior Pupils are not now received.

NAVAL CADETS, ASSISTANT CLERKS, HOPE HOUSE, SOMERSET-PLACE, SOUTHSEA.
Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.

At the competitive examination in November, 1875, and at the recent examination in June, of candidates for Assistant Clerkships, all the pupils sent up from this Establishment were successful.

HOME FOR INDIAN CHILDREN, MALVERN.
Fees, from 100 Guineas. CLERICAL, MEDICAL, and MILITARY references.
Address—Rev. A. S. RICHARDSON, Castle House, Malvern.

PARIS.—French HOME offered, in a Clergyman's family, to young gentlemen, for acquiring the French language. Address M. Pasteur Lalot, Military Chaplain, 265, Boulevard Pereire.

BOURNEMOUTH. — ANGLO-GERMAN COLLEGE for YOUNG LADIES. Principal, Mrs. SCHOLEFIELD (geb. M. Macat). The house is pleasantly situated, overlooking the pleasure-grounds and Pine Woods, and is within a few minutes' walk of the sea. Special arrangements, with partial study for delicate children.—For prospectuses, &c, apply Villa Beulah, Crescent Road.

ELIZABETH COLLEGE, GUERNSEY.

Preparation for the Universities, Army, Navy, and Civil Service. Six Scholarships at Oxford. Valuable school exhibitions and prizes. French and German have the same time and attention as Classics and Mathematics. There is a Modern Department, where Classics are not obligatory.

Terms for Boarders (ages from 8 to 16), from 50 to 65 Guineas, inclusive of school fees.

Next term commences May 1st.

KELLY COLLEGE, Tavistock. — The College will be OPENED in September next. The examination of first candidates for the Foundation will be held August 7th, 1877.—For information and forms of application for admission apply to the Head Master, R. W. Taylor, Esq., Rugby.

BEDFORD GRAMMAR SCHOOL.— Head-Master, J. Surtees Phillpotts, M.A., B.C.L., formerly Assistant-Master of Rugby School. THE practical value of all machinery depends in a very great degree upon the extent to which it is possible to minimise the friction of its different parts. If the friction is great the machine soon wears itself out, and even during the brief period of its existence its usefulness is greatly impaired, so large a proportion of the motive power being employed to drive along the engine itself, instead of being husbanded and wisely spent in accomplishing the work for which it was originally designed. This is no less true when the machine is a society of men, and the friction is caused either by irregularities and jealousies, or by overbearing conduct on the part of its constituent members. In the Institution of Naval Architects—a society established some eighteen years ago for the express object of bringing together the talent and experience of the most eminent naval architects, ship-builders, marine engineers, naval officers, yachtsmen, and others, in order to foster and improve the science and art of shipbuilding, to carry out experiments, to examine new inventions, and to investigate the various questions which might arise in the practice of the naval architect's profession—such friction is now reported to exist. The value of such an institution must be recognized by almost every member of the profession, and few scientific societies have been less barren of results. During its history the Institution of Naval Architects has done much to give unity and coherence to the profession, and the seventeen volumes in which its transactions are recorded contain an amount of information and a mass of scientific learning to which it would not be easy to find a parallel. For several years after its foundation nothing could have been more harmonious than the working of this Society, and, under the able guidance of Lord Hampton, it has gone on to the present time without the semblance of a rupture. During the last few years, however, there have not been wanting signs that its unanimity is somewhat broken, and that there exists a feeling of dissatisfaction which must prove sooner or later injurious to its interests. For this increasing disaffection there are two principal causes—the constitution of the Council and the somewhat high-handed action which is taken by the Council as at present constituted. With regard to the appointment of the Council, the rules of the Institution are singularly meagre; the only provision that they make is that "members only shall be eligible for election as members of Council at the annual general meeting." The number of members of which it is to consist is not specified, nor is any provision made for the annual or periodical retirement by rotation of any of the members of Council. The practical effect of this omission is that a considerable proportion of the Council is composed of gentlemen who, from age, infirmity, professional engagements, or other causes, are unable to interest themselves actively in the work of the Institution. Complaints are made by many unofficial members that the Council of the Institution is composed of Admiralty and Lloyd's officials, and a good deal of soreness seems to be felt at the fact that a considerable number of the oldest members, who do not happen to be connected with these two offices, have no share in the government of the Institution, and are debarred from the professional distinction which a seat at the Council Board is supposed to confer. This feeling was strengthened by the action taken by the Council at the session which was recently held. Last year an opinion was expressed that it would be well if "new blood" were infused into the Council, and the President—Lord Hampton—with his customary fairness, admitted that the proposal was worthy of consideration. This year the Council, appearing to yield to the suggestion, nominated five new members, but adopted the very unusual course of announcing the name of one only at the commencement of the session, and the remaining four just before the close of the last meeting. This would not, perhaps, have given rise to more than a passing murmur if the gentlemen themselves were all that could be desired; but, with one exception, the five are young members, while there are upon the roll of the members a number of gentlemen distinguished by their standing in the profession, and by their keen but unobtrusive interest in the welfare of the Society, whose qualifications for a seat at the Council are admitted by all beyond the charmed circle of officials. There is another point in which the Council gives offence. By the constitution of the Institution the Council is empowered to call a general meeting of the members at any time which it may consider of sufficient importance to demand a general expression of opinion. Although the Institution has existed for eighteen years, no such special meeting has ever been summoned, and yet, during that time, the Council has on several occasions presented papers to the Board of Trade, or other departments of the Government; and while these papers have had all the weight and importance to which the opinion of the Institution of Naval Architects is fairly entitled, they have been the expressions of a few members of the Council, and have never been submitted to the Institution, or discussed by it in any way. Of this the members have good reason to complain; for, though the Council may be composed of men eminent in the profession, it is not fair to attach to their opinions the sanction of the Institution, by whom it is quite possible they might have been out-voted, and any expression of opinion which they may forward to a public department has only just that value which would be attached to the views of the individual men who may concur in it. It should, therefore, be understood, and we commend this consideration to the Board of Trade, that these important representations are not necessarily the opinions of the Institution of Naval Architects, nor even of those gentlemen who form the Council—for it is a rare occurrence for the majority to attend the Council meetings—but they are the opinions of a few gentlemen, some of them it may be of high standing as naval architects, who happen for the time being to figure as members of the Council.

By the new reorganization scheme for the Royal Regiment of Artillery, which is to come into operation in July, some few changes of importance will be effected. The depôt batteries will be scattered over the country, instead of being concentrated at Woolwich and Sheerness; the foolish system, adopted only some two years ago, of connecting seven batteries together to form a brigade, under the command of a Lieutenant-Colonel, as if it was a regiment of Infantry or Cavalry, will be abolished; and the formation of double brigades, although a rather cumbrous arrangement, entailing a large amount of superfluous correspondence, may be attended with advantage if properly worked, so as to form a real connection between the brigade and the district in which its depôt is placed. It is evident that for purposes of administration and promotion of non-commissioned officers there should be some division, such as brigade, battalion, or regiment, between the battery unit and the total number of batteries constituting the whole Artillery force, or, as it is called in our Service, the Regiment of Artillery; but it is questionable whether small brigades of three batteries, under a Lieutenant-Colonel, for Field Artillery, and of six batteries, under two Lieutenant-Colonels, for Garrison Artillery, with paid Staffs suitable to their respective requirements, would not be a much better arrangement than the large double brigades, between the batteries composing each of which there can be but very slight connection. The reduction in the Brigade Staff will be a serious loss to the prospects of the senior non-commissioned officers, which might be rectified to some extent by allowing a paid Sergeant-Major and Quartermaster-Sergeant with rank of first class Staff Sergeants to every station where two or three batteries are quartered. Under the contemplated scheme there may be a Brigade Sergeant-Major and a Brigade Quartermaster-Sergeant where there is but one battery at the depôt, while at another station with a couple of batteries a Battery Sergeant-Major and a Battery Quartermaster-Sergeant will have to perform the duties of acting station Sergeant-Major and Quartermaster-Sergeant without any additional pay or rank. Here it may be as well to call attention to the numbers of batteries in different districts varying so much, which might be easily corrected by a slight redistribution of stations among districts. The proposed method of promoting non-commissioned officers is a novel one. Up to the rank of Corporal it is to be made in each battery, but to the rank of Sergeant and Battery Staff-Sergeant it is to run throughout the batteries of the same branch serving in the district. The latter arrangement will no doubt shuffle the Sergeants pretty freely, but whether it will satisfy them is questionable. A Corporal in a battery just come home from abroad may thus find himself promoted to Sergeant in another battery in the same district, but which is next for foreign service. As far as the relief of batteries is concerned, the new scheme is a return to the old plan carried out under the battalion system, which allowed a single battery, or any required number of batteries, to be relieved at one time, or sent abroad with a force or army without being hampered by the supposed necessity of sending whole brigades of seven or eight batteries together. In the General Order giving details of the scheme of reorganization, the functions and responsibilities of regimental Colonels are fully explained, but no mention is made of the Lieutenant-Colonels, except that they will be put on a roster for foreign service—which is also a return to the old rule under the battalion system—and that certain letters and documents are to pass through their hands. The Lieutenant-Colonels are, however, those officers who are chiefly affected by this reorganization, which makes but few changes in the destinations or prospects of either regimental Colonels or battery officers, except of the small number which belonged to the Woolwich and Sheerness depôts. A good opportunity now offers of putting the Lieutenant-Colonels of Artillery on a proper footing; that is to say, on an equality in authority, pay, and allowances with officers of similar rank in the Infantry or Cavalry. At present only one-fourth of the Lieutenant-Colonels of Artillery doing regimental duty are on such a footing. A committee is said to be now considering the question at the War Office; but, as it is merely a matter of common justice and good policy, consideration is less required than immediate action. The roster of Lieutenant-Colonels for foreign service should not be settled without a good deal of consideration. The lists of the old Royal and Indian Artilleries have been so mixed up by transfers, exchanges, and appointments to Horse Artillery, that a number of points may arise to tax the ingenuity of the authorities. Another question may be asked.

Considering that a two-battalion Line regiment has two bands, one for each battalion, and that the Marines have a band for each division at Chatham, Portsmouth, and Plymouth, is it right that the bands of the whole Artillery service should be concentrated at Woolwich, where not a garrison battery will be quartered? Have not Portsmouth, Plymouth, or Dover some claim, on behalf of the Garrison Artillery, to a band, to say nothing of those of certain foreign stations?

With war actually in progress in the East, and when some of our greatest national interests may be said to be threatened, it is natural to scan narrowly the state of our Navy, "whereon, under the good providence of God, the wealth, safety, and strength of the kingdom chiefly depend." Some severe strictures on our naval administration were made before the meeting of Parliament by Mr. Reed and others; and though the motions of censure or inquiry of Mr. Seely, Captain Pim, and Mr. Reed himself were either withdrawn or collapsed, it may be thought they were put down by the mere force of a Parliamentary majority, and now that war has been declared it becomes important to see how the "brave words" of the Government are sustained, either by public opinion or their own actions. As to public opinion on the Navy, whether represented by Lord Palmerston's man in the white hat, by the majority of writers in the Press, or by what are familiarly termed "naval circles," we can only remark that it is extremely quiescent, and that neither autumn grumbles nor Parliamentary motions appear capable of raising a panic as to our state of preparedness for any possible naval eventualities. This, then, is satisfactory, and if we turn to the conduct of the Government we shall be still more reassured. Mr. Ward Hunt does not display "the shadow of a fear," and meets the present crisis with decreased naval Estimates; while as yet, at least, we have heard nothing of extra credits for the two Services, in accordance with the precedents of 1870. These, however, may yet be required hereafter, but we repeat that Mr. Ward Hunt was content to meet a period of probable war in Europe with reduced Estimates. Let us look now cursorily round the dockyards, and endeavour to see what they are doing, and whether we can rest satisfied with the confident assurance of the Minister in the state of our ironclad fleet. We pass over the complaints, some of which were undoubtedly well-founded, of the machinery of a few of the new ships, feeling satisfied that these weak points have been made the most of, and we look to see that our so-called Active Fleet is not composed of "phantoms" and "dummies," as it was stated to be with but too much truth three years ago. It is but necessary to make some definition as to what constitutes the difference between an efficient ship and a "dummy." Sir John Hay would probably tell us that any ironclad of the present day which had not armour of at least nine inches thick, that could not steam with her boilers at the pressure they were originally tested to, and that was not fitted for firing the Whitehead of the newest pattern, was a dummy; but it is evident that all our men-of-war cannot be constantly being re-endowed with youthful vigour, and that they may be expected to do good service even when their boilers or themselves have reached middle age. We shall take, then, as effectives, any of our ironclads that are in good repair, and the pressure on whose boilers has not been materially reduced. In this category we may, then, class all the ironclads now in commission, though the Monarch and one or two others will require new boilers shortly, At the present moment, then, we have, in commission 24 ironclads—viz., 9 in the Mediterranean, 4 in the Channel Squadron, 7 first reserve ships, 3 flagships on foreign stations, and the Thunderer, just commissioned at Portsmouth. In the home dockyards, ready, or nearly ready, we have the Shannon, Invincible, Agincourt, Temeraire, and Dreadnought; while the Triumph and Hercules, just paid off at Portsmouth, requiring new boilers, could be ready in a few months. We may regret that at this juncture any of our ships should be unfit for immediate service; but, were we even at war ourselves, it would become necessary to take out old boilers and replace them with new occasionally. We cannot now discuss the question of our unarmoured fleet, but we may regret that the pressure of the times does not allow of a new Detached Squadron being formed, and we may remark that the *Times* is in error in speaking of the Inconstant as "requiring the labour of months to refit for active service;" for this noble frigate has, we are informed, her masts on end, and her guns on board, and could, were she required, proceed to sea in a few days. That a certain number of the wooden frigates in the "Navy List" should be classed as dummies cannot be denied, though all the fast "iron cased with wood" corvettes and frigates are in good condition, both with regard to hull and machinery. We have left out of consideration the four monitors of the Hydra class, the Glatton, and gunboats, all of which are in good condition, but suitable only for coast defence, and it has been unnecessary to speak of the Inflexible and other formidable vessels not yet nearly completed; but, on the whole, the outlook is extremely satisfactory, though we trust that the activity now displayed in the dockyards will not be relaxed till all the vessels now in a state of forwardness are ready for the pennant at twenty-four hours' notice. As to the *personnel* of the Navy, we can only refer to the opinion expressed by Sir Alexander Milne a few days ago, and that it is so effective is undoubtedly due to the number of ironclads employed in peace time, in spite of the plausible advice often given to instruct our men in vessels which would be cheaper to keep at sea. In these days it is more than ever important that officers and men should know their ships well beforehand, or they might fairly complain, when suddenly called upon to use the model weapons which have been kept in reserve, that they had not proved them.

The deaths of the following officers on the Active Lists have been officially reported to the Admiralty since March 20, 1877: — Fleet-Surgeon William Smith, M.D., Paymaster Herbert H. Jollye, Navigating Sub-Lieutenant Henry B. Newton, Naval Instructor William Read, Carpenters Thomas Rogers and Benjamin D. Sanders, Midshipman Samuel A. W. J. Handy. The names of the following officers have been removed from the List of the Royal Navy since March 20, 1877:—Captain Charles E. Stevens (dismissed by sentence of court-martial), Surgeons William J. Morier, M.D. (name removed from the List on account of misconduct), and George Cooke (resigned), Engineers Joseph Hopwood (pensioned), and James A. Dicks (dismissed by sentence of court-martial).

Rear-Admiral Sir Leopold M'Clintock, Superintendent of Portsmouth Dockyard, struck his flag on board the Asia at sunset on Sunday, his term of service having expired.

A vacancy on the list of Paymasters-in-Chief has been caused by the death of Paymaster-in-Chief John Thomson, the senior on the list. This officer entered the Navy as Midshipman in 1810, and being offered the rank of Paymaster, was appointed to the Redpole with that rank on March 24, 1812, in which ship he served until 1815. He afterwards served in the Brazils and South America; in the Blossom, from August, 1819, till 1824; in the Lightning, also in South America, from June, 1829, till January, 1831; in the Eagle, on the North American and West Indian Station, from November, 1844, until September, 1846, and from the latter date until paid off, in 1849, in the Vernon, flagship in the East Indies. In the summer of 1848, while on duty in Hong Kong harbour, he sustained a severe sunstroke, which rendered him insensible for 28 hours, and from which he only recovered with the total loss of sight in the right eye. He was appointed to the Excellent, gunnery-ship at Portsmouth, August 2, 1852, from which ship he retired as Paymaster-in-Chief July 25, 1856. He obtained the Greenwich Hospital pension of £50 per annum in March, 1866. While in the Excellent, he was engaged on the then new code of instructions for the Paymasters of the Fleet. He was the first officer promoted to the rank of Paymaster-in-Chief, and it is worth noting that his commission, dated the 25th of July, 1856, empowered him to assume the rank and title of a commander in the Royal Navy, the relative rank being afterwards raised to that of Captain, of three years standing. "Captain" Thomson was much beloved and respected in the Service, and his death is mourned by a large circle of relatives and friends.

Rear-Admiral the Hon. Fitzgerald A. Foley, who hoisted his flag as Superintendent of Portsmouth Dockyard on Monday, entered the Navy in 1837. He served as Midshipman of the Castor on the coast of Syria, and at Acre in 1840, and was twice mentioned in the public dispatches to the Admiralty for his services. He served also in the boats of the Cambrian during much severe boat work in 1842-43. From May, 1867, till May, 1871, he commanded the Cambridge, gunnery-ship at Devonport, and from August 31, 1871, until August 31, 1874, the Britannia training-ship for Naval Cadets. He was Captain-Superintendent of Sheerness Dockyard from January, 1875, until advanced to the flag rank, December 31, 1876.

Commander Charles Pitman Coppin, whose death is reported at the age of eighty-seven years, entered the Navy in 1800 as Midshipman on board the Flora, and afterwards served in the Maidstone and Active in the Mediterranean, and was present at the forcing of the Dardanelles by the fleet under Sir Thomas Duckworth, in which action the Active chased and blew up a Turkish frigate and also assisted in destroying a Turkish liner and a heavy battery on Peoquis Point. Commander Coppin served for three years as Lieutenant of the Weazel, and was actively employed in the destruction of several privateers, and contributed to the defeat of a French brig of twenty guns and several other vessels, one being the French privateer L'Eole, of fourteen guns and 130 men, after a gallant action of an hour and thirty minutes. He was in several boat actions, and commanded a party of seamen and two howitzers at the taking of Diamante, on the coast of Calabria, when a large convoy of forty or fifty sail and several gunboats were taken. He received a medal for the capture of eight gunboats and a large convoy laden with stores and ammunition for Murat's army at Armanthea, and was employed in the Faro of Messina during the time Murat was at Scylla with a large army to invade Sicily, and during that arduous service was frequently engaged with the enemy's batteries and gunboats. He was present at the taking and destruction of an armed felluca and gunboats at St. Enfernia, which were supported by a body of French troops. Subsequently he served in the Canopus, Tuscan, and Zephyr, when the latter vessel was in attendance as a yacht on the Princess Charlotte of Wales, and as First-Lieutenant of the Iphigenia on the coast of Africa.

We understand that Lieutenant Dougall, R.N., of the Bittern, will again join Major-General Sir A. Kemball, K.C.S.I., with the Turkish Army, as Aide-de-Camp.

The Brilliant, drill-ship of the Naval Reserve, stationed at Inverness, is no longer to be a tender to the Clyde at Aberdeen, the Admiralty having decided to make her a separate command. A Lieutenant will be given the appointment.

The torpedo staff at Malta being short of officers, Lieutenant Gallwey, of the Alexandra, has been lent for service on shore with the Royal Engineers, to superintend laying sub-mines.

As the repairs to the Rupert are likely to be some time in hand at Malta, Captain Hunt Grubbe, C.B., has been granted a month's leave for the purpose of taking a run home in the Serapis, and arrived at Portsmouth on Sunday.

Acting Sub-Lieutenant W. M. Murdock, of the Monarch, and Navigating-Lieutenant Scriven, late of the Research, will take a passage home from Malta in the Thetis.

Orders have been received at Devonport for the ships of the Channel Squadron to be out of the dockyard hands by the 25th instant, and to be in the Sound by the 26th, if necessary. Men are to work extra time to bring the vessels forward. The Achilles has been ordered to Devonport to have defects made good, and the crew of the Resistance will be turned over to her.

Captain F. W. Wilson, late of the Repulse, has arrived in England, accompanied by Mr. Collot, Surgeon of the ship.

Having on more than one occasion pointed out the undesirability of sending an iron ship to relieve the Aboukir, we are pleased to hear that it has been decided to arrange for keeping the Urgent cool, on her being moored in Port Royal harbour, by giving her an outer casing of wood, which will be extended about two feet from the iron sides of the vessel. This will keep the rays of the sun from the iron plates, and will allow for free passage of air between her inner and outer skin.

It has this week been authoritatively stated in Parliament that the power of removing the names of officers from the "Navy List" is an immemorial usage, and is an exercise of the prerogative of the Crown. That such authority should be vested in the Lords Commissioners for executing the office of Lord High Admiral may be convenient for the public service, but any approach to abuse in the exercise of so vast a power must be carefully watched. We have reason for believing that a medical officer is at this moment suffering grievous injury from the hasty removal of his name from the "Navy List" "for misconduct." With this attached to his name, he is, after many years' service, ruined both in reputation and prospects, for the difficulty in entering upon practice on shore with this mark recorded against him in the official "Navy List" must be readily recognized. The sympathies of his late brother officers are with him, and in applying to the Admiralty for a fair trial he has been supported by officers of high standing. He has documentary evidence to prove that the charge of misconduct upon which he has been struck out of the "Navy List" without any report of court of inquiry or court-martial, was brought against him under a misconception, and he has repeatedly begged to be given an opportunity of defending his character before some tribunal. The case is a most exceptional one and has created much comment; and we may add that the summary punishment which has been awarded to this officer is generally believed to be anything but the unanimous vote of the Board, but rather the decision of the First Lord. If this be so, it becomes a matter of the gravest importance to the Service; for though we would not suggest that any official of such high standing would for a moment knowingly commit an act of injustice, yet the officers of the Navy cannot feel secure if it be true that their fate may rest entirely in the hands of the Minister who may temporarily control the naval Service, he being empowered to strike them off the List in the exercise of the prerogative of the Crown. If the Board, composed partly of naval officers, had to be fully agreed on such a point as the dismissal of an officer, the chances of injustice being done need not be feared. It is said there is some probability, should it be found possible to bring the matter before the country by taking legal proceedings, that this course will be adopted.

While trying to solve the great problem, how to satisfactorily provide the Navy with Engineer officers, the Admiralty has not been content to rely upon the experience and advice of those who have only had an insight into the working of our own system, but has been seeking information as to the methods adopted in some foreign Services. The question has not been free from difficulties in other Services, notably the Russian and American, and some valuable hints as to the best course to pursue in the introduction of the Engineer Cadet and the method in which his training should be conducted, are likely to be obtained from foreign sources.

The Liverpool Brigade of the Royal Naval Artillery Volunteers certainly appears to be prospering under the charge of Captain C. E. Foote, R.N. Last week sixty officers and men of the Brigade embarked on board the Achilles, by Admiralty permission, and proceeded outside the Mersey and off Holyhead for two days' target practice, &c. The men were stationed at guns, told off to parts of the ship, placed in watches, and messed on the main deck, paying for their rations at the rate of 1s. 6d. per diem; in fact, they performed all the duties required by the regulations for Royal Naval Artillery Volunteers, being exempt from going aloft or work in the stokehole. The Brigade, when joined by Captain Foote in July last, numbered under 200, we believe, but it is now nearly 500. Corps have been established at Southport, Bangor, and Carnarvon, and before long Rhyl and Llandudno will also raise corps attached to the Brigade. It is hoped that the yachting community and the majority of the seaports of England will further strengthen this body, and that each port in time to come, may have its Volunteer Torpedo Company selected from the Royal Naval Artillery Volunteers, and properly instructed.

The Engineer officers of the Resistance have received from the Admiralty a communication, in which it is stated that the results obtained on the full-power trial made when on passage home reflects considerable credit upon the Engineer staff.

The Turquoise, which was built and engined by Earle's Shipbuilding Company, still remains at Sheerness, waiting until her engines shall be put in a satisfactory condition for trial. A survey of her weak points has disclosed a cracked crank-shaft, which is to be returned to the contractors and replaced by them without delay.

A new idea is about to be put in practice with regard to the colour of the British man-of-war when ordered to hot climates, the regulation whitewash and blacking being superseded, as far as the exterior of the ship is concerned, by the substitution of a delicate light tint. The first ship for the West Coast of Africa which is to be painted a light colour is the Swallow, orders having been given for her to have a coat of the same tint as that supplied for the Indian troopships.

We are sorry to hear that during the recent cruising of the Simoom, Captain Pasley was on the Sick List for some weeks, but by the last mail we hear he was on a fair way to recovery.

A story is told in the "Life of Lord Dundonald" of an old First Lieutenant being appointed to a ship supposed to be in the West Indies, but which he could never succeed in finding. History repeats itself, and at this moment there is an officer running about after his ship on that same station, the Admiralty having ordered him a passage to the West Indies, while his ship is, and has been for some time, at or near Halifax. As every mail from the Admiral gives the details of the disposition of the ships of the squadron under his command and their probable movements, it should not be such a very difficult thing to ensure an officer being sent to meet his ship, instead of giving him the impossible order to join his ship where she is not.

Commander H. T. Price has received Admiralty permission to accept the appointment of Governor of Knutsford Gaol, to which he was elected not long since.

The Royal Warrant extending the Albert Medal, first and second class, to cases of gallantry in saving life on land, has been published. The medal of the first class is to be a gold oval-shaped badge, enamelled in crimson, instead of dark blue, with the monogram V. and A. (the anchor being removed) in gold, surrounded with a garter in bronze, inscribed in raised letters of gold, "For Gallantry in Saving Life on Land," and surmounted by a representation of the Prince Concert's Crown, and suspended from a crimson riband in four white longitudinal stripes, instead of a dark blue riband with two stripes. The medal of the second class will be of bronze. Each additional act of bravery is to be indicated by a bar. The medals are to be awarded on the recommendation of the First Lord of the Treasury, to those who have endangered their own lives in saving or endeavouring to save the lives of others from accidents in mines or on railways, or at fires or other perils.

Captain Henry F. Nicholson, of the Royal Naval College, Greenwich, has been selected for the appointment as Naval Attaché for Europe, being relieved at Greenwich by Captain C. E. Domvile. As we have more than once pointed out how inadequately England is represented on the Continent by those conversant with naval matters, we are pleased to hear that there is some prospect of an additional or Assistant Attaché, also, being appointed.

Commander Cyprian Bridge has arrived in England, invalided home from the flagship on the China Station. Long and continued service in hot climates has told upon this officer's health, but we hear that it is hoped at the Medical Department that a few months' rest may sufficiently restore his health to admit of his accepting a home appointment.

It is not the intention to carry out any further moves of Cavalry until June, when the Inniskilling Dragoons proceed from Dublin to Edinburgh, and the 7th Hussars from Edinburgh to Dublin.

Consequent upon the reorganization of the Royal Artillery, eighteen Adjutants lose their appointments, fourteen only being required instead of thirty-two, as formerly. The following are provided for in the reorganized regiment, and are posted to brigades as specified, viz.:—Captains A. Harness, late 14th, to the 3rd Brigade; J. W. Inge, late 24th, to the 5th Brigade; R. Alexander, late D, to B Brigade R.H.A.; H. W. Isacke, late 10th, to the 9th Brigade; T. Wood, late 25th, to the 6th Brigade; J. R. Poole, late E, to C Brigade R.H.A.; A. Warry, late 18th, to the 2nd Brigade; J. W. Bernard, late 15th, to the 10th Brigade; G. C. H. Parlby, late 2nd, to the 7th Brigade; C. W. Long, late 16th, to the 4th Brigade; W. A. Roberts, late A, to A Brigade R.H.A.; A. J. Shuttleworth, late 3rd, to the 8th Brigade; A. G. Yeatman, late 1st, to the 1st Brigade; and C. F. Glass, late 23rd, to the 11th Brigade. The following become supernumerary, viz.:—Captains C. Thornhill, late 6th Brigade; J. M. Douglas, late 7th Brigade; T. J. C. A. Studdy, late F Brigade R.H.A.; T. Graham, late 19th Brigade; C. W. Brereton, late 20th Brigade; C. H. Campbell, late 11th Brigade; W. R. Stirke, late 13th Brigade; W. H. Sandham, late 12th Brigade; F. C. Nicolas, late 9th Brigade; J. M. Murray, late B Brigade; A. D. Anderson, late C Brigade; F. P. W. Freeman, late 22nd Brigade; S. Gardiner, late 8th Brigade; D. W. Lawrell, late 17th Brigade; R. P. Hare, late Depôt Brigade; T. R. Disney, late Depôt Brigade; and E. S. B. Lockyer, late 4th Brigade. Nine, instead of sixteen, Ridingmasters will, in future, be required—Messrs. J. Virr, R. Butler, T. Richie, J. Drummond, J. Daly, J. Abbott, and E. Stannard having become supernumerary. Eighteen Quartermasters have also been reduced—Messrs. M. Robinson, B. Ashbee, W. Cliff, T. Briggs, T. Gibson, W. Wishart, A. Arbuthnot, N. M'Leod, W. Gunn, R. Green, G. Brown, E. Simons, J. Forsdyke, T. Langrish, R. Scott, J. Gillard, A. Walker, and T. M. Richey being made supernumerary.

Colonel R. A. Logan, C.B., half pay, late 57th Regiment, will succeed Colonel Broadley Harrison in command of the Brigade Depôt at Bradford. Colonel Logan commanded the 57th Regiment in New Zealand to the end of the war in 1861 (thanked in General Orders and named in despatches); commanded four companies, being the main body which rushed and took the enemy's redoubt at the Katikara River, June 4, 1863 (mentioned in despatches, medal, and C.B.). He entered the Army October 26, 1841, and became Colonel February 17, 1871, retiring upon half pay July 26, 1876.

Brevet Major H. G. E. Somerset, half pay, late 3rd Buffs, has been appointed Fort Major and Adjutant at Jersey, vice Lieutenant-Colonel E. D. Smith, transferred to Barbadoes as Assistant-Adjutant and Quartermaster-General. Major Somerset served with the Cape Mounted Riflemen in the Kaffir war of 1847, and in that of 1850-52 (medal). He entered the Army October 13, 1848; became Lieutenant, May 27, 1853; Captain, March 5, 1858; Brevet Major, July 5, 1872; and was employed from April 15, 1864, to within a few days ago as Staff Officer of Pensioners.

Having vacated his appointment as Brigade-Major at Gibraltar, after a service of six years on the Staff, Captain G. J. Gilbard, 71st Highlanders, has been recommended for the appointment of Aide-de-Camp on the Staff of General Lord Napier of Magdala, to whom he has been acting as Assistant Military Secretary. Captain Gilbard, who passed from the Staff College in December, 1864, entered the Army January 18, 1859, and became Captain February 26, 1864.

Not only is there an increase in the number of men offering themselves for enlistment, but all are agreed as to the marked improvement in physique of those who have lately been entering the ranks. There was undoubted room for improvement in the latter respect. It is not satisfactory to hear that fraudulent enlistment continues to an alarming extent. Some means must soon be found for checking this evil, of which all commanding officers complain, but which their endeavours to prevent the growth of prove unavailing.

Captain G. E. Grover and Lieutenant W. A. H. Hare, Royal Engineers, both of them holders of Staff College certificates, have been appointed to the Intelligence Department.

ARMY SHORT SERVICE AND THE INDIAN REVENUE.

It is well known that for some years past angry inter-departmental disputes have occurred between the War and India Offices regarding the price which the Indian exchequer should pay for the maintenance of the European force in this country, under the altered circumstances of the home military organization of 1870. When the present Ministry took office the dispute was in full force, and, together with other military matters affecting the financial interests of India, had become so complicated from years of correspondence between the two departments, that Mr. Bouverie, formerly member for Kilmarnock, was referred to, to arbitrate. Subsequently, we believe, a committee of the House was appointed to investigate and report upon the whole circumstances of the case. No doubt, many of the charges which had been so industriously circulated against the War Office, of imposing exaggerated charges upon the finances of India, on account of the European Army in this country, were disproved. Yet, the cost of bringing back the short-service soldiers at the expiration of their six years' service in the ranks, and replacing them in India by others from home, will, with each year that passes, become greater as the action of the Enlistment Act of 1870 developes itself. It is, therefore, felt by the Indian officials that, in equity, the same sums should no longer be charged against the Indian Revenue as when soldiers completed the whole of their military service in this country, provided the corps for which they had enlisted was not removed home, in the ordinary course of relief, before they became entitled to discharge. By late accounts from England it is understood that the Secretary of State for War has addressed proposals to the India Office which will have the effect of remedying some of the financial evils complained of regarding the difficulty of combining the system of short service with the military requirements of this country. The details of the plan have not as yet been promulgated, but the opinion of the Government of India *in India* is, we hear, being taken on the subject. It by no means follows, even if the administration of this country tacitly accept the situation and the reduced charges, that a financial improvement will immediately take place, as any reduction of the sums paid from the Indian revenue for the maintenance of the European Army entails a corresponding increase in the home Army Estimate, which increase, we may safely allege, will be delayed by the Secretary at War as long as is possible. Nevertheless, even if the proposed financial modifications do not fulfil the entire expectations of Indian reformers, there is one argument which must not be lost sight of, which is, that even if the large numbers of soldiers to be drafted from India after six years' complete service in the ranks of their corps to the British Reserve Force are not again and at once directly available for further active service in India, although a large proportion of them have been enlisted and trained at the expense of our revenue, such men would return to the ranks of regiments serving at home in the event of war or any national emergency. By such an organization, therefore, a much larger force of trained soldiers would be ready to take the field and proceed to India or abroad than could ever be the case if the reserve system did not exist, it being well understood that the House of Commons would never have consented, on the ground of expenditure ,to such a large augmentation of the Army as the Reserve Force will eventually prove if the whole of the additional soldiers had always to be present with the colours. The present policy of the home Government is strictly Imperial, and to bind the welfare of India with that of England. The interests of the vast British Empire demand that all parts of it should have a common cause, and that no undue preponderance should be evinced as regards security from aggression. Consequently, although the main bulk of the British Army will be quartered at home—the men either at their duty or in the Reserve—a far larger force could be quickly despatched to this country or anywhere else than was even the case during the Mutiny. Still, as we have remarked, the entire charges for recruiting and training large numbers of soldiers, who will be available for six years in the home Reserve (after, in many instances, but four or five years in India) for the general defence of the Queen's dominions, should not be allowed to fall on the revenue of this country. The total expenses of the Army should rather, if it were possible, be in a fixed ratio, and be equitably divided. How this is to be accomplished is a moot question, and one not ever likely to be answered so as to satisfy everybody concerned.—*Civil and Military Gazette of Lahore.*

Capt. O'Beirne asked the Secretary of State for War, on Thursday, whether he would consider the expediency of permitting a portion of the service in the ranks of non-commissioned officers on being promoted to the rank of officer to count towards the extra shilling a-day to which subalterns become entitled after serving ten years in that grade, in order to obviate the great difficulty in connection with the promotion of non-commissioned officers to the rank of officer. Mr. Hardy said that the matter was under consideration, and he hoped that an alteration might be made so as to effect the object the hon. and gallant member had in view.

The Army.

Royal Horse Guards moved on Wednesday from Albany-street Barracks to St. John's Wood.

1st Life Guards left London on Wednesday for Windsor, and took over the Spital Barracks.

4th Dragoon Guards. The regimental steeple-chases came off last week at Dundalk. The events resulted as follows:—Subalterns' Cup, Lieut. Vansittart's gr m Confidence (owner) 1; Farmers' Race, Mr. Osborne's Cineraria (Capt. Bates) 1; Regimental Challenge Cup, Capt. Bates's Mohawk (owner) 1. A Flat Race for horses (the property of officers) was won by Major Shaw-Hellier's Sir Harry; and the Black Coat Race by Capt. Bates (owner up) brought the day's sport to a conclusion. The band was on the ground.

2nd Life Guards. They arrived in London on Wednesday from Windsor, and took over the Albany-street Barracks.

6th Dragoon Guards (Carabiniers). On arrival in India from England next winter the regiment will be stationed at Meerut, not at Muttra, as the *Times* lately stated. The officers ran a "point-to-point" race at Sutton-on-Forest, near York, a few days ago. The start was fixed for 2 in the afternoon, but it was nearly an hour after that time before the field of eleven, of which the following is a list, were got away:—Lieut. Porter's Young Camperdown (owner), 1; Lieut. Hallowes's Hardwicke (owner), 2; Capt. Williamson's Belzoni (owner), 3; Lieut. Sandeman's Kirkwood (owner), 4; Lieut. Hammond's Asylum (owner), 0; Lieut. Sandeman's Hilston (Lieut. Hanbury), 0; Lieut. Sandeman's Stodham (Sub-Lieut. Baird), 0; Sub-Lieut. Massy's Ploughboy (owner), 0; Lieut. MacGeorge's Gipsy (owner), 0; Lieut. Sprot's Nottingham (owner), 0; Lieut. Gaskell's Obadiah (owner), 0. Each horse carried 13st., and each rider was dressed in the conventional scarlet coat of the hunting field. Lieut. Porter's Camperdown reached the goal first, and was directly afterwards followed by Lieut. Hallowes's Hardwick, the third to pass the post being Lieut. Williamson's Belzoni, and fourth Lieut. Sandeman's Kirkwood. The prize for the first is a cup, and it was well earned, for throughout the pace was good, and the character of the country something keener for horses and riders than the ordinary description of "fair."

3rd Hussars. Lieut. Alexander has been granted leave from India to England for fifteen months, on private affairs, and arrived home on Sunday in H.M.S. Serapis.

10th Hussars. The statement of the *Times* the other day as to the move of the regiment from Muttra to Umballa next winter is incorrect, Rawul Pindee being the station to which it is proceed.

11th Hussars. The regiment has received its orders to embark for England next winter.

19th Hussars. Col. Jenkins has leave of absence from the 2nd inst. to the 15th proximo, pending his retirement.

Royal Artillery.

Her Majesty has signified her gracious intention of conferring the honour of knighthood on Col. H. B. Sandford, lieut.-col. on the Retired Full-Pay List (late Bombay), in recognition of his services as commissioner for this country at the Philadelphia Exhibition.

Col. F. W. Stubbs, Major J. R. Dyce, and Major Helsham Jones have been formed into a committee, of which the first-named officer is president, for the inspection of the forts in the Lahore Division of the Bengal Army. The Committee will report on the additions of ordnance and material necessary to the thorough efficiency of the forts as far as Peshawur.

Cols. C. R. O. Evans, 3rd Brig.; G. Selby, 11th Brig. (late Madras); and A. Light, C Brig. R.H.A. (late Bengal); Major H. J. Thornton, 6th Brig. (late Madras), ; and Lieuts. C. H. Hamilton and A. J. Dunnage, B. Brig. R.H.A., arrived home from India on Saturday in H.M.S. Serapis.

Lieut. E. Vaughan-Hughes, 2nd Brig., has sailed for India.

The following changes of stations take place in Ireland this month:—C Bat. D Brig. R.H.A., from Dublin to Newbridge; D Bat. D Brig., from Dublin to Ballincollig; B Bat. D Brig., from Dublin to Ballincollig; B Bat. D Brig., from Ballincollig to the Curragh, for the drill season, and afterwards to Dublin; G Bat. 14th Brig., from Dublin to the Curragh; and C Bat. 14th Brig., from Kilkenny to Dublin.

A Bat. 14th Brig. has moved to Dublin from Fermoy to go through its annual course of gun practice, on the termination of which it will proceed to the Curragh for the drill season.

Royal Engineers.

Lieut. H. P. Knight has left England for Malta, for duty at that station.

Major J. T. Twigge arrived home from India on Sunday in H.M.S. Serapis.

A special telegram to the *Cologne Gazette* states that the intelligence of peace definitively concluded between Col. Gordon and the King of Abyssinia is premature. As yet no such peace has been concluded.

The officers gave performances in the Royal Engineers' Theatre, at Aldershot, on Thursday and last nights, when *New Men and Old Acres* was played with the following cast:—Marmaduke Vavasour, Esq., Lieut. K. R. Todd; Samuel Brown, Lieut. J. C. MacGregor; Bertie Fitz-Urse, Lieut. H. V. Hart-Davis; Mr. Bunter, Lieut. and Adjt. R. H. Jelf, Royal Engineers Train; Berthold Blasenbalg, Lieut. A. Bagnold; Secker (a lawyer), Lieut. R. L. Hippisley; Gantry (butler at Cleve Abbey), Lieut. J. E. Blackburn; Montmorency (servant to Bunter), Lieut. K. MacKean; Lady Mathilda Vavasour, Hon. Mrs. G. Wrottesley; Lilian Vavasour, Lady Sebright; Mrs. Bunter, Mrs. C. Sin; Fanny Bunter, Miss O'Brien. The string band from Chatham formed the orchestra.

2nd Queen's. The 2nd Batn. is in readiness to embark for India in the course of the winter. Capt. Woodward has completed his five years as adjt. of the 40th Lancashire R.V., and rejoins his regiment.

3rd Buffs. Capt. Kelly, 1st Batn., is acting as garrison-adjt. at Canterbury. We hear that the answer given to Serjt. Simon's question respecting the grant of a medal for the Perak expedition has caused immense disappointment to officers and men. Lieut. Martin, 1st Batn., a probationer, officiating squadron officer, 2nd Bengal Cavalry, is to be admitted to the Bengal S.C. from March 3, 1876.

4th King's Own. Lieut.-Gen. Studholme Hodgson, lately appointed to the colonelcy, which his father and grandfather held before him, has been paying a visit of eight or nine days to the 1st Batn. at Gibraltar, and making a minute inspection, much to the gratification of officers, non-commissioned officers, and men. The general lived at the officers' mess during his stay as one of its members, and was able to tell many particulars connected with the former history, habits, and customs of this old regiment, of which all record had been lost.

5th Fusiliers. Brevet Major FitzRoy, 1st Batn., arrived home from India on Sunday last in H.M.S. Serapis.

7th Fusiliers. Capt. Daly, 2nd Batn., arrived home from India on Sunday last in H.M.S. Serapis.

8th King's. The 2nd Batn. is to embark next winter for India. Capt. Batten's five years as adjt. of Auxiliary Forces have expired, and he rejoins the regiment, vice Capt. Dixon, appointed adjutant of the 2nd Royal Lancashire Militia.

10th Regiment. Capt. Glen, 2nd Batn., leaves England on the 17th inst. for Singapore to take up his appointment as brigade-major in the Straits.

12th Regiment. The 2nd Batn., in India, has received its orders to prepare for embarkation for England next winter.

13th Light Infantry. It is now decided to send the 2nd Batn. to India with the 1877-78 reliefs.

14th Regiment. Lady Templetown, wife of Gen. Lord Templetown, will present new colours to the 2nd Batn. at Belfast on the 12th inst. The battalion was raised in 1858.

17th Regiment. Capt. Richards, 2nd Batn., has passed the lower standard examination in Hindostanee.

18th Royal Irish. The 2nd Batn. will move from Fermoy to the Curragh about the 17th inst. for the drill season.

22nd Regiment. Capt. Kirby, 1st Batn., has been noted for appointment to the adjutancy of one of the battalions of Cheshire Rifle Volunteers.

24th Regiment. The *Cape Times* says the ball given by Col. Glyn and the officers of the 1st Batn. 24th Regt. to Sir Henry and Lady Barkly, on April 1, was one of the most pleasant which has been given in the Commercial Exchange, Cape Town, for a very long while indeed. His Excellency the Governor, Lady Frere, and Miss Frere were present and entered very heartily into the spirit of the occasion, notwithstanding the excessive heat. His Excellency and party left shortly after two o'clock, Sir Henry Barkly and Lady Barkly remaining until the last. The farewell taken of them was most cordial.

29th Regiment is ordered to be increased from 603 to 904 of all ranks.

45th Regiment will return home from India next wintsr. Lieut. Hudson arrived home on Sunday last in H.M.S. Serapis.

47th Regiment. On removal to Ireland at the end of the month from Jersey, the regiment will replace the 88th at Athlone.

48th Regiment. Capt. Powlett arrived home from India in H.M.S. Serapis on Sunday last.

49th Regiment. "An ex-Officer" writes:—"Having a great interest in the 49th Regt., in which I served for upwards of six years, and where my name is still remembered, perhaps you may consider the following worthy of publication in your valuable paper. At the Marlborough Hotel, Toronto, I accidentally met a son of the late Lieut.-Col. M'Nab, who kindly allowed me to copy his father's account of the attack and siege of Detroit, and permitted me to send the same for publication should you deem it of sufficient interest. I may point out that the 49th served in the American war of 1812-15."—Copied from the original.—"Aug. 13, 1812.—This evening Gen. Brock arrived at Amherstburg with 400 men, including Militia and Regulars, and immediately proceeded to make arrangements for advancing to Sandwitch, which the enemy had evacuated a few days before. On the evening of the 15th, a fire was opened from our batteries, and continued for an hour with great effect, and recommenced before day on the morning of the 16th from three mortars, one 18-pounder and two 12-pounder, at which time our troops crossed the river, under cover of the Queen's, Charlotte, and Hunter's brigades, at Point Spring Mill, three miles below Detroit, preceded by 600 Indians, who were landed one mile lower down. Our army, consisting of 700 men, advanced in column, and took up a good position in line, about one and a-half miles in front of Detroit. Every preparation was instantly made for the assault of the fort at one of the salient angles, which would have taken place in a few minutes had not a white flag been perceived coming from the garrison, the bearer bringing proposals from the enterminating G. H., offering to surrender upon conditions which were soon dictated in G. H.'s tent by Capt. Glegg and Col. M'Donald, A.D.C. to Gen. Brock. The fruits of this achievement have been the capture of 2,500 men and 25 pounds of ordnance, a vessel called Brig Adams, and other valuable stores of artillery, &c., without the loss of one drop of British blood. The commandant of Mickilimacina was among the number that sent to G. H., on his parole from our side, not to serve during the war. 1,000 took 2,500. Written by James M'Nab, a volunteer of 1812 under Major-Gen. Sir Isaac Brock, K.C.B. Memo. by the son of the late Lieut.-Col. James M'Nab. Toronto, April 9, 1877." The above was written immediately after the siege of Detroit by the late Lieut.-Col. James M'Nab, of Owen Sound, Canada, who was a volunteer under Sir Isaac Brock, K.C.B., during the late war of 1812-15. Was at the engagements at Fort George, Queenston Heights, Stony Creek, Beaver Dam, and Lundy's Lane, also a number of skirmishes in company with the late Sir James Fitzgibbon, 49th Regt.

54th Regiment. Capt. Newbolt arrived home from India last Sunday in H.M.S. Serapis.

56th Regiment. It is definitely arranged that the regiment shall embark for England next winter. Major Hill has left for Aden to resume duty from leave.

59th Regiment. Lieut. Irwin reached England on Sunday last in H.M.S. Serapis.

68th Light Infantry. We regret to learn of the death, which has been announced by telegram from India, of Capt. L. Bolden, as having occurred at Nusseerabad on the 22nd ultimo. The deceased served with the 68th Light Infantry throughout the New Zealand war in 1864-66, including the attack on the Gate Pah, the engagement at Te Ranga, the West Coast campaign, and action at Kakaramea (medal). He joined the Army Feb. 27, 1856; became lieut., April 23, 1861; and capt., Dec. 1, 1869.

69th Regiment. Lieut. Bewicke has vacated his appointment as acting aide-de-camp to Lord Napier of Magdala, G.C.B., G.C.S.I., Governor of Gibraltar, and has joined the depôt at Cardiff for two years.

75th Regiment. The officers gave their farewell theatrical performances at the Curragh this week, the fashionable night being Monday. The programme included (by special desire) *Little Toddlekins*, the new comic song "Put it in the Bag," as sung by Mr. Lionel Brough, and the farce *The Goose with the Golden Eggs*. The programme throughout was admirably rendered.

76th Regiment is to be moved from Chatham to Aldershot for the drill season, and will go under canvas.

83rd Regiment. Major Wakefield has been granted leave from India to England for fifteen months, on private affairs.

85th Light Infantry. Lieut. Spens arrived home from India on Sunday in H.M.S. Serapis.

88th Connaught Rangers. H.M.S. Orontes is expected at Kingstown about the 19th inst., to embark the regiment for conveyance to the Cape.

89th Princess Victoria's. Capt. Caddell is to be placed on the Supernumerary List, on appointment as adjt. of the Louth Rifles Militia, Lieut. B ker obtaining the company.

91st Highlanders move to Belfast from Enniskillen at the end of the month, to relieve the 2nd Batn. 14th.

99th Regiment, stationed at Kilkenny, will furnish detachments at Waterford, Clonmel, Dungarvan, and Carrick-on-Suir about the 16th inst. Provost-Sergt. Prunty has received the medal for long service and good conduct, with gratuity of £5. Col. Welman, in presenting the medal, most cordially shook hands with him whilst congratulating him. Medals were also presented to Orderly-room Sergt. Waylen and Private Innes, of the depôt 62nd Regt., by Col. Welman, who tendered them similar congratulations.

100th Royal Canadians. It has been settled finally that the regiment shall proceed to India with the 1877-78 reliefs, but its destination on arrival is still uncertain.

103rd Fusiliers will leave Templemore in August for Mullingar, to spend the winter.

104th Fusiliers. On relief at Guernsey by the 75th, the regiment will move to Ireland, and will be stationed at the Curragh, proceeding for the winter to Birr.

109th Regiment. It is now arranged finally that the regiment shall return to England next winter from India.

1st West India Regiment. Lieut.-Col. J. M'Auley, on the Half-Pay List, died at Stockton, Upper Norwood, on the 29th ultimo, aged forty-six years. The deceased, after serving for a short time in the ranks, obtained his commission in the regiment Oct. 1, 1855; became lieut., April 9, 1857; capt., Dec. 27, 1866; major, June 8, 1867; lieut.-col., Aug. 2, 1871; and retired upon half pay, Dec. 24, 1873.

Medical Department. The Duke of Buckingham has appointed Surg.-Major J. Mackenzie to be surgeon on his personal staff. Surg.-Major H. Titterton, M.D., on the Half-Pay List, died a few days since. Dr. Titterton was present throughout the Eastern campaign of 1854-55, including the battle of Balaklava, siege and fall of Sebastopol, and attacks of June 18 and Sept. 8 (medal with two clasps and Turkish medal), serving from the beginning to the end of the war, although suffering from dysentery, scurvy, and rheumatism. He also served in the New Zealand war of 1863-65 (medal), was present throughout the whole of the epidemic in the Mauritius, and the last two years of his active service were passed in India, whence he was invalided three years ago, and in consequence of valvular disease of the heart was placed on half pay. He entered the Army May 26, 1854; became surg.-major, Sept. 14, 1866; and retired upon half pay, May 13, 1875. Surg.-Major W. C. Roe has been ordered to hold himself in readiness to proceed to the Cape of Good Hope in medical charge of the 88th Regt., and on completing this duty will return to England.

THE AUXILIARY FORCES.

MILITIA.

Royal Cardigan Rifles. The regiment assembled for training yesterday at Aberystwith.

2nd Royal Lancashire. Capt. Dixon, 8th King's, has taken up duty as adjt. on appointment, vice Major Whitting, who has vacated on promotion. The regiment is to be congratulated upon having obtained so worthy a successor to its late most popular adjt. Capt. Dixon was for four years adjt. of the 2nd Batn. 8th, a regiment which has for years past been known throughout the Service for its smartness.

5th West York. The regiment, over 1,000 strong, will assemble at Knaresboro' on Monday next for its annual training, under the command of Col. Gunter. The recruits, some 300 men, were inspected on Wednesday by Col. Cureton, commanding the 6th Brigade Depôt. They are a lot of healthy, well set-up young men, and their clean and smart appearance and aptitude at drill are all that could be desired, and reflect much credit on the painstaking adjt. and other officers, as well as the Staff, who have trained them during the past two months, and they now join the rest of the regiment for another month's work. The following gentlemen have joined since last training as sub-lieuts.:—The Hon. W. M. Eden, Sir C. T. H. Miller, Bart., and Mr. T. W. Dent. Col. Gunter and the officers out with the recruits gave a dance in their mess-room on April 11, which was numerously attended by the county families in the neighbourhood, the string band of the regiment occupying the orchestra, under the direction of the band-master.

Highland Rifles. Lieut.-Col. Ross made a spirit-stirring speech at the inspection of the regiment, at Fort George, on Wednesday. Nearly 700 men were under arms, and at the close of the movements the regiment formed square, when the col., after speaking of the war between Russia and Turkey, intimated that they might possibly be called out for permanent duty before the usual training time in 1878. In such a case he trusted that every man would turn out, and that there would be none hanging behind. Should this summons arrive he would say to them in the spirit-stirring words which had been set to one of the most beautiful of the Highland pibrochs—

"Leave uncared the herd, leave the flock without shelter;
Leave the corpse uninterred, leave the bride at the altar;
Leave the deer, leave the steer, leave the nets and barges;
Come in your fighting gear, broadswords and targets."

Col. Ross then expressed a desire that they would indicate how many would come forward to fight for their country. Those willing to fight would "slope arms;" those desiring to remain at home would "order arms;" while the officers desirous to fight would "uncover arms." In an instant the entire rank and file sloped arms, and the officers unsheathed their swords amid ringing cheers from the spectators.

Armagh. The recruits assembled for preliminary drill at Armagh consist on parade of 1 capt., 2 subalterns, the adjt., surg.-major, 23 sergts., 8 buglers, and 194 rank and file.

Dublin City Artillery. Sub-Lieut. Lyons has been recommended for transfer to the Dublin City Infantry.

Wicklow Artillery. Capt. and Adjt. Grubb, Sub-Lieut. Howard, Surg. Brew, 12 sergts., 3 trumpeters, and 56 gunners have assembled at Wicklow for preliminary drill.

The following regiments assembled for training on Monday last, viz.:—The Royal Cornwall and Devon Miners' Artillery, at Falmouth; the Hampshire, at Winchester; the Huntingdon Rifles, at Huntingdon; the Kent Artillery, at Dover; the 2nd Royal Lancashire, at Liverpool; the Royal Lancashire Artillery, at Liverpool; the Royal London, at Finsbury; the Royal Pembroke Artillery, at Pembroke; the 1st Tower Hamlets, at Dalston; the Dublin County, at Dublin; and the Kildare Rifles, at Naas.

The following regiments are ordered to assemble for training on Monday next, viz.:—The Royal Anglesey Engineers, at Beaumaris; the Bucks, at High Wycombe; the Cambridge, at Cambridge; the Royal Cornwall Rangers, at Bodmin; the Devon Artillery, at Tregantle Fort; the Dorset, at Dorchester; the Hants (Isle of Wight Artillery), at Carisbrooke Castle; the Hertford, at Hertford; the 7th Royal Lancashire, at Bury; the Leicester, at Leicester; the North Lincoln, at Lincoln; the Royal Monmouth Engineers, at Monmouth; the Oxford, at Oxford; the South Wales Borderers, at Brecon; the Yorkshire Artillery, at Scarborough; the 2nd West York, at York; the 5th West York, at Knaresborough; and the 6th West York, at Halifax.

YEOMANRY.

Sergeants on the permanent Staff of the Yeomanry Cavalry may, if it does not interfere with their military duties, accept civil employment, subject to the consent of their commanding officers and the sanction of the Secretary of State. In no circumstances will they be allowed to keep or be employed in a public-house or beer-shop.

The following officers joined at Aldershot on Tuesday for a course of instruction at the Yeomanry School at that station, viz.:—Sub-Lieuts. Murray and Brocklehurst, Cheshire; Capt. Harfield and Lieut. Arden, Middlesex; Lieut. Crawshay and Sub-Lieut. Cuthbert, Northumberland; Sub-Lieut. Lloyd, Pembroke; and Capt. C. G. Edwards and Sub-Lieut. Morris, 2nd West York.

VOLUNTEERS.

Devon Mounted Rifles. This corps is about to be disbanded, it being found impossible to keep it up to its establishment, owing to the insufficiency of the capitation grant.

Lanarkshire Engineers. Brevet Major Briscoe, 20th Regt., has elected to remain with the regiment as adjt. to complete his five years.

1st Adm. Batn. Dorset Rifles. Capt. Batten having completed five years' service with the Auxiliary Forces, rejoins his regiment, the 8th King's. He joined the Dorsetshire Batn. in Feb., 1874, on exchange from the 23rd Middlesex (Inns of Court).

40th Lancashire Rifles. Capt. Woodward, 2nd Queen's, has completed his five years' service as adjt., and rejoins his regiment.

40th Middlesex Rifles. The adjutancy is vacant by the resignation of Capt. Cowper, who has held it since May, 1861, and accepts pension, to the great regret of all ranks. Capt. Cooper joined the corps in its infancy, and under him it has gradually increased in numbers and efficiency, until it can now claim to hold place among the most flourishing in the metropolis. A performance was given by the officers at the Royalty Theatre on Saturday last, when the *Jacobite* and *On Guard* were presented. The latter was most creditably played, especially by Major Miller as Dennis Grant, Capt. Florence as Guy, J. Turner, Esq., as Kavanagh, Lieut. Low as Grouse, Miss Hughes as Mrs. FitzOsborne, and Miss Taylor as Jessie. Lieut. Low was inimitable, and created great amusement by his humourous rendering of his part.

3rd Adm. Batn. Suffolk. The battalion will in future be known as the 1st Adm. Batn. Norfolk Rifles, being made up of the 4th Norfolk, and 4th, 14th, and 17th Suffolk Corps, its head-quarters being moved from Lowestoft to Great Yarmouth.

THE INDIAN ARMY.

10th Bengal N.I. Major W. D. Palmer, wing officer, died in London on the 27th ult., while home on furlough from India. He entered the Army June 14, 1856; became lieut., Aug, 25, 1857; capt., June 14, 1868; and major, June 14, 1876.

22nd Bengal N.I. Capt. C. H. Bridges, wing officer, has arrived home from India on furlough. Capt. F. H. Hinde, wing officer, has been granted leave to England for two years on private affairs.

1st Madras Cavalry. The command is falling vacant by the retirement of Col. J. N. Maclean on special annuity.

5th Madras N.I. Lieut.-Col. O. Morgan, second in command, has been granted furlough to England for two years.

9th Madras N.I. Lieut.-Col. S. New, wing officer, accepts a special annuity from April 1.

Yorkshire Hussars—William Darby Russell, gent., to be Sub-Lieut. (Supy.); April 18, 1877.

The *Western Morning News* learns from Port Natal, under date March 27, "Whilst the negotiations between Sir T. Shepstone and the Transvaal Government have been going on, troops have been marching to Newcastle, which is situated in the extreme north of the colony. They consist of two detachments of the 1st Batn. 13th Regt., one of which left a fortnight ago, and was followed by the other a week afterwards. It is rumoured that the 3rd Buffs and the 80th, both of which regiments are at present in the colony, will shortly leave for the same destination. Newcastle is admirably suited for an encampment of between 700 and 1,000 men, situated on a plain at the foot of the Draken, being close to the banks of its own river, and little above its level; it is intersected by two natural streams, and by several artificial sluits. Both streams and sluits are all open, and each makes its turbid way through a bed of mud. The site has been carefully chosen, but it is fortunate that the soldiers will be able to get coal a mile or two off, for they will want it."

It was announced in last night's *Gazette* that "the Queen has been pleased to confer the honour of knighthood on Col. H. B. Sandford, R.A."

The Executive Committee of the Corps of Commissionaires acknowledge the receipt of the following sums towards the Endowment Fund, in answer to the appeal recently made by Gen. Lord Napier of Magdala, G.C.B., G.C.S.I.:—The officers, 1st Batn. 2nd, £25; the officers, 13th Brig. R.A., £9 5s. 10d.; the officers, H.M.S. Excellent, £20; Sir W. Grey (acknowledged in error last month as Mr. J. C. Plowden), £10; "L.," Surrey, £5.

THE NEW "MAGAZINE ACCOUTREMENTS."

Surg.-Major Oliver, M.D., exhibited his new Magazine Equipment in the theatre of the Royal United Service Institution on Monday. Dr. Oliver explained that the accoutrements can be used and worn in different ways, the weights to be carried (which may be either kit, ammunition, great-coat, blanket, waterproof sheet, medical appliances for use in the field by the Army Hospital Corps, or trenching tools for throwing up earthworks) being all transferrable from one point of carriage (shoulders and buttocks) to the other with great facility. When kit, great-coat, and waterproof sheet, and seventy or eighty rounds are carried, the kit with sheet on top is usually carried below, and when such is required the waist-belt is passed through the waist-belt loop of whichever bag contains the kit, and the hooks of that bag are separated to their full extent, while the hooks of the other bag (which is to contain the great-coat) are to be placed on the inner side of the bag straps and attached to the iron rings of the conjoined braces, and the back straps of "magazine brace" are then passed through the loops on back of bag. The waist-belt is next taken, the right end in right hand, and left in left, and buckled (with bag attached) around the waist; and in the same manner the conjoined braces are taken in both hands—right in right, and left in left—and the bag and coat thus lifted on to the back of shoulders; the front straps of "magazine brace" are then followed down by the hands, and its ends hooked on to the loops in waist-belt, and the D's in kit brace attached to the hooks of kit bag; the back straps "magazine brace" are next buckled at sides of chest, and all are on. By catching coat sleeves in each hand and extending both arms, and also drawing on conjoined braces in front of shoulders, every part will assume its proper position and rest extremely easy on the body. The "magazine pouch" is next attached to front of waist-belt, and water bottle either slipped around on belt or strapped on to it behind right hip, and the soldier is fully accoutred in heavy marching order. The soldier can now get at waterproof sheet or any portion of his kit in a moment by merely unhooking lower bag from kit brace and moving it around on waist-belt to right front; he can also take great-coat from shoulders and replace it himself unassisted and without removing accoutrements by simply unhooking both braces and lifting bag off shoulders, and the same can be replaced as already stated. For ordinary daily duties, guards, parades, field-days, or active service in the field of battle, the soldier only needs one bag, the other being almost under all circumstances left in the barrack-room in peace or at "base of supplies" in war. On these occasions the great-coat is taken out of "magazine bag" No. 1 and suspended on its own "coat yolk," either at the back of shoulders or buttocks—always the former when the "magazine bag" is required for use. This leaves the "magazine bag" free for the carriage of bread rations, waterproof sheet (at bottom of bag), and from 100 to 150 rounds of ammunition. The "mess tin" is, under those circumstances, carried either on the top or bottom of great-coat on "coat yolk," provision being made in mess tin straps for the latter contingency. The "water-bottle" is slung on waist-belt, as before mentioned behind right hip, and the "magazine pouch" in front of waist-belt; and the soldier is then carrying from 150 to 200 rounds of ammunition, a water-proof sheet, great-coat, and a day's rations of food and water. The food and ammunition are disposed of as follows:—Preserved or cooked meat in "mess tin." Biscuit or bread in "magazine bag." One hundred or 150 rounds in "magazine bag," in inside and outside pockets; thirty-five in magazine-pouch in front, and ten in each of waterproof pockets in breast of soldier's tunic or jacket—the mouths of those pockets to be sown up in peace time, and open in war. The great-coat should have no cape or shoulder-straps, and should weigh from 4½ to 5lb., and be folded 13 inches wide, 10 high, and 3 inches deep. When it is carried on its own yolk on the shoulders, the back straps of the "magazine brace" are passed between coat and its straps, in front, when coat yolk hooks have been hooked on to iron rings of conjoined braces. The "mess tin" can be carried in six different places, either above or behind "magazine bags" No. 1 and 2, or above or below great-coat, on coat straps. The soldier can march with his waist-belt open. The magazine-pouch is then transferred to left side from centre of waist-belt. All accoutrements, kit, coat, &c., can be removed at once by unhooking waist-belt, and removing like an ordinary open waistcoat. The "magazine pouch" and water-bottle can be carried in the centre pocket of bags when not required for immediate use on waist-belt. When blanket, splints, trenching tools, &c., are required to be carried by accoutrements, the straps on "magazine bags" can be utilised for that purpose.

The soldier's field kit consists of one pair of boots, one pair of summer trousers, one cotton shirt, one pair of socks, one towel, one hold-all, complete, containing needle and thread, boot-laces, one set; knife, fork, spoon, razor and shaving-brush, one piece of soap, one hard brush. This kit is packed in No. 2 magazine-bag (or in No. 1 if necessary) thus:—The hold-all and one sock are placed inside one boot, and the soap, hard brush, and other sock inside the other boot, the "uppers" of which are then folded down, and the left boot is placed sole downwards with heel to right side of bag, and the right boot with heel to left side of bag, and "upper" facing towards back of bag. The trousers are then placed leg to leg, and rolled tight on themselves from above downwards to the knees; the rolled part is then packed between back of bag and boots, and the loose ends laid over the latter. The towel is then rolled up tight within shirt, 14 inches lengthwise, and placed at back of bag over the rolled part of trousers, leaving the remaining space for bread or biscuit ration, a pocket for which is buttoned to the side of each bag.

THE WAR IN THE EAST.

The Grand Duke Nicholas, the Russian Commander-in-Chief, issued on Saturday last the following War Proclamation to his Army:—"Our Christian brethren in Turkey have been groaning for centuries under the Ottoman yoke. Their slavery has been a terrible one. All that is dear to man, the sacred religion of Christ, honour, and the proceeds of toil—all have been desecrated and appropriated by the infidels. Unable to endure their sufferings any longer, our unfortunate brethren have risen against their tyrants, and Christian blood has been shed for two years running. Towns and villages have been destroyed; our brethren's property has been plundered, their wives and daughters have been dishonoured, and the population exterminated in more places than one. All the representations made by our august Sovereign and some foreign Governments, with a view to improve the condition of the Christian subjects, remain without result. The long-suffering patience of our Czar Liberator is exhausted. The fiat of the Czar has gone forth. The Czar has declared war against Turkey. Troops of the Army entrusted to my command, we have been chosen to carry out the will of the Czar and to fulfil the vow of our ancestors! Not to conquer, but to defend our down-trodden brethren and to vindicate the faith of Christ, do we go forth. Forward, then; ours is a holy work, and God is with us! I am convinced that from the general down to the rank and file every one of you will do his duty and add to the glory of the Russian name. May the Russian name be as terrible now as it was in the past! May the greatest efforts and deprivations have as little power to stay our march as the resolve and obstinacy of the enemy! The pacific portion of the inhabitants, whatever religion and race they may belong to, are inviolate, nor must their property be troubled by you. For everything you take a proper equivalent is to be given. No arbitrary transactions will be permitted. I shall expect the strictest order and discipline from you all. Order and discipline are our strength and honour alike. On crossing the frontier, we shall be entering Roumania, a country which has ever been friendly to us, and for the liberation of which much Russian blood has been shed. I am convinced we shall meet in Roumania with the hospitality formerly shown in those parts to our fathers and ancestors. I enjoin you to requite this hospitality by defending our Roumanian brethren, upholding their arrangements, assisting them against the Turks, and defending their houses as you would your own. This order is to be communicated to all the companies, sotnias, and batteries.—The Commander-in-Chief of the Active Army, Inspector-General of the Cavalry and Engineers, NICHOLAS.—Kischineff, April 25."

The Sublime Porte has issued a manifesto showing that Turkey is in no way responsible for the war. It recounts the events of the last two years, affirming that the risings in the Herzegovina, Bosnia, and Bulgaria were instigated by committees organized by Russia, and that it was at the direct invitation of that Power that Servia and Montenegro took up arms. The manifesto protests against Russia having declared war without taking account of Clause 8 of the Treaty of Paris, and on the pretext of protecting the Christian subjects of the Sultan, when the equality of all Ottomans has been proclaimed by the Constitution. Finally, it declares that Turkey is ready to fight to the death for her independence.

The following order has been issued by the Sultan to the Army:—"Russia having declared war, we are compelled to have recourse to arms. We have always desired peace and tranquillity, and have listened to the counsels of the Powers to that end; but Russia wishes to destroy the rights and the independence of our country. Russia attacks us, and God, the protector of right and justice, will give us victory. Our soldiers will defend the territory acquired by our ancestors at the price of their blood, and by God's help secure the honour and independence of the Osmanlis. The nation will take under its charge the wives and children of the soldiers. Should it be necessary, the Sultan, taking in hand the sacred banner of the Caliphate, will himself join the Army. The Sultan is ready to give his life for the honour and independence of the country."

The Berlin correspondent of the *Cologne Gazette* writes that in military circles at Berlin, Turkish commanders are considered to have shown a want of readiness and promptness of action contrasting unfavourably with the rapidity of movements on the other side. Much as Turkey is unquestionably favoured at the outset by circumstances, German military men apprehend that by her dilatoriness she may allow Russia to get the start. Russian officers are understood to be highly satisfied with the marching qualities manifested by their men.

The Czar has conferred the *jus gladii gratiandi* upon the Russian Commander-in-Chief, the Grand Duke Nicholas. The Grand Duke is thereby entitled to promote officers as high as the rank of lieutenant-general, and also to confer decorations on his own authority.

A telegram from Vienna announces that Russia has made the first payment of a million of roubles to Roumania for war services. The money was taken from the proceeds of the secularized estates of religious orders.

A despatch to the *Daily Telegraph*, from Pera, gives an account of Hobart Pacha's exploit in withdrawing the advice boat Rethymo from the Danube under fire. While lying at Rutschuck he received intelligence of the arrival of the Russians at Galatz, and was advised to abandon his vessel, but he determined rather to sink her. Night approaching, he made everything ready for running into the Black Sea, in opposition to all Russian hostile intentions, getting clear fires under the boilers of his craft, in order to avoid smoke from her funnel, and making other arrangements. The Rethymo, be it said, is a very fast boat, capable of steaming at the rate of fifteen knots an hour. When Hobart Pacha started on his daring expedition, the Danube current was running swiftly, being estimated at fully five knots an hour. Upon nearing Galatz he found that heavily armed Russian batteries commanded the river, looking capable of sinking anything afloat, besides the torpedoes reported to be hidden beneath the waters. Immediately it was dark, the word was passed "lights out," and the steamer sped rapidly along. The batteries were soon reached, and the Russian camp, the heavy guns, and the soldiers in great numbers were clearly visible to those who manned the saucy Rethymo, when suddenly a rocket was sent up from the Roumanian shore to apprise the Muscovite gunners of Hobart Pacha's coming. Other rockets followed in quick succession. Then the hoarse word of command was distinctly heard. Bugles sounded and the drums beat, summoning the Russians to their posts. Hobart Pacha expected every moment to be blown out of the water by the fire of the heavy guns he was treating so cavalierly, but being determined to make efforts in some degree proportionate to the great risk he was facing, he ran his vessel close in shore, not forty metres from the batteries themselves; indeed, so near that the Russian gunners were unable to compress their pieces sufficiently fast to get a good aim. His boat went quickly by at twenty knots an hour, and soon all danger was over. When satisfied that he had nothing to fear from his enemies, Hobart Pacha ordered the crew of the Rethymo, which carried one 40-pounder Armstrong gun, to throw one shell into the centre of the Russian camp, an order which was quickly obeyed, the missile bursting in the midst of the Muscovite tents. Its effects were, of course, unknown, but it was the first shot fired upon the Danube in the Russo-Turkish war. Hobart Pacha subsequently proceeded to Constantinople, where he received a hearty welcome and enthusiastic congratulations. Hobart Pacha reports the Russians in great force close to Galatz, making preparations apparently to cross the Danube and enter the Dobrudscha to move upon Varna. He also found that twelve small Russian gunboats had been brought by rail across Roumania, and were ready for launching in the river. He has formed an opinion that the depth of water is insufficient to enable gunboat operations against Galatz to be successfully carried out, but believes that if he were allowed to act he could prevent any crossing of the Russians.

It seems that the asserted destruction of Poti was a myth. The Russian statement is that the Turkish squadron passed that port without firing a shot.

The bombardment of Odessa is expected shortly, in consequence of the return of Hobart Pacha from his expedition up the Danube. It is almost deserted of inhabitants.

Torpedoes have been laid down in the Danube between Reni and Ibraila in large numbers.

On Thursday morning fire was opened between the Russian batteries near Ibraila and a Turkish monitor, which drew near to the shore, and is reported to have commenced to bombard the town, but withdrew before the Russian fire. Only a few Turkish shells have fell among the houses of Ibraila. No lives were lost, and the damage done was unimportant. The Russian batteries are said to have opened fire first upon the Turks, who returned it. Five bombs fell accidentally into Ibraila, two of which struck the residence of the prefect. There had been a slight loss of life, and one house had been destroyed.

The Porte has notified to the representatives of the Powers that it declared a blockade of the whole Russian coast of the Black Sea. A delay of three days would be granted to vessels wishing to enter, and of five days to those intending to leave the Black Sea.

The Russian advance in Roumania is comparatively slow. On the extreme left of their line, towards the coast of the Black Sea, the 36th Division has occupied Kilia and Ismail. Further up the Danube the 11th Russian Corps has occupied Galatz and Ibraila, and is said to be preparing a pontoon bridge for the passage of the river in this direction. Further westward the 9th Corps has for several days been moving in the direction of Bucharest by the road which leads from Jassy through Fokchani and Bueso. The two remaining corps, the 8th and the 12th, seem to be following the line of march of the 9th Corps in the direction of Bucharest. On the Asiatic frontier the Russian armies are reported as pushing forward more rapidly. Here there are in the field the 19th, 20th, 21st, 38th, 41st, and 59th Russian Divisions, acting as independent divisions. In this direction the Turkish Army consists of about 83,000 regular troops, besides the Militia, which should furnish an additional force of 25,000 men, and the Circassians and Kurds, who should supply a contingent of about 20,000 more. The regular troops under Ahmed Moukhtar Pacha have their head-quarters at Erzeroum, at which there was a few days ago a force of about 22,000 men, from whom the garrison of Batoum was furnished. At Kars there is a garrison of 28,000, while at Ardahan and the villages in its neighbourhood there were about 22,000 men, and at Bayazid about 5,000. The advance of the Army of the Caucasus appears to be made in three main columns, with subsidiary detachments between them. The latest telegrams confirm the capture of Bayazid by the left wing of the Russian Army advancing from the Caucasus. The works of the place were almost entirely dismantled some years ago, so it is not unnatural that the Turkish garrison, which consisted of only two battalions, fell back before the advance of the enemy and allowed the Russian troops, after the exchange of only a few shots, to occupy the ruined citadel and a few blockhouses, which seem to have been erected in haste as a hurried equivalent for the former fortifications. Still the Russian onset in this direction appears to have been more or less of a surprise, as the Turks retreated so hastily that they left a considerable quantity of munitions of war and twelve guns to fall into the hands of their adversaries.

The Mediterranean Squadron, under the command of Vice Admiral Hornby, consisting of the ironclads Alexandra, Monarch, Swiftsure, Devastation, and Hotspur, left Malta for Corfu on Saturday, where, it is understood, they will remain until to-day, and on being reinforced by the Raleigh, now at Salonica, will proceed eastward to the Piræus to await orders. The Rupert, now undergoing repairs at Malta, will join the squadron.

Col. W. G. Horton died at Embsway Kirk, Yorkshire, on the 1st inst., aged 85 years. The deceased served in Spain and in the South of France in the early part of this century, and was in the following actions—viz., the Nivelle, Nive, Orthes (wounded), Toulouse, Cambo, St. Pierre, Urt, Garris, Hellete, Arriveute, St. Palais, and Aire, for which he received the war medal and four clasps. Served the Waterloo campaign in Gen. Adams' Light Brigade, and was with the army of occupation until it was broken up. Afterwards served with the 81st Regt. in Nova Scotia, and then in command of the 15th Regt. in Canada. He entered the Army Feb. 22, 1810, as ensign in the 34th Foot; was promoted lieut. in the 4th Garrison Batn., July 25, 1811; exchanged to the 71st Foot, Jan. 23, 1812; was promoted to a company in the 81st Foot, Oct. 5, 1820; became brevet major, Aug. 17, 1821; major, 81st Foot, Oct. 22, 1825; lieut.-col. unattached, Aug. 1, 1826; exchanged to 15th Foot, April 8, 1834; exchanged to half pay July 13, 1838; became col., Nov. 23, 1841; and retired by sale of his commission, Sept. 3, 1847.

PARLIAMENT.

Hobart Pacha.

On Monday Capt. Pim asked the First Lord of the Admiralty whether, as Hobart Pacha is a retired officer of the Navy, and cannot again be employed, and as retired pay has been earned for past services in the Navy, and cannot be legally withheld from any naval or Marine officer when once placed on the Retired List, even if in the service of a foreign Government, as laid down by the law officers of the late Government, Sir John Coleridge and Sir George Jessell, he will be good enough to inform the House by what right or power Hobart Pacha, or any other officer, being no longer subject to the Naval Discipline Act, can be interfered with by the Admiralty; and whether he has any objection to lay on the table of the House the copy of such opinion, as well as the letter sent by the Admiralty to the Accountant-General of the Navy, dated Feb. 13, 1873, in continuation of the Parliamentary paper of March 17, 1876—"Navy officers holding civil appointments."

Mr. A. Egerton repled:—In the unavoidable absence of my right hon. friend, perhaps the hon. member will allow me to answer this question. I have first to say that, in my opinion, the question is somewhat irregular, being of an argumentative nature; but without entering into any argument, it is sufficient to state that the Admiralty can recall into active service in case of war or emergency any officer on the Retired or Half-Pay List, and has also power to remove from the list of the Royal Navy any officer whatever on full, half pay, or the Retired List, and this without reason assigned. The opinion of the law officers of the Crown to which the hon. member refers is immaterial to the question, and it could not, without breaking an invariable rule, be laid on the table of the House. (Hear, hear.)

Retired Officers in the Navy.

On Thursday Capt. Pim asked the First Lord of the Admiralty if he would state on what authority officers on the Retired List can be called on for active service, and in what respect they differ from officers on the Reserve List, or on half pay, in their liability for active service; whether the liability of retired officers to be called on for active service is regulated by Order in Council or by the statute law; and if he would inform the House the authority by which the Admiralty has power to remove from the List of the Royal Navy any officer whatever, whether on full pay, half pay, or on the Retired List, and this without reason assigned.

Mr. A. Egerton.—Officers on the Reserved or Retired List can be called upon for active service by Order in Council, according to the Queen's Regulations, cap. 7, sec. 3, art. 1. The power of the Admiralty to remove the names of officers from the List of the Royal Navy rests on immemorial usage, and is an exercise of the prerogative of the Crown.

Commission of Surgeons in the Army.

Mr. Mitchell Henry asked the Secretary of State for War last night if he would state why the commissions of the gentlemen who were gazetted as surgeons under the Royal Warrant of April 28, 1877, were not antedated, as was heretofore the case; and, in the event of their not being antedated, would the time spent at the Army Medical School, Netley, count towards promotion for those who might be continued in the department after ten years?

Mr. Hardy, who was but indistinctly heard, was understood to say that prior to 1876, when the short service system came into force, it had been customary to allow the term at Netley Hospital to count as service, but that now it was the custom to count the period from the time they left the hospital. He did not think it was desirable to make any distinction between men who had left at the end of ten years' service and those who had not.

Monthly Returns of the British Army.

Sir Alexander Gordon asked the Secretary of State for War whether he would lay upon the table of the House, for the use of members in the library, a copy of the "General Monthly Return of the British Army," which was printed every month at the War Office for the use of Government.

Mr. Hardy said the return in question had always been considered a departmental document. There appeared, however, to be nothing of a secret character in it, and although he would not lay it upon the table of the House, and thus necessitate its being printed for distribution to members, he would give directions that it should be put in the library.

INDIA.

The recovery of Lieut.-Gen. Sir Neville Chamberlain from the effects of his recent severe illness being less rapid than the doctors expected, his Excellency had been urged to proceed at once to the hills, and was to have left Madras for Ootacamund on the 14th ult. It was arranged he should be accompanied by the Adjt.-Gen., the Qrmr.-Gen., and the rest of the head-quarters Staff.

Major-Gen. J. M. Primrose, C.S.I., accompanied by Mrs. Primrose and two Misses Primrose, arrived at Poona from England on April 3, and assumed his command of the division in relief of Lieut.-Gen. Lord Mark Kerr, C.B. Gen. Primrose, after a short stay, was to proceed to Mahableshwur, and will remain there during the hot season and return to Poona at the commencement of the monsoon.

A correspondent, writing from Rawul Pindee, says:—"Brigdr.-Gen. Sir C. Brownlow retires from command of this brigade at the end of April. Report says we are to have Brigdr.-Gen. Macpherson, and every one hopes we may be so blessed; but he himself, I hear, knows nothing of it."

Lieut.-Col. T. Dyer, Madras S.C., has taken up the Assist.-Adjt.-Generalship of the Mysore Division of the Madras Army, which has been vacated by Lieut.-Col. G. A. Arbuthnot, Madras Cavalry. Lieut.-Col. D. Standen, Madras S.C., whose appointment we announced a fortnight since, has relieved Col. Dyer in Burmah.

Col. J. P. Watts, Madras S.C., Officiating Commissary-General, Madras, leaves India this month, and will probably not return, as he becomes entitled to colonel's allowances in March, 1879. He entered the Army Commissariat Department twenty-seven years ago.

The following officers have retired from the Service on special annuities, with effect from April:—viz., Cols. A. T. Etheridge, C.S.I.; T. S. Hewatt and W. Rice, Bombay S.C.; J. N. Maclean, T. C. Langcroft, and R. Ranken, Madras S.C.; and Lieut.-Cols. W. H. Mason, R. Johnstone, R. F. Williams, and F. T. Cornewall, Bombay S.C.; and E. A. Mottet, W. R. Mesham, S. New, and C. H. Beddek, Madras S.C.

ROYAL CAMBRIDGE ASYLUM FOR SOLDIERS WIDOWS, KINGSTON, SURREY.

OFFICE: 40, Charing Cross, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army.

There are 57 widows in the Asylum.

Each widow has a furnished room, and receives six shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £556, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £2,100 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

A regiment can purchase a vote in perpetuity by paying five guineas. J. A. STEWART, Colonel, Secretary.

Office, 40, Charing Cross, S.W.

BUTLER'S MILITARY BAND INSTRUMENTS are all guaranteed first-class, both as to Tone and Workmanship, at prices much under those usually charged.
Manufactory—29, HAYMARKET, LONDON,
And at ELLIS'S QUAY, DUBLIN.

MEAT FARINA.—The "CANTEEN" FOOD

The most nutritious food ever prepared. It is equal to four times its weight of fresh meat, bread, and vegetables, and far superior in nutritive value to salt meat and biscuit. It contains, according to the greatest scientific authorities, the highest possible proportion of heat-producing, flesh, muscle, and bone forming matters.

It occupies less space, and is more portable than any other food.

Half pound will make a most nutritious soup for Nine people in a few minutes at a cost of about one penny per head. It is easily made into "duffs," savoury puddings, &c.

Half pound to 3lb. 1s. 6d. per lb.
Special arrangements on advantageous terms to Canteens.
SOLE MANUFACTURERS—
W. MILLER & Co., 9, ADAM STREET, STRAND, LONDON.

WILKINSON AND KIDD,

SADDLERS AND HARNESS MAKERS
To Her Majesty and H.R.H. the Prince of Wales,
5, HANOVER SQUARE,
REGENT STREET, LONDON, W.
(*Removed from Oxford Street.*)
ESTABLISHED 1786.

SPECIAL NOTICE.

TO THE NOBILITY AND GENTRY.

WM. PUGH (many years coat cutter at Messrs. Poole's, Saville-row), having succeeded to the old-established first-class business of Jackson and Co., 5, CORK STREET, BOND STREET, W., solicits the patronage of the nobility and gentry.

Best trade only at fixed fair prices, and 10 per cent. allowed for prompt cash.

N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready money entitles them to.

WM. PUGH (from Poole's), 5, CORK STREET, BOND STREET, W.

SCHWEITZER'S COCOATINA

Anti-Dyspeptic Cocoa or Chocolate Powder

Guaranteed Pure Soluble Cocoa, Without Sugar, Spice or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "The most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and Children.

Highly commended by the entire Medical Press.

In air-tight canisters at 1s. 6d., 3s., &c., by Chemists and Grocers.

MR. R. WILLSON,

ARMY, FINANCE, AND COMMISSION AGENT,
3, CRAVEN STREET, CHARING CROSS, LONDON, W.C.
(From 33, St. James's Square, S.W.)
EXCHANGES STILL ARRANGED,
And every description of
ARMY, FINANCE, and COMMISSION AGENCY transacted.

BRAND and CO.'S SOUPS,

WALKER'S CRYSTAL CASE WATCHES
PRIZE MEDAL, 1862.
The above are the only Watches suitable for a Campaign,
JOHN WALKER, 68, CORNHILL, E.C.; & 230, REGENT STREET, W

TARRY AND CO., WINE MERCHANTS.

CONTRACTORS TO THE ARMY, NAVY, AND HER MAJESTY'S GOVERNMENT
22½, BUCKINGHAM STREET, STRAND, LONDON, W.C.

United Service Sherry 21s. per doz.	Amontillado 32s. per doz.
Golden Sherry 30s. " "	United Service Port 24s. " "

The above Wines are constantly supplied to HER MAJESTY'S GOVERNMENT, REGIMENTAL MESSES, and to OFFICERS OF THE HIGHEST RANK in both Services.

NOTICES TO CORRESPONDENTS.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

Letters cannot be received in answer to Advertisements.

Remittances should be made payable to Mr. RICHARD JAMES WOOD, to whom all business communications should be addressed.

SIGNALS, Aldershot.—We have looked over your code, and returned it with thanks. It resembles in many points that in use in Germany, but it appears to be somewhat simpler.

R. J. S., St. Vincent.—Probably next week, present moment being rather inopportune for hostile criticism. The other side will then have an early opportunity of replying.

FULL-BLOWN LUFF.—Very much too personal, and as you are not to be found on the list of the Navy or on the members' list of the Service Club from which you write, we doubt whether your views can be accepted as representing those of naval men.

YEOMANRY.—Many thanks; we shall always be pleased to hear.

W. E., EDINBURGH.—There is something in your theory, but if you take into consideration the weight of armour-plating, you will recognise the difficulty of bolting it to your basket work

TRUTH AND JUSTICE.—Much obliged for the care and trouble you have taken. Under existing circumstances, it is as well to keep it in reserve.

H. P.—He ran the blockade seven times at least.

R. N. A. V.—Always glad to receive reports of progress.

Army & Navy Gazette.

LONDON, SATURDAY, MAY 5, 1877.

The Duc Decazes has pronounced the policy of the French Government to be one of absolute neutrality, and has declared that France is on the best terms with all her neighbours. We are inclined to doubt this latter assertion after what fell from Field-Marshal Von Moltke the other day in the Reichstag. It is evident that the relations between France and Germany are, to say the least of it, delicate. Although the French papers protest that the Chief of the German Staff has greatly exaggerated the amount of the forces lying between Paris and the German frontier, the compensatory measures spoken about have already been commenced, and reinforcements are moving into Alsace-Lorraine. Our French contemporaries declare that the formidable masses conjured up by M. de Moltke simply consist of the 6th Army Corps, commanded by General Douai, and the 7th Army Corps, commanded by the Duc d'Aumale, or fourteen regiments of Infantry, five battalions of Chasseurs, four regiments of Artillery, and fourteen regiments of Cavalry disseminated over eight departments. It is probable that the Chief of the German Staff has taken into consideration not only the two army corps above mentioned, but the Army of Paris, perhaps the Army of Lyons, the independent Cavalry divisions at Chalons, and, in fact, all the troops which are within striking distance of the frontier, and which are brigaded. A letter from Berlin, addressed to a Paris journal, says that M. de Molkte, having obtained his 105 Captains, will next ask for 105 extra companies for these officers to command, and he points out to all the danger for France and Germany of keeping large bodies of troops in close proximity. We find in a French review an article on the French Army, from which we extract the following observations:—"France cannot attack Germany, but, if attacked, she is quite strong enough to defend herself. Germany has nothing to fear from France, but, if she attempts another invasion, she will have a tough job. Although there is still much to be done, France, since 1871, has accomplished a colossal work in the way of Army reform. To-day, France can dispose of the following fighting force:—Field Army, 455,000 men; camps and garrisons, 210,000; troops not concentrated, 325,000; men incorporated at depôts, 310,000; total of Active Army, 1,300,000; Foresters and Custom House men, 25,000; Territorial Army, 500,000; total, 1,825,000 men. Half of this force could be ready to take the field in three weeks, and the reserve of the Territorial Army, not yet organized, is omitted. In 1870 France was only able to concentrate 250,000 men, while the reserves and the garrisons did not reach, at first, 200,000 men. The position is, therefore, not the same, and money, work, and time have converted the French Army into a most powerful machine. But would it be possible to attack Germany? When the Germans seized upon Alsace-Lorraine, and raised additional fortifications at Metz, Strasburg, &c., they placed France in the impossibility of undertaking an offensive campaign, and they accomplished a work of great military wisdom. It cannot be admitted that an army should advance into an enemy's country without immediately investing the strong places situated on its route, when those places dispose of large garrisons. Then, with the enormous masses of men which modern warfare sets in motion, the invader cannot advance without having at his disposal one or more lines of railroad for the transport of his provisions. Now, the German places between France and the Rhine will necessarily have very large garrisons, and it would be indispensable to invest them. Such an investment would occupy a force of about 400,000 men. Then the loss of Metz and the other forts signifies the total stoppage of the railways which traverse those places. Consequently, supposing France in a position to tell off 400,000 men to reduce the obstacles lateral to her road; supposing she had men enough to besiege several first-class places, and simultaneously to beat the German armies in the field, until she had taken one or two fortresses she would have to struggle against immense difficulties in the way of transport. Neither strategically nor materially can France hope to carve a way into Germany. She could only do so after having inflicted on a German army invading France some decisive blows. The material obstacles in the way of an offensive war are not less important or less real. According to the new Constitution, war can only be declared with the consent of the two Chambers. It is difficult to suppose any circumstances under which the two Chambers would vote a voluntary attack upon Germany. But if France cannot dream of attacking Germany, she is certainly in a position to defend herself. The Germans penetrating into France would encounter the same difficulties as the French penetrating into Germany. France at home would have every man in hand. She has fortresses and entrenched camps ready to shelter her armies, and to supply them, and her financial resources are such that she could carry on war for an indefinite period." Such is the substance of the writer's remarks.

A French correspondent, writing from Odessa, after alluding to the defences executed at that place, at Ovidiopol, and Ackerman, gives some particulars about the Admiral Popoff, which terrible ship is destined to remain off Odessa, while the Novgorod remains at the mouth of the Dnieper, where it is supposed that the Turks will try and do a stroke of business. The Russians, however, seem to have fortified all the most important points of their littoral with great care, the works at Perekof have been repaired, and Sebastopol has been rendered impregnable. Along the south-east coast of the Crimea, where there are numerous villas, owing to the mildness of the climate, it is thought that the Moslems will effect a landing, and it would astonish no one to learn that the Imperial villa of Yalta and other habitations had become the prey of the Infidel. The Russian engineers, aided by the French engineer, M. Menneton, have for some years been engaged in fortifying Kertch, and rendering all access to the Sea of Azof impossible. A regular crop of torpedoes appears to have been sown along the coast, but it seems that the Turks are quite equal to the task of fishing them up. From the Straits of Kertch to the Asiatic frontier of Turkey there are twenty-five forts, and we learn that Poti, which has already been attacked, though it has already cost the Russian Government 10,000,000 of roubles, cannot admit large vessels. This is why the Muscovites have such sinister designs against Batoum, which, in spite of certain promises, they will most assuredly retain—in the event of being able to bring the present war to a satisfactory conclusion—for themselves.

It has been overlooked in the various remarks and criticisms on Field-Marshal Von Moltke's speech that the Prussian Army of 1877 gave a quiet admission of an increase of 145 officers over the number in 1876, so that the augmentation of 122 Captains, now proposed, raises the excess of officers over the number for that year to no less than 267; and when we consider the large commands assigned to individual officers in proportion with those obtaining in other commands, it strikes one that there is something more than meets the eye in this later addition.

The Grand Duke Nicholas is forty-six years of age, in the full vigour of life, a strongly-made, muscular, soldierly-looking man, with a melancholy Romanoff face. He is General of Engineers and Aide-de-Camp General to the Emperor, Inspector-General of the Engineer Corps, of the Imperial Guard, and of the Cavalry, Commander-in-Chief of the Military District of St. Petersburg, President of the Supreme Committee on the Organization and Instruction of the Army, Chief of a Grenadier regiment, of the regiments of Dragoons of Astrakhan, of the Alexander Hussars, and of the 1st Battalion of Sappers of the Caucasus, Proprietor (Colonel-in-Chief) of the Austrian Hussars, No. 2, and Chief of the 5th Regiment of Prussian Cuirassiers. His Adjoint in charge of the Engineers is General de Totleben. The Chief of his Staff in the command of the St. Petersburg District is Lieutenant-General Schouvaloff; Chief of Artillery, Prince Massalsky.

It was very "bonnie" for Colonel Ross to make a heart-stirring appeal to his gallant Militiamen, and their outburst of martial ardour in reply to it must have been a pretty thing to have seen—and a touching. But was it sensible? Was it "military"? It is not quite the thing for Militia Colonels to make inflammatory addresses to their regiments in peace time, and to deliver political addresses. Just imagine the results of such a practice all over the country at a time that the Government has ordered a strong declaration of neutrality, and when we are assured that the best policy for England is to keep as quiet as possible. Militia regiments are under strict discipline, and the "volunteer" display called for by Colonel Ross, however well meant, was out of place. If with Militia, why not with Regulars?

Why are promotions and retirements in the Royal Artillery delayed until, after the lapse of some months, a whole batch can be put in the *Gazette* at the same time? Officers and clerks sitting in their offices in London may not think that it is a matter of any consequence whether a step comes out a few months earlier or later, but to those who are doing regimental duty it may make all the difference, to say nothing of any small loss of pay, an officer may lose a number of places on the lists of field officers or of inferior grades, and he cannot tell where he may be posted on promotion, as with a batch of steps he is more or less at the mercy of the authorities, who have the opportunity of filling the vacancies as they like. Steps have not of late fallen in so rapidly as to cause any embarrassment; on the contrary, promotion in the Royal Artillery has been pretty nearly at a dead-lock this last year, and any single step is most welcome.

There are many candidates in the field for the post of Military *Attaché* to the British Embassy at Berlin. There is at present no "rule" laid down by the authorities here as to the rank of the officer who holds these posts. The Military *Attaché* at St. Petersburg, for instance, is only a Captain in the Guards; but, then, he bears the name of Wellesley, and, at least for the old generation of Russians, that would be a strong recommendation. Nevertheless, the rank held by Captain Wellesley has been made to tell against him, if we are rightly informed, for he was not included in the invitations to join the Head-quarters Staff which were sent to the Austrian and German Military *Attachés*, and when the omission was pointed out it was answered that these officers were Aides-de-Camp to their respective Sovereigns, and were entitled, in respect to that rank, to the privilege which was not extended to the British Captain. We hear that another Captain is likely to succeed Major-General Walker at Berlin; and, if he were not so low in the military hierarchy, no better selection could be made than Captain Villiers, now on the Staff of the Governor-General of India. He is brother-in-law of Lord Odo Russell, *persona gratissima* to the Court of Berlin, and brother of a lady who is universally liked in Prussian society; but if the late occupant of the post, who was regarded as a personal friend and comrade in arms by the Crown Prince, and was treated with the utmost kindness and goodwill by the Emperor, found that the rank of Colonel which he had when he was with the Head-quarters Staff of the German Army during the war did not secure him an adequate consideration in the Army, and was anxious for a step of brevet rank, to entitle him to greater weight, there seems to be ground for thinking that mere social and personal qualifications do not compensate for the absence of Army rank in the estimation of Prussian officers. It is said that Major Frank Russell is among those named, but his one step of rank does not place him so far above Captain Villiers as to make up for the absence of the peculiar qualifications possessed by the former for a post of the sort in Berlin; although he is a pushing, active officer, anxious for work and for distinction, and has just returned from "a tour of inspection" of the European seat of war and of the situation, and has given abundant proofs of his fitness for special employ, and of his desire to obtain it. Colonel Fielding is also included by outsiders among the candidates. Whoever is appointed will find just now more thorns than roses in his path if he desires to guide his steps in the way of knowledge and get behind the scenes; and if there be, indeed, any competition for the post, the prize will be a Dead Sea Apple. There is no use in mentioning other names; but, if the authorities wish to extract the least utility from the *Attaché* at Berlin, they must let him have proper Army rank.

Colonel Martin furnishes us with a sketch of Nedjib Pacha, now forty-five years of age, who was head of Abdul Kerim's Staff during the war with Servia, and who is certainly destined to play an important part in the affairs of his country. Nedjib Pacha has the look and manners of a polished European officer, and, in fact, he was educated at the military school at Brussels, which has turned out several celebrities, and afterwards spent some years in France, England, and Italy. On his return to Constantinople he married a French lady. Nedjib Pacha is exceedingly liberal in his views, and Colonel Martin calls him a Voltarian in a fez; he is gifted with an amount of vivacity and activity not usual in a Turk. During the war in Herzegovina he was charged with the task of reinforcing Dervish Pacha, under which General he afterwards commanded an independent brigade with great distinction. Returning to the capital, Nedjib Pacha rejoined the party which considered it absolutely necessary to replace Abdul Aziz, and on the advent of Murad he was named Ferkir, or General of Division, and with the assistance of four Staff officers and two Captains of Infantry he directed the operations of the Army during the Servian campaign. Colonel Martin found a great many highly-educated officers in Turkey, and Generals who could speak several languages.

The following promotions take place in the Army, consequent upon the death of Major-General F. E. Voyle, Bengal Staff Corps, viz.:—Colonel Hon. A. G. C. Chichester, commanding the Brigade Depôt at Beverley, to be Major-General; Major J. Hudson, 84th Regiment, to be Lieutenant-Colonel; and Captain the Hon. J. D. Drummond, 6th Dragoon Guards, to be Major in the Army.

Colonel F. W. C. Ord, Royal Artillery, has been appointed to the command at Sheerness.

Captain H. H. Goodeve, R.A., has entered upon his duties as Brigade-Major of the School of Gunnery, Shoeburyness, vice Major H. L. Mitchell, who has held the appointment since July 15, 1872, Captain A. H. N. Pearse having relieved him in the Adjutancy.

The reliefs for the season 1877-78 may now be said to be finally arranged. The regiments proceeding out to India are the 6th Dragoon Guards, H. I, K, L, M, N, and O Batteries, 5th Brigade Royal Artillery (the batteries which lately formed the 24th Brigade), the 2nd Battalion 2nd Foot, 2nd Battalion 8th Foot, 2nd Battalion 13th Foot, and 100th Foot. These will relieve the 11th Hussars, A, B, C, D, E, F, and G Batteries, 5th Brigade Royal Artillery (lately forming the 19th Brigade), the 2nd Battalion 12th Foot, 45th Foot, 56th Foot, and 109th Foot, which return to England. There will also be some colonial reliefs, for it has been arranged that the 87th Fusiliers shall be brought home from Nova Scotia. With this view, the 1st Battalion 19th will probably embark for Gibraltar to relieve the 69th, expecting final orders for Malta, to replace the 71st, which will doubtless be sent to the West Indies to complete its foreign tour.

The statement of the leading journal, that it is in contemplation to bring home some batteries of C Brigade Royal Horse Artillery (late F Brigade) next winter from India, is, we are requested to state, without foundation.

Captain F. T. Lloyd, Royal Artillery, has been appointed a Captain-Instructor at the School of Gunnery, Shoeburyness, vice Major S. J. Nicholson, R.A., whose five years' service have expired. Captain Lloyd entered the Royal Artillery October 1, 1857; became Captain, May 28, 1870; and has been Adjutant of the 8th Brigade since October 18, 1871.

We regret to learn that the health of Assistant Commissary-General A. D. Burnaby broke down lately at Bermuda, to which station he was last year appointed to the ordnance charge, and that he has been invalided to England.

Surgeon-Major Oliver, whose Magazine Equipment has met with the unanimous approval of the Staff at Head-quarters, has been ordered over from Ireland to superintend the manufacture of a number of sets of his accoutrements, which are to be issued for trial to the Cavalry, Artillery, Infantry, and Army Hospital Corps.

The Navy.

GAZETTE.

Admiralty, April 30, 1877.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Staff-Capt. William Furze Hains has this day been placed on the Retired List, with permission to assume the rank and title of Retired Captain.

May 2, 1877.

Navigating Sub-Lieut. F. J. Atkinson has been promoted to the rank of Navigating Lieut. in H.M.'s Fleet, with seniority of the 24th ult.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Lieut. W. Pigot has been this day placed on the Retired List of his rank.

APPOINTMENTS.

Staff-Commander—John E. Knight, to the Revenge.

Lieutenant—Somerset A. Hungerford, to the Orontes.

Fleet-Surgeon—Thomas J. Breen, to the Eagle, drill-ship for the Royal Naval Reserve at Liverpool.

Staff Surgeons—Thomas G. Wilson, late of the Triumph, to the Unicorn, drill-ship for the Royal Naval Reserve at Dundee; Edward B. Broster, to the Impregnable, training-ship at Devonport.

Surgeon—Richard P. Griffiths, to the Minotaur.

Chief Engineer—James Bannerman, from the Gorgon to the Orontes, troopship, on particular service; Daniel Cartmel, to the Indus, additional.

Engineers—John C. Thompson and Edward H. Willey, to the Active.

Aboukir, Commodore Algernon Lyons, A.D.C. A most extraordinary composition appears in a little publication called *Gall's News Letter*, published in Jamaica, which if it be really written by the Rev. Lorenzo Shepperd, chaplain of the flagship, proves that he is more suited to the post of comic writer to a light periodical than to the cure of souls at Jamaica. It is one of the most curious and least commendable productions we have ever read from the pen of a clergyman; but in saying this we have no desire to enter into the merits of the controversy which has been raging about the conduct and manners of Sir William Grey.

Active, Capt. C. R. F. Boxer, will, it is hoped, be out of the hands of Portsmouth yard very shortly, and will then be able to put to sea in another week.

Agincourt will be ready for commission as soon as she has shipped the new carriages for her improved armament.

Antelope, Lieut.-Com. E. Wingfield, left Malta on April 27 for Constantinople, to be at the disposal of the Ambassador.

Asia, Capt. C. L. Waddilove. Rear-Admiral Sir L. McClintock struck his flag on board on April 30, and relinquished the post of Admiral-Superintendent. Rear-Admiral Hon. F. A. C. Foley hoisted his flag and assumed the duties of Admiral-Superintendent.

Audacious, Capt. P. H. Colomb, flagship of Vice-Admiral Ryder, was at Hong Kong up to March 15. He was leaving that day in the Audacious, with the Vigilant, for Nagasaki.

Bittern, Com. G. J. Anstruther, is at Malta refitting.

Black Prince, Capt. T. B. Lethbridge, has been taken into dock at Devenport.

Boxer, Com. A. H. Alington, left St. Vincent, Cape de Verde, on April 17, for the West Coast of Africa.

Bullfinch, Com. R. M. Lloyd, was sent on April 7 to Port Limon de Costa Rica and Colon from Port Royal.

Charybdis, Capt. T. E. Smith, has been ordered to be at Hong Kong by May 6, to meet the Tamar with her fresh crew on board.

Danae, Capt. J. C. Purvis, arrived at St. Vincent, Cape de Verde, on April 16, and would leave on April 21 for Sierra Leone.

Defence, Capt. R. P. Cator, has been docked at Devonport to have bottom cleaned and coated and valves examined.

Emerald, screw-corvette, was taken outside Plymouth Breakwater on Tuesday for a contractor's preliminary trial of her machinery, which proved very satisfactory. At the three hours' trial with 60lbs. pressure of steam on the boilers and 27 inches vacuum, the engines made 98 revolutions per minute, indicating 2,580-horse power, being 480 above the power stipulated. On the mile trial she made a mean speed of 13·5 knots per mile.

Euphrates, Capt. W. H. Cuming, left Port Said on the afternoon of the 28th inst.

Eurydice, Capt. Marcus A. S. Hare, was undocked at Portsmouth on the 27th ult., and will be ready for sea about 15th May. Her cruising has been arranged as follows:—Summer.—Portsmouth, Lisbon, Madeira, Queenstown, West Coast of Ireland and Scotland, visiting Lough Swilly, Stornoway, Lerwick, &c., returning along the East Coast of Scotland and England, visiting Leith, Yarmouth, the Downs, &c., finally arriving at Portsmouth about the middle of September. Winter.—Portsmouth to Lisbon, Canaries, and Barbadoes. The Eurydice is to cruise among the Windward Islands, visiting St. Vincent, St. Lucia, Grenada, Tobago, Trinidad, Antigua, St. Kitts, &c., finally leaving for Bermuda about the middle of February, and arriving there early in March, remain four or five days, and then proceed to Portsmouth, arriving about April 4.

Flamingo, new composite gunvessel, was taken outside Plymouth Breakwater for a trial of her machinery at the measured mile on Wednesday. The trial was satisfactory, nearly 10½ knots having been attained. Another trial will be necessary, as sufficient steam was not generated.

Forward, 4-gun composite gunboat, recently launched at Barrow, has undergone a trial of her machinery at Devonport at full boiler power. Speed of 9·927 knots was obtained, the engines indicating 452-horse power. The pressure of steam in the boilers was maintained at 59lbs. per square inch; the mean pressure in the high pressure cylinder, 32·73lbs.; in the low pressure cylinder, 12·76 lbs.; vacuum in condenser, 26 inches; and revolutions, 115 per minute. At half-boiler power the mean pressures were 21·5 and 8·07; vacuum in condenser, 26½ inches; revolutions, 90·2; indicated horse-power, 228; speed, 8·286 knots. A trial as to handiness in stopping and starting was made, and the auxiliary engines were also tried and found to work satisfactorily.

Fox, 2, Staff-Com. J. G. Dathan, arrived at Devonport on Tuesday from Queenstown.

Foxhound, 4-gun composite gunboat, has had a satisfactory machinery trial at Devonport. On the full-power runs steam was maintained at 59lbs.; vacuum in condenser at 26 inches; mean pressure in high-pressure cylinder, 33·48; in low pressure, 12·19; revolutions, 120; indicated horse-power, 465; and speed, 10·096 knots. During the half-boiler power trials the mean pressures in the cylinders 23·32 and 8·15lbs., vacuum in condenser, 26½ inches; revolutions, 99·1 per minute; indicated horse-power, 262; and speed, 8·702 knots. The engines are 60-horse power nominal, to indicate, by contract, 360-horse power, and are the same in every respect as those fitted in the Cygnet, Express, and Contest by the same makers. During the whole of these trials the machinery worked in a very satisfactory manner, 92-horse power over the contract having been obtained in the case of the Forward, and 105 in the case of the Foxhound. The supply of steam was abundant.

Gorgon, turret ship, is now fit for service, extra fittings to the amount of £1,000 having been lately placed on board.

Hart, Com. Hon. H. N. Hood, has been ordered to be at Hong Kong by May 6, to meet the Tamar with her fresh crew on board.

Hercules, Capt. Bowden-Smith, late flagship of Admiral the Hon. Sir J. Drummond, K.C.B., Commander-in-Chief of the Mediterranean, was paid off at Portsmouth on Monday, the men being granted an extra week's leave before joining the flagship. She was paid off all standing.

Himalaya, Capt. E. White. The following is given as probable dates of arrival and departure:—Arrive at Simon's Bay on May 1, leave on May 10; arrive at St. Helena on May 18, leave on May 18; arrive at St. Vincent on May 28, leave on May 30; arriving at Portsmouth on June 12. If passing Ascension during the day, the Himalaya will call for a period of four hours. Letters posted in London on May 9 for St. Vincent will be obtained on arrival at that port.

Modeste, Capt. A. Buller, C.B., has been ordered to be at Hong Kong by May 6, to meet the Tamar with her fresh crew on board.

Myrmidon, Com. the Hon. R. Hare, will be ready to pay off at Sheerness on Thursday, May 10.

Narcissus, Capt. Lord Charles Scott, flagship of Rear-Admiral Lambert, C.B., was at St. Vincent, Cape de Verde, up to April 19. The squadron left Ascension on April 1, and reached St. Vincent on the 15th. The squadron would leave on April 19 for Devonport. The ships are due on May 17.

Nassau, Com. R. H. Napier, has been ordered to be at Hong Kong by May 6, to meet the Tamar with her fresh crew on board.

Opal, Capt. F. C. B. Robinson, has arrived at San Francisco.

Orontes, Capt. E. H. Seymour, arrived at Portsmouth on Saturday.

Osprey, Com. the Hon. Henry Holmes A'Court, made a satisfactory trial of her machinery at Sheerness on the 27th ult., and returned into harbour.

Pallas, Capt. H. H. Beamish, has been ordered from Smyrna, to relieve the Raleigh at Salonica.

Pearl, Capt. L. Brine, was to leave Rio Janeiro on March 31, and may be expected at Spithead on May 20.

Penelope is ordered to be out of the hands of Chatham yard in June, when she will hoist the flag of Rear-Admiral Phillimore as Superintendent of Reserves.

Plover, Com. H. B. Stewart, was sent to Belize on March 25 from Port Royal.

Raleigh, Capt. G. Tryon, C.B., will join the fleet at Suda Bay.

Rapid, Com. E. C. Drummond, has been ordered to leave Constantinople on the arrival of the Antelope there.

Repulse, Acting-Capt. F. Vander Meulen, having left Valparaiso on Feb. 15, arrived at Rio de Janeiro on April 3, and would leave about April 8 for Spithead.

Resistance, Capt. C. W. Hope, was put out of dock at Devonport on Saturday, having had the annual survey of bottom, and the bottom coated. She will, it is said, be paid off at Devonport shortly, and recommissioned for Coastguard service.

Royal Adelaide, Capt. J. O. Hopkins. Admiral Sir T. Symonds, K.C.B., commander-in-chief at Devonport, returned from leave on Saturday evening, and his flag was rehoisted on board the Royal Adelaide, that of Rear-Admiral Willes, C.B., Superintendent of the dockyard, being hauled down and rehoisted at the mizen of the Indus.

Rupert, Capt. H. J. Grubbe, C.B., is undergoing repairs to her machinery, and will not be ready to leave Malta for some time.

Salamis, Com. F. W. Egerton, left Devonport yesterday for the Mediterranean, as additional despatch-vessel to the squadron. She takes out supernumeraries.

Seagull, Com. Maxwell Heron, was at Bathurst on April 10. A private letter states that "every precaution has been taken to keep the crew of the Seagull from the sun and preserve them in good health, and this has been so far successful that there are none on the sick list. I greatly attribute the good health of the ship's company and officers to the fact of their being carefully kept from the sun as much as possible, the men wearing straw hats, and the officers a light helmet of wicker work covered with a material of greyish colour, said to be a waterproof, though when dry looking porous like fine homespun, with a white puggaree around. In these hot climates the comfort of a hat of this description over the uniform, cap and cap-cover, which is worse than useless, is incalculable. It would be a good thing for the Navy if such a hat were made uniform."

Serapis, Capt. G. D. Davidson, from Bombay, with 28 military officers, 662 military invalids and time-expired men, 133 soldiers' wives, and 332 children, arrived at Portsmouth on Sunday.

Shannon is now nearly ready for commission at Devonport, where she has been brought forward for sea at a cost of £25,000.

Simoom, Capt. R. G. Pasley, arrived at Barbadoes on the 3rd inst.; all well; will sail on the 6th inst. for Bermuda and England.

Sirius, Capt. G. L. Sulivan, was at Whydah on March 29.

Spiteful, Com. A. T. Powlett, was at Whydah on April 4.

Sultan, Capt. H.R.H. the Duke of Edinburgh, arrived at Marseilles on Wednesday morning with the Prince of Wales on board, and was saluted by a French man-of-war, as also by the guns of the port on landing. The Prince was waited upon by the authorities, and landed at 3 p.m. for Paris. The Sultan was to leave Marseilles for Malta on the 3rd inst.

Sylvia, Capt. B. W. Bax, has been ordered to be at Hong Kong by May 6, to meet the Tamar with her fresh crew on board.

Thetis, Capt. T. Le Hunte Ward, undergoing repairs, will be ready to sail about May 10 from Malta for England.

Thunderer, Capt. J. C. Wilson, was commissioned at Portsmouth on Tuesday. On Friday the experiment for ascertaining the position of her centre of gravity was made by Mr. Watts, of the Admiralty, who assisted Mr. Froude in his observations of the behaviour at sea of the Devastation. The day was not very favourable, on account of the high wind which prevailed, the operation being best performed in perfectly still water. The ship was placed in the new tidal basin, and was moored by hawsers in such a position as to be least affected by the wind. Sixty tons of iron ballast were used during the experiment. It was disposed in three lots of ten tons, in lines 50ft. apart, on each side of the ship, so that the distance through which it was moved in producing the inclinations was in each case 50ft. The inclinations were measured by means of three separate plumb lines, each being 15ft. high, and more than the usual number of observations were taken in order to provide against any possible inaccuracy of measurement due to the pressure of the wind. First of all the port ballast was carried over to starboard, ten tons at a time, the various inclinations from the perpendicular being carefully noted at the several plumb lines after each of the lots had been taken across. The ballast was then removed back in the same way to its original positions and the marks at the plumb lines checked. The starboard ballast was next conveyed to the port side and back again to its place in the same manner as before, the inclinations in each case being observed and recorded. By this process the deviations to port and starboard were made to correct each other. The differences between the series were very slight, amounting in no instance to more than one per cent. Her draught of water at present is 25ft. 5in. forward and 26ft. 7in. aft; but when she receives her shell, powder, stores, &c., on board, her immersion will probably be increased by a foot, and she will practically be brought down to the estimated load line.

Urgent, Com. R. H. Boyle, was commissioned at Portsmouth on Tuesday for service at Port Royal.

Valorous, Capt. L. F. Jones, will be out of the hands of the Devonport Dockyard authorities to-day, and will take a short trial trip, and then await orders.

Vivid, Staff-Com. E. Wise, is to proceed to Portsmouth from Devonport to take the place of the Alberta during her refitting with new boilers.

Wye, Staff-Com. W. W. Vine, arrived at Madeira on May 1, all well; was to leave on the 3rd inst.

Zephyr, Lieut.-Com. W. G. Le Cocq, was at Port Royal on Morch 7.

ROYAL NATIONAL LIFEBOAT INSTITUTION.

On Thursday a meeting of this Institution was held at its house, John-street, Adelphi, Thomas Chapman, Esq., F.R.S., V.P., in the chair. The Secretary having read the minutes of the previous meeting, the Silver Medal of the Institution and its thanks inscribed on vellum were ordered to be presented to William Manifold, late assist.-coxswain of the Arklow lifeboat, and thanks on vellum to John Montgomery, late coxswain of the Chichester Harbour Lifeboat, in acknowledgment of their long and gallant services in those lifeboats in saving life from various shipwrecks. The thanks of the Institution inscribed on vellum were also voted to Mr. S. Richards, farmer, in testimony of his continued valuable co-operation in forming one of the crew of the Cardigan lifeboat whenever the boat was called out on occasions of shipwrecks. Rewards amounting to £308 were also granted to the crews of different lifeboats for saving life on numerous occasions during the heavy gales of the past month, in which period they had been instrumental in saving seventy-eight lives from different wrecks, besides assisting to rescue two vessels from destruction. The thanks of the Institution inscribed on vellum and £3 were voted to Capt. John Smart, of the steamer Rio Banto, and £1 each to his crew of seven men for saving three fishing-boats and their crews, consisting of twenty men, which had been overtaken by a sudden gale from S.W., and were helplessly drifting away to sea off Glengad Head, Co. Donegal, on Feb. 2. Other rewards were granted to the crews of shore-boats for saving life from wrecks on our coasts. Payments amounting to £1,330 were ordered to be made on some of the 256 lifeboat establishments of the Institution. The receipt of various contributions and legacies was announced. It was reported that at a public meeting recently held in the Liverpool Town Hall, a gratifying presentation was made to the crews of the Liverpool lifeboat belonging to the Mersey Docks and Harbour Board, and the New Brighton tubular lifeboat of the institution. It consisted of a gold medal awarded by the Government of the United States of America to each survivor of the crews of those lifeboats, and 600 dollars to the families of the three Liverpool lifeboat-men who perished while nobly succouring the crew of the American ship Ellen Southard, wrecked at the mouth of the Mersey during a severe gale on Sept. 27, 1875. Reports were read from the inspectors of lifeboats to the Institution on their recent visits to its lifeboat stations. The proceedings then terminated.

As there appears to be some misapprehension as to the object of the arrival of two British gun-vessels in the Danube, their rumoured intention of "protecting Galatz" having created "a most favourable impression" at Bucharest, it may be well to point out that by Article 19 of the Treaty of Paris, March 30, 1856, it was agreed that, in order to ensure the execution of the regulations established by common agreement, each of the contracting Powers should have the right to station at all times two light vessels at the mouths of the Danube. And in the Convention, bearing the same date, between Great Britain, Austria, France, Prussia, Russia, and Sardinia on the one part, and Turkey on the other part, the Sultan reserved to himself, as in past times, the right to deliver firmans of passage for light vessels under flag of war, which should be employed, as is usual in the service of the missions of foreign Powers, to secure the execution of the regulations relative to the liberty of the Danube, the number of such vessels not being allowed to exceed two for each Power. Those now ordered to represent the British flag in the Danube are merely wooden, lightly armed gunboats.—*Standard.*

POSITION OF NAVAL ENGINEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—After a careful perusal of the "leader" of April 21, I beg to state that the writer has "jumped at conclusions" that could exist in the mind only of those not engineers. I propose to show, first, that he is mistaken in his conclusions, and, second, what is contended for by me, and the existing injustice that comes of it. If, in doing the latter, I have to enter into what some people are pleased to term "petty details," I hope the necessity of proving my case will be my excuse, observing, by the way, that the ocean itself is only a multitude of "petty drops," but which in the aggregate form just the ocean, neither more nor less. Now, commencing at the beginning of the "leader," it is just exactly that complicated nature of the "gun" that in the present day requires a "regular engineer" to work it at sea. We do not carry engineers to sea to "manage" the engines; it is to keep them in order when away from the great establishments that built them. We require to know thoroughly their construction, and at such places as Hong Kong, Bermuda, Halifax, and at Malta men of the very same class the leader describes as "loaders and cleaners," and that I say are regular "gun" makers, are the superintendents of the factories. Allow me to point out also that the "repairs," as it is mildly termed, away from England sometimes include very heavy "jobs," which are executed entirely by the naval engineers, artificers, and stokers under their orders. But, leaving that matter, I pass on to the "dual system." Two admirals would not be needed, nor two captains, because they "have nothing to do with the machinery," and though they might send for the chief engineer on the quarter-deck if anything went wrong and (as I have myself within the last twelve months been subjected to) find fault first and inquire the cause afterwards, yet, for all practical purposes, they would be as helpless as a child in as far as the machinery went. I have a pretty good knowledge of the practical value of a naval officer's knowledge of steam, book-learnt as it is, and, if an engineering captain was wanted, he already exists—*i.e.*, the chief engineer. Now, in turn, we will take the next article. Who should coal the ship but the sailors? It takes all the stokers to "trim the coal." In entering harbours or going out of them (if under steam) though the ship has not moved, the steam has been up for hours beforehand, one watch has gone off, and wants rest (Navy stokeholes are not paradises), one watch is "on the fires," and the third watch is "coming on," and won't be very fit for watch-keeping after doing two or three hours' work on deck, at what is no part of their duty. On getting under weigh, after being once "clear out," the greater part of the blue-jackets will be watch below," whilst the third watch of stokers, who helped them to get under weigh, will now also have "watch below," but of a very different nature; in other words, they will now be working hard in an abominable atmosphere at their legitimate function. Next, going into action. If there is any period throughout the whole commission when a chief engineer wants his men all to himself, it is then. What with the "stop-valves" either of steam or water to be shut off in case of pipes being struck; what with boilers to be attended to, with their legion of appurtenances; what with the steam fire-engines, to be started and stopped, in case of fire breaking out, and a host of details, I think any man not an executive naval officer must see the chief does require all his men. The attempt to compare a man-of-war to a merchant ship is misleading, but from very opposite reasons to the ones given. A merchant ship, the writer says, performs regular voyages. Good. And her stokers after coming off a hot watch are not worried by a master-at-arms by a lot of petty annoyances, and perhaps called on to drill, or "make sail;" and, when the voyage is over, those that do remain in the ship are engaged overhauling the machinery under their own chief ready for the next voyage, and plenty of factory hands are sent on board by the company to help to get it done. Now, does it occur to the writer of the article that what repairs are done at steady intervals, and with no "deck interruption," in the companies' ships, have to be performed "bit by bit" at most unsteady intervals, "as best you can," on board a man-of-war? There is in the naval mind an idea that our engines are like their topsails; if they are not "blown out of the boltropes," or have a hole in them you could put your head through, all you have to do is to furl them till they are wanted again; so they think that if a cylinder cover is not blown off, or a crank smashed, or something that will cause an excitement, "there is nothing to do." It is because there is always something to do that cranks do not smash; but, as it is done quietly, without a boatswain's mate and 200 men blowing and bawling, we get no credit. Now, in the case of the Malacca, we are approaching the point really at issue. A naval chief engineer does not want to differ with the captain as to whether steam is to be "got up," or in any way dictate as to the use of the engines. He knows he is there for that purpose. But what he does want is his own men and his own method of arriving at the results the captain desires. The captain is no engineer, and there is an end of the matter. Coming next to his quotation of "requirements," they are like some of the "antique" tools still at times served out to small ships at out-of-the-way dockyards. They stand word for word as I read and laughed at them in 1849. Perhaps the concocter of that document would not have been flattered at the opinion passed on it by the engineering press at the time, when it stated that "there could have been no one at the Admiralty capable of drawing up a proper description of what an engineer's capabilities were, so they took refuge in vagueness." The result of such vagueness is, that whilst "screwing" really important qualifications out of their engineers, the Admiralty leave the world to imagine a very low standard will "do for the Service." If so, then the more discredit for placing such machines as the Temeraire and Alexandra in the hands of such men. Now we come to the real grievance: No man can serve two masters, but a chief in the Navy has to "try it." Now, were the captain of the ship to be our sole master, as long as we pleased him afloat we might "whistle" at inspectors of machinery or chief engineers of dockyards in their reports on "paying off," or of the "state and condition" of the engines. Why, though not very flattering to our professional pride, yet we would be safe enough, the captain's good certificate would get us another ship, till the day arrived when, if we lived, we might "throw our hats up" and be "rid of the whole concern." As far as I am personally concerned, I would put the air-pump into the boiler if the captain would take all the onus of it. On reversing the case, when an inspector of machinery comes on board your ship, not two days after the "anchor has gone," and "pitches into you" because certain regulations are not carried out, and on your pointing out that thirty out of seventy of your stokers were pumping water for the lower deck for a certain time, instead of employing that time in doing the very thing you were "pitched into" for not doing, I say that on being appealed to, to go to the captain and to point out if the "accursed system" be not altered, the Queen's or Admiralty Regulations for the engine-room cannot be carried out (the very thing he is in the Fleet for), "washes his hands in invisible soap," and cautiously looking down at his toes, says—"I cannot interfere with the discipline of the ship," and proceeds to find minute faults in the log-book, a complete instance of "straining at a knat and swallowing a camel." The inspectors of machinery are described in the "requirements" as men in whose judgment and integrity implicit reliance can be placed. Therefore, assuming all these officers to be such men, then only one of two conclusions can be drawn from a state of things that exists in the Navy—either they have not sufficient power to press their representations on a captain quietly in his cabin, or to cause the admiral to issue memoranda insisting that the chief engineer's men should be applied to their legitimate functions, on the one hand, or, on the other, are afraid to use their power because it is easier to snub a subordinate than to face a post-captain. Which is the truth lies in their own breasts, though I am quite willing to admit that they have not power enough. Now for the chief engineers of dockyards. This part is very simple. All they have to do is to report that the condition of such-and-such a ship's machinery on paying off is in a bad condition, without troubling their heads as to how it came so. But if their Lordships have an idea that it might result not from wear and tear, but from neglect, and the dockyard officers agree in that opinion, no detailed examination of the engineer takes place, but he gets a rap on the knuckles from the common master of both parties, viz., the Admiralty. Now, your leader says the engineer is to be all over the ship. Under the present system, why? There are only two other parties concerned in metal matters besides himself in the ship. One is the gunner, the other is the carpenter. What are the armourers for? Also the carpenter's crew? There are quite sufficient grounds for ill-feeling between the carpenter and chief engineer already in respect to the ship's pumps without introducing fresh causes, not for unanimity, but the very reverse. In fact, in the present day a carpenter in a large ship is quite a misnomer for the ancient wooden man. He gets his most awkward jobs done by disguise; really the engineer does them, on the plea that the carpenter has no lathe nor men used to metal work. Why add the gunner's gear to it? Common sense, divested of red-tape, would suggest that the carpenter and gunner should have amongst their crews men used to the work now-a-days required of them, paid properly, and let alone to the sole control of their own officers. Otherwise, let the chief engineer be really head mechanical (metal) man in the ship, and give him a sufficient extra allowance of men to do metal work out of the exact steam line. Either course is honest and above-board. At present it is an "ill-blood" producing system, which will bring a "dead-lock" some day, and the sooner the better. I will give a proof. In a big ironclad the steam steering blocks have all gone wrong—I mean the part, not the steam engine; at the same moment, one of the big gun-carriages is disabled; lastly, though far from least, I am overhauling my engines. Now there is only one lathe, worth calling such, in the ship. I have only a certain number of "skilled" hands in my department. I want the lathe and my men; but the captain, as head of all, wants his rudder and 25-ton gun put to rights, all at the same time. Who is to give way? Are the engines, which are my special charge, to give way to guns and rudders when there are armourers and carpenters in the ship? Now, as to the results of your system, with reference to distinct ill-treatment of the chief engineers, also his unfortunate men. I will give only two instances, out of fifty, I have by me in writing. Here is one. I paid off a ship at Woolwich on Dec. 9, 1868. The captain had (without consulting me) given ten days as the time requisite to pay off in. Well, we went alongside the Arsenal Pier, and all the guns complete with their carriages were whipped out with the hydraulic cranes on the wharf. At the same time, men aloft were hard at work stripping the rigging. To be in accordance with this state of things, I ought, by the regulations, to have been "opening up" the machinery, cleaning the bilges, returning my stores, and fulfilling all the regulations appointed for the guidance of the engineer in "paying off." But, no, the fires were kept in for three days, ready to move at any moment; so in the afternoon of the third day, when I "drew the fires" in Woolwich Dockyard basin, the sailors' part was half done, whilst I had only seven days to do what the "deck party" were allowed ten for. And yet the captain talked about ten days. Getting desperate, I walked to the commodore's office myself, and told him the ship would not be ready and the reason why. Well, we worked day and night for seven days, whilst the sailors were snoring in their hammocks, and only just scrambled through at the last, and, instead of getting credit for our heavy exertions, were as good as told we had wasted three days. This is naval justice. Now for the last ship I had in the Navy. She was a large ironclad, 1,250 nominal horse-power and full of "gear." Here, the commander, without any real knowledge of what my assistants were doing, was repeatedly making unjust remarks about their conduct whilst drawing stores in fitting out. We not only had to fit out our own ship, but to keep the machinery of the vessel used as a hulk in order; though there was a chief engineer and one assistant appointed to her. On complaining about the disposal of the force "nominally" my own, he turned round and said, "Machinery, yes; men, no!" I pointed out that one was no use without the other. His manner to me on all questions relating to the men was so domineering, that I wrote a "letter on service" to the captain, pointing out the various positions, that we must necessarily come into collision unless my status was distinctively defined. Shortly after, having received an injury, which, if known, disqualifies for the Service, and thinking this "accursed system" will never alter till some exposure of it takes place, I made known my injury, and got out of it altogether. I am afraid this "system" will never be put to rights till a "dead-lock" comes somewhere, or a ship comes to grief. If the ship only came to grief, without hurting any of her crew, I would like to see it happen to-morrow, for nothing less will do it. Now for the poor stokers, who suffer because their officer is powerless to protect them. When a ship makes a port the "watches" are given leave, but with a troublesome pair of engines (and the Navy is full of them), the unfortunate stokers cannot go in the daytime till the engines are once more ready for sea, and by that time the period for "leave" has elapsed, and the poor fellows get no leave, or else a "crippled" leave. As to interruptions in their messes, after they "come off the fires," their name is legion. Long as this letter is, it is a mere sketch; my log-books contain the facts I allude to. Now if, after this, your leader writer cannot see that it is not independence of the captain I want (none but a fool or a prejudiced person could think that), but simply the power to do my own work—though its results are for the captain—with my own people, why it is useless writing any more, for "he who's convinced against his will is of the same opinion still." Finally, the duties of the surgeon, paymaster, and chaplain, do not bring them into collision with the executive, because they have not a body of men under them. If the commanding officer meddles with the doctor, and evil comes of it, the executive stands a very good chance of "getting a rap on the knuckles," if not worse. If he meddles, or rather does not assist the paymaster, his crew will go short of provisions and money, and that will come on his shoulders. As to the chaplain, he is spiritual, and there is an end of him. As to the carpenter, he will not trouble him, because he works for him; ditto gunner, ditto boatswain. The engineer is *solus*.—I am, &c.,

CHARLES JAMES INCHES, Retired Chief Engineer.

P.S.—I intend publishing a private pamphlet, in which all these questions, accompanied by the proofs, will be entered into at length, and forwarding a copy to each of the engineering journals and all the marine factories in the country,- where the subject will be discussed without "class prejudice."

ADMIRAL SIR ALEXANDER MILNE.

A copy of the correspondence relative to the award of a special pension to Admiral Sir Alexander Milne, G.C.B., having been laid before Parliament, the following appears as the letter in which the Admiralty requested that the services of this distinguished officer should receive special recognition, a request which was readily granted by the Lords of the Treasury:—

The Secretary to the Admiralty to the Secretary to the Treasury.

Admiralty, S.W., Oct. 2, 1876.

SIR,—My Lords Commissioners of the Admiralty desire to bring before the Lords Commissioners of her Majesty's Treasury the services of Admiral Sir Alexander Milne, G.C.B., in the conduct of the naval administration of the country, which they consider to be deserving of special recognition in the way of pension. Sir Alexander Milne has enjoyed the confidence of many different Administrations as a naval adviser. He was a member of the Board of Admiralty from Dec. 23, 1847, to June 27, 1859. He filled the post of First Naval Lord from July 13, 1866, to Dec. 17, 1868, and again from Nov. 27, 1872, to Sept. 6, 1876. His services at Whitehall have thus been spread over a period of nearly twenty-nine years, during which he actually held office for seventeen years and 269 days, comprising the period during which the country was engaged in the Crimean war. He will, if he be alive, be placed on the Retired List on Nov. 11 next, on attaining the age of seventy years. My Lords are of opinion that, in consideration of his long and valuable services at the Admiralty, a Special Civil Pension of £1,000 per annum should be awarded to this distinguished officer, commencing from the 6th ult., when he retired from the post of First Naval Lord. Should the Lords of the Treasury concur with the views of my Lords, I am to request they will take such steps as are necessary to give effect to the proposal. In making this application, their Lordships of the Admiralty have made no reference to the services of the officer afloat, in highly responsible commands, which have from time to time received honourable recognition at the hands of his Sovereign.—I am, &c.,

The Secretary to the Treasury. ALGERNON EGERTON.

The slightly increased activity which has been apparent at our dockyards and arsenals during the past week has attracted some notice, and exaggerated rumours of preparations for war are beginning to be spread. As a fact, some orders have been given which might encourage the belief that England is making ready to take an active part in the war; but the intention of the Government to maintain a strict neutrality has already been made known, and the so-called "preparations" are no more than indications of our intention to ensure a state of "preparedness" for any possible contingency. The country would learn with satisfaction that troops had been detailed, on paper, for embarkation, and that every arrangement for speedy transport, and for the supply of stores had been made, so that, should the necessity arise, every man would be in his right place at a moment's notice. —*Standard.*

The Earl of Aberdeen presided over a public meeting at Willis's Rooms, on Thursday, to promote missions to seamen on shipboard, at home and abroad, in the Royal and Mercantile Navies, and amongst the seafaring population around our coasts. The report stated that, notwithstanding a very inclement winter, attended with fearful loss of life at sea, the fifty honorary chaplains, fifty mission chaplains and readers, and four lay helpers, with the boatmen and various yachts and boats employed by the Missions to Seamen Society at thirty-six seaports at home and abroad, have been all mercifully preserved.

The two six-gun composite screw sloops of the Pelican class, 1,124 tons, 900-horse power, ordered to be built at Devonport, are commenced on Nos. 1 and 2 slips, and are both to be launched this year.

The Worshipful Company of Fishmongers have generously voted fifty guineas to the Shipwrecked Mariners' Society, which relieved 10,386 persons last year.

THROAT IRRITATION.—The throat and windpipe are especially liable to inflammation, causing soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use glycerine in the form of jujubes. Glycerine, in these agreeable confections, being in proximity to the glands at the moment they are excited by the act of sucking, becomes actively healing. Sold only in 6d. and 1s. boxes (by post for 14 stamps), labelled "JAMES EPPS and Co., Homœopathic Chemists, 48, Threadneedle Street, and 170 Piccadilly. London."

STATIONS OF THE BRITISH ARMY.

[Where two places are mentioned, the last-named is that at which the depôt is stationed.]

Corrected up to May 5.

	Year in which the corps last went on or returned from foreign service.	*Foreign Station to or from which it last changed.*

COLONIAL CORPS.

1st West India Regt.—West Indies
2nd—Sierra Leone
Malta Fencibles—Malta

ARMY SERVICE CORPS

Head-quarters—109, Victoria-street, Westminster.

The whole of the troops, Cavalry, Infantry, and Artillery, intended to take part in the summer drills at the Curragh will be concentrated there by the end of the month.

Her Majesty has signified her intention of visiting Aldershot on Wednesday next.

The Woolwich correspondent of the *Morning Post* writes:—"The strengthening of the Mediterranean forts and garrisons, which has been occupying much attention of late years, still proceeds. Private ships are generally employed for the conveyance of stores, and are nearly always loaded in the docks at London. The Spartan has taken a great number of small arms from the Tower for Malta. The Hecla is embarking a large quantity of shot, and shell, and barrack stores for the same place, and the Cadiz is expected at the Royal Arsenal for about 300 tons of land service guns and iron shields for the fortifications at Gibraltar."

The announcement is made that the Austrian Artillery are now fully equipped with the new "steel-bronze" breechloader, and competent, therefore, to take the field at any time against any enemy. The *Abendpost* is assured, on trustworthy authority, that Austrian artillerists are highly satisfied with the new gun. General von Uchatius, the inventor of the "steel-bronze," has quite recently constructed two guns of heavier calibre, with a 15-centimétre bore, one of which has been practically tested, and has likewise given complete satisfaction.

The Officers' Divisional Dramatic Club gave a performance at the Club House, Aldershot, on Wednesday. The entertainment commenced with the *School for Scandal*, the characters being sustained as follows:—Sir Peter Teazle, Lieut. Mott, 2nd; Sir Oliver Surface, Capt. Dennistoun, 64th; Sir Benjamin Backbite, Lieut. C. N. Simpson, R.A.; Sir Harry Bumper, Depty.-Comy. F. H. Bridgman, A.S.C.; Joseph Surface, Capt. A. G. Yeatman, R.A.; Charles Surface, Lieut. J. C. MacGregor, R.E.; Crabtree, Lieut. Randolph, 20th; Careless, Lieut. Browne, 100th; Rowley, Assist.-Comy. F. R. Gossett, A.S.C.; Moses, Lieut. Bingham, 64th; Snake, Depty.-Comy. Dunstan, Ordnance Dept.; Trip (Servant to Charles), Lieut. Bagnold, R.E.; Servant to Joseph, Lieut. A. G. S. Wade, R.A.; Lady Sneerwell's Servant, Lieut. Stracey, 96th; Sir Peter's Servant, Lieut. Fletcher, 8th; Lady Teazle, Mrs. R. S. Crawley; Mrs. Candour, Hon. Mrs. G. Wrottesley; Lady Sneerwell, Mrs. R. T. Thompson; Maria, Mrs. E. L. B. Kevill-Davies; Lady Teazle's Maid, Mrs. F. J. Tidy. The orchestra was filled by a string band composed of the following officers:—Major-Gen. Hon. F. A. Thesiger, Lieut.-Col. Sir H. Elphinstone, Bart., R.E.; Capt. Richardson, R.E.; Capt. Ruxton, 29th; Capt. Willoughby, 96th; Lieut. E. Ward, R.A.; Lieut. Currie, 64th; Lieut. L. Anstruther, 96th; Depty-Comy. F. H. Bridgman, A.S.C.; Assist.-Com. E. J. Dolton, A.S.C.; and A. Lucas, Artist Volunteers. Pianoforte, Mrs. J. T. Westropp; conductor, Capt. Bell, 8th Hussars.

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea.—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices, 9, Southampton-street, Strand.

THEATRES.

GLOBE.—The hopes that were entertained, after the promising announcement of a new play by a new writer, were somewhat rudely dashed last Saturday when *Percy*, a drama in three acts, was produced to a very dissatisfied audience. As its run is of the briefest, and its existence of the least value, it will be enough for us to record that it recalled memories of *Manfred* and *Hamlet*, as well as of *The Iron Chest*. The hero is a moody gentleman, who, at some period or other, has murdered two people, and, as a sort of atonement, keeps their skeletons in a cupboard ready to his hand. As for the dialogue, it seemed to be blank verse of an inferior order, and the diction was strangely out of keeping with the costumes. The author, Mr. Leonard Towne, played the principal part with some elocutionary ability, but neither his exertions nor those of his colleagues could save *Percy* from its fate.

ALHAMBRA.—Yet another version of Offenbach's *Orphee aux Enfers*, this time with the book of words from the pen of Mr. H. S. Leigh, the ablest and most polished writer of *libretti* for comic operas. There is a ring about Mr. Leigh's songs which will be looked for in vain at the hands of his fellow-workers in the same field, and the ears of the audience are never tortured by the wild unfitness of the words for the music which has too often haunted them at the Alhambra—and elsewhere. Many additions and alterations were made to the score and the piece itself on its last production at the Gaiete, and these have been duly transferred to the English stage. No less than four grand ballets now form part of the work, and there can be little doubt they will be the chief attraction in these degenerate days. It would be difficult to select which of the four should receive special praise, as they are the best things M. Justamant has yet done in this line. The chief points at the Alhambra are the ballad, the scenery, and the costumes. These have not only been looked after so carefully as to be perfect in their respective ways, but actually some pains has been spared to waste upon the representation. A new tenor, Mr. Woodfield, has been retained for Pluto, and aquits himself by the aid of a pleasant voice and a not disagreeable exterior. Of acting, however, he has much to learn, but not nearly so much as Mr. Paulton has with regard to the singing of his music in Jupiter. Miss Kate Munroe is altogether very good as Eurydice, acting and singing with taste and spirit. Miss Emma Chambers and M. Loredan also deserve credit for their efforts; the latter has greatly improved of late. Various gods and goddesses are represented by as many sprightly ladies, who do their best to look well, the most successful being Miss A. Temple and Miss N. Vane.

BIRTH.

KNIGHT.—April 26, at Narborough, Leicestershire, the wife of Captain Gregory Knight of a son.

MARRIAGES.

ANDERSON.—BROWN.—April 28, at Christ Church, Clifton, by the Rev. William Hay Chapman, M.A., Vicar, John Anderson, Edinburgh, younger son of the late Samuel Anderson, to Elizabeth Brown, widow of the late Robert Brown, Captain H.M. 16th Regiment, and second daughter of the late James R. D. Dewar.

CLARKE.—TEEVAN.—May 1, at the Chapel of St. John the Baptist, Brighton, by the Very Rev. Canon Rymer, J. Alleyne Clarke, Esq., Commissariat Department, to Alice Mary Watton, elder daughter of John Teevan, Esq., of Woodside Court, Croydon.

CHURCHILL.—KIDD.—May 1, at Kidbrook Church, Blackheath, by the Rev. Neville Sherbrooke, assisted by the Rev. Melville Churchill, brother of the bridegroom, Seton Churchill, Lieutenant 44th Regiment, to Elinor Milly, eldest daughter of J. Kidd, Esq., M.D., of Brooklands, Blackheath Park.

DEATH.

THOMSON.—April 25, at his residence, The Elysees, Emsworth, Captain John Thompson, Senior Paymaster-in-Chief of her Majesty's Navy.

Advertisements.

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.

The Turkish dominions having now been invaded, and hostilities having actually commenced, the suffering among the Turkish soldiers is very greatly increased, and as will be seen from the annexed statement by Captain Burnaby, who has just returned from Asia Minor, they are in the greatest need of clothing, of food for the hospitals, and of medical stores and surgical instruments.

The Committee, therefore, appeal strongly to their countrymen for subscriptions to enable them to mitigate the horrors of the war by sending out to the Turkish soldiers such additional supplies as are now most urgently needed.

Statement by Captain Burnaby:—

"Regent's Park Barracks, April 27, 1877.

"In the course of my recent travels through Asia Minor, I visited several Turkish military hospitals, and conversed with the surgeons in charge. They often complained to me of the great scarcity of drugs, and said the authorities at Constantinople found it impracticable to supply many of the necessary specific medicines and surgical instruments, all of which have to be obtained in Europe.

"If people in this country could only realise to themselves the sufferings which the wounded will undergo when being operated upon without chloroform and with worn-out surgical instruments, I think they would willingly subscribe to the Stafford House Fund.

"The soldiers from the southern parts of Anatolia suffer very much from the change of climate, and are utterly unsupplied with warm underclothing. Many a time I have met battalions of Redifs on the march, the men with bare feet and wading through deep snow while the thermometer stood at zero. Many were frost-bitten on the march to Erzeroum and Kars. A supply of warm stockings and flannel shirts and blankets would save thousands of lives."

JUNIOR UNITED SERVICE CLUB.—The ANNUAL GENERAL MEETINGS of this Club will be held on SATURDAY, May 12th, and on SATURDAY, 26th of May. The Chair will be taken at 1 o'clock p.m. Members who are unable to attend the second meeting may obtain voting papers on application, personally or by letter, to the Manager.—By order of the Committee,

J. G. WALLACE HOARE, Manager.

4th May, 1877.

OTTOMAN CLUB, 29, King Street, St. James's.—The house is furnished throughout, and will be shortly opened. Annual subscription, £5 5s. Members are at present admitted without an entrance fee. Further particulars may be obtained by applying to Captain R. J. A. Webb, Secretary.

RALEIGH CLUB. — The ANNUAL GENERAL MEETING will be held at the Club House, 16, Regent Street, S.W., on FRIDAY the 25th May. The Chair will be taken at one o'clock. By order.

THE WANDERERS' CLUB Pall Mall.—The number of members having now reached 1,400, there remain only 200 vacancies. Candidates joining from this date will pay one subscription, extending to May 1st, 1878. The entrance fee remains at 10 guineas. Subscription:—Town members, 3 guineas; country members, 4 guineas. The Club being strictly proprietary, the members incur no liability. The Honorary Secretary to the Committee is Lieut.-Colonel T. R. H. Drummond Hay.—For further information apply to Major T. P. Kennan, Secretary.

Pall Mall, May 1st.

Colchester, Essex, on the outskirts of the town, within 10 minutes walk of St. Botolph's and the Hythe Stations, on the Wivenhoe Branch of the Great Eastern Railway, and only two miles from the main line station, from whence there is an excellent service of quick trains to London.—An exceedingly attractive Freehold Residential Property, known as Scarlett's, situate on the east side of the garrison town of Colchester. It comprises a substantially-built and and well-arranged residence, in capital order, including three reception rooms, four principal bed and two dressing rooms, two secondary bed rooms, bath room, and suitable domestic offices, with cellarage in basement. The residence occupies a dry and elevated position, commanding extensive and pleasing views over an undulating country, placed nearly in the centre of about 20 acres of very ornamental land, approached by two carriage sweeps, with entrance gates, surrounded by lawns and pleasure grounds, tastefully studded with choice specimen shrubs, conifers, and other trees of great beauty and luxuriant growth, intersected by shaded and winding walks, leading to productive kitchen gardens, with conservatory, vinery, and forcing pits, well-stocked orchard, and productive closes of pasture land. In the rear is a small farmery, gardener's cottage, and the requisite outbuildings. The whole occupying a charming position, and, with the exception of about two acres, is in hand, and will be sold with possession.

MESSRS. BEADEL are instructed by the Proprietor to offer for SALE by AUCTION, at the Mart, Tokenhouse yard, London, on Thursday, the 7th of June, 1877, at 2 o'clock precisely, in one lot, the above very attractive FREEHOLD PROPERTY. Particulars, with plans and conditions of sale, may be obtained of Horace Philbrick, Esq., Solicitor, 50, Old Broad-street, E.C.; at the Mart; and of Messrs. Beadel, 25, Gresham-street, London, E.C.

PROFITABLE FARMING.—FREEHOLD LAND TO BE SOLD, at £2 per acre. A party will accompany the Land Commissioner this month to inspect the rich pasture lands of Southern Minnesota, near towns and railways. The soil and climate are all that could be desired. Good shooting and fishing. Stock raising pays 50 to 100 per cent. Cost of transit to an intending purchaser, from Liverpool to the Lands, £15, first class. For full particulars apply to William Ellison, Architect, Mansion House, Building, E.C., or F. C. Taylor, Land Commissioner, 57, Charing Cross, S.W Bankers, McCulloch and Co., 41, Lombard Street, E.C. Pamphlets post free.

HIRE SYSTEM.

Elegant and useful FURNITURE, CARPETS and BEDDING, and FURNISHING REQUISITES of every kind on this convenient system, displayed in numerous extensive and the most beautiful show-rooms in the kingdom. Prices fixed from an Illustrated Catalogue representing the stock, and all the advantages offered by numerous wholesale houses are combined and to be found in this establishment, and at one profit only.—Prospectus and priced Illustrated Catalogue on application to the Manager, Hire Department, 81, Brompton Road. Established 60 years.

JNO. GOSNELL and CO.'s "CHERRY TOOTH PASTE" greatly excels all other preparations for the Teeth. Price, 1s. 6d. per pot.

"TOILET AND NURSERY POWDER," beautifully perfumed and guaranteed pure.

"PATENT TRICHOSARON," or newly-invented HAIR-BRUSH, the peculiar mechanical construction of which accomplishes the two operations of cleansing and polishing simultaneously.

To be obtained of all respectable Chemists and Perfumers throughout the world.

JOHN GOSNELL AND CO.,
Perfumers by Appointment to her Majesty, the Princess of Wales, &c.,
ANGEL PASSAGE, 93, UPPER THAMES STREET, LONDON.

HAMBURGER, ROGERS, AND CO., GOLD AND SILVER LACE MANUFACTURERS by Appointment to her Majesty the Queen, and to H.R.H. the Prince of Wales. MILITARY CLOTHIERS, CAP, HELMET, SHABRACQUE, and CAVALRY ACCOUTREMENT MANUFACTURERS, with every description of UNIFORM, and Appointments for the Army and Navy, Yeomanry, Militia, &c., 30, KING STREET, COVENT GARDEN, LONDON, W.C

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall —"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO., 283, Strand, London, W.C.

THOMAS WHITE'S
CELEBRATED CAMPAIGNING KIT,

CONSISTING OF

BEDSTEAD, BEDDING, BLANKET, PILLOW, BATH, WASHSTAND, BASIN, CAMP-STOOL, BUCKET, LANTERN, POLE-STRAP, LOOKING-GLASS, PYJAMAS, AND SLEEPING CAP.

ALL OF WHICH ARE CONTAINED IN HIS

LOCK-UP WATERPROOF BAG.

Which, when packed with the above articles, supplies room for clothing and other necessaries. The chief feature in this Kit is T. White's FOLDING BEDSTEAD (recently improved), weighing 16lbs., price 30s.; or his larger sized ditto, 18lbs., price 35s., intended for officers entitled to carry extra weight. Also his CANTEENS for company messing, to cook for and dine three or more officers, as supplied and thoroughly tested during the Manœuvres of 1871, 1872, 1873, 1874, and 1875. This Canteen was used by Sir Garnet Wolseley, G.C.M.G., K.C.B., his Staff, and the 42nd Highlanders (the Black Watch), and other regiments during the Gold Coast campaign, and is recommended and patronized by the highest military authorities.

The above Campaigning Kit, or Canteens, and in most instances both, have been supplied to his Majesty the Emperor of Germany; H.R.H. the Duke of Cambridge, K.G., &c.; H.R.H. the Duke of Connaught, K.G., &c.; H.S.H. Prince Edward of Saxe-Weimar, C.B.; the late General Sir Hope Grant, G.C.B.; Generals the Right Hon. Sir John Michel, G.C.B.; Sir R. Walpole, K.C.B.; Sir Charles Ellice, K.C.B.; Major-Generals Sir Charles Staveley, K.C.B.; Sir Alfred Horsford, G.C.B., Military Secretary; J. S. Brownrigg, C.B.; Henry Smyth, C.B.; Lord Mark Kerr, C.B.; D. Lysons, C.B., Q.M.G.; Sir Thomas MacMahon, Bart., C.B.; Sir E. Greathed, K.C.B.; G. V. Maxwell, C.B.; Hon. A. Hardinge, C.B.; C. Shute, C.B.; W. Parke, C.B.; A. J. Herbert, C.B.; and Sir Garnet J Wolseley, G.C.M.G., K.C.B., besides some thousands of officers of nearly every branch of and regiment in the Service.

THOMAS WHITE,
CAMP AND BARRACK FURNISHER,

Begs leave to inform Commandants of Corps, Presidents of Messes, and Officers generally, that he

IS PREPARED TO SUPPLY ON HIRE
EVERYTHING NECESSARY FOR OFFICERS' MESSES,
Including
MARQUEES, FURNITURE, BOARDED FLOORS,
PORTABLE KITCHENS,
WHITE'S CELEBRATED FIELD RANGE,
Cooking Utensils, Cutlery, Electro-Plate, Crockery, China, Glass, &c.

The same will be securely packed and forwarded, accompanied by an experienced assistant, if desired, to any part of the United Kingdom.

THOMAS WHITE'S
STANDING CAMP TENT KIT,

As supplied by him for 12 years to the National Rifle Association at Wimbledon, and to Officers at Aldershot when under canvas, consisting of the following articles:—

Wood Folding Camp Bedstead
Hair Mattress
„ Pillow
Folding Chair
Sponge Bath
Water Can
Tent Pole Strap
Strip of Matting
Tripod Washstand.
Looking Glass
Basin
Lantern

Can be had on hire, in any number, to meet the requirements of regiments or County Rifle Meetings. The weight of each Kit complete is about 80lbs. The Kit includes everything necessary for camping out, and is looked upon by the large number of officers who have used it in England Ireland, and Scotland as a great convenience, saving them the trouble and annoyance of looking out, packing, and conveying their own goods (which are often unfitted for the purpose) to the camping ground.

P.S.—The Campaigning Kit is for Sale, and not for Hire; the Standing Camp Tent Kit is for Hire only.

Full details, Illustrated Price Lists, and Estimates for Officers' Messes, may be had post free on application to

DR. J. COLLIS BROWNE'S

CHLORODYNE.

THE ORIGINAL AND ONLY GENUINE,

Which is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever Croup, and Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout Cancer, Toothache, &c.

From Lord FRANCIS CONYNGHAM, Mount Charles, Dec. 11, 1868.

Lord Francis Conyngham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half-a-dozen bottles sent at once to the above address.

⁂ Earl Russell communicated to the College of Physicians that he had received a despatch from her Majesty's Consul at Manilla, to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, Dec. 31, 1864.

CAUTION.—BEWARE of PIRACY and IMITATIONS.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. COLLIS BROWNE was, undoubtedly the INVENTOR of CHLORODYNE; that the story of the Defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See *Times*, 13th July, 1864.

Sold in Bottles, at 1s. 1½d., 2s. 9d., and 4s. 6d. None is genuine without the words "Dr. J. COLLIS BROWNE'S CHLORODYNE" on the Government stamp. Overwhelming Medical Testimony accompanies each bottle.

SOLE MANUFACTURER

J. T. DAVENPORT, 33, Great Russell Street, Bloomsbury, LONDON.

ROYAL SCHOOL FOR DAUGHTERS OF OFFICERS OF THE ARMY.

The daughters of all officers in her Majesty's Army, inclusive of the Royal Marines, on full or half pay, or who may have died in the service, are eligible. The ages of admission are from ten to fifteen.

The next election will take place on June 29, 1877.

Pupils elected by votes of subscribers pay only £12 per annum.

With a view to afford the advantages of a good education to the daughters of officers of competent means at a moderate cost, and at the same time to aid the primary object of the Institution, a limited number of pupils are admitted on payment of £80 a-year, which includes all extras. The new form of application can be obtained at the office.

Each donation of £5 5s. entitles to one life vote. Each annual subscription of 10s. 6d. entitles to one vote at all elections during the current year.

Further contributions to meet the current expenses are earnestly solicited by the Committee.

By order,

G. W. FORSTER, Secretary.

No. 22, Cockspur Street, London.

ROYAL NAVAL SCHOOL, New Cross.—Notice is hereby given, that the ANNUAL GENERAL MEETING of the members of this Corporation will be held in the Theatre of the Royal United Service Institution, Whitehall-yard, on Thursday, the 24th inst., at 2 o'clock p.m. precisely; Admiral the Hon. A. DUNCOMBE, President, in the chair.

The Council's Annual Report will be furnished by the Secretary, on and after the 10th inst., to those members of the Corporation who may apply for it.

By order, ALFRED EAMES, Secretary.

ROYAL NAVAL FEMALE SCHOOL, St. Margaret's House, Isleworth.

The THIRTY-SEVENTH ANNUAL MEETING of this Society will be held in the Lecture-room of the Royal United Service Institution, Whitehall Yard, on WEDNESDAY, May 9th. The chair will be taken at 2 p.m. precisely by the President, Admiral the Hon. ARTHUR DUNCOMBE.

The result of an Election of Eight Pupils will be declared on Wednesday, the 4th of July. No votes can be registered after Four p m. on the 3rd of July. The list of candidates and voting-papers will be sent out about June 14th. All persons can vote who become contributors before the election.—By order of the Committee.

All sizes can be seen at
13, CRANBOURNE STREET, LEICESTER SQUARE, LONDON.

CHLORODYNE.—FREEMAN'S is the original and only true.—Lord Chancellor Selborne, Lord Justice James, and Lord Justice Mellish decided in favour of R. Freeman and against J. C. Browne and J. T. Davenport; see "Times" of July 24, 1873. Thousands of medical practitioners testify that there is no substitute for it in the treatment and cure of asthma, bronchitis, coughs, and other chest affections, neuralgia, fevers, cholera, dysentery, spasms, and all nerve pains. Bottles 1s. 1½d., 2s. 9d., 4s. 6d., 11s., and 20s. Sold by patent medicine dealers in all parts of the world. See that "Freeman's Original Chlorodyne" is engraved on the Government stamp.

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON SEA, near Ramsgate, in 1 hour and 45 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE."
"The situation of the palatial establishment on a cliff somewhat removed from the town, though conveniently proximate thereto, is an advantage greatly augmented by its superb suite of ozone and various other health-giving baths, its well-constructed rink, its excellent and cheerfully appointed table d'hôte, and all other liberal additions of comfort, luxury, and amusement since the hotel has come into the present enterprising hands."—"Daily Telegraph," March 29.

THE "GRANVILLE" HOTEL.
The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL.
"Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

COLT'S NEW GOVERNMENT ARMY REVOLVER,
after a severe competitive trial by the U. S. Ordnance Department in 1873 and 1876, has been exclusively adopted by the United States Government, and the whole of the United States Cavalry is now armed with them. It is made to take the English Government Boxer cartridge. Length of barrel 5½ inches and 7½ inches.

In the trial of 1869, advertised by another maker, the Colt's pistol used was a muzzle-loader adapted to the use of metallic cartridges, which pistol has not been made or sold after that year.

COLT'S NEW 41-CAL. FIVE-SHOT DERINGER REVOLVER,
Especially suitable for the traveller, for personal and house defence (see "Land and Water" and "Bell's Life," April, 1875). Weight 12½ ozs.

COLT'S NEW 38-CAL. POLICE REVOLVER,
Shoots hard and accurate, even at longer ranges. 4in. barrel. Weight 15 ozs.

COLT'S DERINGER FOR THE VEST POCKET,
Weight 6½ ozs.

THE DIRECTORS of the BRIGHTON LIVERY STABLES COMPANY, Limited, give notice that Prospectuses inviting application for the portion of unallotted Shares may be obtained from the Secretary at the Offices of the Company, to whom an early application should be made.

A. J. BODDINGTON, Secretary.
17 Prince Albert Street, Brighton.

HOLLOWAY'S OINTMENT and PILLS.—Safely and Securely.—When the severities of winter have yielded to the genial spring, invalids should make a determined effort to regain their lost health. When, through confinement indoors, want of appetite, and disturbed sleep, the entire system has been weakened and the spirits have been broken down, Holloway's remedies are equal to the occasion. The Ointment rubbed over the regions of the stomach and liver, aided by the internal administration of his Pills, will rectify the digestion, regulate the bile, and purify the blood—three sanatory actions which will speedily confer renewed vigour, brace up the failing nerves, confirm the flaccid muscles, and restore to the ailing cheerfulness, that great charm of existence.

SOVEREIGN LIFE ASSURANCE COMPANY.

EXTRACT FROM REPORT OF THE DIRECTORS, MAY, 1877:—

The Directors have again the pleasure of reporting a material advance in the amount of new business effected by the Company during the past year.

The Policies issued were 474 in number, assuring £249,060, or nearly £50,000 in excess of the preceding year. The average amount of each Policy was £525, and the new premium income represented was £8,295 3s. 10d., or £2,100 more than in 1875. The increase on the Total Revenue from Premiums and Interest was £4,995.

The sum paid for claims by death during the year was not in excess of the amount anticipated; but the aggregate disbursements on account of policies falling due exceeded that of any former statement, owing to an increased number of Endowment Assurances having arrived at maturity. Nevertheless, £23,000 were added to the Funds of the Company.

H. D. DAVENPORT, Secretary.

ST. ANDREWS SCHOOL FOR GIRLS' COMPANY (LIMITED).

PRESIDENT.

The Right Hon. the COUNTESS of AIRLIE.

VICE-PRESIDENTS.

The Right Hon. the Earl of Aberdeen.
The Lady Charlotte Elliot; &c., &c.

COUNCIL.

The Very Rev. Principal Tulloch, D.D.
Lady Anstruther; &c., &c.

HEAD-MISTRESS.

Miss L. I. Lumsden, Cert. Student in Honours, Girton Coll., Cambridge.

ASSISTANT-MISTRESSES.

Miss C. L. Maynard and Miss Dove, Cert. Students of Girt. Coll.

And other highly qualified Teachers.

This School provides for the daughters of gentlemen a thorough education at a moderate cost. Pupils are admitted on the nomination of a shareholder, with the sanction of the Council. The Head-Mistress receives Boarders.

School fees from 12 to 24 guineas per annum. Boarding-house fees from £60 to £75. The School will be opened on the 2nd October.

Forms of nomination, and all information can be obtained from

Mrs. DANIELL, St. Mary's Place, St. Andrews .... }
Mrs. RODGER, South Court, St. Andrews .... } Hon Secs.

NAVAL CADETS EXAMINATIONS.—

A Retired Naval Instructor can prepare young gentlemen for the above. Address, T. S. Crockford, 37, Cranfield Road, Brockley, S.E.

ARMY AND NAVY CO-OPERATIVE SOCIETY, LIMITED.

Established for the advantageous supply of
PROVISIONS AND GOODS OF ALL KINDS
TO ITS MEMBERS,
Comprising
Officers and Non-Commissioned Officers serving, or who have served,
The Widows, Sons, and Daughters of Officers, and Friends introduced by the above;
Also, the Secretaries of Naval and Military Clubs, and the Representatives of Regimental and Naval Messes and Canteens.

For further particulars address the Secretary, 117, Victoria-street, Westminster, S.W.

MEMBERS of the Army and Navy Co-operative Society (Limited)

are respectfully informed by CHARLES MORGAN & Co., of the Hatcham Park Brewery, New Cross, S.E., that they can be supplied with ALE, PORTER, and STOUT of the finest qualities at the Society's prices. See Price List, page 253.

H. PEAT,

SADDLER AND HARNESS MAKER,
14, OLD BOND-STREET,
HAS REMOVED TO 173, PICCADILLY.
Opposite Burlington Arcade

TEMPORARY MESSENGERS IN GOVERNMENT DEPARTMENTS.

—A few Pensioners (life) from the Army, Navy, Royal Irish Constabulary, or London Metropolitan Police will be selected at once. Fee for examination, 2s. 6d. Pay, 6d. per hour, or 3s. to 3s. 6d. per day when employed. Candidates may attend for examination on Monday, the 30th April, or Monday, 7th of May, between 10 and 1 o'clock at the Civil Service Commission, Cannon Row, Westminster.

EMANUEL,

3, THE HARD, PORTSEA,

By appointment to H.R.H. the Duke of Clarence, 1827; H.R.H. the Duke of Edinburgh, 1872.

New Designs in High Class Jewellery at Moderat Prices.
Bridesmaids' Lockets from Three Guineas.
Bracelets from Five Guineas.
English and Foreign Watches and Clocks.
Regimental, Presentation, and Prize Plate.
Old Plate, Jewels, Epaulets, &c., bought.
Foreign Money exchanged.
Miniature Copies of all Medals and Decorations.
Field, Race, and Opera Glasses, and Nautica Instruments.
Rare China, Bronze and Curios.

Collections Valued and Purchased.

Cheques payable to EMANUEL EMANUEL

SOLE ADDRESS, 3, THE HARD, PORTSEA

LAWRANCE D. PHILLIPS AND CO.,

MILITARY, COURT, AND GENERAL
TAILORS AND OUTFITTERS,
13, GEORGE STREET, HANOVER SQUARE, LONDON, W

Established for upwards of half a century on the Credit System, but now conducted exclusively for Ready-Money Payment and supplying

UNIFORMS AND MUFTI

Of precisely the same high-class quality as heretofore

AT GREATLY REDUCED PRICES.

ESTIMATES ON APPLICATION.

OVERLAND ROUTE and SUEZ CANAL.

Under Contract for the conveyance of the Mails to the Mediterranean, India, China, Japan, and Australia. The Peninsular and Oriental Steam Navigation Company dispatch their Steamers from Southampton, *via* the Suez Canal, every Thursday; from Venice every Friday; and from Brindisi, with the Overland Mails, every Monday.

Offices—122, Leadenhall-street, E.C., and 25, Cockspur-street, S.W.

HALL LINE.—STEAM from LIVERPOOL to BOMBAY, via SUEZ CANAL.—

Average passage, 26 days, including all detentions. Sail punctually as advertised.

Passengers booked at through rates from London, via Genoa, Naples, and Alexandria (Rubathino Line), joining the "Hall" steamer at Suez. Full particulars on application.

The magnificent fast steamship CHILDWALL HALL, 2,100 tons, 300 horse-power nominal, sailing 19th May. This steamer has been specially adapted for the East India trade. Her saloon and state-rooms are spacious and well-ventilated. The accommodation is unsurpassed. Only first class passengers taken. Fare from Liverpool, 45 guineas. Surgeon and stewardess carried.

Succeeding steamers:—

Trentham Hall .... 30th May.
Branksome Hall............ To follow.
City of Baltimore .... To follow.

For passage apply in London to Henry S. King and Co., 65, Cornhill, and 45A, Pall Mall; for freight, to J. H. Wackerbath, 18, Cullum Street, E.C.; or for freight and passage to ALEXANDER and RADCLIFFE, 8B, Liverpool and London Chambers, Exchange, Liverpool.

H.M. TROOPSHIPS, PORTSMOUTH DOCKYARD

OFFICERS' BAGGAGE cleared through Customs,

Warehoused, Shipped or Forwarded, by CURTISS and SONS, Railway and Shipping Agents, 88 to 94, Broad Street, Portsmouth.

Letters and telegrams for passengers promptly delivered free of charge.

CURTISS and SONS' rates for Warehousing or removing Furniture, &c., are exceedingly low.

OFFICERS' BAGGAGE, &c.

—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER STREET BAZAAR, W.

The warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

Separate lock-up rooms for large or small quantities.

JOHN HANES, Manager.

Store Warehouses Baker Street Bazaar, W.

NAVAL AND MILITARY CLUB.

—The ANNUAL GENERAL MEETING of this Club will be held at WILLIS'S ROOMS, 26, King Street, St. James's, on MONDAY, the 28th of May, at 2.30 p.m.

April, 1877.

FURNISH YOUR HOUSE or APARTMENTS THROUGHOUT on MOEDER'S HIRE SYSTEM.

The original, best, and most liberal. Cash prices; no extra charge for time given. Large useful stock to select from. Illustrated priced Catalogue, with terms, post free. 248, 249, and 250, Tottenham Court Road. Established 1862.

Printed by JAMES MELDRUM and published by EDWARD O'BRIEN PALMER for the Proprietors, at the Office, No. 16, Wellington-street, Strand.—SATURDAY, May 5, 1877.

"AND jesting Pilate asked, 'What is truth?' And there were none who answered him." Captain P. Arvers, in pursuance of the excellent regulation for keeping up *esprit de corps* in the French Army, has recently written a history of the 82nd Regt., formerly the Legion of the Jura, and subsequently the 7th Regiment of Light Infantry, under which style and title it was known to our soldiers in the Crimea. It was distinguished at the capture of the Mamelon Vert, in the great night sortie of March 22, 1855, and, earlier still in the campaign, at Inkerman. Now, here is what Captain Arvers says of the part taken by the regiment in the latter action:—"At 3 a.m. on the morning of November 5, 1854, the 1st Battalion of the 7th Léger was acting as support of the grand guard near the Telegraph. Towards 6 a.m. it was about returning to camp when a very lively cannonade was heard in the direction of Inkerman. Sixty thousand Russians, under cover of a fog, having arrived on the plateau of Inkerman, were attacking the English army. The 2nd Division of the Army of Observation at once got under arms, and the 2nd Brigade, of which the 7th Léger formed part, was directed to proceed to the help of the English. When it was close to the Mill, the fog having lifted, the corps of General Liprandi was visible in the plain of Balaclava, marching against our position. The 2nd Brigade at once turned back, and the 1st Battalion of the 7th took post by the Telegraph, the 2nd Battalion being on our line of circumvallation. Scarcely had they halted ere the 1st Battalion of the 7th Léger received orders to advance again and to hasten to the help of the English army, cut in two at its centre, and driven back into its very camp. After a march of three kilometres at the double *(pas de course)* the battalion arrived in presence of the Russians. Greeted by the cheers of the English, it formed in front in line, and, although out of breath after its run, advanced with bayonets at the charge, led by its gallant commandant, against the Russian columns, which gave way before its shock. Obliged to retire behind an earthwork to reform, at the signal of its chief it precipitated itself a second time on the Russians, cutting a bloody path through the centre of their mass. The Russians, yielding to this furious charge, fled to the very bottom of the ravine, in which they rallied under cover of their Artillery and of new reinforcements. The 1st Battalion then regained the plateau, to await the attack of the enemy. At this moment a battalion of the 3rd Zouaves, a battalion of Algerian Riflemen, and four companies of the 4th Battalion of Chasseurs-à-pied came up. These three, uniting with the 1st Battalion of the 7th Léger, charged the Russians together and overwhelmed them, driving them at the point of the bayonet to the very bottom of the Inkerman ravine, where, crowded together and offering a compact mass to the fire of musketry, they were *écrasés* and put to utter rout. The 1st Battalion of the 7th Léger, to which belonged the greater part of the honour of the day, paid dearly for its glory. The brave Major, whose gallantry was specially mentioned by the General-in-Chief a few days after in his report to the Minister of War, had his horse killed under him; he was, indeed, for an instant in serious danger of being taken, and was only extricated from the midst of the enemy's column by his soldiers, among whom Private Giroux was especially distinguished. Captain Botta, Sub-Lieutenant Mayer, and Sub-Lieutenant Champion were killed. Sub-Lieutenant de Bermon died of his wounds. Captains Bréqer and Blot, Lieutenants de Gourville, Clavelin, Laffargue, de Bermon, and Rinccheval, and Sub-Lientenants Quinernant, Drevon, and Patriarche were wounded. There were 6 Sub-Officers, 4 Corporals, and 32 soldiers killed; 8 Sub-Officers, 14 Corporals, and 131 soldiers wounded; in all, 209 killed or wounded, and seven missing." Any one who desires to see the Kinglake version of Captain Arvers' account must refer to Vol. V., from page 329 to p. 406. *Part of the enemy's vanguard overrunning the crest of the Home Ridge, but confronted by the battalion of the 7th Léger.* That is the marginal note. The knots in the thread of the long narrative are these:—"But a French battalion was approaching—the battalion of the 7th Léger. This force halted in front of the camp, and formed line with its left on the Post Road. Met thus . . . the Russians at some moments stopped, at others moved doubtfully forward. . . . The battalion of the 7th Léger began to advance up the slope, but all at once came to a halt. . . . An English Staff officer rode galloping down to the battalion, and stopped when he reached its left flank. . . . The battalion was visibly faltering. Then the English Staff officer was heard undertaking an actual harangue in plain French, and vehemently asking all Frenchmen within reach of his voice whether they were indeed of that nation which had so nobly contended with ours in the Peninsula? . . . The battalion took heart, and once more began to move forward. Soon, however, the English Staff officer was struck by a shot, which . . . forced him to quit the field, and again the battalion stopped. Then it broke, began to fall back, and retreated down the hill side. . . . When Lord Raglan saw the French falling back he for once, they say, suffered his countenance to disclose the vexation he felt." There follows an excellent Kinglakian account of the rally of 100 men of the 55th, and of their attack on the Russians; of Egerton's advance with the 77th, in rear of which the 7th Léger rallied, and again advanced in double column of companies, and of the accession of sixty truant Zouaves forming a line, of which the Zouaves and 170 of the 57th were the left, the 7th Léger the centre and right, and of a movement of which Mr. Kinglake says: "It seemed that the fate of the combat, carrying with it the fate of the battle, if not of the invasion itself, might, after all, come to depend upon the hitherto uncertain quality of the young French battalion." The English troops were retreating before what Mr. Kinglake calls the great trunk column of Russians, when, "somewhat suddenly, and with great joy, they found they were retreating upon a strong body of red-capped soldiery drawn up in good order at a distance of not more than about a hundred yards." The retreating English impeded the opening of the French fire, which was delivered as they effected a deployment from their column formation in the face of a powerful enemy only a few paces distant, and which wrought much havoc. But "from some cause or other, it happened that, with victory almost in its grasp, the young French battalion was seized with misgiving . . . lost its "moment for charging, then visibly loosened in structure, then ceased to stand fast." But Pennefather, Wilbraham, Thackwell, Glazebrook, Harding, and Macdonald, and several more of the Staff of the 2nd Division, "when the line faltered, burst down on it in a torrent of vehement speech." The French soldiery ceased to fall back on the left, but turned and broke in disorder on the right. The enemy's great trunk column, 2,000 strong, with exultant hurrahs, sprang forward to clench the victory, but they were suddenly arrested by Colonel Daubeny and thirty men of the 55th, who charged their rear, and "froze the rush of the column let loose on the broken French soldiery." Pennefather seized the moment; there were hurrahs, cries, commands, entreaties, clarions, and drums as he and the rest of the horsemen round him "achieved their purpose," and the 7th Léger and the few English soldiers supporting or combatting with them "made good their advance in the wake of the great trunk column, now slowly retreating before them The 7th Léger were, however, now called upon to aid the 6th of the Line by Bourbaki, and, when they advanced to execute an attack on the enemy's centre later in the day, found the English in front of them," These were, says Mr. Kinglake, "the last conflicts the French Infantry undertook in the battle of Inkerman."

As a result of the remarks we made some time since on the disaster which happened to the Newcastle, we have received several letters from the Detached Squadron in which we are thanked for having brought the matter under notice, and in no instance have we been accused of having overstated the sad affair. Our desire, and the desire of our correspondents, is that the other side shall be heard. Thus far there has been a strong suspicion that some unfortunate mismanagement or want of judgment played a lamentable part in the catastrophe, and that more might have been done. But, seeing the long and tried service of the majority of naval Captains, it would be but right that the officer in question should have an opportunity of removing the doubts which at this moment exist in the minds of many, and we have thought it better in the present juncture not to insert the communications we have received from officers and men on the subject, believing that the Admiralty will cause a searching public inquiry to be held into the whole circumstances of the case, and we cannot doubt that the Captain of the Newcastle is as anxious as any that such an inquiry should be held. Of course, no one should be so well able to give an accurate account of any occurrence happening on board his ship as the Captain, yet it appears that in the official report sent to the Admiralty, and which was given to the House by the First Lord, there are certain errors. "About 2.50 p.m." is named in that official report as the time of the accident, but in the ship's log 3 o'clock is the time recorded, and ten minutes make a wonderful difference in a case of life or death. The statement that the "lifebuoy was immediately let go and the ship brought to the wind" should read, "It was more than a minute before the starboard lifebuoy could be let go, and it unfortunately fell on its side, and the port buoy could not be let go until it was too late to be of service." It has been officially reported that the lifeboat was at once cleared and lowered, and look-out men were placed aloft in the mizen top and topmast cross-trees to look out; but before the cutter was clear of the ship, Miles was observed to throw his arms up and Mr. Wingfield struggling to support him, when both were lost sight of. On the other hand we have it that, it was quite ten minutes before the ship was hove to. She was running with main and mizen topgallant sails, single-reefed topsails, and both courses, between eight and nine knots, with a heavy but not a broken sea. The starboard lifeboat was manned and lowered, but owing to the ship having much way on her it was found impossible, when the boat touched the water, to free the Service hooks (not Kynaston's or Hill and Clarke's) with which she was fitted; consequently, she nearly capsized, two men and five oars were jerked out of her, and a considerable quantity of water was shipped. Happily the men were hauled on board. The signalmen, on the alarm, at once repaired to their stations aloft, and the one on the mizen topmast head observed Mr. Wingfield and Miles together in the water. Mr. Wingfield was trying to place a patent life-preserving collar on Miles's neck, the brave young officer thus nobly sacrificing one of the chances of saving his own life in order that the drowning seaman might be kept afloat, and he noticed Miles with his arms up, but whether it was to assist Mr. Wingfield to adjust the collar or from exhaustion he could not say, his attention being attracted at the time by the accident to the cutter, and when he again looked he failed (most probably owing to the motion of the ship and the distance she was from the men—more than a mile) to catch sight of them again. A few moments after the starboard lifebuoy was let go, R. Hesk, A.B., and G. Reed, A.B., jumped overboard from the quarter, and were both seen by two officers within thirty yards of the buoy swimming vigorously towards it. Another officer says he saw one of them upon the buoy. The ship was certainly allowed to drift away to leeward, and no attempt seems to have been made to beat up towards the ship's boat and the scene of the accident. The explanation we have been given of this circumstance is, that Captain Douglas was anxious not to wear ship, lest he might lose sight of his boat; but surely the cutter would hardly have lost sight of the ship, and the bearings of the spot to which she was directed to pull would have been known, and even if the ship could not have beaten up to the boat, she could have run down to the ship. As to the roughness of the sea, we are informed that the regular N.E. monsoon was blowing, and its force for several days had been logged from 4 to 5, the continuous wind having caused a heavy swell rather than a rough sea. Having said this much, it now remains to give the Captain of the ship the points upon which there are the gravest doubts, in order that he may be prepared to answer them, for it is quite possible that few serving in the ship would dare to approach him with suggestions that the course he adopted was not all that could have been wished. These are a few of the questions which should be satisfactorily answered in order to remove all doubt:—Were there any confused or contradictory orders given which would be likely to cause delay in bringing the ship to the wind? How long was it before she came to from the time Miles fell overboard? Was the temperature of the sea taken in the watch? Has any addition or alteration been made to the log since the accident, and, if so, when and by whose order? What order was given by the Captain when the lifeboat touched the water, and what was the cause of the accident that so nearly happened to her? Did an officer, seeing the peril in which she was, call away the second lifeboat, and was he immediately ordered off the bridge for having done so? How long was it from the time of the accident until the lifeboat was clear of the ship, and how many hands and oars was she short when she got away? Would there have been any danger of losing sight of the boat had the ship been wore at once? What orders did the Commander give when he heard the cry, "Man overboard?" and did he not ask the Captain to beat the ship up to the assistance of the boat, and did not other officers of the ship urge the same course? What answer was given to this request? When was the recall hoisted for the first time? How soon was it after the boat had left the ship? Was it hauled down again? By whom and for what reason? At what time was it rehoisted? What was the cause of the lifebuoys being in so inefficient a condition, and has it been customary to keep sentries on the lifebuoys? So much for the ship. The other questions mostly concern the Midshipman who was sent away in charge of the lifeboat and the crew of that boat, the principal one being whether they believe they ever reached the spot where the men first went overboard, and their opinion on being recalled to the ship. The lowering apparatus in use for the lifeboats might also be made the subject of inquiry. That the Captain is anxious to meet any investigation that the Admiralty may see fit to order, we cannot doubt, and we understand that he has already been engaged in collecting such evidence as would be of service to him; but we would venture to remark that the manner in which that evidence has been gathered has given cause for complaint amongst those who have been examined. Our Blue-jackets, when brought face to face with their Captain in his cabin, and when their answers are being reduced to writing, will answer just what they are asked and no more, and for leading questions to be put to men, for their evidence to be taken down and then put forward as their "statement" of the facts of the case as it appears to them to lie, has impressed them and their shipmates with the idea that they have said just what their Captain wished them to, neither more nor less. We merely give this hint to the principal mover in this matter, and in no manner blame him in his endeavour to procure any amount of evidence that will clear the terrible doubts that now surround the sad events of December 13. For the credit of the Service, for the peace of mind and satisfaction of those who have been deprived of the gallant souls they so dearly loved, and in the hope that others may never be deterred from such deeds of daring by the fate that has befallen those three brave "Newcastles," two of whom were led to this deed by their gallant young Midshipman, no wish is stronger within us than that the Captain of the ship may be able to prove beyond all doubt that he acted with the best motives, and that he did all a seaman and an officer could have done to stand by those who risked their lives to save a shipmate.

The "evolutionary cruise" which is about to be carried out under the command of Vice-Admiral Seymour with the Channel Squadron, strengthened by two ships of the First Reserve and the latest and most powerful turret-ship yet afloat, cannot fail to give some valuable results, and it must be satisfactory to all to see such an ironclad squadron assembled in the Channel and ready for immediate service. By the addition of these ships to the command of Admiral Seymour, the strength of the Channel Squadron will be doubled, the Minotaur, Black Prince, Achilles, Defence, Lord Warden, Valiant, and Thunderer representing nearly 60,000 tons of armour-plated ships, carrying 116 guns and 5,000 men. At the same time the Fleet in the Mediterranean, although slightly reduced by the withdrawal of the Triumph, now consists of twenty sea-going vessels (of which ten are armour-plated), having an aggregate complement of just 5,000 officers and men. If the Admiralty had desired to give the most direct proof of the untruthfulness of the charges recently brought forward, that there were so many of our ironclads now under repair as to seriously cripple our naval strength, nothing could have better answered the purpose than the assembling of so powerful a squadron in the Channel at a moment when we have also a larger Mediterranean Fleet than has been seen for years. As a fact, the Fleet was never in a more efficient condition than it is now, notwithstanding the difficulties and immense outlay inseparable from keeping ironclads in thorough working order.

We cannot commend too highly the *esprit* of the old "Havannahs"—the Commission of 1855-59—who still keep up their associations as former messmates by meeting together at an annual ship-dinner. As many as can possibly attend, renew their old friendships on these occasions, and on Thursday last they again tucked their legs under the same mahogany. At this time of the year the Clubs are full of Army men who have run up to town to attend their regimental dinners, and it would be well if the same pleasant gatherings were more in vogue in the sister Service. The difficulties in the way of ship-dinners are, of course, far greater than with regiments; but even if it were found impracticable to keep them going for any length of time, there should be no difficulty in organizing squadron dinners. For instance, numbers would gladly attend a China Squadron meeting, say those who were on the station during Sir Henry Keppel's command, and a Channel Squadron dinner of those who have served with Admiral Beauchamp Seymour could not fail to be a success, and we believe we may say that such popular chiefs would be only too happy to preside. It may be too late this season to organize any such gatherings, but we hope that the example set by the "Havannahs" may find many followers.

Rear-Admiral Phillimore had been spoken of as likely to resume, temporarily, his former appointment as second in command of the Channel Squadron during the forthcoming evolutionary cruising; but, as the appointment of a permanent second in command has now been revived, Rear-Admiral W. M. Dowell, C.B., has been selected to fill the post.

Captain Sir William Hewett, K.C.B., will take command of the Achilles on her being turned over from the First Reserve to the Channel Squadron.

The Ruby, composite corvette, has been ordered to be brought forward for commission at Sheerness, and the command will be given to Captain R. H. Molyneux.

Commodore Sullivan, C.B., has started on a tour of the West Coast, calling at Cape Coast Castle, Bonny, the Congo, Loanda, &c., and anticipated being back at the Cape early in July.

An interesting Report has been made by the Committee appointed to inquire into the establishment of the Royal Naval College, extracts of which will be found in another column. As a whole, the report proves the College to be working in a satisfactory manner, but there is an exception—namely, with respect to the half-pay Lieutenants, voluntary students. The Committee complains of the irregularity of their attendance, a fault which has already resulted in the removal of several from the College, and, to judge by a marked falling off in the entries of students of this class, it may fairly be supposed that they are not satisfied with their position. There were seventeen more half-pay Lieutenants studying at the College on January 1, 1876, than on January 1, 1877, the total reduction in the number of voluntary students during the same period being eighteen.

The announcement in Parliament that the Admiralty possessed the power to call upon retired officers to serve in case of war has whetted the appetites of many for another turn of service, and there will be no lack of officers ready and willing, should the call be made.

On Thursday the Narcissus, Immortalité, Topaze, and Newcastle, forming the Detached Squadron, under the command of Rear-Admiral Rowley Lambert, C.B., arrived in Plymouth Sound. The Immortalité has proceeded to Portsmouth and the Newcastle to Sheerness. We hear that the health of the Rear-Admiral commanding has not been at all satisfactory of late, and though it improved after leaving the Cape, he is anything but well at the present time.

By the retirement of Colonel Drury, R.M.L.I., Lieutenant Turner has obtained his company after nearly eighteen years' service, and the retirement of Captain Coppin will promote the last of the Lieutenants of the year 1862, Lieutenant J. A. Sweny, who entered the Service in November, 1859. It is no matter for wonder that the First Lord of the Admiralty confesses to having been much struck with the unfortunate position of the subalterns of this corps, and, if the Treasury could only be equally struck, there would be some chance of matters mending earlier than now seems probable. In the Artillery Division affairs are not in so bad a state, for the retirement of Major Durnford will promote a Lieutenant of 1867 who entered the Service in 1865, and has only a total of eleven and a-half years' service, instead of nearly eighteen, like the junior Captain of the Light Infantry.

The long commission of the Myrmidon which has just been brought to a close, is deserving of notice, for few ships return to pay off after four and a-half years' foreign service with so many of her original officers on board. Her commander, the Hon. Richard Hare, commissioned her at Sheerness on October 24, 1872, and all the officers who joined with him have remained throughout the commission excepting the Paymaster, who was appointed Secretary to the Commander-in-Chief. This is an exceptional circumstance, and a happy one, seeing how difficult it is for some Captains to keep their officers. And, as regards the discipline of the ship, we hear that a man in the second class for conduct is quite a *rara avis*. We believe Commander Hare has been in command now nearly eight years, and we hope that one who has shown himself well versed in the art of commanding may soon be selected for promotion, many juniors having already been advanced over his head.

It appears that the Committee appointed to consider a scheme of promotion and retirement for the Royal Marines has not yet made its Report, as was generally supposed, nor is any day named for it to be ready, but Mr. Egerton has promised to lay it before Parliament as soon as possible. This is another surprise, and the delays which have attended the development of a scheme for the relief of the present stagnation in promotion are remarkable. But we have reason for believing that the Committee referred to in the question put by the member for Plymouth has concluded its sittings, and it is presumed has prepared its report, but why it has not been presented is a query that remains unanswered. The Admiralty must be aware that the report is ready, and if they are, as stated by their Secretary, prepared to lay it upon the table of the House as soon as received, it is surely their duty to call upon Mr. Welby, the President of the Committee, to submit it. It is, however, the general opinion that a quiet hint has been given to withhold the report in question for a more convenient season.

We believe that Commander Hubert Grenfell will not be Naval *Attaché* to the British Embassy at St. Petersburg, as has been stated, but will be given the post of Assistant Naval *Attaché* for Europe, an appointment which we stated last week was likely to be created.

The rules and regulations under which "Torpedo Lieutenants" are to qualify for this special duty have been received on board the Vernon.

Admiral Inglefield did good service last Saturday at the Newspaper Press Fund Dinner in giving a formal denial, as member of the Committee on the outbreak of scurvy in the Arctic Expedition, to the falsehood that the Lords of the Admiralty had objected to the strictures of the Committee on the conduct of the Expedition, and had called on them to modify or alter their report. There are people in the world who would believe that a public body like the Board of Admiralty would be capable of such conduct, and it was therefore right to give the story its *quietus*, and to explain the cause of delay in presenting the report. We are not quite so sure that our Navy is "finer" in the sense of being stronger than the Navies of any three of the Great Powers together; but there we hope Admiral Inglefield was right also.

The Tamar has arrived at Hong Kong with the new crews for the Charybdis, Nassau, Hart, Sylvia, and Modeste, all of which will be recommissioned forthwith.

The memorial presented to her Majesty by the Admiralty in recommending the appointment of H.R.H. the Prince of Wales as Honorary Captain of the Royal Naval Reserve, was as follows:—"Whereas we are of opinion that it would tend to the advantage of your Majesty's Service if the name of his Royal Highness the Prince of Wales were placed at the head of the list of the honorary officers of the Royal Naval Reserve; and, whereas his Royal Highness has expressed his willingness to accept such a position with the rank of Honorary Captain, we humbly beg that your Majesty will be graciously pleased to authorise us to appoint his Royal Highness to be an Honorary Captain in the Royal Naval Reserve accordingly. The uniform for such rank we recommend should be similar to that of the Captains of the Royal Navy, except as regards the special distinctions prescribed for officers of the Royal Naval Reserve by your Majesty's Order in Council of March 1, 1864."

The 45-inch Gatling is to be added to the armament of the new corvette Bacchante, now preparing for sea at Portsmouth, and her tops are to be fitted accordingly. She will be ready for commission in the course of next month.

The Channel Squadron having been ordered to be strengthened by the substitution of the Achilles, which is in capital order, for the Resistance, which is defective in her engineering department, the crew will be turned over at Devonport in the course of next week, and the Achilles will be ready for sea within a fortnight.

Rear-Admiral Sir Leopold M'Clintock has received from the Admiralty a letter complimenting him on the able administration of Portsmouth Dockyard during the period of his holding office as Superintendent.

The news of the death of the Bishop of Versailles ought not to be allowed to pass without a word to call attention to the character of a prelate who would have done honour to any Church, and whose Christian virtues were powerfully if painfully illustrated during the time of the German occupation. We live so fast, the chariot wheels of history travel so rapidly, and events are either so large or exercise so much influence over the present by reason of the vivid manner in which they are laid before us, that it is difficult to keep in mind the details even of such a tremendous struggle as the war between France and Germany six years ago. It may be forgotten that the Château of Versailles, now the scene of the patriotic labours of the legislative bodies of the French Republic, was then a vast hospital filled with wounded men, that the Emperor King was lodged in the Prefecture, that Prince Bismarck was resident in a quiet little side street, that Lutheran heretics thronged the Chapel of Lewis the Great and the Cathedral, that every public building in Versailles was turned into an infirmary, where wounded and sick, French and German, were tended by all sorts and conditions of women and men throughout that dreadful winter. The Bishop was the centre of the hopes of the many thousands of French people in Versailles, who, living under martial law, and cut off from communication with their friends, were exposed to great privations. He and the Maire represented to these poor people all that was then left of France, and it may safely be said that the Bishop of Versailles won the respect of all the Prussian authorities with whom he was brought in contact on many an errand of charity and love, and that he bore himself in a time of trial with great dignity and temper.

We have from time to time called the attention of our readers to the admirable series called "Le Cours d'Art Militaire," by Captain Barthélêmy, published by Delagrave, of Paris, who has given to the world a very good edition of "Geographie Militaire," in one volume, a "Cours de Fortification," in one volume, and a "Guide Medical Pratique de l'Officier," in one volume, which, with the two volumes of the work of Captain Barthélêmy, form a compact, and, we may say, complete military library for the use of French officers, and may be very advantageously consulted by our own.

The *Pall Mall Gazette* of Wednesday was "officially" informed that there is no foundation for the statement in some of the morning papers that Sir L. Simmons or any other General had been selected to command an expeditionary force. There is no force of the kind, and therefore the official contradiction is authorised by the facts; but there is more in the statement than meets the eye, and the *Pall Mall Gazette* may, on inquiry, ascertain that Sir J. L. Simmons was most assuredly "thought of" in high places should certain things occur. And so as to certain other matters which have been announced —let us say at least prematurely—for they may never come to pass, and were at most contingent remainders. There is, however, no truth in the statement that English officers have been sent to select a site for an entrenched camp at the entrance—there are two—to the Suez Canal. God help the officers and men on duty at such a post, if it were made!

The Brigade of the Bengal Army, which is being vacated by Brigadier-General Sir C. H. Brownlow, K.C.B., on the expiration of his five years' tenure, is to be given to Colonel J. I. Murray, C.B., Bengal S.C., commanding the 14th Bengal Cavalry. Colonel Murray served in the Punjab campaign of 1848-49 (medal). Served throughout the Indian mutiny campaigns of 1857-59; present at the battle of Shahgunge; commanded Rajah Gobind Sing's Jât Horse at the battle of Allyghur (mentioned in dispatches "for conspicuous gallantry," wounded, and charger wounded); served as a volunteer at the battle of Agra; employed in November and December, 1857, in raising the Jât Horse and in restoring order in the Allyghur and Etah districts; commanded at the Cavalry engagements at Kutchla Ghaut, and defeated with 200 sabres of the Jât Horse 600 Irregular Cavalry mutineers, and held the Rohilcund rebel army in check till the arrival of General Penny's force on March 11, 1848; in April, May, and June with the Jât Horse guarded successfully the Ghauts on the Ganges in the Allyghur and Etah districts against the Rohilcund rebels; commanded the regiment throughout the second Oude campaign and the operations on the Nepaul frontier, including the action near Bootwal, attack on the rebels in the hills, and defeat of the Nusseerabad rebel brigade at Durreahpore; commanded a column in the final operations on the Nepaul frontier (medal, Brevet of Major, and repeatedly thanked by the Commander-in-Chief and the Government). He entered the Army December 10, 1842; became Brevet Lieutenant-Colonel, November 6, 1866; Lieutenant-Colonel, December 10, 1868; and Colonel, November 30, 1871.

Major-General Michael Bruce is the officer referred to by Mr. Stacpole in his question put to Mr. Hardy on Tuesday, as to the practice with regard to the command of the Home District. The present holder, Major-General Stephenson, has not exercised the command for twelve months yet, and it is only reasonable to suppose that by the time he vacates there will be several officers eligible for the appointment. Colonel Higginson, for instance, is fast nearing the head of the list, and will, doubtless, be a General officer before the end of the year, whilst Colonel Percy Fielding will have attained General's rank by the end of 1878. These, at any rate, will be available for the employment by August, 1881, when, in the ordinary course, General Stephenson should retire. To suggest, as Mr. Stacpoole seemed to do, that the Home District should be thrown open to the Line is all very well, but the authorities see, and the Army sees too, that such an arrangement would be in every way objectionable, and would result in differences which could not but prove damaging to the interests of the Service. Besides, the Guards have a right to be considered, and, seeing that they have to do the duties of the Home District, it is but natural they should prefer that those duties should be ordered by an officer who has risen in the "Brigade," and appreciates the difficult nature of the work its members are called upon to perform.

On the occasion of the Queen's visit to Aldershot, on Wednesday last, her Majesty visited the Garrison Instruction Lecture-room for the purpose of inspecting Captain Wilkinson Shaw's model for illustrating the study of minor tactics. Sir Thomas Steele, in explaining the system, expressed his opinion that it had proved a great success; and after Captain Shaw had exhibited the process of working the model, the Queen was pleased to express to him, in very gracious terms, the interest which she felt in the subject of his ingenious invention. Captain Shaw has now established two voluntary officers' classes, numbering about 100 students, besides a class composed of fifty non-commissioned officers, for the conduct of which Major Haldane, 64th Regiment, has offered his services, and who, with the Lieutenant-General's permission, acts as assistant to the Garrison-Instructor in this course of study.

Lieutenant-General Sir John Garvock succeeds General Sir Hastings Doyle, K.C.M.G., in command of the Southern District. Sir John Garvock served on Sir Harry Smith's Staff in the Kaffir war of 1850-52 (medal). He also acted as Adjutant-General and Quartermaster-General to Sir Harry Smith in the action with and defeat of the rebel Boers at Bloem Plaats (South Africa), August 29, 1848; was a Brigade-Major in Sir Harry Smith's Division throughout the Sikh campaign of 1845-46; and was present at the battles of Moodke, Ferozeshah (horse shot under him), Buddiwal, Aliwal, and Sobraon, where he was himself severely wounded, and his horse struck in three places (medal with three clasps); commanded the Eusofzai Field Force, consisting of 12,000 men and twenty-four guns, in the operations on the North Western-Frontier of India, in December, 1863, which led to the completely successful termination of the war and submission of the enemy (K.C.B. and medal). He entered the Service September 4, 1865; became Major-General, April 1, 1863; and Lieutenant-General, December 29, 1871.

Captain Lord Albert Seymour, Scots Guards, has been appointed Aide-de-Camp to Lieutenant-General Sir John Garvock, G.C.B., at Portsmouth. His lordship entered the 43rd Light Infantry as Ensign June 26, 1867, and was transferred from that regiment to the Guards as Ensign and Lieutenant by purchase February 4, 1871, becoming Lieutenant and Captain August 24, 1874. He was employed from May to December, 1875, as Aide-de-Camp to Lieutenant-General Sir Thomas Steele, K.C.B., at Aldershot.

Captain G. H. Hutton, 23rd Fusiliers, succeeds Captain H. M. Moorsom, Rifle Brigade, as Aide-de-Camp to Major-General E. W. D. Bell, V.C., C.B., commanding the Cork District. Captain Hutton embarked for the Gold Coast with the 2nd Battalion 23rd Fusiliers, and served in the second phase of the Ashantee war in 1874, and was severely wounded at the battle of Amoaful (medal with clasp). He joined the Army September 18, 1863, and obtained his company August 12, 1876.

As the revolvers of other makers, such as those of Colt, Tranter, and also of Messrs. Webley, are extensively used in all branches of the Service as well as those of Adams, we are glad to observe in this month's General Orders an addition to the General Order for March respecting revolvers, to the effect that all officers having revolvers taking the Government Boxer 45-cal. Service cartridge will be able to obtain for them ammunition from the stores of an army in the field. The General Order of March made it appear as though officers who had furnished themselves with revolvers other than those manufactured by Adams would be put to the expense of providing themselves with new weapons.

Captains H. M'Calmont, 7th Hussars; H. Trotter, Royal Engineers; and J. C. Fife, 65th Regiment, have been appointed additional Military *Attachés* to the Embassy at Constantinople.

The 33rd Brigade Depôt, at Bedford, is about to be formed, under command of Colonel F. A. Willis, C.B., the barracks at that place having been completed and made ready for occupation.

Colonel H. A. Smyth, C.B., has been appointed Colonel on the Staff commanding the Royal Artillery in the Southern District, vice Colonel J. G. Petrie, C.B., whose period of service has expired. Colonel Smyth served in the Crimean campaign from June, 1855, including the siege and fall of Sebastopol (medal with clasp and Turkish medal). He joined the Army December 20, 1843, and became Brevet Colonel August 31, 1870.

A statement appeared in the daily papers last week that the 29th Regiment, at Chatham, had received most unexpected orders to at once increase its establishment from 604 to 903 of all ranks. The "London Correspondents" have utilised this information, of course, making it a peg whereon to hang all sorts of warlike reports. But it so happens that the Eastern complications have nothing whatever to do with the order issued to the 29th. The regiment is associated under the localization arrangement with the 36th, lately arrived from India, and, as under the system in question no two battalions forming the same brigade are to be at home together, the 29th, though it only returned in April, 1873, is to supply the place on the list of corps "first for abroad" which the early departure of the Connaught Rangers leaves to be filled. The surprise occasioned by the order is not, perhaps, to be wondered at, seeing the low position the 29th Regiment holds on the roster—forty-sixth—but it is not well to create unnecessary alarm at a moment when the Ministry has a very difficult duty to perform.

Lieutenant-General Sir George Balfour, K.C.B. (late Madras), becomes a Colonel Commandant in the Royal Artillery, in consequence of the death of Lieutenant-General J. W. Croggan. Sir George served with the Malacca Field Force in 1822-23, campaign against Kurnool in 1839, including the taking of Zorapore. Served with the expeditionary force in China throughout the war of 1840-42 (medal), including the first and second capture of Chusan, attack and capture of Chinhae, Ningpo, Tsekee, Segoan, Chapoo, Woosung, Shanghae, Chin Kiang Foo, and investment of Nankin. He joined the Army December 16, 1825; became Major-General, June 5, 1865; and Lieutenant-General, July 21, 1874.

Major-General F. Turner, R.A., becomes Lieutenant-General in the Army, consequent upon the death of Lieutenant-General J. W. Croggan, Royal (late Madras) Artillery, on the 2nd instant; but there will be no promotions in the junior ranks.

The *Temps* publishes a letter from Odessa which confirms what has been said about the condition of the Russian Army. The French correspondent was much astonished to find the Cossacks, instead of the uncouth savages he had imagined, carefully washed and shaved. He adds that these irregulars are the *enfants gâtés* of the Grand Duke Nicholas, and of public opinion.

The writer was much struck with a singularity which he remarked when the Artillery were defiling before the Czar. "The musicians at the head of regiments, instead of sounding their trumpets, sang, and their chief was transformed into the leader of a chorus. Some of *ces messieurs* accompanied the singing with a shrill whistling like that produced by a fife, which marked the measure, and which had an effect at once wild and graceful. In the Infantry the men who have good voices are instructed and formed into singing squads, which is an excellent practice, for nothing supports and enlivens the soldier during a march more than music. I think that a certain musical education forms a part, not to be disdained, of a good military education." The torpedo experiments exhibited before the Czar do not seem to have gone off well, for a condemned barge safely ran the gauntlet of these terrible submarine engines, which refused to go off at the right moment.

We are glad to learn that the appeal of the governing body of the Royal School for Daughters of Officers of the Army has been liberally responded to, but there still remains very much to be done to keep this excellent institution up to its present standard of usefulness.

An army corps is to be formed at Aldershot on the 25th proximo, consisting of three divisions, each division to be made up of one battery Royal Horse Artillery, two regiments of Cavalry, two batteries Royal Artillery, and seven battalions of Infantry, with the proper proportion of Royal Engineers and Army Service Corps. Total—Three batteries Royal Horse Artillery, six regiments of Cavalry, six batteries Royal Artillery, and twenty-one battalions of Infantry. The manœuvres continue until July 21, when the force will be distributed.

Although Colonel Hamley holds his appointment at the Staff College under the seven years' rule, and ought to retire on July 1, the Service will learn with satisfaction that it is the intention to extend the officer's term, and that Colonel Hamley has made known his willingness to entertain the proposals which have been made to him that he should continue at Sandhurst.

The Honourable Corps of Gentlemen-at-Arms has suffered a great loss by the death, which occurred suddenly yesterday morning, of its Captain, the Earl of Shrewsbury. His lordship succeeded the Marquis of Exeter in command of the Corps in February, 1875.

Lieutenant H. G. F. Siddons, Royal Artillery, has been appointed Assistant Inspector of Warlike Stores in Ceylon.

According to the *Lorraine Gazette*, Field-Marshal von Moltke has commenced reinforcing the garrisons in Alsace-Lorraine, and has notified this fact to the French Government. The garrisons of Frankfort, Cologne, and Mayence have been considerably augmented; and, if there was any truth in the rumour that the French contemplated pouncing unawares on a weakly-defended frontier, they have allowed their opportunity to slip. The French protest that they had no such intention, and that they wish to live at peace with all the world and Germany. The old Field-Marshal, however, knows that the French character is inflammable, and he has considered it expedient to set his house in order for fear of a conflagration. The French, on their side, are still uneasy with regard to the ulterior intentions of the Cabinet of Berlin, and they fear invasion, perhaps, more than Germany does.

Capt. Phipps, R.N., of the Warspite, has received a letter from Messrs. Siemans, the Telegraph Engineers, enclosing a cheque for five guineas, to be disposed of in any way thought proper for the benefit of the boys of the ship who so promptly came to the assistance of Messrs. Siemans on the occasion of the late fire at their works.

As the Indian trooping season terminates on the 13th inst., the five Indian troopships, carrying about 1,400 each, will be available for any other service on which they may be required. Thirty troopboats have been ordered, and are being built with all despatch, and are to be delivered by the contractors in the course of next month. This will place 50 of these boats at the disposal of the authorities, 20 having been previously ordered.—*Standard.*

According to a telegram despatched from Corfu on Saturday, the vessels of the Mediterranean Fleet lying there have been ordered to proceed to Crete, and a Paris telegram says that this news has caused "considerable sensation, and is regarded as confirming the universal impression that England must soon interfere in the struggle between Russia and Turkey."

It has been arranged that the Hercules and Triumph shall be provided with new boilers by the makers of their engines, and, in order to save time, the repairs to the machinery will be executed by the contractors, the workshops belonging to the Steam Reserve at Portsmouth being placed at the disposal of the contractors' men.

EPPS'S COCOA—GRATEFUL AND COMFORTING.—"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette.* Made Simply with Boiling Water or Milk.—Sold only in Packets labelled—"JAMES EPPS & CO., Homœopathic Chemists, London."

The Army.

5th Dragoon Guards. The two troops at Limerick are under orders of readiness for removal to the Curragh. They will be succeeded by a squadron of the 2nd Dragoon Guards.

4th Hussars. Major Clarke and Capts. Lawrell and Lay have been constituted a committee of paymastership, vice Capt. Murphy, transferred to the 10th Hussars, Capt. Lay performing the duties of paymr. on the responsibility of the committee. Lieut. Ramsay is *en route* to England from India in H.M.S. Euphrates.

9th Lancers. Lieut. Shearburn has been granted leave from India to England, on medical certificate, and with Capt. Bushman is expected home in H.M.S. Euphrates.

11th Hussars. Lieut.-Col. Annesley is about to be promoted brevet col. from March 21 last. Major Garnett and Lieut. Verelst have been granted leave from India to England, on medical certificate, and are expected home in H.M.S. Euphrates. Last summer a class of native Cavalry soldiers, fifteen in number, were, by the request of Major Davidson, commanding the 18th Bengal Cavalry, attached to Col. Annesley's regiment for instruction in fencing, single stick, and feats of arms, and this summer Major Upperton, commanding the 16th Bengal Cavalry, has applied to send a class of his men for the same purpose to the 11th Hussars.

15th Hussars. Capt. White and Lieut. Sharman-Crawford have been granted leave from India to Melbourne, Australia, from the 15th ult. to Oct. 15, on private affairs.

16th Lancers. Capt. Maillard's appointment as brigade-major of Cavalry at Aldershot is to date from April 13.

18th Hussars are in readiness to move from Colchester to Aldershot, there to be stationed. They will not be succeeded at Colchester until after the summer drills at Aldershot.

ROYAL ARTILLERY.

The *Pioneer* of April 14 says: "The claims of a certain class of Artillery officers for back pay have often been explained in these columns, and constitute a substantial grievance. We hear now that a deputation of officers of Royal Artillery, who have served in India, and who have these claims, were introduced early last month to Mr. Hardy, and laid before him a statement of their case. Mr. Hardy, while expressing his opinion that the matter should have been settled long ago, informed the deputation that he would at once see the Marquis of Salisbury and have the case decided. Officers in this country, concerned in the agitation, would do well to lose no time in using any Parliamentary influence they may have at the earliest opportunity, by post or telegraph."

Lieut.-Gen. J. W. Croggan, col.-commandant (late Madras), died at Tregunter-road, London, on the 2nd inst., aged seventy-two years. He entered the Army Dec. 18, 1823; became first-lieut., May 1, 1824; capt., Sept. 10, 1838; major, April 30, 1849; brevet lieut.-col., Nov. 28, 1854; lieut.-col., Feb. 11, 1855; brevet col., Nov. 18, 1857; col., Feb. 18, 1861; major-gen., June 12, 1866; col.-commandant, Dec. 14, 1868; and lieut.-gen., April 10, 1876.

The following officers were to have taken passage from India in H.M.S. Euphrates, now *en route* to Portsmouth, viz.: Col. W. F. Swinhoe, 9th Brig. (late Bengal), Major E. C. W. Raynsford, B Brig. R.H.A. (late Bengal); Lieut. A. N. Rochfort, 2nd Brig.; Rdgmr. G. L. Wilkinson, 6th Brig.; Qrmr. T. Gibson, N. M'Leod, and Vet.-Surg. J. Hammond, 5th Brig.

Capt. J. F. Houstoun, 6th Brig., has been granted leave from India to England for twelve months, on private affairs.

Lieut. H. A. Graves, a probationer, assist.-engineer, second grade, Public Works Department, is about to be admitted to the Bengal S.C., with effect from the 30th ult.

Lieut.-Col. J. Fulton (late Bengal), has been assigned local rank as col. in India from June 14, 1876, and Lieut. W. P. Graves, 9th Brig., from March 24, 1877.

Capt. R. McG. Stewart, D.A.Q.M.G., Lahore Division, has been granted leave from India to England for four months, on private affairs.

Capt. W. H. Auchinleck, Lieut. J. T. Bury, and Gunner Groves, 6th Brig., have passed the lower standard examination in Hindostanee.

Brevet Col. G. A. Wilkinson, A Brig. R.H.A., has been transferred from Meerut to Agra; Brevet Col. W. J. Gray, 9th Brig. (late Bengal), from Agra to Mean Meer; and Lieut.-Col. J. E. Cordner, 5th Brig. (late Bengal), from Meerut to Peshawur.

The *Standard* announces the appointment of Col. C. S. Henry, C.B., A Brigade R.H.A., to command the Royal Artillery at Aldershot, vice Col. J. Turner, C.B., promoted a major-gen.

ROYAL ENGINEERS.

The *Pioneer* contains the following obituary notice:—"We hear with much regret of the death of Capt. K. C. Pye, R.E. He died of typhoid fever in Calcutta on Sunday, April 8. The Government of India loses in him one of its most talented and valuable officers, and few men of his age will leave behind them such a circle of sorrowing friends, high and low. His rare combination of marked ability, tact, and sympathy is given to but few. All officers who have worked with or under him will feel that they have lost a true and manly friend, and a really competent leader."

It is more than probable, says the Lahore paper, that Lieut.-Col. E. C. S. Williams (late Bengal), will be confirmed in the appointment of Depty. Secretary to the Government of India in the Public Works Department, and that Col. F. W. Peile (late Bengal) will take Col. Williams' place. The appointment is not a very popular one with the officials of the guaranteed railways, which are now under his special care, past experience having taught them that making rose beds is by no means one of the gallant colonel's peculiarities or weaknesses.

Capt. G. F. L. Marshall (late Bengal) has been granted six months' furlough from India to England, on private affairs.

Lieuts. M. H. Gregson having completed a tour of seven years in India, has been relieved at the Thomason College, Roorkee, and is now *en route* to England in H.M.S. Euphrates, in company with Lieut. F. R. de Wolski.

1st or Royal Scots. The head-quarters and four companies of the 1st Batn. moved on Thursday from Mullingar to the Curragh, where the battalion will winter. Capt. Kennedy has been appointed to officiate as interpreter to the 2nd Batn., there being no qualified subaltern available. Surg.-Major Kelsall is on passage home in H.M.S. Euphrates, with a view of taking up duty at a home station, after having been for six years in medical charge of the 2nd Batn. in India.

2nd Queen's. Lieut. Adye, 1st Batn., is a candidate for the Indian S.C., and has been appointed to officiate as wing officer of the 5th Hyderabad Infantry, on probation.

3rd Buffs. Major Blaksley and Capts. Kerr and Graham have been appointed a committee of paymastership, Capt. Kerr acting as paymaster on the responsibility of the committee.

5th Fusiliers. Capt. Ormond, 1st Batn., has been granted leave from India to England, and was to have taken passage in H.M.S. Euphrates, now *en route* to Portsmouth. Lieut. Collins, 1st Batn., has leave to Calcutta from the 15th ultimo to Sept. 15, to study the native languages.

6th Regiment. Capt. Collis, 1st Batn., has been assigned local rank in India from April 27, 1872. Lieut. Stratford has been appointed interpreter to the 1st Batn.

7th Fusiliers. Capt. Smith, 2nd Batn., has been assigned local rank as major in India from Nov. 23, 1876.

8th King's. Capt. Malet, 1st Batn., has been appointed station Staff officer of the Puchmarhi Sanitarium. Capt. Wheeley and Lieut. Oakeley, 1st Batn., have been granted leave from India to England on medical certificate, and were, with Lieut. Ward, to have sailed in the Euphrates, now on passage.

9th Regiment. A sudden order has been received for the dispatch of the 1st Batn. from Colchester to Ireland. Lieut. Farley, 2nd Batn., has been assigned local rank as capt. in India, from Oct. 15, 1873. Lieut. Shuckburgh, 2nd Batn., is expected home from India in H.M.S. Euphrates.

11th Regiment. Lieut. Fairbrother, 1st Batn., is expected home from India in H.M.S. Euphrates.

12th Regiment. Capt. Boyes, 2nd Batn., has been appointed a brigade-major on the Bengal Establishment, with effect from the 15th ultimo. Lieut. French, 1st Batn., has been assigned local rank as capt. in India from Dec. 2, 1874.

14th Regiment. The old colours of the 2nd Batn., which are being borne on parade to-day for the last time with the regiment, were the first colours of the newly-raised battalions to be unfurled in an enemy's country. On the outbreak of the Maori war of 1860, the battalion, under Col. Sir James Alexander, was sent to New Zealand, where it did good service, and suffered severely during the ensuing campaigns. At the presentation of new colours to-day in Belfast by Lady Templetown, there is only one officer with the battalion who was in it when the old ones were given by the late Countess of Eglinton in Dublin, on New Year's Eve, 1858.

15th Regiment. The leave to England granted to Col. Wilkinson, 2nd Batn., has been cancelled at the officer's own request. Lieut. Shortland, 2nd Batn., is expected home from India in H.M.S. Euphrates.

16th Regiment. The 1st Batn. embarked at Portsmouth on Tuesday in H.M.S. Assistance for conveyance to Queenstown, *en route* to Buttevant. The depôt companies of both battalions proceed to Bedford, to join the 33rd Brigade Depôt, being formed there under Col. F. A. Willis, C.B. Capt. Tabb, 2nd Batn., was to have taken passage from India in H.M.S. Euphrates, daily expected at Portsmouth, *en route* to join the depôt.

17th Regiment. Capt. Brind, 1st Batn., has completed his five years as a brigade-major in India, and has reverted to regimental duty, with effect from the 15th ultimo. Capt. Edwards, 1st Batn., has been granted leave from India to England, and with Capt. Hunt, 2nd Batn., is on passage home in H.M.S. Euphrates. Lieut. Wiseman has been appointed interpreter to the 1st Batn., vice Lieut. Clarke, who has left India for England.

22nd Regiment. Lieut. Curtis, 2nd Batn., has been granted leave from India to England, on medical certificate, and is expected at Portsmouth in H.M.S. Euphrates.

25th Regiment. Capt. Coulson is expected home from India in H.M.S. Euphrates, now on passage, to rejoin the 2nd Batn. from the Staff; and Lieut. Thompson, 1st Batn., has been granted leave from India to England, on medical certificate.

32nd Light Infantry. A telegram from Cape Town, dated April 17, states that "H.M.S. Himalaya has embarked the 32nd Regt. for England."

33rd Regiment. Major Johnstone ranks as major in India from Oct. 27, 1874.

34th Regiment. Capt. Tuffnell is appointed to the vacancy at the depôt. Lieut. Martin is a candidate for the Indian S.C., and has been appointed to officiate as wing officer of the 5th Goorkhas on probation.

39th Regiment. Lieut. Egerton has been assigned local rank as capt. in India from March 3, 1877.

40th Regiment. Capt. White has passed parts I. and II., Examination B, in India.

41st Regiment. The command becomes vacant by the retirement of Col. Jordan, C.B.

43rd Light Infantry. The depôt will proceed with the 53rd to Jersey about the 27th inst.

44th Regiment. Lieut.-Col. Hand is on passage home from India in H.M.S. Euphrates. Capt. Odell has been granted leave from India to England, on medical certificate, and is also expected in the Euphrates.

ROYAL MARINES.

A party of two or three hundred Marines, who have been employed in Chatham Dockyard for some years, have received notice that they are no longer to be employed in the yard, but that mechanics and labourers are to be employed in their places. This has given great satisfaction to the dockyard employés, as the employment of the Marines has always been a sore point with them.

Capt. and Brevet Major E. C. L. Durnford, R.M.A., and Capt. C. J. Coppin, R.M.L.I., have been placed on the Retired List of their rank under the provisions of H.M.'s Order in Council of Feb. 22, 1870.

Capt. and Brevet Major W. H. H. West has been ordered to embark in H.M.S. Indus to relieve Brevet Major H. F Rull, who will be compulsorily retired for age on the 13th inst.

Consequent on the retirement, from 3rd inst., of Lieut.-Col. and Brevet Col. Geo. Drury, R.M.L.I., under the provisions of the Order in Council of Feb. 22, 1870, the following promotions have taken place, viz:—Capt. and Brevet Major

O. F. C. Fraser to be Lieut.-Col., and appointed to Plymouth Division; Lieut. H. A. L. Turner to be Capt. at the Portsmouth Division.

51st Light Infantry. Capt. Phibbs has been granted leave from India to England for two months and a-half, on private affairs. Lieut. Boxwell is *en route* from India in H.M.S. Euphrates, daily expected at Portsmouth. Surg.-Major Jones has been granted leave from India to England for six months, on private affairs.

53rd Regiment will leave Birr for Jersey about the 27th inst.

54th Regiment. Lieut. Browne has been granted leave to Bombay from the 15th ultimo to Sept. 15, to study the native languages.

59th Regiment. Capt. Powys has obtained leave from India to England, on medical certificate, and was to have taken passage in H.M.S. Euphrates.

60th Rifles. Capt. Byron, 2nd Batn., has been assigned local rank as major in India, from Sept. 25, 1875.

61st Regiment. Major Heywood has succeeded Major Hutton at the depot at Bristol, where Brevet Major Shiffner and Lieut. Whalley have taken up duty also, in relief of Capt. the Hon. E. J. Chetwyn and Lieut. O'Connell.

62nd Regiment. Capt. Kelly is expected home from India in H.M.S. Euphrates.

66th Regiment. Lieut. Barclay has been granted leave from India to England, on medical certificate.

68th Light Infantry. Major Galbraith has been granted leave from India to England for fifteen months, on private affairs. Capt. Crawford is about to be appointed to an adjutancy of Auxiliary Forces.

69th Regiment. Capt. Aitchison has joined the depôt for two years.

70th Regiment. Lieut. Freeman is a candidate for the Indian S.C., and has been appointed to officiate as first squadron officer of the 4th Punjab Cavalry on probation.

72nd Highlanders. Lieut.-Col. Beresford has been granted leave from India to England, on medical certificate, and is expected to arrive in H.M.S. Euphrates. Lieut. Downing has passed the lower standard examination in Hindostanee.

73rd Regiment. Capt. Hill has been granted leave from India to Australia and New Zealand from April 21 to Oct. 15.

75th Regiment will embark at Kingstwon at the end of the month for conveyance to Guernsey.

79th Highlanders. The sergeants assembled in their mess-room on Saturday, the 5th inst., to bid farewell to an old and much esteemed comrade, Sergt. P. Shaw, and present him with a timepiece, as a testimonial of their regard for him as a comrade in arms. Sergt. Shaw has been drill-sergeant for some years, and is now transferred as sergeant-instructor to the Haddington Rifle Volunteers. Colr.-Sergt. Makann was also present for the last time, as he leaves the regiment on Wednesday to join the Staff of the Lanark Militia on probation.

80th Regiment. A telegram from Cape Town, dated the 17th ult., states that "H.M.S. Himalaya has landed at East London a part of the 80th Regt." Major Twemlow obtains the command vacant by the retirement of Col. Smith, Brevet Major Rowland becoming major, and Lieut. Saunders capt.

83rd Regiment. Major Wakefield has been granted leave from India to England for fifteen months, on private affairs.

85th Light Infantry. Sub-Lieut. Galloway is retiring from the Service.

86th Regiment. A correspondent writes:—"The brigdr.-gen. commanding the Curragh District made his annual inspection of the regiment (Major Adams in command) to-day. The usual programme was gone through, and, judging from his strong expressions of approval, the general must have been well satisfied with the drill and appearance of the battalion. Considering that a very large number of young soldiers (many of them under six months' service) were in the ranks, it was really wonderful to see how steadily the battalion went through its several manœuvres. The general was good enough to express his great regret at losing the regiment, and was of opinion that very great credit would be given to it at Aldershot, to which station it is about to be moved. According to present arrangements it will embark at Kingstown on the 14th inst. in H.M.S. Assistance, and on arrival at the camp will go under canvas on Rushmoor Bottom."

89th Princess Victoria's. Capt. Richmond is expected home from India in H.M.S. Euphrates, to join the depôt for two years. Qrmr. Archer has been granted leave from India to England for fifteen months, on private affairs.

92nd Highlanders. Capt. M'Gregor and Lieut. Hamilton have been granted leave from India to England for fifteen months, on private affairs.

97th Regiment. Lieut. Cautley, who has been for some time past on the Staff in India, is on passage home in H.M.S. Euphrates, having vacated his appointment.

104th Fusiliers. The regiment is expected at the Curragh about the 4th proximo from Guernsey.

Rifle Brigade. The death is announced of Lieut.-Col. E. H. Glegg, late of the Brigade, of Backford Hall, near Chester, which occurred on Monday. Col. Glegg was born Sept. 18, 1809, and was consequently in his sixty-eighth year. Major Wood, 4th Batn., has obtained leave from India to England on medical certificate, and is expected to arrive in H.M.S. Euphrates. Capt. Stephen, 4th Batn., station Staff officer, has been appointed commandant of the Puchmarhi Sanitarium from the 13th ultimo.

Medical Department. The following officers are on passage home from India in H.M.S. Euphrates, viz.:—Surgs.-Major A. Guthrie, M.D., H. Kelsall, J. Davidge, A. F. S. Clarke, W. T. Martin, M.D., J. M'Creery, H. C. Gillespie, M.D., and J. Hector, M.B.; and Surg. W. J. Fawcett, M.B. Surgs.-Major S. A. Lithgow and J. Bonnyman on arrival in, India have been appointed to the Poona, and Surg.-Major R. W. Forsayeth to the Mhow Circle. Surg. J. E. V. Foss, M.D. has been transferred from the Poona to the Presidency Circle.

Chaplains' Department. The Ven. Archdeacon H. Press Wright, M.A., late senior chaplain, who is about to leave England for Vancouver's Island, was on Monday presented at Portsmouth with a testimonial, consisting of a handsome silver salver, with a tea and coffee service, and a purse containing 125 guineas, as a memento of his long and valuable services, and especially for his untiring exertions for the restoration of the Garrison Church at Portsmouth. In accepting the testimonial, the Archdeacon said he had always had the welfare of the soldier at heart, and had striven to serve him.

THE AUXILIARY FORCES.

MILITIA.

Royal Bucks, under command of Col. Pratt, which assembled on Monday at High Wycombe, proceeded on Tuesday to Aldershot for training. The regiment is encamped on Church-hill plateau.

Devon Artillery. The regiment assembled on Monday at Fort Tregantle. The officers present are—Col. Russell; Major Devon and Hon. Major Beadon; Capts. Arscott and Jones; Lieuts. Colley, Walker, Chanter, and Loveband; Sub-Lieut. Ellicombe; Lieut.-Col. and Adjt. Dowell, V.C., and Surg.-Major Woollcombe. Capt. Yeo and Sub-Lieut. the Hon. A. G. Fortescue are on leave.

Highland Rifles. We have received the following letter from Col. Ross:—"Cromarty House, Cromarty, N.B., May 9, 1877.—Misled, I have no doubt, by an exaggerated report which appears in your paper of the 5th of the inspection of the Highland Rifle Militia, you have done me the honour to criticise somewhat severely the few words which I said to the regiment on its private parade, after having been inspected. To the best of my recollection, I said that 'they were all aware that a war had broken out between two great European Powers; that no one could foretell whether we might not, sooner or later, be involved in it; that while it was our duty earnestly to pray for peace, it was also our duty to be prepared for war; that it was quite possible that we might be called out for embodiment before the usual time of training; that I trusted that no man would hang back, but that they would muster as well as they did on April 6 this year; that for my part it would put me to great inconvenience and some personal loss to have to leave my home and family, but if my services were accepted, I should be proud to serve her Majesty in any part of the world.' All this, referring as it did to the possibility of embodiment, was, I submit, quite legitimate advice for a commanding officer of Militia to give his men. I further said that 'during bygone wars the Highland Rifles had, like many other regiments of Militia, always volunteered for active service, and that I should like to take the opportunity of seeing, in the event of the worst being realized, and of war actually taking place, whether they would again volunteer their services.' I then told all those men who would be ready to volunteer to 'slope arms;' those that were not, to remain at the 'order.' The cases of a Line regiment and a Militia one are not parallel. The former knows that it is his duty to serve where it is ordered, either in peace or war. The latter knows that it cannot be ordered out of Great Britain or Ireland, though its services may be accepted if it volunteers. I submit, therefore, that a commanding officer of Militia may be pardoned for wishing to ascertain before dismissing his men whether, if need be, they would volunteer their services. I beg to add that there was no cheering, that all was conducted in silence, and in an orderly manner; and as the regiment was formed in square and turned inwards, very few, if any, of the spectators outside heard a word of what I said."

Royal Pembroke Artillery. The regiment is training at head-quarters, Haverfordwest, not at Pembroke, as we announced last week. There are only four absentees from training, a fact almost, we should think, unprecedented, and which speaks well for the discipline of Col. Owen's splendid regiment.

2nd Tower Hamlets. The regiment is to train this year at Aldershot, to which station it will proceed on the 4th prox.

Dublin County. The regiment, training at the Curragh, musters 2 field officers, 7 capts., 9 subalterns, the adjt., 35 sergts., 7 buglers, and 524 rank and file.

Kildare Rifles. Major Mansfield has been recommended for promotion to the command, vice Lieut.-Col. the Marquis of Drogheda, retired.

King's County. The regiment was to have trained at the Curragh this year, but the order has been countermanded. Capt. Urquhart has been recommended for the vacant majority.

Limerick City Artillery. Lieut. the Hon. J. G. P. Vereker proceeds to the School of Gunnery to qualify as instr. in artillery to the regiment.

South Mayo. The order for the regiment to train at the Curragh has been countermanded.

Royal Meath was to have undergone training at the Curragh, but the order has been countermanded.

Wicklow Artillery. Trumpet-Major Sprent has been granted a medal for long service and good conduct.

It has been arranged that those regiments of Militia which were ordered to train at the Curragh in June and July will not proceed there, but will do duty within their own counties.

The following regiments assembled for training on Monday last, viz.:—The Royal Anglesey Engineers, at Beaumaris; the Bucks, at High Wycombe; the Cambridge, at Cambridge; the Royal Cornwall Rangers, at Bodmin; the Devon Artillery, at Tregantle Fort; the Dorset, at Dorchester; the Hants (Isle of Wight) Artillery, at Carisbrooke Castle; the Hertford, at Hertford; the 7th Royal Lancashire, at Bury; the Leicester, at Leicester; the North Lincoln, at Lincoln; the Royal Monmouth Engineers, at Monmouth; the Oxford, at Oxford; the South Wales Borderers, at Brecon; the Yorkshire Artillery, at Scarborough; the 2nd West York, at York; the 5th West York, at Knaresborough; and the 6th West York, at Halifax.

The following regiments assemble on Monday next for training, viz.:—The Hereford, at Hereford; the Royal Montgomery, at Welchpool; the Norfolk Artillery, at Great Yarmouth; and the Suffolk Artillery, at Harwich.

The lieut.-col. of a Welsh Artillery regiment writes as follows:—"I cannot help thinking that at this peculiar juncture, when we do not know what turn the course of military events may take in the East, it would be very desirable that the training of the Militia should be extended from twenty-seven days, as at present arranged, to fifty-six days. I refer especially to Artillery regiments of Militia, and to the Welsh regiments in particular, for this reason, that our hay harvest, as a rule, is late, seldom commencing before the third week in June—and likely this year to be later still—by which time the training, even if extended, would be over; and the labourer would be enabled to return to his employer from the ranks in plenty of time to resume his usual agricultural duties, as well as in good fettle to exchange his sword and bayonet for the scythe. There is no doubt that permanent embodiment of the forces would be immensely popular. I believe there to be a reaction in favour of the Turk, or rather against Russian policy in the East, which I, as a Liberal, feel myself. Any steps that we can take to free the Royal Artillery for action would be most opportune, and I cannot conceive any better course than the embodiment of the Artillery Militia, for the purpose of supplying their place in garrisons at home."

YEOMANRY.

Staffordshire. The adjutancy is vacant by the death, on the 28th ult., at Lichfield, of Capt. P. C. G. Webster, late of the 8th Hussars. The deceased entered the Service by purchase Feb. 2, 1855; became lieut., May 12, 1857; capt., May 13, 1859; retired by sale of his commission in 1863; and was appointed adjt. of the regiment June 2, 1865.

VOLUNTEERS.

The Spring General Meeting of the National Rifle Association will be held at the Royal United Service Institution on Wednesday next, at 2.30 p.m., H.R.H. the Duke of Cambridge, K.G., president of the Association, in the chair.

THE INDIAN ARMY.

8th Bengal Cavalry. Lieut. G. A. Money, officiating squadron commander 5th Bengal Cavalry, has been appointed squadron officer during the time Brevet Major Hon. R. W. Napier remains seconded while on the Staff of Gen. Lord Napier of Magdala, at Gibraltar.

14th Bengal Cavalry. The command is falling vacant, Col. J. I. Murray, C.B., having been selected for a vacancy on the brigade Staff, after having been at the head of the regiment since its formation.

17th Bengal Cavalry. Capt. E. G. Newnham, third squadron officer, has been appointed squadron commander, vice Major G. H. W. Hoggan, appointed commandant of Fort Abazaie; Capt. H. Swiney is appointed squadron commander, vice Newnham; and Lieut. R. F. Trotter, officiating squadron officer 13th Cavalry, squadron officer and adjt., vice Swiney.

1st Bengal N.I. Lieut.-Col. L. H. P. de H. Larpent, second in command (on furlough), has been appointed commandant, vice Lieut.-Col. F. J. Craigie, appointed commandant, Major G. Atkins, wing commander, acting temporarily in Col. Larpent's absence; Capt. W. M. Molyneux, wing officer, has been appointed wing commander, and continues to officiate as second in command; and Lieut. G. H. More-Molyneux, wing officer 36th N.I., has been appointed wing officer, and continues to officiate as adjt.

8th Bengal N.I. Col. T. A. Carey has been granted furlough to Europe for one year and eight months.

10th Bengal N.I. Lieut.-Col. R. Y. Chambers, Staff Corps, officiates as second in command and wing commander.

16th Bengal N.I. Surg.-Major R. H. Perkins is appointed to the medical charge from the 5th N.I., vice Surg. E. Bovill, M.B., whose services have been placed at the disposal of the Government of India.

21st Bengal N.I. Lieut. H. H. Swetenham, wing officer, has been appointed qrmr., vice Dyce, vacated on promotion to capt.

23rd Bengal N.I. Major H. Collett, Staff Corps, has been appointed to officiate as second in command and wing commander, vice Lieut.-Col. Fellowes, appointed to 32nd N.I.

29th Bengal N.I. Lieut.-Col. J. J. H. Gordon, commandant, has been granted a three months' extension of leave in England. Major W. D. Macturk, late 64th N.I., on being relieved of his appointment of officiating wing commander, has, at his own request, been appointed to Ferozepore for general duty.

32nd Bengal N.I. Lieut.-Col. H. Fellowes, second in command and wing officer 23rd N.I., has been appointed to officiate as second in command, vice Col. G. A. Williams, appointed to officiate as second in command 8th N.I. Capt. A. P. Samuels, wing officer and qrmr., has been appointed wing commander during the time Major C. E. Bates is seconded while holding an appointment on the personal Staff of the Lieut.-Governor of the Punjab.

37h Bengal N.I. Major W. F. Bartleman, late 39th N.I., has been appointed to officiate as wing commander, vice Capt. Madden, on furlough. Capt. W. J. Stewart has been confirmed in his appointment as wing officer.

42nd Bengal N.I. Lieut.-Col. J. P. Sherriff, commandant, has been granted furlough to Europe for one year on private affairs.

43rd Bengal N.I. Lieut.-Col. W. Cabell, Staff Corps, has been appointed to officiate as second in command and wing commander, vice Capt. H. M. Evans, on furlough. Lieut. F. C. N. Goldney, Staff Corps (on furlough) has been appointed wing officer, vice Lieut. V. A. Schalch, transferred to the 45th N.I.

59th Bengal N.I. Lieut. R. G. Handcock, wing officer 38th N.I., has been transferred to the 59th in a similar capacity, vice Capt. Martelli, and is appointed adjt., vice Capt. Forbes, vacated on the expiration of his five years.

2nd Goorkhas. Lieut. W. Hill, qrmr. (on furlough), has been appointed adjt., vice Becker, vacated on the completion of his five years' tenure of the appointment.; Lieut. W. P. Newall has been appointed qrmr., vice Hill, and will continue to officiate as adjt.; and Lieut. H. S. Wheatley, wing officer, will continue to officiate as qrmr.

5th Goorkhas. Capt. J. Cook, wing commander, has been granted furlough to Europe for one year and nine months on private affairs. Lieut. A. R. Martin, 34th Foot, a candidate for the Bengal S.C., to officiate as wing officer on probation.

1st Punjab Cavalry. The following appointments have been made:—Capt. H. Dela M. Hervey, adjt., to be third squadron commander, vice Capt. H. Wylie, seconded, and to officiate as second squadron commander during the period Capt. J. R. B. Atkinson may officiate as second in command; Lieut. D. S. Cuninghame, first squadron officer, to be adjt., vice Capt. Hervey; Lieut. A. M. Muir, second squadron officer, to be first squadron officer, vice Lieut. Cuninghame, and to officiate as third squadron commander in addition to his other duties; and Lieut. W. F. Hannell, officiating second squadron officer, to be second squadron officer.

4th Punjab Cavalry. The following appointments have been made:—Major A. Vivian, squadron commander 3rd Punjab Cavalry, to officiate as commandant, with effect from the date on which he may take up the duties of the office, vice Col. C. J. Godby, proceeding on leave; Major R. C. R. Clifford, squadron commander 2nd Punjab Cavalry, to officiate as second in command, vice Major T. O. Underwood, on furlough; Lieut. W. Lambert, 70th Foot, a candidate for the Bengal S.C., to officiate as first squadron officer, on probation; and Lieut. H. A. Deane, 54th Foot, officiating wing officer 5th N.I., on probation, to officiate as second squadron officer on probation.

5th Punjab Cavalry. Capt. J. C. Stewart, squadron officer, has arrived home from India on furlough.

4th Hyderabad Cavalry. Capt. J. T. Cummins has resumed duty as adjt. on return to India from furlough in England.

5th Hyderabad Infantry. Lieut. A. Adye, 2nd Foot, a candidate for the Bengal S.C., has been appointed to officiate as wing officer on probation, vice Lieut. C. C. Whistler.

4th Madras N.I. Capt. A. W. Foord, adjt., has arrived home from India on furlough.

6th Madras N.I. Capt. R. C. Lavie, wing officer, has arrived home from India on furlough.

1st Central India Horse. Capt. R. J. H. Wyllie, squadron officer, has been appointed to the Indian Commissariat Department as a sub-assist. comy.-gen., 3rd class.

24th Madras N.I. Capt. F. H. Vanderzee, wing subaltern, has qualified for promotion, with effect from April 7.

28th Madras N.I. Capt. E. M, Stevenson, wing officer, has been granted two years' furlough to Europe on private affairs.

41st Madras N.I. Surg.-Major J. S. Ridings, M.D., has been appointed to the medical charge.

2nd Sind Horse. Lieut. J. Monteith, 72nd Foot, squadron officer on probation, has leave to Bombay to July 31, studying the native languages.

18th Bombay N.I. Col. F. S. Hewett retired, was a cadet from Addiscombe in 1843, and served in the 12th, 29th, 28th, 1st, 14th, and 18th Regts. He held the certificates of interpretership in Hindostanee, extra first class musketry (Hythe), diplomas in civil engineering and surveying; honourable mention from the Soldiers' Institute at Poona for drawings, views, and descriptions of the Sawant Waree rebellion, for which he wears the Indian mutiny medal, and he received a gratuity of six months' pay for his services in Scinde from 1843 to 1846.

The Army Gazette.

WAR OFFICE, PALL MALL, May 8, 1877.

Commissariat and Transport Department—Assist. Comy.-Gen. L. W. Blacker to be Depty. Comy.-Gen., vice Alexander Crowder Crookshank, C.B., deceased; April 16, 1867. Comy. G. H. Phillips to be Assist. Comy.-Gen., vice Blacker; April 16, 1877. Depty.-Comy. W. Fryer to be Comy., vice Phillips; April 16, 1877.

Chaplains' Department—Chaplain of the Fourth Class the Rev. R. Orr to be Chaplain of the Third Class; May 4, 1877.

The Militia Gazette.

WAR OFFICE, May 8, 1877.

Where not otherwise specified, the following commissions and announcements bear date May 9, 1877:—

ARTILLERY.

Sligo—The appointment of Capt. H. W. J. Hubback, Royal Artillery, as Adjt., dated April 5, 1877, notified in the *London Gazette* of April 17, 1877, is cancelled.

ENGINEERS.

Royal Monmouth—Major J. Davies is granted the hon. rank of Lieut.-Col. Sub-Lieut. E. C. P. Curzon resigns commission; April 27, 1877.

INFANTRY.

Royal Flint—Lieut. L. Sedgwick to be Capt.

Royal Glamorgan—Sub-Lieut. A. H. Calland to be Lieut.; March 31, 1875.

West Kent—Joseph William Leycester, gent., to be Sub-Lieut.

Royal South Lincoln—Richard Gordon Smith, gent., to be Sub-Lieut. (Supy.); April 27, 1877.

Royal London—Walter Scott Mackenzie, Esq., late Capt. 84th Foot, to be Major; April 24, 1877. Capt. O. T. Hearne resigns commission.

Shropshire—Capt. W. Patchett to be Major, vice J. V. Lovett, resigned; April 30, 1877.

1st Stafford—Major H. Talbot to be Lieut.-Col. Capt. W. G. Webb to be Major. Henry Somerset St. Leger-Wood, gent., to be Sub-Lieut. (Supy.).

Highland Light Infantry—Tain Robert James Murray-Grant, gent., to be Sub-Lieut.

Dublin County—Lieut. A. F. W. G. de G. Cusack resigns commission.

Royal Limerick County—Robert George Edward Twiss, gent., to be Sub-Lieut. (Supy.).

Longford Rifles—Charles Edward Lefroy, gent., to be Sub-Lieut.

YEOMANRY CAVALRY.

Buckinghamshire—Lieut. H. W. Kiallmark resigns commission.

Royal East Kent—The Hon. Bernard Edward Barnaby FitzPatrick to be Sub-Lieut.

West Somerset—Leonard Charles Blackett, gent., to be Sub-Lieut.

Hon. Artillery Company of London—Second Lieut. H. Rawlins to be Lieut., vice Potter, resigned. Ensign H. Munday to be Lieut., vice Pearson, retired into Veteran Company. John Pugh, gent., to be Second Lieut., vice Rawlins, promoted. Lewis Thomas Crook, gent., to be Ensign, vice Munday, promoted. The Rev. W. Rogers to be Chaplain, vice Hugo, deceased. The commission of the undersigned officer has been renewed—Capt. A. J. Waterlow, from July 4, 1876.

Mr. Stacpoole asked the Secretary for War on Tuesday whether by the regulation limiting the command of the Guards to major-generals promoted from full pay of the Guards, there was now but one officer, excluding the late and present holders of the appointment, who was eligible for the command of the Home District and Brigade of Guards; and, if so, whether he proposed to make any alteration in a rule which thus took away the power of selection for so important a command. Mr. Hardy said that the statement of the hon. member was quite correct as to the present state of things. With respect to the future, he was informed that there would be several eligible officers to choose from.

ALDERSHOT.

The Queen, accompanied by Princess Beatrice, left Windsor at 11 a.m. on Wednesday by a special train for Farnborough Station, where she was received by Lieut.-Gen. Sir T. M. Steele, K.C.B., and Staff, who attended her Majesty to the Pavilion. The 2nd Batn. 2nd Queen's furnished the guard of honour, and the 1st Royal Dragoons the escort. The band of the 2nd Queen's played on the terrace. Her Majesty left the Pavilion at 3.30 p.m., inspected a model for instruction in field tactics, invented by Capt. Shaw, visited the Female Hospital, and proceeded to the parade-ground, where her Majesty was received by a Royal salute, and drove down the first line, after which the troops marched past. Cavalry Brigade—1st Dragoons, 8th Hussars, and 17th Lancers. 1st Brigade—2nd Batn. 20th, 64th, 96th, and 58th Regts. 2nd Brigade—2nd Batn. 2nd, 2nd Batn. 13th, and 2nd Batn. 8th Regts. 3rd Brigade—1st Batn. 19th, 61st, 100th, and 3rd Batn. 60th Regts., together with Royal Horse and Royal Artillery. The Royal Artillery, field batteries, and the Cavalry trotted past. The salute terminated the review. The Queen and Princess Beatrice returned to Windsor, and we understand that there was much disappointment felt at the short time given to the review, and that the second and third lines, which were not honoured by her Majesty, felt it greatly, being in ignorance of the cause of the neglect.

The following order was issued yesterday:—"The lieut.-general commanding has much pleasure in publishing the following extract from a letter received from the Adjutant-General to the Forces, dated the 10th inst.:—'His Royal Highness the Field-Marshal Commanding-in-Chief has received the Queen's commands to express her Majesty's entire satisfaction with the general arrangements of the camp, and also with the soldier-like appearance of the garrison corps reviewed at Aldershot yesterday under your command.'"

The *Times* stated a few days back that the undermentioned regiments had been placed on a roster for immediate departure for service abroad, should their services be required:—Cavalry—4th, 5th, and 6th Dragoon Guards, 1st and 2nd Dragoons, 8th Hussars, and 17th Lancers. Artillery—E Brig. R.H.A., 3rd Brig. Garrison Artillery, and 24th and 25th Brigs. R.A. Infantry—1st Batn. 1st Foot, 2nd Batn. 2nd Foot, 2nd Batn. 4th Foot, 2nd Batn. 5th Foot, 2nd Batn. 6th Foot, 2nd Batn. 8th Foot, 2nd Batn. 10th Foot, 2nd Batn. 13th Foot, 2nd Batn. 14th Foot, 2nd Batn. 18th Foot, 1st Batn. 19th Foot, 2nd Batn. 21st Foot, 2nd Batn. 24th Foot, 26th Foot, 29th Foot, 30th Foot, 38th Foot, 41st Foot, 47th Foot, 49th Foot, 52nd Foot, 58th Foot, 1st and 3rd Batns. 60th, 61st, 75th, 78th, 84th, 86th, 88th, 90th, 91st, 93rd, 94th, 95th, 96th, 99th, and 100th Foot, the 1st and 3rd Batns. Rifle Brigade, also the 2nd Batn. Grenadier Guards, 2nd Batn. Coldstream Guards, and 1st Batn. Scots Guards. The reply of Mr. Hardy to an inquisitive member in the House respecting the above statement may be regarded as strictly official, but there is nothing more likely than the selection of these regiments *if* the services of a force of all arms should be required abroad. The number of Cavalry regiments would be increased.

Mr. Valentine Baker has been attacked with typhoid fever, and Mrs. Baker has hurried off to Turkey with a trained nurse.—*Medical Examiner*. [We are glad to say that news has since reached London that the crisis is over.]

It is officially announced that there is no foundation for the statement that Sir L. Simmons or any other general has been selected to command an expeditionary force.

Mr. Hayter asked the Secretary for War on Tuesday whether it was the fact, as stated in the *Times* of May 5, that a special roster had been formed of troops for immediate departure for service abroad, including a brigade of Guards, seven regiments of Cavalry, four brigades of Artillery, and forty battalions of Infantry. Mr. Secretary Hardy said that no special roster had been formed. The troops which were ordered for service abroad were so ordered in the ordinary course to recruit regiments which were below their proper strength, and no change whatever had been made in the roster.

The *Times* says:—"The organization of the field train, which was the chief end of the exhaustive experiments at Eastbourne last autumn, has been decided upon. For administrative purposes the train will be formed into units, some of light and others of heavy artillery. Each unit of the light siege train will comprise 30 guns—viz., ten 24-pounders, ten 40-pounders, and ten 6·3in. howitzers. Each unit of heavy siege train will also consist of 30 guns, of which number 14 will be 8-inch howitzers, and the remaining 16 40-pounder and 64-pounder guns. The preponderance of 40-pounders is in accordance with the high value attached by the Siege Gun Committee to that arm, and the two descriptions of howitzers are both highly commended. No provision is made for mortars, which have practically become almost as obsolete as any of the old smooth-bore guns, and another novelty will be the introduction into the siege train of the lightest gun in the Service, the 7-pounder field-gun, six of which will be attached to each unit, as likely to be of essential service in certain cases. The howitzers were not all ready, but are being brought forward with rapidity, and will be issued within a week or two. The unsettled state of the rifling question has caused some delay, but the manifest superiority of the poly-groove system has induced the authorities to adopt it for their howitzers without waiting for the report, which will in all probability be made in its favour, and the projectiles are consequently being manufactured without studs, and fitted with the gas check for rotation. The rifled howitzers may now be regarded as having superseded and rendered extinct the mortars which from the very birth of artillery until the present have occupied the most prominent position in the siege train equipment."

Recruiting, the *Standard* hears, has lately been progressing so briskly, that at this moment there is scarcely a regiment in the Service which is not up to its full establishment. The same satisfactory accounts reach us from the various Militia regiments, many of which are taking on supernumeraries.

A marble monument has just been erected at Cassall, near Nottingham, to the memory of Shaw, the Life Guardsman, and his two Waterloo companions, Waplington, of the Blues, and Wheatley, of the 23rd Light Dragoons, who were natives of that village."

KRUPP GUNS.

Herr Krupp, says the *Times*, is just completing a monster piece of ordnance, evidently designed to show that guns of cast steel can be produced on a scale to vie with the wrought-iron ordnance of Woolwich and Elswick. The weight of the new Krupp gun is almost exactly that of the great Fraser gun which has lately distinguished itself at Shoeburyness. The length of the gun, including the breech-piece, is 29ft. 6in., the breech-piece itself being 6ft. 4in. in length. The calibre of the gun is 15¾in. The weight of the projectile will be 750 kilogrammes, or 1,650lb., and the powder charge will be 396lb. The 81-ton gun of the Fraser construction has a bore of 24ft. and an external length of 27ft. As a 16-inch gun (without an enlarged powder chamber), it has taken a charge of 370lb. of powder, and a projectile of 1,700lb. The external diameter of the Krupp gun, independently of a narrow strengthening ring at the extreme rear, is 5ft. 10in., that of the Fraser gun being 6ft. The core of the Krupp gun is a steel tube in two lengths, upon which four steel rings overlap, rising in steps from a point between the muzzle and the trunnions, and accumulating in the thickness towards its rear. These more massive rings are irrespective of the narrow strengthening ring over the powder chamber. The external diameter of the gun at the muzzle is 2ft. 3½in. The weapon is provided with a pivoting carriage of wrought-iron suitable for a coast fortress, weighing 45 tons. The price of the gun, exclusive of the carriage, is £20,000. Of course this includes a profit to the manufacturer, but the sum is more than double that which goes to defray the expense of producing an 80-ton gun at Woolwich Arsenal. There is, however, this fact to be remembered, that the great Woolwich guns are muzzle-loaders, while the Krupp guns have all the elaborate finish which appertains to breech-loading ordnance. In common with the other large Krupp guns, the rifling of the new weapon is on the poly-groove system, the elongated projectile being rotated by means of the gas-check, a method which there is little doubt will be adopted in the British Service, so as to dispense with the use of studs. The velocity anticipated from the projectile fired from the Krupp 80-ton gun is 473 metres per second at the muzzle, or 1,552ft., producing an energy of 27,543 foot tons, equal to 556 foot tons per inch of shot's circumference. The gun is by far the largest breech-loader yet constructed. The nearest approach to it is the 56-ton breech-loader shown by Herr Krupp at the Philadelphia Exhibition last year. This smaller, but yet formidable weapon, has been purchased by the Russian Government, and is just now being delivered at Cronstadt. It has a calibre of 14in., and fires a charged steel shell of 510 kilogrammes, or 1,122 pounds, with an initial velocity of 485 metres per second, or 1,590ft. The charge for the gun consists of 275lb. of prismatic powder; but having now constructed the 80-ton gun, Herr Krupp is prepared to show that he can proceed still further in the production of steel breech-loading ordnance. The 80-ton gun has been constructed at Essen purely at the instance of Herr Krupp himself. Should the demand arise, the great Prussian gunmaker has a design already prepared for a gun of 124 tons. The larger weapon would have a calibre slightly exceeding 18 inches, and would throw a steel shell weighing 1,000 kilogrammes, or a chilled iron shell of 1,030 kilogrammes. The weight of the projectile would therefore be practically a ton, and the charge of powder would be probably about 500 pounds. The weight of the carriage would be 62 tons. The cost of the gun alone is reckoned at £33,500. Herr Krupp is at the present time supplying the Russian Government with a number of 11-inch steel breech-loaders, weighing 27½ tons each. The weight of the carriage, with the pivoting arrangement (which weighs about a ton), is between 11 and 12 tons. In connection with the fact that Russia has purchased the 56-ton Krupp gun shown at Philadelphia, it may be mentioned that the Sultan has obtained from Herr Krupp a duplicate gun for the defence of the Bosphorus.

THE 81-TON GUN.

The experiments with the 81-ton gun were resumed at Shoeburyness on the 4th inst. One important purpose was to ascertain if the gun's powers would be so increased by the chambering as to justify the chambering of the four weapons of the like calibre which are now being "built" for the Inflexible. The charge was 425lb. of the pebble powder, the enlarged chamber permitting the addition of 55lb. of powder to the former charge of 370lb. The projectile was a blind Palliser shell, the same as on the former occasion when firing at the target, the weight being the same as before—1,700lb. The gun was fired, and the explosion which followed was a sullen roar. When an interval had elapsed, the company ran from their shelter. The gun itself was first inspected, and it was seen that her machinery had worked admirably, for the gun had run back 55ft. on her tramway, which rises slightly, on delivering the shot, and then had run down to the firing point. The target was then inspected, and the result of the shot was soon seen. The shot had, like the one in February, penetrated three plates and the teak intervals to all four, but the increased energy on this occasion was seen in the work it had effected on the fourth plate, in comparison with that effected by the shot in February. The part of the plate, the fourth or outward one, struck by the February shot was cracked and slightly bulged, but the part of this plate struck by the shot just fired was bulged out some 15 inches from its normal position, and in place of being only cracked, as in the other case, it was broken across, the edges of the broken part gaping wide and showing the head of the shot, which had gone further in distance than the 47 inches of iron and teak of the target. The cracks radiated in all directions. The initial velocity of the shot—the speed at which it had left the mouth of the gun—was registered at 1,600ft. a second, and the striking velocity at 1,585ft. a second. In February the shot fired with 370lb. of powder made an initial velocity of 1,500ft. a second, and a striking velocity of 1,496ft. a second. The velocity registered on Friday last was the highest known, it is said, and fully accounts for the base of the shot "setting up" in the manner described. The pressure upon the chamber of the gun was taken after the shot, and it was found that the mean pressure was under 20 tons. A cast was taken of the interior, and the facts came out clearly that the gun was in the same condition she was in before firing—that the slight fracture known as the "crack" had not altered in the least, and that there was nothing to prevent her from being fired if the Committee should desire to fire with a steel shot, so as to test to the utmost the powers of the gun. The Committee decided not to fire any more shots, but to consider and weigh fully the results before proceeding further.—*Times.*

THE INDIAN ARMY.

It is rumoured that a long-established West-End club (where traditions of the grand old East India Company still linger) is about to change its name and constitution. *Tempora mutantur et nos mutamur in illis.* Nearly twenty years have passed since the promulgation of the proclamation of her Majesty the Queen, under which the Crown assumed the direct government of India; and in this short period what momentous changes have occurred in the splendid Services—naval, military, and civil—which so gallantly won, and so ably administered, the brightest jewel in England's Crown! When the "East India United Service Club" was formed, the College of Haileybury—the *Alma Mater* of the great Indian Civil Service—was flourishing under the direction of Melville, Jeremie, H. Wilson, Monier Williams, and other illustrious Professors. Where is it now? The Addiscombe Military Academy, which produced so many famous soldiers and heroes, was then in its prime, but it exists no longer; competition and amalgamation have swept away all distinctive features of the great Indian Services. In 1857 the first batch of "competition wallahs" for the Indian Civil Service arrived in India—all able men, and many very distinguished University scholars; but their like has never been seen since Indian service has lost its charm. The "Parliamentary guarantee" (known as Henley's Clause) was first published to the armies of India in the General Order of the Government of India dated Sept. 11, 1860, and set forth "that the rights, privileges, and exemptions of every man now serving in her Majesty's Indian forces are to remain precisely as they are." On April 10, 1861, the General Order (No. 332) amalgamating the British and Indian Armies under the Royal Warrant was promulgated, and by the General Order (No. 9249) of Oct. 14, 1861, the world-renowned Indian Artillery and Engineers were amalgamated with the Royal Artillery and Royal Engineers. On Aug. 13, 1862, the General Staff of the British and Indian forces were amalgamated. In 1863 the gallant Indian Navy (which was not only a fighting, but a scientific Service) was abolished. During its existence it produced many first-rate hydrographers, and ably performed the duties of police of the Indian Ocean and Eastern Seas. By the Royal Warrant of Dec. 27, 1870, all Indian Staff Corps officers and general and field officers were transferred to the British establishment, and only a few weeks ago it was announced in General Orders that the officers of the Indian Staff Corps would be allowed to count service for pension, when employed out of India, either in the direct service of the Crown or in the service (if approved by Government) of foreign countries in alliance with Great Britain. So what was once a close service, and confined to India, has now been placed at the general disposal of the Crown, and is available for the service of the country in any part of the globe. None now remain "Indian" but the Civil Service, and even this Service became "Imperial" on Jan. 1 last, when her Gracious Majesty was proclaimed "Kaiser-i-Hind," for it must be remembered the members of the Covenanted Indian Civil Service are in the direct service of the Crown, and not of the Government of India, as is the case with all other public servants appointed by the Governments in India. The one is an "Imperial," the other —so to speak—a colonial Service. The changes (which we have enumerated in detail) in the character of the Services have rendered a change in the name and constitution of this club very desirable—in fact, an imperative necessity, as there is no longer an "United East India Service." A proper time for making this change seems to be the present year, in which her Majesty assumed the Imperial title. We believe the new name of the "club" will be discussed and decided upon at the general meeting of the club next ensuing. Two names appear to have been suggested—"The Foreign Service" and "The United and Imperial Service Club." Either would do very well, but the latter might probably be considered the most applicable, as showing its direct connection with the Indian Civil Service. We think some of the new Service clubs might take advantage of this change of name and constitution of the old Indian Club to make overtures to amalgamate with it, for it is certainly one of the best West-End clubs, and has associations and traditions of which any British officer may well be proud. We trust it may long remain the outward and visible sign in London of that grand empire which adds so immeasurably to the glory of the Crown of England and the honour of her people.

INDIA.

As the result of the recommendations of Lieut.-Gen. Sir C. Reid to reconstruct railway waggons so that they might be serviceable for military purposes as well as for ordinary traffic, it has been determined to effect alterations at a cost of a quarter of a million, to be spread over ten years.

Col. J. Puckle, Madras S.C., of the Mysore Commission, now on special famine duty in the province, has accepted the bonus, and bids farewell to India. Can nothing be done, asks a Madras contemporary, to prevent the Government seducing thoroughly able officers from their allegiance to India, and landing them in England with a competency, but with less to do than the "frozen-out gardeners?" Col. Puckle is in the prime of life and the full swing of usefulness, and we must confess to regretting that he has committed the fatal act of military despatch.

Major-Gen. F. E. Voyle, Bengal S.C., and formerly of the 39th Bengal N.I., died at Tenby a few days since, aged sixty-two. The deceased officer obtained his commission as ensign June 9, 1831, and served against the Bheels in 1837. He became lieut. Oct. 17, 1838; brevet capt., June 9, 1846; capt., Nov. 18, 1846; and major, June 4, 1855. In 1857 he served against the Googaira rebels, including three night attacks by the rebels, ending in their defeat and relief of the town of Pak Puttun, for which he received a medal. He became lieut.-col. June 4, 1859; brevet col., Feb. 18, 1866; and major-gen.. May 11, 1871.

Major C. E. Bates, Bengal S.C., has been appointed private secretary, and Lieut. C. C. Egerton, Bengal S.C., aide-de-camp, to the new Lieutenant-Governor of the Punjab.

The following resolution, published in the *Gazette of India*, has reference to furlough pay:—"The Governor-General in Council is pleased to decide that the difference due to any officer shall be paid him in England in sterling money if he desires it. If paid in India, the difference shall be disbursed at its equivalent in Indian currency at the rate of exchange fixed for the year on account of which the difference is due."

After some thirty-seven years' service and a lengthened career of usefulness, in the Irrigation Department in the Bengal Presidency, Col. J. F. Stoddard, Madras S.C., is, the *Madras Times* says, about vacating his appointment as Superintending Engineer in the Public Works Department of that Presidency, preparatory to going home on furlough, and thereafter retiring on the pension to which he is entitled, and the colonel's allowance which will fall to his share about the end of next year. Col. Stoddard rose in the 23rd Regt., Madras Light Infantry, and was educated in Bishop Corrie's Grammar School in this Presidency.

"Aristarchus" in the *Whitehall Review,* hears "on excellent authority that a most important document has been received at the India House and laid before the Premier. It is an official statement, very clearly drawn up by Major-Gen. Lumsden, Adjt.-Gen. of the Bengal Army, showing the extremely bad effect which the philo-Russian speaches and writings of certain persons in England have had on our Native Army. Of the latter, one-third of the Infantry and two-thirds of the Cavalry are Moslems; and the persons disaffected to our rule in the East have not missed the opportunity of translating and publishing in the Native Press whatever Mr. Gladstone and his followers have seen fit to say in England. The consequences are—so the document from Gen. Lumsden shows—that the Mahometan portion of the Army was never, not even in the time of the great mutiny of 1857, more dissatisfied than at present."

Major-Gen. J. A. Ewart, C.B., on arrival in India from England, on appointment, has been posted to the command of the Allahabad Division.

Capt. W. J. Boyes, 12th Foot, has been appointed a brigade-major on the Bengal Establishment, with effect from April 17, 1877, vice Capt. F. S. Brind, 17th Foot, whose term has expired.

Lieut.-Col. Sir J. Louis, Bart, Bombay Infantry, has been retired from Jan. 31, 1877, on an annuity of £180 per annum.

Surg.-Major F. Carter is permitted to retire from the service on a pension of £220 per annum from April 25.

The following General Order has been promulgated:—"The Commander-in-Chief has directed that on the occasion of inspection and review, battalions, preparatory to marching past in quarter distance columns, will change ranks instead of countermarching as provided for in Part VI., 'Marching Past' of the Field Exercises. With reference to General Order in Council 508, Aug. 23, 1876, wing officers of native Infantry regiments, not being adjts. or qrmrs., shall invariably dismount and take command of the two leading right-half companies of half-battalions on the caution 'Form for Attack.'"

The following officers of the Bengal Army are retiring on special annuities, viz.:—Brevet Col. H. Finch, Bengal Infantry, ordinary pension £456 5s., capitalized value of annuity £5,358; W. D. Bishop, Bengal Infantry, ordinary pension £456 5s., annuity £531 7s.; J. S. Davies, Staff Corps, ordinary pension £456 5s., annuity £668 12s.; J. Smith, Staff Corps, ordinary pension £456 5s., annuity £528 7s.; T. W. Mercer, Staff Corps, ordinary pension £456 5s., annuity £470 10s.; G. B. Malleson, C.S.I., Staff Corps, ordinary pension £456 5s., annuity £468 6s.; A. R. G. Hutchinson, Staff Corps, ordinary pension £456 5s., annuity £417 1s.; J. E. L. Willows, Staff Corps, ordinary pension £456 5s., capitalized value of annuity £5,143; J. E. Cracroft, Staff Corps, ordinary pension £456 5s., annuity £473 11s.; Lieut.-Col. A. R. Bayly, Staff Corps, ordinary pension £365, capitalized value of annuity £3,145; A. H. Millett, Staff Corps, ordinary pension £292, annuity £232 18s.; and J. A. M. Biggs, Staff Corps, ordinary pension £292, annuity £229 8s.

THE WAR IN THE EAST.

The news from the seat of war is still very contradictory. The Russians continue to move round their right to its positions on the Danube. On Wednesday they made an attempt to cross the river at Reni. They threw a bridge over the river, but were met by the Turkish Infantry, with artillery, assisted by three gunboats. The Turks broke down the bridge, killing a large number of men, taking many prisoners, and utterly defeating the enemy. There has been, it would seem, a good deal of artillery fighting near Galatz between the Turkish gunboats and the Russian batteries.

The Roumanian Army is to take the field with the Russian forces, but it is to be commanded by its own Sovereign, Prince Charles. The blockade of the Russian coasts of the Black Sea has been proclaimed by Turkey, and there is a great panic in consequence at Odessa, which, it is said, Hobart Pacha is preparing to bombard. That officer has elected to remain permanently in the service of the Porte, and to leave the English Navy. From Asia Minor the reports are unreliable, but it seems likely that the Russians have been foiled in one or more attempts to take Kars by a *coup de main,* and that they have made a detachment to mask that fortress, while their main body passes on to Erzeroum. The Sultan expected a contingent of 10,000 or 12,000 men from Egypt, but it is now said that the Khedive finds himself again embarrassed by affairs in Abyssinia, and will spare no troops to his Suzerain.

Lord Derby has sent a very stern reply to the Russian announcement of the commencement of hostilities. The English Government cannot accept the statements of Prince Gortschakoff as justifying the resolutions taken. They cannot believe that the existence of Russian armies on Turkish soil will solve any difficulties or improve the condition of the Christian populations. And the dispatch ends with a grave rebuke to Russia for contravening the provisions of the Treaty of Paris in respect to the territorial integrity and independence of the Ottoman Empire, and from separating herself from the European concert by her isolated action. The decision of Russia is one which the British Government must state cannot have their concurrence or approval.

The Sultan, it is said, is very much pleased at Lord Derby's reply, and has ordered the Porte to officially thank the English Government. His Majesty has also sent Said Pasha to wait upon Mr. Layard for the same purpose.

Dr. J. Williams writes to the *Lancet* from the Central Military Hospital at Sejnstza to state that scurvy is rampant among the Turkish patients, especially the wounded cases. This must be very gratifying to some good Christians here. The Stafford House Committee, which met again yesterday, has resolved on sending out further supplies of medicine or money to procure medical comforts. This must be very irritating to some Christians here also. The war that is developing itself promises to have in its train an unusual crop of horrors, for the plague is spreading northwards from Bagdad, and has reached Resht, though we do not quite admit it is in the rear of the Russian Army in Asia Minor. The *Lancet* reminds us that in 1828-9 the Russians operating against Kars suffered from the plague.

PARLIAMENT.

HOUSE OF COMMONS.—FRIDAY.

THE SUEZ CANAL.

Mr. Errington asked the Under Secretary of State for Foreign Affairs whether her Majesty's Government had any information as to how far the statement which had appeared in the newspapers was accurate, viz.:—"That the Suez Canal is closed to Russian ships of war by agreement between the Porte and Khedive. The entrances to the Canal will be guarded forthwith."

Mr. Bourke: Her Majesty's Government have heard that it is intended to close the passage of the Suez Canal against Russian ships of war, but no official information has reached them on the subject. It is not intended, however, to close the Canal against other ships.

ENLISTMENT OF RECRUITS.

Mr. Callan has given notice that he will, on Monday next, ask the Secretary of State for War, if he would state how many recruits were enlisted over 25 years of age, in accordance with the War Office order which raised the maximum age to 30, in the months of January, February, and March; how many were enlisted at the height of 5 feet 4½ inches; and whether those orders were now in force that permit of the foregoing age and height; and, if not, at what date were they cancelled.

THEATRES.

GLOBE.—The unfortunate production, *Percy,* having been withdrawn, as was inevitable, within a week from its advent the place of honour in the programme here has been given to *East Lynne,* a drama which, singularly enough, always commands a fair share of patronage. The dramatic version of Mrs. Henry Wood's novel is very fairly given at the Globe, the management having engaged Miss Louise Moodie for the principal female character. This actress, as Lady Isabel and the pretended Madame Vine, is seen at her best, and the reception given her on the first night was most flattering. Barbara Hare was very well played by Miss Murielle, and the Cornelia Carlyle of Miss Marlborough was a really excellent impersonation. Mr. W. J. Hill played Lawyer Dill in the true spirit of comedy, and Mr. Markby's Capt. Levison was a capital performance. A word is also due to Mr. Ireland, whose rendering of Archibald Carlyle is an excellent piece of acting. The drama was followed by the ever-fresh and funny farce of *Vesta's Temple,* in which Mr. W. J. Hill once more convulsed his auditors by his remarkably funny reading of Gummidge, the Manager. The present programme can only be continued for another week, as the theatre then passes into the hands of Mr. Edward Righton, who will produce Boucicault's *After Dark* with a very strong company and with entirely new scenery.

OPERA COMIQUE.—Mr. Charles Mathews is going steadily through his *repertoire* here, and it seems a shame that he is not better patronised. The *Game of Speculation* was revived on Monday night, and the house was very far from being crowded. The veteran light comedian plays Mr. Affable Hawk very well still, but the rendering will hardly satisfy those who saw it some years ago. For all this, it would be difficult to find, even among our freshest and most juvenile artists in the same line of art, any one who could fulfil his task so well. The manner is as bright as ever, but the voice is no longer so clear nor yet so steady as of yore, and the action has lost much of its briskness. Still, the piece is well worth seeing, and no one can possibly regret a visit paid to the Opera Comique just now, when Charles Mathews plays in two of his most famous pieces—*A Game of Speculation* and *A Cosy Couple.*

ST. GEORGE'S HALL.—The entertainment provided by Mr and Mrs. German Reed commands a select audience, and such an audience must be taken from a class small in number. This can be the only reason why the programme is changed so often, since the items constituting it are invariably of the best kind. The latest novelty is a social sketch given by Corney Grain, with the title of *Edwin and Angelina.* All who know the powers of this versatile artist can imagine how much fun he (with the help of the pianoforte, which he knows so well how to manage) makes out of the sorrows endured by a young married couple having mistaken notions of hospitality. Those who have not seen Mr. Grain have a treat in store.

The *Irish Times* says, "There will be no concentration of troops at the Curragh this summer."

In the House of Commons, in reply to Sir H. Havelock, Mr. Hardy said it was true that Col. Lennox, of the Royal Engineers, was now at the head-quarters of the Turkish Army; but as he perfectly understood both his duty and his position as a neutral, it was not thought necessary to send any special instructions on the subject, either to him or to the other English officers who accompanied him.

The *Whitehall Review* says:—"Information has reached the Colonial Office of the departure of Col. Sir William Jervois, K.C.M.G., C.B., R.E., the Governor of the Straits Settlements, from Singapore on April 2, in the steamer Normanby, for Australia, whither, as we lately announced, he proceeds to inspect and report upon the defence works. Col. A. E. H. Anson, C.M.G., R.A., had arrived from Penang and taken over duty as Acting-Governor in Sir William's absence. Lady Jervois does not accompany her husband, but will, with her daughters, pay a visit to England, attended by Capt. Paton, his Excellency's aide-de-camp. From all sides Lord Carnarvon is receiving assurances of the great popularity of Sir William Jervois and his amiable wife, and of the benefits the Settlement has received from Sir William's ability and zealous labours in its interests."

ROYAL CAMBRIDGE ASYLUM FOR SOLDIERS' WIDOWS.

Supported by Voluntary Contributions.

The ANNUAL GENERAL COURT of the GOVERNORS and SUBSCRIBERS will take place at the ROYAL UNITED SERVICE INSTITUTION, Whitehall, on WEDNESDAY, the 23rd instant, at 3 o'clock p.m.,

H.S.H. the DUKE OF TECK, G.C.B., in the Chair.

The following additions to the Rules will be proposed, viz.:—

Addition to Rule No. 3:—"Or some other duly registered Medical Practitioner; and that no Widow be admitted into the Asylum until passed by a medical officer of the Society."

New Rule after No. 5:—"6. That the Funds of the Asylum shall be invested in the names of three Trustees; but it shall not be necessary to transfer the funds into new names until only one of the three Trustees, in whose names the money is then invested, shall remain."

Four Widows will be elected at the Office on the 22nd instant, and the result will be announced at the Meeting.

A Subscription of Half-a-Guinea annually, or a Donation of Five Guineas, entitles to one vote at each election.

J. AINSLIE STEWART, Colonel, Secretary.

Office—40, Charing Cross, S.W.

SPECIAL NOTICE.—MARCOVITCH and CO., Manufacturers of the celebrated PELLEGRINI, VANITY FAIR, and CZAREWITCH (mouthpiece) CIGARETTES (by appointment to H.R.H. the Prince of Wales and H.I.H. the Czarewitch of Russia), beg to inform their numerous customers and the public in general that they have received the finest Turkish Dubec growth of Yenidge that has ever been imported into this country. It is only owing to the want of money by the Turkish merchants that MARCOVITCH and CO. have been enabled to get this tobacco.

The only Manufacturers in England who deal solely in Turkish Tobacco and Cigarettes.

Address—11, AIR STREET, REGENT STREET, LONDON, W.

TO THE NOBILITY AND GENTRY.

WM. PUGH (many years coat cutter at Messrs. Poole's, Saville-row), having succeeded to the old-established first-class business of Jackson and Co., 5, CORK STREET, BOND STREET, W., solicits the patronage of the nobility and gentry.

Best trade only at fixed fair prices, and 10 per cent. allowed for prompt cash.

N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready money entitles them to.

WM. PUGH (from Poole's), 5, CORK STREET, BOND STREET, W.

SCHWEITZER'S COCOATINA

Anti-Dyspeptic Cocoa or Chocolate Powder

Guaranteed Pure Soluble Cocoa, Without Sugar, Spice or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "The most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and Children.

Highly commended by the entire Medical Press.

In air-tight canisters at 1s. 6d., 3s., &c., by Chemists and Grocers.

MR. R. WILLSON,

ARMY, FINANCE, AND COMMISSION AGENT,

3, CRAVEN STREET, CHARING CROSS, LONDON, W.C.

Army & Navy Gazette.

LONDON, SATURDAY, MAY 12, 1877.

The Russians have long desired to possess Batoum, which, unlike Poti, is a commodious port. Batoum has been carefully fortified of late, and the Turkish Fleet will be able to protect the place against any attack directed against it, except by the banks of the Tchorok. Trebizonde, whose fortifications cannot be said to exist any longer, can also be protected from the sea, and nothing is to be feared for that place until Batoum, Kars, Baibourt, and Erzeroum, which is the objective of the Russian Commander, have fallen. To reach Erzeroum the Russians will have to pass Kars, which Paskiewitch carried in 1828 by a fortunate *coup de main*, and which Mouravieff took in 1855 after a long and painful siege, in which famine did more for the besiegers than their artillery. The possession of Kars is indispensable to any army which wishes to hold the country, in consequence of the broad road which runs from that place to Erzeroum. Now, Kars was fortified in the most formidable manner by Hussein Avni Pasha, the War Minister, who was assassinated last year at Constantinople. The citadel, which dates from the sixteenth century, is not of much use now, and, if Kars had no other fortifications, commanded as it is from the neighbouring heights, it would soon be reduced to ashes by the enemy's shells. But the town is first of all defended by a double enceinte in masonry, garnished with four bastions, and defended by ditches filled with water, and by glacis. To the north-west on the White Mountain, rises the fort of Arkanieh, perched at the summit of a rock 250 feet high, and not to be carried by assault; it is a pentagonal, with bastions *à la* Vauban, it is armed with the heaviest modern guns, and it is the chief arsenal of the place. To the west and to the south of Kars are two eminences, about 500 feet high, which command the plain. On the Black Mountain is the English battery (so named in honour of Sir W. Williams) and on Cannon Mountain is the Hungarian battery in honour of General Kmety, better known as Ismail Pasha. Kars has been thus fortified by two Prussian officers, Blum and Gründwald, and has become a first-class place. In March last it was further strengthened by the construction of a series of redoubts heavily armed, some of them with Krupp guns. The Russians on the conclusion of peace in 1856, and, contrary to the stipulations of the Treaty, blew up the fortifications of Kars to the great damage of a confiding and inoffensive population. They will now find them more redoubtable than ever, and very difficult to capture. In the way of artillery, Kars possesses 289 siege guns and sixty-six field pieces; it has a garrison of eighteen battalions of Infantry, six squadrons of Cavalry, eleven field batteries, and two companies of sappers. In addition to this force there is a reserve quartered at Anadoli-Gumri composed of twelve battalions of *rédifs* and three batteries. These forces form a total of 22,000 men.

There are as many at Erzeroum, 12,000 men at Ardahan, &c., &c.—in all 100,000 men, counting Circassians and Kurds. It is said there are 40,000 men at Batoum. The value of these troops is very uneven; the regular battalions will show a bold front, but it is much to be feared that the Militia will not stand fire. The Kurd and Circassian horsemen will, however, be able to render good service as scouts and skirmishers. Moukhtar Pacha is not thought much of as a General, and has erred in not protecting Bayazid, which lies so close to Erivan, where the Grand Duke Michael had his head-quarters, and which is only separated from the Russian territory by the passes of Ararat. By seizing on Bayazid (as the Russians have done) they will gain possession of a portion of the road from Trebizonde to Persia by Erzeroum, and will menace that place turning Kars; they will also be able to seize on Van and the upper valleys of the Tigris and Euphrates. The country, however, is very rough and difficult.

It could not but be very gratfying to the gentlemen of the Press who heard Sir William Codrington's speech at the Newspaper Press Fund Dinner to learn that the gallant officer who commanded the largest British army ever assembled in the field, and who served in the Crimea from the landing at Old Fort till the last soldier left Balaclava, gave the highest praise to the Special Correspondents for "the honest, truthful, and conscientious way in which they do their duty," and laid peculiar emphasis on "the spirit of the truest loyalty with which they send home the latest and most authentic information," for he spoke from his experience of the value of their labours at a time when there were difficulties in their way which have now disappeared. We have been told that Sir W. Codrington and one of these gentlemen had a curious interview very early indeed in the war of 1854. The Guards had embarked at Southampton, and Sir William, then a field officer of the Grenadier Guards, was engaged in superintending the skinning of a sheep on deck, when a young gentleman in civilian garb presented himself on board the P. and O. steamer with a letter for Brigadier Bentinck, from Lord Hardinge, at the Horse Guards, authorizing the bearer to accompany the brigade, and requesting the Brigadier to make the necessary arrangements. Colonel (now General) Sir W. Bentinck was away at the time, and Lieutenant-Colonel Codrington was the senior officer on duty. He read the Horse Guards letter, and, as there was no mention in it of the capacity in which the gentleman who presented it was to sail with the Guards to Malta, he inquired, "May I ask, Mr. ——, for what purpose you are to come with us?" "I am appointed to act as Special Correspondent of the ——." The officer started, stared, and stood for a moment quite aghast. "As correspondent of ——"! he exclaimed. "Then by Jove, sir, I think you are the most dangerous man on board this ship"! Referring again to the letter, he added, good-humouredly, "Here you are, however, and we must do what we can for you! Take Mr. —— to the Quartermaster, and tell him to arrange for his berth on board, and for his place at mess." The gentleman in question must have read with genuine satisfaction the words in which General Codrington bore testimony to the value of his labours "in what was" to him "tantamount to a campaign"—*without* any of its honours, profits, emoluments, and distinctions.

It would seem to be a very inopportune moment to choose for the infliction of an injury on a great Mahometan State in India, and for the alienation of one who proved his loyalty and attachment to the British connection in times past; and yet there is reason to believe that the claim which has been before the Government for the return of the Berars to the Nizam has been met in a manner which closes the door to hope of restitution. It is not that the Indian Government and Lord Salisbury, acting for the Cabinet, declare that the Berars ought not to be restored "in the abstract," but it is argued that the British Government must determine the time of the restoration, and that it would be inexpedient to select the present moment. It is certainly a very inexpedient moment to select for irritating the ruler of ten millions of people in India, supposing that they take any interest in this matter.

On Monday next Prince Albert Victor and Prince George of Wales will attend at the Royal Naval College for examination for naval cadetships.

The Turkish soldier's ration is—Bread, 918 grammes; mutton, 250 grammes; rice, 75 grammes; butter, 8 grammes; salt, 2 grammes; wood, 250 grammes. Coffee is distributed so much to the company, which is generally the cooking unit. There are, roughly speaking, 32 grammes in an ounce.

The idea of a "Roumanian" Minister calling the Turks "savages" is rather good! It was Mr. Bratiano, a Roumanian Minister, colleague of this Mr. Cogalniciano, now Minister for Foreign Affairs, who approved of the *noyades* and persecutions of the Jews by the enlightened Christians of Roumania, and the pious people of Servia pursue the same system of oppression to the children of Israel who find toleration and protection in Turkey. If the Roumanians allow the Russians to occupy their towns on the Danube, they must expect that the Turks will destroy those towns if they can; and the course their Government has pursued disentitles them to any treatment but that which we should deal to rebels.

We have not the least faith in the permanence of peace with the Afreedees. They merely want to get in the seed and gather their crops, and when autumn comes they will be at their old tricks again—perhaps with some new ones—and with more vigour this time.

The English map-makers do not seem to be very happy in their attempts to satisfy the public wants in the matter of good maps of the seat of war. The only maps we have seen which contain the names of all the places in Roumania and in Armenia which have been "mentioned in despatches" are those of Kiepert of Berlin, and the Austrian maps published at Vienna. There may be English maps which are as good, but we have not seen them, and those we have seen are open to the criticism of the *Times* in a brief notice of these latest issues last week.

The Island of Crete just now possesses unusual interest for British readers, and we can safely recommend to their notice the excellent account of the place by sea and land written by our friend Rear-Admiral Spratt in 1864, and published by Von Voorst, than which no better or more satisfying piece of topographical writing about Crete has been given to the public.

One of the illustrated papers last week gave an engraving of a Cossack outpost which was not calculated to inspire the public who know anything about the present equipment, uniform, and appearance of the Russian Cavalry with much confidence in the accuracy of the representations of scenes in the war, and if all the illustrations be equally imaginative or antiquarian, want of confidence would be justified. The head-dresses, cloaks, and boots belong to the irregular Cossacks of 1854—not to the regular Cossack of the Army of 1877.

Some of the correspondence relating to the war which appears now-a-days is curious. From Berlin we are informed, under date of May 10, that intelligence has "just been received there from Bucharest of the entry into Wallachia of several Russian detachments"! We should think so. Again, we learn that "the Russian commanders are evidently taking every precaution to bring their armies to the Danube without fatiguing the men and animals." To ensure that end, "the larger proportion of the Cavalry march on foot, leading their horses," which is, we are assured, an excellent way for preventing the *animals* becoming exhausted? But how about the *men?* Bucharest seems to be the head-quarters for news, and it is thence we hear of the operations on the Danube at points hundreds of miles away. The mortality among horses continues to be great. The Roumanians destroyed two Turkish gunboats. These gunboats opened fire on the Roumanians at Oltenitza at 3 p.m. on May 10, and continued their practice till 7 p.m. "The Roumanians had one horse killed." Why not give us the horse's name? The most detailed news in the leading journal comes from Vienna.

Since Mr. Gladstone has gone from Carlton House-terrace to Harley-street, he has taken it into his head, among many other—oh, how many!—ideas that the "West End" is a very bad place, and he has laboured hard to show that no good thing comes out of or is approved of in it. Does Mr. Gladstone really propose that the views of the *turba Remi* there are to shape the ends of our domestic legislation on foreign policy? Or does he go in for the democratic charms of Harley-street and of that postal district?

It is now just twenty-three years since Major Collingwood Dickson was anxiously awaiting at Gallipoli the arrival of Lord Raglan, in expectation of being put on his Staff as Turkish Interpreter. The gallant officer had been for some years engaged as Artillery Instructor to the Turkish Government at Tophaneh, and had apparently but little hope or chance of a career at home in his own arm of the Service when the war of 1854 was declared, and he hastened to place his services at the disposal of the Government. What those services were are written in history. For some time he was attached as Interpreter to Lord Raglan, and he held no military command, even at the Alma; nor was it till the siege began that his abilities in the arm of the Service to which he belonged were specially engaged, and it was to his battery which was entrusted the duty, thoroughly performed, of silencing and destroying the Malakhoff Tower, on October 17, 1854. The work he did with his two 18-pounders at Inkerman made him at once conspicuous, and the letter of the *Times'* Correspondent giving a narrative of his exploit drew all eyes upon his name, whilst the official commendation of dispatches secured his professional advancement. He has now gone out to Constantinople to assist his old friend and comrade Mr. Layard in any military matters which may have to be discussed, and no better councillor could be found than Lieutenant-General Sir C. Dickson, who revisits the scenes of his early labours with such a very different purpose and position to those he had in 1854.

At the beginning of the London Season, or, at least, at the commencement of the best part of it, H.R.H. the Duke of Connaught sets a conspicuous example of love of work and attachment to the duties of his profession by leaving race meetings, balls, operas, and all the infinite gaiety and diversions of life, which are open to one in his position here, to go back to his regiment in Ireland, where truth compels us to say there is little to amuse any one, either in the capital or the country, when the hunting season is over, Dublin being just now especially dull.

Sir W. Palliser's claim for an extension of his patent rights has had a chilling reception, the Judges thinking that £20,000 was not a bad return for his invention and labours. But if there had been pressure on the country and a war panic, not only £20,000, but £200,000 would have been cheerfully paid to the gallant officer who has so materially contributed to our means of piercing armour-plates and "letting daylight" into our enemies.

The novel case of "Grant against the Secretary of State" raises points of immense interest and importance to Indian officers, but we are not very sanguine of the results of a fight against the power of the Crown to dismiss officers, unless that power has been specially limited. We offer no opinion, however, and are only anxious that the rights of officers should be defined and guarded.

The observed of all at Wagner's opening night last Monday was Count Schouvaloff, who was seated beside her Imperial and Royal Highness the Duchess of Edinburgh, apparently in the very best possible spirits and in his usual good-humour, and, indifferent apparently to the progress of the debate in the Commons, remained in the Royal box to the end. It is supposed that the leave of absence which his Excellency has taken is not quite unconnected with urgent public as well as with urgent private affairs, and his departure may have been in some degree influenced, it is supposed, by the effect produced by the reply of Lord Derby to Prince Gortschakoff's Circular. Whatever may be said of Russian policy or designs, Count Schouvaloff is accepted in London society as a most agreeable gentleman—a *persona grata*—everywhere.

It will have been observed that H.R.H. the Duke of Cambridge was unable to receive the Queen on the occasion of the review at Aldershot on Wednesday, and we regret to hear that the cause of the Field-Marshal's absence was indisposition. It is stated, though we cannot vouch for the accuracy of the report, that it is likely the Duke of Cambridge may be appointed Commander-in-Chief, instead of Field-Marshal Commanding-in-Chief, and the change seems in every way commendable, especially as it has been ascertained that there will be no increase of pay or charges to the State in consequence of it. The "Letter of Service" by which his Royal Highness holds his appointment would, of course, have to be modified.

If the mouthing and froth of Mr. T. Hughes and of speakers at Gladstone meetings could be reduced to a solid, it would be a sword to use in a war against Turkey, and, as Russia is at war with Turkey, we should be the allies of Russia. But there is not a man in England of the smallest consideration who would venture to recommend such a course as a panacea for the wounds of the Christians in Turkey. Well, then, all that mouthing and froth are mere "bounce" and "brag," quite unworthy of Englishmen, and calculated to render their names ridiculous. Abroad we have rather a reputation for swagger as it is, and it is at best such a reputation as only becomes small and insignificant people who cannot afford to let their own deeds speak for their position in the world.

So far the great English newspapers seem to be in a bad way as to their war correspondence. The "special" gentlemen have not been able to get to work at the scenes of action, and instead of battle pieces and animated and minute descriptions of advances and retreats, scenery, tactics, and incidents of travel, we are treated to meagre and contradictory telegrams from such places as Bucharest, Galatz, Jassy and Pera. What an admirable field for correspondents the recent events in Asia Minor would have afforded could they have made their way to it! The Russian invasion of Armenia, the fight near Batoum, the march from Goumri (Alexandropol), and from Erivan, the taking of Bajazid, the battles around Kars—these and the surrounding circumstances would have given material worth its weight in gold to our journals. But the abrupt declaration of war took them by surprise, perhaps; and there is, we hear, a positive order of General Miliutin not to allow British correspondents or officers to accompany the Russian armies. Colonel Stracey was politely requested to retire, and others have been refused. The Turks, however, are not so difficult as to giving leave, but are not easy to accompany in the field.

REVIEWS.

How to Make Up; a Practical Guide for Amateurs, &c. By Haresfoot and Rouge. With Illustrations. (Samuel French, 89, Strand.)

This little work seems to us to "hit the blot" in many an amateur performance, and to be a most useful guide to those who delight themselves, if not others, by amateur performances, which afford so many pleasant hours in garrison, camp-quarters, and ship-board. The illustrations and directions are clear as can be, and we think that some veterans off the stage might learn a useful hint or two in making up for their parts on the great theatre of life from the modest little volume. The efforts of some ancients to look young are as painful as obvious, and the study of this work might be of great benefit to them.

Messrs. Cassell and Co.'s Magazines.

As each month progresses, Messrs. Cassell and Co. provide some new contribution to literature which is well calculated to maintain the reputation that the firm has already acquired. We are all on familiar terms with "The Quiver," "The Family Magazine," "Old and New London," "The Bible Dictionary," "The History of England," "The History of India," and "The Illustrated History of the United States of America." Each is excellent in its way. It seems to be a thing that "no fellow can understand" how, for the sum of sixpence, Messrs. Cassell and Co. can provide the public with such value as is contained in the May number of "The Quiver." Twenty stories of average length, and of more than average merit, all neatly bound in pamphlet form, and sold at sixpence, seems a marvel of cheap literature. But, indeed, the same observation is applicable to each of Messrs. Cassell and Co.'s contributions. We only select "The Quiver" on the *ex uno disce omnes* principle.

The fourth volume of the Cabinet Edition of Mr. Kinglake's "History of the Invasion of the Crimea" has just been issued by Messrs. Blackwood. There is no new matter, and we miss the introductory remarks which in previous volumes of this valuable issue gave us the results of the author's latest reflections on the Eastern Question, and on the attitude of political leaders in this country in reference to it; but the story of the war reaches its highest interest, and there is one point about that story which may be noted—History will not repeat itself. The Crimea will never again be invaded from the sea.

ROYAL NAVAL FEMALE SCHOOL.

The thirty-seventh annual meeting of this naval charity took place at the Royal United Service Institution on Wednesday, the 9th inst., under the presidency of Admiral the Hon. Arthur Duncombe. Amongst those in attendance were Admirals Sir Frederick Grey, G.C.B.; Sir Claude Buckle, K.C.B.; Sir John E. Commerell, K.C.B.; the Hon. Francis Egerton, M.P.; Hand, R. A. Oliver, Ommanney, Wellesley, Boyle, and Sir Charles Eden, K.C.B. Capts. W. Dawson, Boyce, May, and Woodgate; Messrs. Fitzroy, Cleeve, Eames, Warre, &c. The report was read by Capt. the Hon. F. Maude (one of the Hon. Secretaries), and the Secretary, Mr. S. Rayson, read the balance-sheet. The President, in moving the adoption of the report, urged the necessity of his hearers making the school more widely known amongst their brother officers and friends, with the view of bringing in an increased amount of support, so much needed in order to enable the committee to meet the increased expenses of the institution, consequent on the enhanced cost of provisions, the rise in wages, and other outlay necessary to keep pace with the higher educational requirements of the times. The Rev. J. D. Hales, Vicar of St. John's, Richmond, Capt. W. Dawson, Mr. A. Eames, and the other speakers ably supported by their remarks the earnest appeal of the chairman. The report showed that there was a deficiency of current income for the past year to the amount of £713, which obliged the committee to use an equal amount of money received as donations and legacies, which would otherwise have been invested. It also stated that there had been a slight falling off in the annual subscriptions, a circumstance we very much regret; and bearing in mind that the sum received under this head for the last year was only £1,280, it is not too much to say—considering the number of officers on the "Navy List" who have not yet contributed to this institution—that the amount ought to be more than double. We believe that the school, educationally, is in a very good state of efficiency, and we earnestly hope that the great commercial public will so combine with the Navy that the usefulness of this excellent naval charity may never be allowed to diminish for want of funds to carry on its high and noble work.

ARCTIC MEDALS.

The Department of the Accountant-General of the Navy and Controller of Navy Pay, Admiralty, New-street, Spring-gardens, have issued the following notice:—"Notice is hereby given, that the medals awarded to the officers and crews of her Majesty's ships Alert and Discovery, and the yacht Pandora, for service in the Arctic Expedition of 1875-76, are now in course of distribution. Application should be made personally, or by letter addressed to the Accountant-General of the Navy and Controller of Navy Pay, Admiralty, London, S.W. Petty officers and seamen, whether applying in person or by letter, are required to produce their certificates of service."

H.R.H. the Princess Christian has graciously consented to become patroness of an amateur theatrical performance to be given by the Philothespian Club at St. George's Hall, Langham-place, on May 31, in aid of the funds of the Home for Incurable Children, 33, Maida-vale, W.

Furnish on the New Hire System.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea.—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices, 9, Southampton-street, Strand.

The Navy.

◆

GAZETTE.

Admiralty, May 4, 1877.

In accordance with the provisions of her Majesty's Order in Council of Feb. 22, 1870, Staff-Com. Daniel John May has been placed on the Retired List of his rank from the 26th ultimo. Chief-Engineer Henderson Leslie has been placed on the Retired List from the 2nd inst.

May 7, 1877.

Navigating Sub-Lieut. William Sugden has been promoted to the rank of Navigating Lieut. in H.M.'s Fleet, with seniority of April 24, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Fleet-Surg. George Irwin Willes, M.D., has been this day placed on the Retired List, with permission to assume the rank and title of Deputy Inspector-General of Hospitals and Fleets in H.M.'s Fleet.

May 8, 1877.

Navigating-Lieut. F. K. Taylor has been promoted to the rank of Staff Com. in H.M.'s Fleet, with seniority of April 26.

The following promotion has been made:—Navigating Sub.-Lieut. V. D. Hughes to be Lieut. in H.M.'s Fleet, with seniority of April 24, 1877.

Royal Marines—The undermentioned promotions, dated May 3, 1877, have taken place in the Royal Marine Light Infantry, consequent upon the retirement, under the provisions of H.M.'s Order in Council of Feb. 22, 1870, of Lieut.-Col. and Brevet Col. G. Drury, viz.:—Capt. and Brevet Major O. F. C. Fraser to be Lieut.-Col., vice Drury; Lieut. H. A. A. Turner to be Capt., vice Fraser.

May 9, 1877.

Assist.-Paymr. F. A. Carter has been promoted to the rank of Paymr. in H.M.'s Fleet, with seniority of May 2, 1877.

APPOINTMENTS.

Rear-Admiral W. M. Dowell, C.B., to be second-in-command of the Channel Squadron.

Captains—The Hon. Edmund R. Fremantle, C.B., G.M.G., to the Lord Warden for temporary service, vice Buckle, sick; Robert H. M. Molyneux, to the Duncan, additional for service in the Ruby; and George H. Parkin, to the Asia, "vice" Charles H. Waddilove, whose period of service has expired; W. Hunt Grubbe, C.B., to the Devastation, vice Richards, whose period of service has expired; W. E. Gordon, to the Rupert, vice Grubbe; C. S. Jago, to the Raleigh, vice Tryon, time expired.

Commander—Lewis R. Beaumont, to the Vernon for temporary service.

Lieutenant—William C. H. Snell, to the Achilles, when recommissioned as a sea-going ship.

Navigating-Lieutenant—John G. Scott, to the Hotspur.

Sub-Lieutenants—Cecil H. Wright and Charles G. May, to the Achilles.

Midshipmen—William H. Eyre, Godfrey Hubbard, Annesley B. Prance, Francis C. Tattersall, Armytage A. Lucas, and Montague G. Cartwright, to the Achilles.

Naval Cadets—George A. Ballard and Henry Adair, to the Achilles.

Fleet-Surgeons—William Ross to the President; and Alexander Watson, to the Duncan, additional, for service with the Marines at Deal.

Surgeon—D. Twigg, to the Undaunted, for disposal.

Paymasters—William J. C. Row, to be secretary to Rear-Admiral Dowell, C.B.; and William E. Chown, to the Amethyst.

Engineer—Thomas Rose, to the Mosquito.

Active, Capt. R. F. Boxer. The hot haste with which the Active was re-commissioned was scarcely called for, says the *Hampshire Telegraph*, having regard to the state of the ship, and had the Admiralty been better informed as to her real condition, it is not probable that they would have made all the appointments of officers until the ship was ready. It seems strange that so many defects should have been discovered in a ship which was reported as fit for immediate commission, and her surface condensers are in such a bad condition that they will be under repair until the end of this month. Then will come the trial trips and usual delays, so that if Commodore Sullivan has started from the Cape for the West Coast under the impression that he will find the Active there ready to receive him, he will be disappointed.

Alacrity, Lieut.-Com. W. U. Moore, left Sydney on March 15 for Fiji, calling, if possible, at Norfolk Island *en route*.

Alexandra, Capt. R. O'B. FitzRoy, flagship of Rear-Admiral G. T. P. Hornby, arrived at Suda Bay on the evening of the 8th inst., with the Swiftsure, Monarch, Devastation and Hotspur.

Assistance, Capt. Prattent, sailed from Portsmouth early on Wednesday for Queenstown, Channel Islands, &c.

Beagle, Lieut.-Com. C. Caffin, on arrival at Sydney from Fiji, will refit.

Bittern, Com. G. J. Anstruther, was at Malta on the 8th inst.

Britannia, Capt. W. Graham. The annual regatta of the cadets took place last week. The result of the various races were as follows:—Four-oared gigs, 4th Form Cadets—1 Duff, Graham, Anstruther, Walker, Carey (cox.); 2, Sutton, Holmes (a), Vaughan Hughes, De Robeck, Douglas-Hamilton (cox.); 3, Pollen, Pearce, Beck, Meredyth, Ethelstone (cox.). Four-oared gigs, 3rd Form Cadets—1, Martin, Evan-Thomas, Yelverton, Parks, Hotham (cox.); 2, Worthington, Akers, Lyons, Monro, Lloyd (cox.); 3, Cooper (a) Kennedy, Wilson, Hutchinson, Richardson (cox.). Four-oared gigs, 2nd Form Cadets—1, Burne, Limpus, Hill, Chadwick, De Horsey (cox.); 2, Anson, Brune, Pasco, Orpen, Wake (cox.); 3, Hillyar, Spain, Petre, Gaitskell, Browning (cox.). Ten-oared cutters—Starboard *v.* Port—1, starboard, Graham, Anstruther, Sterling, Faithfull, Even-Thomas, Duff De Robeck, Gleig, Martin, Yelverton, Carey (cox.); 2, port, Sutton, Holmes (a), Denman, Parks, Burne, Wood, Pearce, Walker, Parry, D. Hamilton (cox.). Four-oared gigs—1st Form Cadets—1, De Crespigny, Williams, Parry, Weymouth, Miller (cox.); 2, Clive, Cooper (b), Faussett, Somerville, Beaumont (cox.); 3, Musgrave, Travers (b), Travers (a), Daintree, Webber (cox.). Scullers, over five feet—This was rowed in heats, with the following results:—1, Anstruther; 2, Graham; 3, Pearce. Four-oared gigs—Study class—1, Martin, Evan-Thomas, Yelverton, Parks, Hotham (cox.); Anstruther, Walker, Sterling, Graham, Madden (cox.); 3, Pasco, Limpus, Gaitskell, Boys, Wake (cox.). Scullers, under five feet; rowed in heats—1, Ellis; 2, Wilson; 3, Walker. Pair-oared boats, over five feet, with coxwains; rowed in heats—1, Duff, Graham, Carey (cox.); 2, Burne, Pasco, West, (cox.); 3, Holmes (a), Wood, Douglas, Hamilton (cox.). Pair-oared boats, under five feet, with coxwains; rowed in heats—1, De Robeck, Vaughan, Hughes, Carey (cox.); 2, Worthington, Munro, Lloyd (cox.); 3, Cooper (b), Dantree, Olivier (cox.). Scratch crews in four-oared gigs—1, MacInnes; 2, Lloyd; 3, St. John; 4, Carey; 5, Ethelstone: 6, Miller; 7, Ellis; 8, Madden. Eight started. Mr. Lawless, naval instructor, acted as judge, and the Rev. J. Aldous as starter.

Conflict, Lieut.-Com. J. G. Musters, has orders to proceed to the New Hebrides.

Daring, Com. J. G. Hanmer, was at San Diego on April 3 *en route* for Esquimalt. Her officers were to be entertained at a banquet by the inhabitants of San Diego.

Defence, Capt. R. P. Cator, having bottom cleaned and coated and other defects made good, will be put out of dock at Devonport to-day.

Fox, Staff-Com. J. G. Dathan, has been ordered to Portsmouth with boilers for the Triumph and stores for other ships, and also takes supernumeraries for the Urgent, which is being fitted for a depôt ship at Jamaica.

Hector, Capt. C. H. Simpson, which was moored off Cowes during her Majesty's residence at Osborne, has returned to Netley. The Hector is in excellent condition as regards her boilers and hull, having only recently undergone a thorough refit, and is quite fit for any service.

Helicon, Lieut.-Com. R. W. Stopford, was at Malta on the 8th inst.

Himalaya, Capt. E. White, arrived at Simon's Bay on April 17; left again about April 22; arrived at St. Vincent, Cape de Verde, on May 10; will leave on May 11 for England. She has on board, from the Cape, 296 of the 32nd Regt.

Immortalite, Com. Gerard Noel, arrived at Portsmouth yesterday.

Lord Warden, Capt. the Hon. E. R. Fremantle, C.B., is to be in Plymouth Sound by the 26th inst., to join the Channel Squadron for evolutionary cruising.

Minotaur, Capt. Lord W. Kerr, flagship of Rear-Admiral Beauchamp Seymour, is ordered to be completed with all possible expedition. She has been docked for having her hull cleaned and recoated with composition, and is ordered to have her torpedo gear finished by the 25th inst., so that she may proceed to Plymouth and join the other ships of the squadron on May 28. Should any of her fittings not be completed by the time fixed she will take working parties with her to Plymouth, so that the work may be completed during the passage.

Myrmidon, Com. the Hon. R. Hare, was paid off at Sheerness on Thursday.

Narcissus, Capt. Lord Charles Scott, flagship of Rear-Admiral Lambert, C.B., arrived in Plymouth Sound on Thursday.

Newcastle, Capt. R. G. Douglas, has proceeded to Sheerness.

Nymphe, Capt. S. P. Townshend, left West Australia on Feb. 21 for Fremantle; she would convey the Governor to the Pearl Shell Fisheries, and return to Sydney.

Orontes, Capt. Edward H. Seymour, is undergoing a thorough overhaul at Portsmouth. She was to have left on the 15th inst., and proceeded to Ireland to receive the 88th Connaught Rangers, now stationed at Athlone, for conveyance to Cape Colony, but this order has been cancelled. Instructions have been received for the construction of additional accommodation for troop horses.

Osprey, Com. the Hon. Henry Holmes A'Court, tried machinery at Sheerness on Tuesday, result very satisfactory; she will be ready to leave to-day for the Pacific Station.

Pigmy, Staff-Com. Hewlett, having been relieved by the Waterwitch, has been docked and bored for the purpose of ascertaining her condition, which is so rotten that it would be a waste of money to bring her forward for repairs.

Raleigh, Capt. G. Tryon, C.B., was at Suda Bay on the 8th inst.

Renard, Lieut.-Com. H. J. Pugh, has been detained at Auckland to be ready to communicate with the Sappho.

Resistance, Capt. C. W. Hope, is to be patched up for a turn of Coastguard duty, as she is beginning to grow too infirm for cruising with the Channel Squadron. Her last regular overhaul was in 1873, when her boilers were put on board; but the Achilles, which will exchange places with her, was refitted about eighteen months ago, and her boilers have not been much used since they were put into her.—*Hampshire Telegraph.*

Rocket, Lieut.-Com. C. R. Harris, returned to harbour at Vancouver on the 6th inst. In 1873 a steamer on a voyage to Alaska was lost in Queen Charlotte's Sound. About fifteen of her crew escaped in a boat and landed. As a rule, the Indians have always been foremost in good works and mercy towards shipwrecked people, but on this occasion they were tempted by gain to murder them, which was done. Various inquiries were made afterwards, but no light could be thrown on the occurrence until about six weeks ago a man came down in possession of certain articles belonging to the lost ship, and suspicion fell on a tribe in Deane's Inlet on the mainland to the north of the island. The Rocket, taking an interpreter with her and a sergeant of police, left on March 14 for the place. On her arrival there a close inquiry was instituted, and it was ascertained that the head chief and two of the members of the tribe were still in the neighbourhood, and who had been implicated in the massacre. Measures were taken for their capture. Some of the head men of the village were seized as hostages, and were informed the culprits must be given up. After a great deal of parleying and nothing forthcoming, a boat was sent in, when the natives threatened to fire on the landing party. Six hours' consideration were then given to them, which was again prolonged, when, finding all further parleying useless, the Rocket, having first fired some blank cartridge and sent in a boat manned and armed to ascertain that the village was empty, shelled and burnt the place; this had the effect of the two men being delivered up. The chief had "skedaddled." The Rocket therefore returned with two of the head men and the two culprits on board, who will be handed over for trial.—*Western Daily Mercury.*

Rupert, Capt. H. J. Grubbe, C.B., was at Malta on the 8th inst.

Sandfly, Lieut.-Com. J. Bell, was on her way back to

Sydney from her cruise round Australia when the last mail left.

Sapphire, Capt. E. H. Murray, arrived at Port Chalmers, New Zealand, on March 14.

Sappho, Com. Noel N. S. Digby, was at Samoa, according to last accounts.

Sealark, Lieut. F. H. Haygarth, has proceeded to Falmouth.

Sultan, Capt. H.R.H. the Duke of Edinburgh, arrived at Malta from Marseilles on Monday, and has left for Crete to join the flag.

Thetis, Capt. T. Le Hunte Ward, was to leave Malta on the 4th inst. for Gibraltar and England, and would, it was expected, reach Devonport about the 24th.

Torch, Com. R. H. Hamond, arrived at Malta on the 2nd inst.

Topaze, Capt. A. T. Thrupp, arrived at Plymouth on Thursday.

Tourmaline, Commodore F. W. Sullivan, C.B., was due at Cape Coast Castle on Saturday last, and will return to Simon's Bay in July. The ball given on board the Tourmaline on Thursday by Com. Wright and the officers almost exhausted the resources of even the elastic hospitality of that hospitable branch of the Service. There were two hundred and fifty guests, including the Commodore and Mrs. Sullivan, the Misses Frere, the Hon. Cecil Ashley, several officers of the Cape Town garrison, and a large representation of the beauty and grace of Cape Town. Covered lighters, well lined and carpeted, were provided to convey the guests from the dockyard to the ship. On board the Tourmaline a false floor was formed from the poop to the midships. This floor was in perfect order for dancing. On the poop-deck refreshments were served, and supper was laid forward. An ample awning covered in the hall, refreshment, and supper-rooms, which were brilliantly lighted with lanterns, chandeliers, and Chinese lamps, and elaborately decorated. Most noteworthy was a large grotto down the centre of the supper-room, rich with ferns and dahlias, and showing in floral letters the name of the ship. Nothing could exceed the attention and genial hospitality of the officers of the Tourmaline, and at 4 o'clock the next morning their fair guests were reluctant to tear themselves away. Last night the Commodore, with his usual hospitality, gave a dance to the remaining visitors. We regret to add that the Tourmaline will shortly leave for the West Coast, it is believed about the 18th inst.—*Cape Times*, April 7.

Valorous, Capt. L. F. Jones, has made a trial of machinery not altogether satisfactory, there being slight priming and insufficient steam.

Victoria and Albert, Capt. Thomson. As a mark of the regard and esteem in which his Serene Highness the Prince of Leiningen, G.C.B., was held by those who have served under him, they resolved to make a presentation to the Princess of Leiningen. It consists of a solid silver vase in the form of a nautilus shell resting on sprays of coral and seaweed, and supported by a stem and base of bold shell and scroll work. The centre stem contains *repoussé* medallions of the Queen and of the late Prince Consort. The nautilus shell, which is composed of frosted silver, bears on one side a representation of the Victoria and Albert, and on the other relievos of the Alberta and the Elfin. At the end of the shell is a figure of a mermaid. The whole is mounted on an ebony block, ornamented with dolphins. At the front is a shield, bearing the following inscription :—"Presented to her Grand Ducal Highness the Princess of Leiningen, in commemoration of her husband, Rear-Admiral his Serene Highness the Prince of Leiningen, G.C.B., &c., upon attaining his flag, relinquishing the command of her Majesty's yachts, by the Royal yachtsmen whose names are inscribed, as a token of remembrance of many happy days.—Hugh Campbell, J R. T. Fullerton, D. M'Ewan, J. Sear, J. G. Wallace Hoare, H. T. Stephenson, T. W. Sulivan, D. W. Welch, A. Balliston, A. T. M. Roberts, hon. sec." The shields at the sides contain the names of the subscribers, while that at the back bears a Royal crown.

Warrior, Capt. W. H. Whyte, has been ordered to Portsmouth from Portland. There was to have been a ball on the 15th, and this has necessarily been postponed.

Wolverene, Commodore Hoskins, was at Hobart Town on March 19. She left Sydney on March 7, and arrived at Hobart Town on the 13th, and would leave on March 28 for New Zealand.

ROYAL NAVAL COLLEGE.

The following extracts have been made from some of the most important recommendations and observations of the Committee appointed to inquire into the establishment of the Royal Naval College :—

On the whole, from the various testimonies we have received, we are brought to the conclusion that there is very little deficient either in the quantity or quality of the higher instruction supplied to the Classes A and B. But, while we have every reason to be satisfied with the provision made for the instruction of these classes, we are bound to say that Class B, particularly the half-pay lieutenants, are extremely remiss in availing themselves of the advantages offered. We take the table of absences in the month of May as an illustration. There were 104 hours of study in that month, the absences from which are on record, and it appears that one lieutenant was absent eighty-three hours, the average absences of the whole class being thirty hours. This contrasts very unfavourably with the gunnery lieutenants, one of whom was absent fifteen hours, the average absences of the whole class being three hours fifty minutes. And we have it in evidence that the habits of the half-pay lieutenants, who are voluntary students, even when present, are far from regular. One lieutenant informed us that "he came in at 9, and then found that he was obliged to go out for a quarter of an hour, about a quarter or half-past 10, and then came in again for an hour, and so on," and this he called "being pretty regular." Under such circumstances, it is quite clear that a good deal of the time of the instructors and the money of the country must be spent to no purpose.

We now come to Class C, *i.e.*, the acting sub-lieutenants who are at the College for their final examination after six months' study. As regards these students we feel bound to say that the state of things is not satisfactory, either as to the means supplied for their instruction or its results. During the last year it was found practically that the staff of instructors was not sufficient; but this was owing to the large number of students from exceptional causes, which are not likely to occur again. Admiral Fanshawe is, however, of opinion that it is amply sufficient for fifty, and Dr. Hirst carries on this number to seventy-five, the present number being fifty.

We recommend that each officer's attendance at lectures and studies should be officially recorded, and that returns showing the number of each officer's absences or only partial attendances should be furnished to the Admiralty not less frequently than at the middle and at the end of each session, special attention being called in these returns to the more serious cases of irregularity.

We think it important, however, to add that, in our opinion, it is indispensable to place sufficient time at Dr. Hirst's disposal to enable him to make personal visits frequently and without notice to the classes at work, more especially those attended by the half-pay officers and the acting sub-lieutenants.

The need of a subaltern instructor under the Professor of Fortification, and of a qualified assistant to take charge of the observatory and to teach the use of fixed instruments, has been strongly pressed upon us. We would suggest whether one of the assistants of the neighbouring Royal Observatory might not be willing and able to undertake this latter duty for some moderate addition to his salary, without making a new appointment in the College, unless it should be found that the Instructor in Nautical Surveying requires further assistance.

It has been brought to our notice that there is a great need in the engineering course of engines or models of engines to make drawings from and to refer to, the only one at Greenwich being an old engine of a type which is out of date. We believe it is only necessary to call attention to this want, which has probably not been yet remedied in consequence of the recent establishment of the College. A few models or portions of engines of the newest type, which could readily be supplied from the dockyards, would be of great service not only to the engineer students, but to all officers studying at the College.

There is only one more class of students at the College which it remains to notice, viz., that of naval-instructors. These gentlemen pass a preliminary examination, and then go through a course of study not exceeding nine months, at the end of which they are examined in those professional subjects which they will afterwards have to teach. The examination of course determines whether they possess the knowledge required. But something more than that is necessary to show they are fit for naval-instructors on board ship. Aptitude to teach is a gift. It cannot be acquired, and the possession of it cannot be proved by examination. We have had before us the case of an instructor who has made the most praiseworthy efforts to qualify himself for his duties, but who does not seem to possess this aptitude. It seems to us that it would be a good thing if a naval-instructor were to be appointed after his final examination, provisionally in the first instance, to work under the supervision of the Director of Studies for such time as may be thought desirable, and he might be usefully employed in assisting to instruct the acting sub-lieutenants. It would then be ascertained whether he had that aptness to teach and personal authority which would make him an efficient instructor when he had to act independently, and to a certain extent under great disadvantages as a teacher in a ship of war. It is possible that the ignorance of the acting sub-lieutenants when they come to this College may in some cases be attributed to the want of these qualities on the part of the instructors.

We think that in organizing the College, it is desirable to remove, as far as possible, from the minds of the executive officers of the Royal Navy, who are under instruction in it, the impression that they are simply going through on shore the same sort of instruction as they might have been going through under a naval-instructor in a ship of war. The youngest of them are men to whom the idea of going back to school again must be naturally repulsive. The strict discipline of a ship of war cannot be enforced outside it. New associations are needed; the Naval College should stand to the Britannia, and to the instruction afloat, in much the same light as the universities stand to the public schools, or as the Staff College to Woolwich and Sandhurst. No one can doubt that it would make a serious difference in the minds of undergraduates, if college "lectures" were still called "forms," and if "tutors" and "professors" were still called "masters." When it becomes impossible to insist upon the obedience of boys, it becomes all the more important to neglect no means, through new associations or otherwise, which may arouse the responsibility of men. We have no intention of depreciating the naval-instructors; in some subjects it would be very difficult to find gentlemen equally well qualified to teach young officers. But for the general instruction of the College, we prefer new associations, such as are represented by professors, with assistant professors, when necessary, in due proportion to the number of students.

We are led to insist the more strongly upon all that leads officers coming to the College from afloat to look upon this step as an advance to a higher sphere of instruction, because institutions, whether for the Army or for the Navy, labour under this inherent defect, educationally, that, unlike public schools and universities, they are not governed by those who teach, or by those who are drawn from the teaching body, so that the teachers everywhere appear to occupy a secondary place in precedence, in salary, in power. These conditions are (perhaps) inevitable, but it requires strong men to hold their own under them, however considerately such a system may be administered by the authorities, and all the support which can be given to the position of the teachers should be given. It is for such reasons we think that a body like the present professors, with juniors of the same stamp under them, are likely to encounter fewer difficulties in achieving the objects, arduous under any circumstances, which the College is expected to accomplish, than men equally able, who bring with them old associations.

So far as the annual examinations of Classes A and B are concerned, we find that, under the supervision of Dr. Hirst, they "are conducted by 'external examiners solely,' the questions being set and the answers reported upon by persons not on the College Staff." The examiners have hitherto been gentlemen distinguished in the several departments of learning in which they examined, and the only recommendations we have to make in regard to these examinations are that in those subjects where one examiner is employed he should not be appointed, as a rule, for more than two years, and never for more than three years; while in those where there are two examiners (as the mathematical subjects) they should not be appointed for more than four years, and that no examiner should set papers more than three times continuously on the same subject.

We are of opinion that four gentlemen of good university standing, experienced in examining, but not connected with the College, should be appointed for a period of two years to examine the acting sub-lieutenants in algebra, geometry, trigonometry, physics, and mechanics and hydrostatics, and that each should set five papers on every one of these subjects during that period, and should look over and mark the answers to them.

We further recommend that four gentlemen, naval instructors or otherwise, should be appointed for a period of two years to examine the acting sub-lieutenants in steam, theory of navigation and nautical astronomy, practical navigation, winds and currents, and marine surveying, and that each should set five papers on every one of these subjects during that period, and should look over and mark the answers to them.

The examiners should be furnished with particulars respecting the course of instruction pursued, the text-books used, and the percentage of marks required to pass in the several classes. Considering that some of the acting sub-lieutenants have had little instruction when afloat, and that their time there must have been chiefly employed in acquiring a practical knowledge of seamanship, the examiners should be enjoined to set a fair proportion of easy questions, and to seek more for a sound knowledge of a subject, with a constant view to its practical application in the Service, than for the power of solving intricate problems, which few can accomplish without long-continued previous practice.

We are of opinion that the gentlemen who examine the sub-lieutenants should undertake these examinations, under the supervision of the Director of Studies, who should arrange the subjects which should be assigned to each examiner. For the examinations for naval cadetships, we think that the services of two of the University examiners would be sufficient; for those of the cadets in the Britannia, the services of two of the University examiners and two of the examiners in professional subjects would suffice, independently of the examiner in French, in both cases. Considering what very important results depend on the examinations of the cadets in the Britannia, we think that where it is practicable, as in the mathematical subjects, the examiners should have had experience in examining young boys. This end could always be secured by appointing gentlemen who had examined the public schools or taken part in the middle-class examinations connected with the Universities. We think it necessary to mention that care should be taken that none of the questions set are beyond the course of studies pursued by the cadets.

Although at the present time Mr. Goodwin, with assistants, sets the papers at the two half-yearly examinations (of junior officers afloat) they look over the results of the July examination only, the others being looked over by the naval instructors on the several stations. We think that the papers should on both occasions be looked over by the gentlemen appointed to examine, and the results published to the Fleet once a year, as soon after the July examination as is practicable, the places of the officers in each year being arranged in classes and determined by the aggregate of the marks obtained in the two consecutive examinations. Rewards should be given to those who most distinguish themselves in the class lists, and a note should be attached to the name of every officer certifying how long he had had the advantage of instruction on board ship.

We think that each naval instructor should make a report at the end of each half year to the officer in command of the ship on board which he is serving, and that this officer should forward a copy of this report with his own observations to the Admiralty.

We have heard different opinions respecting the amount of time which a midshipman may bestow on his studies when afloat, due regard being had to his devoting so much attention to seamanship and professional duties as will ensure his obtaining a thorough acquaintance with these most important parts of his education. No doubt in some small ships, where many duties are thrown on a young officer from which he is free in large vessels, the time for study is necessarily small, but in the Channel and Flying Squadrons, "where a large proportion of the whole of the midshipmen in the Service are serving," all the ships in which carry naval instructors, it seems to be considerable, and is greater than that assigned to mathematics in many schools. Mr. Goodwin thinks that, under favourable circumstances, "a ship which averaged seven and a-half hours a-week would be doing very well indeed, and might be taken as a very fair example of the amount of study in the whole fleet." This is borne out by the report of the Committee of 1870 on the Higher Education of Naval Officers, which devotes a chapter to the system of tuition on board ship. Capt. Curme, on the other hand, says that in his ship "the midshipmen had, on an average, fifteen hours a-week of good work," and "that he allowed nothing to interfere with their school hours." Adopting the former of these two opinions, which supposes the midshipmen to be studying, on the average, for one and a-half hours for five days in the week, it seems probable that under an efficient and painstaking instructor they could not only keep up the groundwork of knowledge which they had acquired in the Britannia, but also go considerably beyond it. It must not be forgotten that midshipmen, like most other youths, require some encouragement and competition to make them work with zest and perseverance; indeed, in their case, these powerful stimulants to industry are especially necessary, owing to the interruptions to which their studies are subjected. We are inclined to think that had they the incentives to study which others of their age usually enjoy, but of which they are now almost destitute, many of them would employ their working hours more profitably than they do at present. Admiral Ryder, in his evidence before the Committee of 1870 on the Higher Education of Naval Officers, when speaking on the studies of the midshipmen, observed "a great deal of time that might be used for purposes of study is often wasted," and this is not surprising considering how small are the motives which induce them to work.

We agree with Dr. Hirst in thinking that the examinations of (4) candidates for naval clerkships should be placed in the hands of the Civil Service Commissioners, to whom also might be entrusted those of (5) and (6), candidates for naval instructorships and for interpreterships. We consider it desirable that these examinations should be undertaken by persons unconnected with the College.

PAY OF MAJORS R.A. IN INDIA.

The injustice and delay that the officers of the Artillery and Engineers have experienced in having the pay due to them as majors when promoted to that rank in July, 1872, withheld by the Indian Government until April, 1875, is most aggravating to those concerned. It has been a loss to them of two and three-quarter years' difference of pay between captain's and major's rank. That this is deeply felt by them, and is appreciated by the Commander-in-Chief in India, is proved by the fact that their claim has been submitted in the form of a petition to Parliament—a course few, if any, officers ever pursue unless they consider that they have great justice on their side. Now, it would be a great consolation to know how much longer they will have to wait for this back pay. The petition has been in Parliament, we believe, since last January year. Will another year be allowed to pass by with this claim still unsettled? To sum up: The case was fairly and justly submitted to a lawyer of standing by some of the officers concerned—who had received no alleged consideration in lieu in the way of contracts, &c., whatever—and the reply was that "no just reason could possibly be given by the Indian Government for withholding the pay of these majors on their promotion in July, 1872, which would not with equal justice have applied to retaining it in April, 1875, when it was granted to them, but without arrears."

VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Notwithstanding the opinion of an Army chaplain of 22 years' service, who considers himself at liberty to make a goose of himself in large camps, but not in garrison towns, I can see no reason why a chaplain of Volunteers, who has to be present at a certain number of parades, in order to make himself efficient, should not be allowed to attend in uniform.—I am, &c.,

A VOLUNTEER.

COMMISSARIAT RETIREMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As a means of solving the difficult question of promotion in this department, the following suggestion is offered for consideration:—By the Warrant of Nov., 1875, officers have an unqualified right to retire on retired pay after thirty years' service. I therefore would make this retirement (after that length of service) compulsory on officers in the administrative ranks; thus extending a principle now in force among combatant officers. This would give promotion to the senior executive officers, viz., the present commissaries. And in the case of the other executive officers, the deputy and assistant commissaries, the adoption of the principle which I believe has existed in the Army Medical Department is recommended, viz, that after a stated number of years' service a step in rank be given. Thus, say after twenty years' full-pay service a deputy should become a full commissary, and an assistant a deputy-commissary. A reform of this nature would cure many heartburns, especially among the junior ranks of officers who otherwise, from their age, have no hope of promotion.—I am, &c.,

RETIREMENT.

RETIRED NAVAL OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The answer of Mr. Egerton to Capt. Pim on the subject of the power of the Admiralty to recall naval officers from the Retired List into active service makes one feel anxious to have defined what could be the position as to rank, pay, and prospective promotion of an officer if so recalled. In many cases officers have been placed on a retired list with a step in rank. Is it to be understood that they would assume the higher rank if called upon for active service? Or how, in your opinion, would this part of the matter be arranged so as to prevent misunderstanding between officers in the Active and Retired Lists thus thrown together? Even, again, it would seem desirable that if retired officers are liable to be brought back again into active service, they should have the means of qualifying themselves for such service. How is this to be effected? This question is a very complex and important one to the public service, and would seem to demand more serious consideration than it has probably received at the Admiralty.

A RETIRED COMMANDER.

BIRTH.

MCHARDY.—May 9, at Rose Villa, Hamilton, N.B., the wife of Commander Wallace B. McHardy, R.N., of a daughter.

WILLIAM S. BURTON,

39, OXFORD STREET, W.

THE PERFECT SUBSTITUTE FOR SILVER.—The REAL NICKEL SILVER introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs. Elkington and Co., is the best article next to silver that can be used as such, either usefully or ornamentally, as by no test can it be distinguished from real silver.

Patterns.	Fiddle or Old Silver	Bead or Thread	King's or Shell.
	£ s. d.	£ s. d.	£ s. d.
Table Forks or Spoons, per doz.	1 10 .	2 1 .	2 5 .
Dessert do., per doz.	1 2 .	1 9 .	1 11 .
Tea Spoons „	. 14 .	1 . .	1 2 .

These are as strongly plated, and are in every respect at least equal to what other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern:—Table Spoons and Forks, 23s. per doz.; Dessert, 17s. per doz.; Tea Spoons, 12s. per doz.

Tea and Coffee sets, in white metal, from £3 15s to £7 7s.; Dish Covers, beaded pattern, £11; Ditto ditto, fluted, £15; from £9 to £21 the set of four Corner Dishes, from £7 10s. to £18 18s. the set of four; Warmers, £7 2s. 6d. to £15 15s.; Biscuit Boxes, 14s. to £5 10s.; Cruet and Liquor Frames, &c., at proportionate prices.

The largest stock in existence of Plated Dessert Knives and Forks, and Fish-eating Knives and Forks, and Carvers.

All kinds of re-plating done by the patent process

WILLIAM S. BURTON, General Furnishing Ironmonger, by appointment to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled Stock, with Lists of Prices and Plans of the 30 large Show-Rooms, post free.—39, Oxford-street, W.; 1, 1A, 2, 3, and 4, Newman-street; 4, 5, and 6, Perry's-place; and 1, Newman-yard; Manufactories, 84, Newman-street and Newman Mews, London, W.

£10 REWARD

Will be given to any Gentleman who can wear out a Pair of
FRANK PORTER'S REAL PORPOISE HIDE BOOTS
In six months, every-day wear.
Note the Address—40, LUDGATE HILL.
Lowest price for nett cash, 16s. 6d.

Warranted waterproof, and as soft as a glove. Gentlemen with tender feet have been known to wear these boots for two years without repairing.

COLCHESTER, ESSEX, on the outskirts of the town, within 10 minutes walk of St. Botolph's and the Hythe Stations, on the Wivenhoe Branch of the Great Eastern Railway, and only two miles from the main line station, from whence there is an excellent service of quick trains to London.—An exceedingly attractive Freehold Residential Property, known as Scarlett's, situate on the east side of the garrison town of Colchester. It comprises a substantially-built and and well-arranged residence, in capital order, including three reception rooms, four principal bed and two dressing rooms, two secondary bed rooms, bath room, and suitable domestic offices, with cellarage in basement. The residence occupies a dry and elevated position, commanding extensive and pleasing views over an undulating country, placed nearly in the centre of about 20 acres of very ornamental land, approached by two carriage sweeps, with entrance gates, surrounded by lawns and pleasure grounds, tastefully studded with choice specimen shrubs, conifers, and other trees of great beauty and luxuriant growth, intersected by shaded and winding walks, leading to productive kitchen gardens, with conservatory, vinery, and forcing pits, well-stocked orchard, and productive closes of pasture land. In the rear is a small farmery, gardener's cottage, and the requisite outbuildings. The whole occupying a charming position, and, with the exception of about two acres, is in hand, and will be sold with possession.

MESSRS. BEADEL are instructed by the Proprietor to offer for SALE by AUCTION, at the Mart, Tokenhouse yard, London, on Thursday, the 7th of June, 1877, at 2 o'clock precisely, in one lot, the above very attractive FREEHOLD PROPERTY. Particulars, with plans and conditions of sale, may be obtained of Horace Philbrick, Esq., Solicitor, 50, Old Broad-street, E.C.; at the Mart; and of Messrs. Beadel, 25, Gresham-street, London, E.C.

PROFITABLE FARMING.—FREEHOLD LAND TO BE SOLD, at £2 per acre. A party will accompany the Land Commissioner this month to inspect the rich pasture lands of Southern Minnesota, near towns and railways. The soil and climate are all that could be desired. Good shooting and fishing. Stock raising pays 50 to 100 per cent. Cost of transit to an intending purchaser, from Liverpool to the Lands, £15, first class. For full particulars apply to William Ellison, Architect, Mansion House, Building, E.C., or F. C. Taylor, Land Commissioner, 57, Charing Cross, S.W. Bankers, McCulloch and Co., 41, Lombard Street, E.C. Pamphlets post free.

RALEIGH CLUB. — The ANNUAL GENERAL MEETING will be held at the Club House, 16, Regent Street, S.W., on FRIDAY, the 25th May. The Chair will be taken at one o'clock. By order.

THE WANDERERS' CLUB. Pall Mall.—The number of members having now reached 1,400, there remain only 200 vacancies. Candidates joining from this date will pay one subscription, extending to May 1st, 1878. The entrance fee remains at 10 guineas. Subscription:—Town members, 3 guineas; country members, 4 guineas. The Club being strictly proprietary, the members incur no liability. The Honorary Secretary to the Committee is Lieut.-Colonel T. R. H. Drummond Hay.—For further information apply to Major T. P. Kennan, Secretary.

Pall Mall, May 1st.

NAVAL AND MILITARY CLUB.—The ANNUAL GENERAL MEETING of this Club will be held at WILLIS'S ROOMS, 26, King Street, St. James's, on MONDAY, the 28th of May, at 2.30 p.m.

April, 1877.

ARMY GUILD OF THE HOLY STANDARD.—The ANNUAL MEETING of the Guild will be held in the Dining Hall of S. BARNABAS COLLEGE, Pimlico, S.W., on WEDNESDAY, 16th May, at 3 p.m.

G. E. W. MALET, Hon. Sec.

Junior U. S. Club, 16th April, 1877.

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO., 283, Strand, London, W.C.

THOMAS WHITE'S
CELEBRATED CAMPAIGNING KIT,
CONSISTING OF
BEDSTEAD, BEDDING, BLANKET, PILLOW, BATH, WASHSTAND, BASIN, CAMP-STOOL, BUCKET, LANTERN, POLE-STRAP, LOOKING-GLASS, PYJAMAS, AND SLEEPING CAP.
ALL OF WHICH ARE CONTAINED IN HIS
LOCK-UP WATERPROOF BAG.

Which, when packed with the above articles, supplies room for clothing and other necessaries. The chief feature in this Kit is T. White's FOLDING BEDSTEAD (recently improved), weighing 16lbs., price 30s.; or his larger sized ditto, 18lbs., price 35s., intended for officers entitled to carry extra weight. Also his CANTEENS for company messing, to cook for and dine three or more officers, as supplied and thoroughly tested during the Manœuvres of 1871, 1872, 1873, 1874, and 1875. This Canteen was used by Sir Garnet Wolseley, G.C.M.G., K.C.B., his Staff, and the 42nd Highlanders (the Black Watch), and other regiments during the Gold Coast campaign, and is recommended and patronized by the highest military authorities.

The above Campaigning Kit, or Canteens, and in most instances both, have been supplied to his Majesty the Emperor of Germany; H.R.H. the Duke of Cambridge, K.G., &c.; H.R.H. the Duke of Connaught, K.G., &c.; H.S.H. Prince Edward of Saxe-Weimar, C.B.; the late General Sir Hope Grant, G.C.B.; Generals the Right Hon. Sir John Michel, G.C.B.; Sir R. Walpole, K.C.B.; Sir Charles Ellice, K.C.B.; Major-Generals Sir Charles Staveley, K.C.B.; Sir Alfred Horsford, G.C.B., Military Secretary; J. S. Brownrigg, C.B.; Henry Smyth, C.B.; Lord Mark Kerr, C.B.; D. Lysons, C.B., Q.M.G.; Sir Thomas MacMahon, Bart., C.B.; Sir E. Greathed, K.C.B.; G. V. Maxwell, C.B.; Hon. A. Hardinge, C.B.; C. Shute, C.B.; W. Parke, C.B.; A. J. Herbert, C.B.; and Sir Garnet J. Wolseley, G.C.M.G., K.C.B., besides some thousands of officers of nearly every branch of and regiment in the Service.

THOMAS WHITE,
CAMP AND BARRACK FURNISHER,
Begs leave to inform Commandants of Corps, Presidents of Messes, and Officers generally, that he
IS PREPARED TO SUPPLY ON HIRE
EVERYTHING NECESSARY FOR OFFICERS' MESSES,
Including
MARQUEES, FURNITURE, BOARDED FLOORS,
PORTABLE KITCHENS,
WHITE'S CELEBRATED FIELD RANGE,
Cooking Utensils, Cutlery, Electro-Plate, Crockery, China, Glass, &c.

The same will be securely packed and forwarded, accompanied by an experienced assistant, if desired, to any part of the United Kingdom.

THOMAS WHITE'S
STANDING CAMP TENT KIT,

As supplied by him for 12 years to the National Rifle Association at Wimbledon, and to Officers at Aldershot when under canvas, consisting of the following articles:—

Wood Folding Camp Bedstead
Hair Mattress
,, Pillow
Folding Chair
Sponge Bath
Water Can
Tent Pole Strap
Strip of Matting
Tripod Washstand.
Looking Glass
Basin
Lantern

Can be had on hire, in any number, to meet the requirements of regiments or County Rifle Meetings. The weight of each Kit complete is about 80lbs. The Kit includes everything necessary for camping out, and is looked upon by the large number of officers who have used it in England Ireland, and Scotland as a great convenience, saving them the trouble and annoyance of looking out, packing, and conveying their own goods (which are often unfitted for the purpose) to the camping ground.

P.S.—The Campaigning Kit is for Sale, and not for Hire; the Standing Camp Tent Kit is for Hire only.

Full details, Illustrated Price Lists, and Estimates for Officers' Messes, may be had post free on application to

THOMAS WHITE, CAMP FURNISHER, ALDERSHOT.

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

22, WELLINGTON STREET, STRAND, LONDON, W.C.,
AND ALL CHEMISTS AND PERFUMERS.

For children it is invaluable, as it forms the basis of a magnificent head of hair, prevents baldness in mature age, and obviates the use of dyes and poisonous restoratives.

DINNEFORD'S FLUID MAGNESIA.

The best remedy for ACIDITY of the STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION; and the safest aperient for delicate constitutions, ladies, children, and infants.

DINNEFORD & Co.,
172, New Bond Street, London, and all Chemists

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.

President, the Duke of SUTHERLAND, K.G.

The Turkish dominions having now been invaded, and hostilities having actually commenced, the suffering among the Turkish soldiers is very greatly increased, and as will be seen from the annexed statement by Captain Burnaby, who has just returned from Asia Minor, they are in the greatest need of clothing, of food for the hospitals, and of medical stores and surgical instruments.

The Committee, therefore, appeal strongly to their countrymen for subscriptions to enable them to mitigate the horrors of the war by sending out to the Turkish soldiers such additional succour as is now most urgently needed.

STATEMENT BY CAPTAIN BURNABY.

"Regent's Park Barracks, April 27, 1877.

"In the course of my recent travels through Asia Minor, I visited several Turkish military hospitals, and conversed with the surgeons in charge. They often complained to me of the great scarcity of drugs, and said the authorities at Constantinople found it impracticable to supply many of the necessary specific medicines and surgical instruments, all of which have to be obtained in Europe.

"If people in this country could only realise to themselves the sufferings which the wounded will undergo when being operated upon without chloroform and with worn-out surgical instruments, I think they would willingly subscribe to the Stafford House Fund.

"The soldiers from the southern parts of Anatolia suffer very much from the change of climate, and are utterly unsupplied with warm underclothing. Many a time I have met battalions of Redifs on the march, the men with bare feet and wading through deep snow while the thermometer stood at zero. Many were frost-bitten on the march to Erzeroum and Kars. A supply of warm stockings and flannel shirts and blankets would save thousands of lives."

Communications to be addressed to T. Gibson Bowles, Esq., 2, Harriet-street, Lowndes Square, S.W., or to H. Wright, Esq., Stafford House, Joint Honorary Secretaries.

Subscriptions will be received by Major-General Sir Henry Green, Hon. Treasurer, Stafford House, S.W.; and will be acknowledged in the published list.

THE SOLDIERS' DAUGHTERS' HOME, Hampstead. Instituted 8th March, 1855.
Chairman—
Major-General J. T. Boileau, R.E., F.R.S.

Number of Children in the Home, 171; Vacancies, 29; Candidates awaiting Admission, 124.

Owing to the loss, by death, of several of the largest annual subscribers, and to the great falling off in donations, the funds are at present unequal to support the increased number of girls (26) who have been added to the Foundation during the last two years.

Further aid is earnestly solicited to meet the increased call upon the funds. Remittances to be made to C. R. Low, Esq., Secretary, No. 7, Whitehall, London, S.W. A guinea yearly gives 1 vote; five guineas, 2 votes for life.

ROYAL COLONIAL INSTITUTE, 15, Strand.—MEETING, at the PALL MALL, 14, Regent Street, on TUESDAY, the 15th inst., at Eight p.m. Paper by Capt. J. C. R. COLOMB, R.M.A., "On Imperial and Colonial Responsibilities in War." His Grace the Duke of MANCHESTER, K.P., in the Chair.

FREDERICK YOUNG, Hon. Secretary.

ARMY AND NAVY PENSIONERS' EMPLOYMENT SOCIETY.

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON SEA, near Ramsgate, in 1 hour and 45 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE."

"The situation of the palatial establishment on a cliff somewhat removed from the town, though conveniently proximate thereto, is an advantage greatly augmented by its superb suite of ozone and various other health-giving baths, its well-constructed rink, its excellent and cheerfully appointed table d'hôte, and all other liberal additions of comfort, luxury, and amusement since the hotel has come into the present enterprising hands."—"Daily Telegraph," March 29.

THE "GRANVILLE" HOTEL.

The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL.

"Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

COLT'S NEW GOVERNMENT ARMY REVOLVER,

after a severe competitive trial by the U.S. Ordnance Department in 1873 and 1876, has been exclusively adopted by the United States Government, and the whole of the United States Cavalry is now armed with them. It is made to take the English Government Boxer cartridge. Length of barrel 5½ inches and 7½ inches.

In the trial of 1869, advertised by another maker, the Colt's pistol used was a muzzle-loader adapted to the use of metallic cartridges, which pistol has not been made or sold after that year.

COLT'S NEW 41-CAL. FIVE-SHOT DERINGER REVOLVER,

Especially suitable for the traveller, for personal and house defence (see "Land and Water" and "Bell's Life," April, 1875). Weight 12½ ozs.

COLT'S NEW 38-CAL. POLICE REVOLVER,

Shoots hard and accurate, even at longer ranges. 4in. barrel. Weight 15 ozs.

HOLLOWAY'S PILLS.—Indigestion.—In all cases of indigestion, producing weariness, low spirits, palpitation, and feverishness, these famous Pills should be resorted to as the gentlest and surest corrective of the stomach, and the best antidote to its ailments. These Pills dispel the cause of dyspepsia; everyone afflicted with it may rejoice at the safe and satisfactory results which can be secured at so small a charge as the purchase of a box of Holloway's Pills. They purify, strengthen, and remedy imperfect development of growth and health in young persons. Thousands of sufferers who casually commenced a course of Holloway's Pills have admired their restorative power of themselves, and afterwards recommended them with a fixed confidence which has never been betrayed.

SOVEREIGN LIFE ASSURANCE COMPANY.

EXTRACT FROM REPORT OF THE DIRECTORS, MAY, 1877:—

The Directors have again the pleasure of reporting a material advance in the amount of new business effected by the Company during the past year.

The Policies issued were 474 in number, assuring £249,060, or nearly £50,000 in excess of the preceding year. The average amount of each Policy was £525, and the new premium income represented was £8,295 3s. 10d., or £2,100 more than in 1875. The increase on the Total Revenue from Premiums and Interest was £4,995.

The sum paid for claims by death during the year was not in excess of the amount anticipated; but the aggregate disbursements on account of policies falling due exceeded that of any former statement, owing to an increased number of Endowment Assurances having arrived at maturity. Nevertheless, £23,000 were added to the Funds of the Company.

H. D. DAVENPORT, Secretary.

SOLICITOR.—CHARLES NORRIS WILDE, Esq.

RICHARD BLANEY WADE, ESQ., IN THE CHAIR.

REPORT.

The Directors are glad to meet the Proprietors, and to submit for their approval the Forty-rth Annual Report of the Bank.

The Bank of England rate stood at 2 per cent. from 19th April, 1876, till the 3rd inst., ving an average rate for 1876 of £2 12s. 1d., being 12s. 3d. less than that for 1875. The long ontinuance of 2 per cent. has only one parallel, viz., from July, 1867, to November, 1868, a period of sixteen months.

The year 1876 was characterised by stagnation in almost every department of trade, and the business of Banking, consequently, has been less profitable than in previous years. Owing, however, to the constantly widening range of the Bank's operations, and the careful investment of its resources, the Directors have the satisfaction of recommending :—

That the Dividend and Bonus now to be declared be 11 per cent. for the half-year, being the usual 4 per cent. Dividend, with a Bonus of 7 per cent., making, with the distribution in January last, 21 per cent. for the year.

That £34,055, 2s. 9d. of undivided profits, being the balance of £50,641 5s. 6d. referred to in last report, be carried forward to the account of the current year. It will be remembered that the latter sum was reserved to meet the increasing amount of Dividend upon the new Capital, until the same was fully paid and rendered productive.

The Statement of Accounts herein contained will show that there has been a considerable increase of deposits—spread over the whole of the Branches—and it may be stated that 3,140 new current accounts have been opened, exclusive of a large number of new deposit accounts.

The following is the summary of the operations for the year, submitted in the form hitherto in use :—

	£	s.	d.
REST or UNDIVIDED PROFITS at 31st December, 1875, as exhibited at the Annual Meeting in May, 1876, viz.:	£860,985	0	0
Less Bonus declared and paid in cash in July, 1876	102,375	0	0
	£758,610	0	0
Add Premium on New Shares received up to December, 1875	141,390	0	0
Leaving	£900,000	0	0
NET PROFITS of 1876, after making allowance for bad and doubtful debts, and Bonus to Officers	308,538	17	3
Making	£1,208,538	17	3

	£	s.	d.	£	s.	d.
Carried forward				£1,208,538	17	3
Add undivided profits from 1875				50,641	5	6
Total				£1,259,180	2	9
DEDUCT						
Dividend on Company's Stock, paid July, 1876	£60,750	0	0			
Do. do. January, 1877	63,000	0	0			
Bonus of 6 per cent. do. do.	91,125	0	0			
Undivided Profits to next year	34,055	2	9			
				248,930	2	9
Leaving				£1,010,250	0	0
Out of these profits the Directors propose to declare, in addition to the foregoing Dividends and Bonus paid to Proprietors as above stated, a further Bonus of 7 per cent. in July next, making a division of Profits in 1876 in all 21 per cent. upon the Paid-up Capital, free of Income-Tax, amounting to				110,250	0	0
Leaving Reserve invested in Government Securities				£900,000	0	0

Since the last Annual Meeting, Branches have been opened at Whitby and Burton-on-Trent, which give promise of success. Agencies to the Bangor Branch have also been opened at Bethesda and Menai Bridge to conserve the business of the Bank in that district.

The following Directors go out of office by rotation, but, being eligible for re-election, offer themselves accordingly, viz. :—

JOHN OLIVER HANSON, ESQ.
GEORGE HANBURY FIELD, ESQ.
JOHN STEWART, ESQ.

It was mentioned at the last Annual Meeting that Mr. Edward Atkinson, after 40 years of valuable services, desired to retire from his duties as Joint General Manager, and that Mr. Robert Fergusson, who had had considerable experience at several Branches, especially as Manager at the Manchester Branch, had been selected to fill the vacancy occasioned by Mr. Atkinson's retirement.

Subsequently to that arrangement, the Directors, having regard to Mr. Holt's length of service and to the importance of having a gentleman thoroughly prepared to fill any vacancy that might occur, have appointed Mr. Robinson, an Officer trained in the service of the Bank and for many years Manager of the important Branch at Middlesborough, to be a Joint General Manager.

IN November, 1872, a War Office Committee was appointed by Lord Cardwell, under the presidency of Mr. Campbell Bannerman, M.P., to consider the organization of the Army Account Services. This Committee, having reported, its recommendations were submitted for the consideration of a second Committee, which was sitting at the time the present Government assumed office in 1874. At the date of the change of Ministry, the subject was ripe for settlement, but for obvious reasons it was deemed expedient that the new Financial Secretary, the Hon. F. A. Stanley, M.P., should report to Mr. Hardy his views on the subject before action was taken. We have reason for believing that this gentleman's report has been received this week, and that it is by this time in the hands of the Secretary of State for War. The main proposal of Mr. Stanley is that a department, to be known as the Army Pay Department, comprising all Army Accountants and the present officers of the Control Pay Sub-Department, should be formed, and to this bureau shall be transferred the duties connected with the Treasury chest—this, of course, with the concurrence of the Treasury. It is intended to obtain the members of this department hereafter through the combatant ranks of the Army, all candidates undergoing a probationary service before being allowed to assume duties of responsibility. These "Accountants" are to be interchangeable, so that the new system will assimilate to that which has been introduced for the medical officers of the Army. In case of war an officer of high rank would be sent from the War Office and attached to the expeditionary force, whose duty it would be generally to superintend all questions of finance, under the orders of the General officer in command. It may be pointed out here that army account duties in the colonies, other than those of regimental Paymasters, are at present vested in the senior officer of the Commissariat. The most convenient mode of carrying out these duties in the future, should it be determined to continue them with the Commissariat, would, it is thought, be to revert gradually to the arrangement which existed previous to the introduction of Control. The Report is framed, however, on the assumption that the rank of regimental Paymaster will still be continued. It is recommended that Staff Paymasters should be appointed from the "Paymasters" of the late Control Sub-Department, and from the existing regimental Paymasters, promotion being made by selection, with due regard to seniority. Combatant officers seeking appointment to the new department are to apply direct to the Military Secretary, who will be called upon to furnish quarterly a list of candidates to the Financial Secretary. From this list selections would be made to fill vacancies as they occur, seniority being duly regarded, the name of the selected officer being submitted through the Financial Secretary for the approval of the Secretary of State for War. On approval by the Secretary of State, the officer will take up duty provisionally as an Assistant-Paymaster, the confirmation of the appointment depending upon a favourable report being received as to the officer's performance of his financial duties at the expiration of six months of such probationary employment. To prevent the inconvenience caused by constant absorption of supernumeraries, it is suggested that these probationary officers should remain for the six months on the establishment of their regiments. Mr. Stanley strongly advocates a system of local inspection with regard to all army pay accounts. As matters stand, should a local inspection of any Paymaster's accounts be ordered, the idea is established that suspicion has arisen, and, as a result, it not unnaturally follows that enquiry is withheld; whilst it renders particularly delicate and disagreeable the position of an officer deputed to make an examination of the books of the Paymaster in question. It will be seen, then, that a more general system of inspection could not but be of great advantage, and ought to prove acceptable both to the officers immediately concerned and to the public, whose monies they are charged with the duty of disbursing. The idea is that these inspections should be entrusted to officers taken temporarily from the department for such service. It is proposed that all monies entrusted upon public account to a Paymaster should be invested in the name of the Secretary of State for War, arrangements being made that such balances should be open to the inspection of any officer sent down to inspect accounts. As the case now stands, the Paymaster can, if he sees fit, pay any public monies in his possession either into his public or private account at his bankers. As regards the accounts of an army in the field, it is evident that some system should be devised which would allow of an actual and regular record of receipts and expenditure. Hitherto, when any expeditionary force has gone out, there has been no constituted central authority to whom account officers have been able to apply upon the spot for instructions and guidance. To meet this requirement it is proposed that a Commissary-General of Accounts should be appointed to the Staff of an army in the field, and that all officers employed on the regimental Staff should look to him for instructions, and that the directions given to him should be recognized as the basis under which the accounts of the expedition should be locally audited and transmitted home. Mr. Stanley lays great stress upon the selection of this financial officer and of his subordinates being lent from the War Office, for these reasons—First, that it would avoid the retention in time of peace of officers with high rank and pay, for whose maintenance there is scarcely sufficient reason, except in time of war. Secondly, that an officer so sent out would, probably, have at his fingers' ends the latest War Office decisions and procedure. Thirdly, that he would probably have been in such a position as to render it possible for him, acting as the representative in the field of the finance authorities at home, to correspond with them privately, as well as officially, upon finance duties. It is intended that the Secretary of the Treasury should be asked to concur in the selection of this "Commissary-General of Accounts," the initiative, though of course with the War Office, and the desirability of the views of the General officer in command being taken is pointed to, though cases might arise where it would not be possible to obtain his opinion. Such are the main features of the scheme now before the Secretary of State for War. It will be seen from the brief summary we have furnished that Mr. Stanley has given great attention to all the details upon which it is likely questions will at any future time be raised; and if the subject so long in abeyance is not now settled satisfactorily for all parties, it will not be that the memorandum has not gone deeply enough into the matter, or that the present Financial Secretary is either wanting in appreciation of the vast importance of the question or fails to appreciate the immense difficulties with which it is surrounded. The statement which appeared in a weekly paper in reference to this important subject was founded on a mistake, the draught of a tentative scheme, improperly obtained, having been accepted as the actual Report.

We are all so busy with Mr. Gladstone and with the news from the East that we have little time to bestow on such questions as the preservation of our Empire, or to cast a glance beyond the Danube and the shores of the Black Sea. But those who were present at the meeting of the Royal Colonial Institute last Tuesday, which met under the presidency of the Duke of Manchester, to hear a paper "On Imperial and Colonial Responsibilities in War," by Captain J. G. R. Colomb, R.M.A., must have felt that a subject of the greatest importance was brought to their notice, and that the Government which neglects the duty of serious investigation and action in the matter incurs a terrible responsibility. As to the country, we are sure that it would compel the Government to attend to the question if it could be brought to understand its gravity. The meeting was remarkable on account of the number of distinguished persons who represented Imperial and colonial interests and took part in the discussion which followed the reading of Captain Colomb's able and remarkable paper, and which excited such interest that it was adjourned to last night. It was not for the first time the author of the paper called attention to the consideration of Imperial and colonial responsibility in making joint preparation for the defence of the Empire, which consists of the United Kingdom as its "grand base," and of all the Colonies as part of the Imperial fabric. Four years ago he read a paper before the Institute, in which he argued that "national defence" could not be properly limited to the defence of the United Kingdom, that the principle of "local" defence must produce Imperial weakness, and that even if the United Kingdom were secured against invasion, an enemy operating, say, with St. Helena as a base, might cut off Imperial communications round both Capes, and that if the Suez Canal were to be blocked at the same time the whole Empire, except Canada and the West Indies, would be locked out from intercourse with its grand base, and the United Kingdom would thus be partially invested. The great point which Captain Colomb pressed on the consideration of his audience was the necessity of erecting a great Imperial dockyard at the other side of the world, and Australia was indicated as likely to afford the best site for such an establishment, although there is, we think, a good deal to be said for Esquimault. Mr. Reed lent the weight of his authority to that idea and strongly enforced it, nor was he sparing of sarcasm in reference to the policy—or want of it—which induced the Admiralty to neglect Vancouver's Island, and to send out an unarmoured vessel to represent the British Navy, and carrying the flag on a station where the ironclads of any of the South American States could dispose of her in a few minutes; but although he very rightly declared that the Government of the day possessed the power of directing the whole machinery of the State to any specific purpose, he did not indicate the means by which they were to induce the Colonies to join in a scheme for general defence, nor the sources from which the money was to come for the first establishment it is proposed to create for Imperial protection. General Macdougall, who also addressed the meeting, and who appeared to be in favour of a representation of the Colonies in the Imperial Parliament—one of the ideas which all must approve of in the abstract, and yet fail to apply in the present state of relations—in a few emphatic sentences expressed his assent to Captain Colomb's views, and the position of that officer as Chief of the Intelligence Department and his well-known ability entitle his opinion to much weight. General Collinson, Sir G. Arthur, and others concurred in the necessity of some general plan of home and general defence being adopted; but we fear that it will only be under stern pressure from without that the country and the Government here will turn their attention to the matter, and that the Colonies will abandon their theory, that it is the duty of the mother country to secure them from attack. It is only fair to say that of late some of the great outlying parts of the Empire—notably Canada and Australia—have been preparing to strike a blow in their own defence; but the principle of a general alliance, so to speak, does not find favour among them. A writer in the *Sydney Morning Herald*, to whom Capt. Colomb adverted in his lecture, has stated the "local" or "colonial" view with clearness. "The only movable troops," he maintains, "are those of the Imperial Army. The Colonies ought not to share in the expense of maintaining the Imperial ports, and so long as they are British the Government is bound to protect them. But Captain Colomb argues that it is impossible for sea-going fleets to atone for the absence of strong places, adequate defences, proper garrisons, and naval resources, and that in case of war our fleets would have to watch our bases, whilst home and colonial ships were being chased over the ocean like hares by Alabama greyhounds. Who is to determine the proportions of loss to each colony in event of disaster? If Fiji or King George's Sound were to be occupied, Australia would feel the blow. Were Singapore or Hong Kong taken each part of the Empire would suffer in proportion to its India or China trade." There is reason in all this, and in the present state of affairs there is much significance in these remarks. Surely it is a fallacy to assume that any colony can "protect its own territory." Is each fragment—nay, is any fragment of our Empire, single-handed and alone, a match for any power which can possibly attack it? Could each particular colony in Australia defy the power of the United States? Is it at all certain that New South Wales, the greatest of them, is a match for Russian power on the Pacific? Mare Island, the United States naval arsenal, is but 6,460 miles, and Vladivostock, the Russian base, but 5,000 miles from Sydney. The Russians moved without steam power military forces, stores, and guns backwards and forwards, in 1854, over a sea line nearly 900 miles long, in the North Pacific, in complete defiance of the combined naval forces of France and England. It is not wise to rely entirely on the power of fleets to prevent the despatch of expeditionary forces from either Vladivostock or Mare Island. There is no physical impossibility to prevent either Power working from those bases to transport a complete corps of 5,000, without any great effort, to the shores of Australia. In war the only matter to be considered by them is the reasonable prospect of success. This prospect of success can only be estimated by our preparations for defence. In inverse proportion to our preparations for resistance will be the arguments in favour of attack. The less we have the power of concentration, the more possible is success to those against us. The following remarks are, we think, worthy of consideration at this moment:—

"It is most important to remember that in 1854 we drifted into a war wholly unprepared. We declared war, and left 'the rest' to the War Office and the Admiralty, and land transport, food, and clothing for our Crimean army was lost in the gulf which lies between the two departments. In that year the Secretary of State for War ceased to be also Secretary for the Colonies, and their affairs passed into the hands of a separate officer of State. It is worthy of note that the requirements of a great war which threatened the Colonies rendered it necessary to transfer in 1794 their affairs from the Home Office to the War Department, while the necessities of a smaller war which—as Russia was then weak in the Pacific—did not threaten them, caused the care of the Colonies to be transferred to an office altogether separate. The next great war will find all matters relating to colonial defence between three stools instead of two. Now, this may account for a good deal of that fog which envelope Imperial defence. The War Office regards it as chiefly an Admiralty or Colonial Office question; the Admiralty views it as either a War Office or Colonial Office matter; and the Colonial Office, having neither fleets nor armies at its disposal, feels quite certain it only concerns the War Office and Admiralty. The easy way out of the difficulty is to leave each Colony to provide for its own defence in any way it thinks fit, and to trust 'the rest' to 'English pluck' and 'English spirit.' There is no colonial branch of the Admiralty or War Office, there is no war branch of the Colonial Office, and therefore it is not surprising that every military and naval change has hitherto tended to distort the English vision from taking one wide view of the whole great question; nor should we wonder that Imperial defence has been split up into little bits and strewed about the world. The people of the United Kingdom would, I believe, spend their last shilling, and fight to their last man, to preserve the Empire intact, and would prepare to do so, and to take their full share of Imperial duty in defence, if they only knew how, if they could only grapple with that 'rest,' which the Colonies look to the statesmen of England to do. Englishmen in the Colonies are not different from Englishmen at home, and an Imperial commission, such as I ventured to suggest ten years ago, and have humbly pleaded for many times since, would let in a flood of Imperial light upon the 'parochial' English mind, and let the world know we meant to stick together in defending each other."

The sixth volume of the military correspondence of Napoleon relates to the Spanish period. The Peninsular war, as the Emperor afterwards admitted at St. Helena, was a great fault. The French arms experienced disaster after disaster in Spain. The troops of Napoleon were repulsed at Saragossa and Valentia, 18,000 men laid down their arms at Baylen, and Junot lost the battle of Vimiero against the English. The brilliant successes of the French did them no good; they were never masters of an inch of land beyond their outposts. It is interesting at the present moment to remember that Napoleon would never have plunged into the Spanish war but for the connivance of the Emperor Alexander, who deserted his allies in the hope of France allowing him to seize upon Moldavia or Wallachia. On this condition the Czar recognized Joseph as King of Spain. In the end Napoleon slipped out of his agreement. He was determined that the Russians should never get to Constantinople. The first letter in the present volume is dated December, 1808, and is addressed to King Joseph. The Emperor was himself at Madrid, and about to march against the English. He had in Spain *300,000 men*, divided into eight army corps, and commanded—1st Corps, Marshal Victor; 2nd, Marshal Soult; 3rd, Marshal Lannes, then Junot, then Suchet; 4th, Marshal Lefebvre; 5th, Marshal Mortier; 6th, Marshal Ney; 7th, Marshal Augereau; 8th, Marshal Massena, "the spoilt child of victory." Fortunately for us the war with Austria broke out, and Napoleon quitted Spain, leaving us to deal with his lieutenants, who bungled his affairs through jealousy of each other. In February, 1809, Napoleon wrote to the King of Saxony from Paris a letter, in which he said—"Austria is being dragged to destruction. Her relations with England are proved. England has made peace with Turkey through the mediation of Austria, and the English have been received in triumph at Constantinople by the Internuncio (or Austrian Ambassador), which has greatly irritated the Emperor of Russia and myself. I am marching on Strasburg the troops which I had destined for the camp at Boulogne. . . It will be impossible to get England to remain at peace as long as she has the means of troubling the Continent." And hence our ally, "the great and ancient monarchy of Austria," was to be ruined. Under date of March, 1803, are observations on the instruction of the military pupils of St. Cyr, which his Majesty has found insufficient. He finds that only eighteen pupils are taught to ride, "and yet there are eighteen horses which should serve for the instruction of seventy-two pupils." The Emperor complains that the pupils do not know how to handle the hatchet or pickaxe, or to make a gabion; they have no idea of the quantity of powder necessary to make ten cartridges--no idea of the weight or charge of a cannon; and so on for four pages. The French papers are always complaining of the spy system resorted to by the Germans during the last war, and protesting that the French are too noble to act as spies. It is true that Frederick the Great said during the Seven Years' War, "The King of France has forty cooks and one spy, and I have forty spies and one cook." We are reminded of this by a letter which Napoleon wrote to Fouché in April, 1809. It runs thus—"I wish to have a man speaking German perfectly to put at the head of my espionage in Germany. I must have an honest man, to whom I could confide large sums of money without fear that he would use them for himself. He will have under his orders the agents of police. Make an inquiry and send me an answer." This looks as if the great Napoleon had many spies abroad. On April 9 the Emperor wrote to the War Minister complaining bitterly of the way in which the campaign was being conducted in Spain, where Jourdan was commanding. "Write to that Marshal," says his Majesty, "that it is inconceivable that he should allow Romana to ravage Gallicia to the rear of Ney and of Soult. The movements are carried out slowly and without vigour. Artillery and Cavalry are disseminated in a disastrous way." In June, Napoleon wrote another letter on the same subject to General Clarke, saying:—"You will inform Marshal Jourdan that I find affairs in Spain very ill-conducted, so ill-conducted that I foresee catastrophes which will certainly happen unless more activity is shown, and a greater impulsion given to the movement of columns. The English have been allowed time to reform their army at Lisbon. They have had the culpable negligence of leaving Soult three months without communications. Yet I have not ceased directing that communications should be reopened with the Marshal. . . . Why not march against Cuesta, and drive him back? The indolence of the Staff in Spain is such that it remained for months without communications with Ney (*sic*), and that I was obliged to send an order from Paris to General Kellermann to march to his assistance. It is almost impossible to imagine such incompetence. An army is nothing without a head, and the Army in Spain has none. Recommend that the enemy be attacked wherever he is to be met with, and open up communications with Soult. The English alone are redoubtable. They alone, if the army is not differently handled, will, in the course of a few months, inflict disaster upon it. All points must be acted upon, and a large corps must be formed against the English. They must not be allowed to breathe." The Court of Madrid was at this time complaining that Napoleon would insist on interfering with the war in Spain, and that King Joseph and Jourdan were powerless. They had no control over the Marshals, who refused to receive orders from anyone but the Emperor. Hence a great deal of confusion, which turned to our profit. On June 12 Napoleon wrote again to Clarke—"You will despatch a staff officer to Spain with orders for the corps of Marshals Ney, Mortier, and Soult to form but one army under the command of the Duke of Dalmatia (Soult). These three corps should manœuvre together, march against the English, pursue them without ceasing, beat them, and drive them into the sea. Putting aside all other considerations, I give the command to the Duke of Dalmatia, the senior. These three corps should muster 60,000 men. If this junction be effected promptly the English ought to be defeated, and the affairs of Spain terminated; but it is necessary to assemble, and not to march in small packets. Send the present order to the King of Spain and to the Duke of Dalmatia." A month before this letter was written, Wellington had crossed the Douro, had beaten up Soult's quarters, and driven him out of Portugal; and before the Staff officer reached Madrid, Victor had been defeated at Talavera, at which battle King Joseph was present. Writing from Austria in July, Napoleon, not yet aware of what had happened, said to his War Minister—"As for Spanish affairs, write to Madrid that the *coup de Jarnac* (or fatal blow) will come from the English if matters are not better managed. I tremble lest the English, debouching from Portugal by Abrantes, should surprise the King at Madrid by hidden movements." And, in fact, poor Joseph was forced to quit his capital in a great hurry. On August 18 his Majesty, having himself done a good stroke of business, beaten the Austrians, and captured Vienna, wrote from Schonbrunn:—"I see no letters from Spain to-day. I am anxious to receive news from that country, and to learn something about Soult. What a splendid opportunity thrown away! 30,000 Englishmen 150 leagues from the coast in front of 100,000 of the best troops in the world! My God! What is an army without a head!" On the 21st Napoleon wrote to the War Minister to "make known my extreme dissatisfaction to Marshal Jourdan for the incorrectness and falseness of his reports on the affairs of the 26th, 27th, 28th, and 29th July. These dispatches do not say how matters fell out, and this is the first time that a Government is laughed at in such a way. He says that on the 28th the army seized on Talavera, while subsequent reports from various officers say quite the contrary. This infidelity towards the Government is a veritable crime, which might have had fatal consequences. . . . My best troops have been compromised, as also the fate of Spain, by ignorance of the rules of war . . . My troops have been led without discernment to the shambles." A number of French historians talk of Talavera still as a drawn battle claimed by the English as a victory. And the Emperor, as he sat at Schonbrunn, was furious at the idea of 30,000 English braving his eagles in the Peninsula. In September, when he had returned to France, Napoleon wrote from St. Cloud to Berthier, Chief of the Staff in Spain:—"My cousin, despatch an officer with a letter to the Prince of Essling (Massena), in which you will make known that my intentions are that he should attack and overthrow the English; that Lord Wellington only has 15,000 Infantry, with Cavalry and Artillery; that General Hill has only 6,000 men; that it would be ridiculous that 25,000 English should resist 60,000 French; that in not feeling, but attacking boldly, he will inflict great losses on them. . . . The Prince of Essling has four times more Artillery than he requires. I am too far off to be able to give precise orders, but it is certain that the enemy is not in a position to resist. According to the most trustworthy information received from spies in London, with 4,000 men at Cadiz the English army does not exceed 28,000 men." What happened to Massena, Duke of Rivoli, Prince of Essling, is well known; how he beat his wings to pieces before the lines of Torres Vedras, was finally forced to retreat with loss of *prestige* and loss of Imperial favour, and was not again employed, except as a peer and Commander of the National Guard of Paris. There are several remarkable letters in this volume concerning the Walcheren Expedition. General Monnet was ordered to drive the English into the sea, and lost Flushing, which had been declared impregnable by Napoleon. His Majesty was in consequence highly indignant at this little glimmer of success. Monnet was proclaimed a traitor and a coward, and was condemned to death by default. In every letter on the subject of this expedition Napoleon repeats—"Inundations and fevers will destroy the English army. Let them lash their flanks in marshes," he wrote, "and pursue the shadow for the substance. They don't know what they want." There are many other letters to which we should like to refer, but our space is limited.

The true value of the torpedo vessel Lightning will soon be ascertained, now that she is out of the hands of her builders and about to be experimented with by the Torpedo School at Portsmouth. At the recent lecture at the Royal United Service Institution "on Torpedo Boats" some surprise was expressed by Mr. Donaldson, of Thornycroft's firm, that while they had constructed so many of these vessels for foreign Governments, England had but one; and certainly such a fact would be remarkable were it generally believed by Service men that the Lightning is so perfect an engine of destruction as has been claimed. In building her for speed, her coal-carrying capacity has been so cramped that about three hours' steaming, as we understand it, will exhaust her supply of fuel. This is a very serious matter, for if she were sent out from one of our home ports to operate upon the enemy's fleet which might be threatening a descent upon some part of our coast, all her power of locomotion might be expended before the time arrived for her to bring her offensive tactics into play, and, having no sails, the difficulty in getting safe home again would be great. We believe, too, that she only stows four torpedoes, and though we are ready to grant that if she were able to apply those four in a successful manner there would be no cause to complain that she had not done well, yet there is a suspicion that this highly-rated machine has a tendency to lose its fighting powers very rapidly. We have in the Lightning a vessel incapable of keeping out of port for more than a few hours on the look-out for an opportunity to act, and her dimensions preclude the possibility of her being used as an additional method of torpedo attack from our large ironclads, for it would be impossible to hoist her on board. The Lightning is 84ft. by 10ft. 10in., and is intended for use in a tolerably rough sea. She has attained a speed on the measured mile of 19·4 knots, but without her torpedoes on board. Thus it would appear that she is neither one thing or the other, but rather a go-between, the thorough efficiency of which is doubtful. As a sea-going torpedo vessel we have the Vesuvius, but now the Whitehead can be launched from any ship it is not probable that more of her class will be built. Of course she lacks speed, her tonnage being 260 and her horse power 379, while the Lightning's tonnage is under 30 and her horse power 300, more than ten horses to the ton. But we possess nearly one hundred handy steam launches and cutters which are carried by almost all ships in commission, and are in future to be supplied even to the new class of river-service gunboat. These small boats are adapted for the use of the spar torpedo, and though they cannot compete with the Lightning in point of speed, nine knots being the highest rate attained by any of them, they can, however, be brought to the scene of action by their parent ship and be then set free to do their worst. Probably their Lordships have been wise in not following too closely in the wake of certain foreign Governments in giving extensive orders for a special and most costly class of small vessel, of use only for one particular service, and with that usefulness greatly limited by very limited stowage. The leading journal, which has apparently had a great scare about torpedoes, does not appear to have been fully informed of the measures which have been adopted for the full investigation of the question, and of the labours of the Torpedo Commission, which has been most sedulous in its labours. We are glad to state that there is no neglect to be charged against the Government in that respect.

Last year regulations for a "formation for attack" were, after a long period of experiment, issued; but it was soon found that they required considerable modifications. On this point, indeed, the Duke of Cambridge expressed his opinion in unmistakeable language. An amended scheme has at length been promulgated, and we notice, with satisfaction, several improvements. In the first place, the front of a battalion is somewhat contracted, and the strength in the direction of depth is proportionately increased. In the second place, the length of the rushes—which are permissive, not obligatory—has been reduced from fifty to thirty yards. In the third place, the fighting line is not to open fire till it is within 400 yards of the enemy's most advanced troops, instead of 500 yards, as laid down in last year's directions. The distribution of the battalion is also changed. By the regulations which have just been superseded the battalion was divided into two half-battalions, which fought side by side. Now the half-battalions are placed one in rear of the other; the first composed of the fighting line and its supports, the second of the reinforcing troops, which are only to be brought up when the fighting line can make no further progress. The leading battalion sends to the front two companie, which are either wholly or partially extended at the discretion of the Lieutenant-Colonel. The other two companies follow in support, accompanied by the unextended portions of the leading companies. The other half-battalion, under a Major, brings up the rear. The supports are gradually absorbed into the fighting line, and all the different portions of the battalion lessen their distance from each other as they approach the enemy. The extended companies are in single rank, and men coming up from the supports are intercalated by files. When the reinforcing troops are brought up for the final effort they form a rear rank to the original fighting line. It will be obvious from the above that there will be never a greater mingling of the men of different companies than hitherto. This is a grave defect, but we do not disguise from ourselves the difficulty, if not impossibility, of keeping companies intact as long as we retain our organization of many and weak companies. The framers of the scheme before us tacitly admit that weak companies are objectionable, for they say "companies must be made as strong as possible, it being preferable for instruction; therefore, to have few strong companies rather than many weak ones, no company is to consist of less than about thirty files." Unfortunately, it will rarely be the case that a battalion on the low peace establishment will be able to turn out more than four companies of that strength; the half-battalion will not, as a rule, consist of more than two companies. To return to the question of mixing up the companies. Assuming that these are eight in number, the following will be the process:—The leading companies will each absorb a company of the supports, each file of the one taking place between two files of the other. Thus will be formed a combined company, to be commanded by the senior Captain. When, however, the rear half-battalion comes up, the four rear companies will constitute a rear rank to the twelve combined companies of the fighting line. Each of the reinforcing companies will have in its front the half of a combined mixed-up company of the fighting line. We fear that some confusion must be the result, for as Captains fall it will be difficult for the surviving officers to know who is entitled to assume the command, and contradictory orders will in many cases be given. It will also be difficult, if not impossible, to handle the troops in case of a retirement under close fire. Yet, in the instructions for retirement, we are told that either alternate half-battalions or combined companies are to be marched to the rear by word of command for a distance of from 100 to 200 yards, when they are to be halted and fronted. We have serious doubts as to whether a retirement under these circumstances will not degenerate into a panic. Another objection which we have to urge against the present regulation is that it is not quite clear what the functions of the Lieutenant-Colonel, the Majors, and the Captains are to be; how much, for instance, is to be left to the discretion of the Captains with respect to feeding the firing line. The tendency of the latest instructions certainly is to curtail the authority of the Captains at the cost of the Majors, and similarly with regard to the Majors in their relations to the Lieutenant-Colonel. There should be no doubt on this point, and it is very certain that, once a company is engaged, the least the Captain is directly controlled by a senior officer the better. An entirely new section is added to the regulations, *i.e.*, that which deals with the defensive. The battalion is to be divided in the same manner as when formed for attack. The principle laid down is that the firing line should be as strong as is compatible with the free use of the rifle, and it is calculated that, including a reserve, three men per yard lineal is the proper proportion. Including all arms, the second line and the reserve, the proportion is to be five men per yard. This would give 8,800 men per mile, which is a larger proportion than the Germans found necessary—in the minor actions, at all events—during the war of 1870-71, but considerably less than that which up to seven years ago was deemed necessary by English authorities. In the section devoted to the employment of Cavalry and Artillery there are scarcely any other than mere verbal alterations, and we regret that we have not been furnished with more elaborate instructions. Notwithstanding much that has been said to the contrary, Cavalry can, we believe, still play a useful part, even in the line of battle. Large masses of Cavalry will not probably be often employed, but squadrons, whose leaders are granted the same independence as the commanders of batteries, would with advantage be distributed in or close in rear of the first line. The moment for an attack soon passes away; in a moment, therefore, squadron leaders must act on their own responsibility. Large bodies of horsemen cannot easily be concealed. But single squadrons, or even troops, placed in a fold of the ground, ready to swoop out and rush back rapidly, would exercise a very demoralizing influence on the enemy's fighting line, particularly if the latter were returning after a reverse.

The newly-appointed officers of the French Territorial Army are being instructed in their duties especially as regards the defensive, to judge from what happens round Paris. They are summoned out once a week to certain villages round the capital—let us say to Robineau. Mustered at Robineau, a field officer of the Line addresses the Territorials, and, informing them that the Prussians are marching on the village, asks an officer how he will defend it. The officer replies, and is directed to carry out his plan without loss of time. He orders Captain So-and-So to march his men to a certain point, and, to the astonishment of the villagers, the Captain steps forward and gives the word—"By your right; quick march!" The officer charged with the defence then visits the houses on the threatened side of the village, and asks the startled proprietors if they have any materials in the place likely to catch fire by the explosion of a shell, and he orders his imaginary men to procure the necessary tools, and to crenelate the walls. The Sergeant is directed to set a squad to work to dig a ditch, and throw up an earthwork. At this moment the field officer gallops up, and announces that the enemy (a Corporal with his hands in his pockets) is advancing. The villagers grow more and more alarmed, and contemplate a bolt. The Commandant calls on his imaginary men to stand to their arms, and on the field officer announcing that the Prussians are within 400 yards, he gives the order to open fire. Needless to add that the Corporal completely fails to gain possession of Robineau, stoutly held by the Territorial Army. Had this system been in force previous to 1870, many a village might have been defended, to the great detriment of the invading army. In the French Cavalry this same system of instruction is being largely practised.

It is always a matter for sincere regret when a naval Chaplain fails to live harmoniously with his messmates, but when such is the case one may feel certain that no injustice is done in leaning towards the opinion that the fault lies rather with the Chaplain than with the officers of the ship. As a rule every respect is shown to one of his cloth, and it is not until he may have so acted as to forfeit, in a measure, the good opinion of those with whom he is brought into daily contact, that they would be inclined to treat him with anything approaching disrespect. For some time past we have heard unsatisfactory accounts of the conduct and bearing of a Chaplain serving on a foreign station, and indeed so unpleasant did the feeling between him and his messmates become that the majority declined to have much to say to him. There is no denying that there must be something radically wrong with a man when the greater part of a mess goes against him, and we were consequently quite prepared to hear that matters had at last come to a climax. That undesirable end seems now to have been reached, for by the last mail we learn that his extraordinary manner of treating those in authority has led to a breach, and his conduct has been reported to the Admiralty. Not content with making things unpleasant on board, this "man of peace" has been attacking the conduct of the highest authorities in the local papers, and one of his effusions, into which the name of his captain has been most unwarrantably dragged, has been alluded to by counsel, in proceeding against the paper, as "about the most scandalous and offensive thing that ever appeared there." There can be no doubt that had any other officer dared to send such a letter to a paper, he would have found himself quickly brought before a court-martial to answer for his conduct; but the position of a Chaplain is such that difficulties present themselves in adopting this measure, and it is owing to the nature of his office that this officer has thus far been spared the treatment which would have been meted out to those of another cloth. The reverend gentleman in question was, we believe, in the Irish Church, and found employment in the Navy on disestablishment; but, if our information be correct, he has now grown tired of the Service, and does not desire to be again appointed to a ship. Of course it is quite open to him to resign his appointment, but by so doing he would lose his claim to half pay. It is therefore suggested—for some reason must be found for his extraordinary conduct—that it is the desire of this officer to so far make himself disagreeable that his name may not be favourably remembered at the Admiralty, and that Captains may be glad to ask for his appointment to be cancelled should their Lordships select him for further service. This would naturally keep him on half pay for an unlimited period, and he would thus get something out of the Service without serving for it. Similar things have happened before, and an easier method of attaining such an end could not well be offered to one who has no compunction about making himself objectionable to those with whom it has been his chance to be associated. The Admiralty have already removed him from his ship, but it is to be hoped their Lordships will not allow the Service to be trifled with and made a convenience of, and that if, on inquiry, there is good reason for believing that an officer has been induced to make himself objectionable with the view of getting ordered home and placed upon half pay, they will either appoint him to another ship immediately, that he may be judged by his conduct there. Happily scandals of this nature are rare, but when they do occur they should be treated with as firm a hand as the nature of the position of the officer concerned will allow.

With that enterprise so closely connected with the daily Press of London, letters are beginning to appear from correspondents who have been engaged to accompany the Turkish Fleet. As yet there has been nothing done by that fleet which is worthy of record, and correspondents are confined to representing the feeling of the Service as far as they may be able, and to talk much of what they would do, or think they would. The Russians are laughed at for not bringing their Fleet to "try conclusions" and because they do not "venture forth to fight," and they are sneered at on account of their preferring to contemplate the naval power of Turkey from a distance. If it be true that the lament of the Ottoman Fleet is that the Muscovite will not bring out his ships, why does not the Turk go and fetch him out? Comparing the strength of the two fleets now in the Black Sea, no one will blame the Russian for keeping his ships within range of her own guns, and the Turk may air his anxiety to meet with so weak an enemy for many a long day unless he cares to go where he is to be met with. To judge from the remarks of the correspondent to whom we are now alluding, there is nothing to keep the Turkish Fleet from doing exactly as it pleases, and while he bounces we are left to wonder why he does not act. But probably this bounce arises from ignorance, for he talks of torpedoes as toys, all very well for a "gala day." He says that experience teaches us that this class of warlike implement is very uncertain in its application in time of necessity, though where he may have gained his experience under such circumstances is a mystery, and we suppose that fact dawned upon him as he proceeded, for he afterwards admits that "we have to learn what it can do." When he seriously contemplates action, we notice that discretion gets rather the better of his valour, for he questions "whether it would be wise to risk the Turkish ships against stone walls and torpedoes." If the command of the Fleet were left in the hands of this correspondent, we should fully expect to find the Turk contenting himself with calling upon the weak enemy's Fleet to "come on," a request which will not be complied with if the Russian is as knowing as he is believed to be. But fortunately Hobart Pasha remains in command, and while his experience enables him to value the torpedo at its proper worth, we may be sure he will do the best he can to get at the Russian ships. The letters of correspondents with the Fleet cannot fail to be interesting, and if they can only be accepted as reliable they will be eagerly read by all.

We fear that the leader writer who favoured the readers of the *Daily News* of Monday with a short article on the Channel Squadron has rather betrayed the trust reposed in him by the Editor, and has misinformed the public. He starts with the bold assertion that "for some weeks past we have been practically without a Channel Squadron," his reason for making such an assertion being that the ships have been refitting. He is evidently ignorant that a few hours would have sufficed to have put them out of the hands of the dockyards, and though not altogether completed in every department, they would have been fit for immediate service of any kind. This critic then states that "the Admiralty has evidently hit upon the idea that it would be just as well to get some of the ships out of the docks," and then gives some "news" respecting the muster of the evolutionary squadron at Devonport, which he says will consist of seven or eight ironclads with several smaller craft. The information of the "smaller craft" is entirely his own, for the Admiralty, even, are not aware of their having been ordered to join the flag of Admiral Seymour. He is disappointed that "the Thunderer will not form part of the Fleet, although quite ready for sea;" so we hasten to inform him that she was one of the first of those that received orders to join the Channel Squadron for the cruise. A list of the ships forming the "Mediterranean Fleet" is then given, and it positively includes the flagship of the Admiral commanding the Channel Squadron, the writer having discovered a secret that would go far to reduce the Navy Estimates, namely, the possibility of having a ship both at home and abroad at the same moment. But we presume that he has only got mixed in writing of things that are strange to him, and was really writing of the Channel Squadron, although he calls it the Mediterranean by way of variety. Further, he says that "probably the Hercules and the Salamis will join the Minotaur," and it is with some regret that we are compelled to undeceive him, for he is evidently of opinion that the former ship is a tower of strength, as she is alluded to as "the only ship that can be called a first-class ironclad of those named," apparently having little knowledge of the qualities of the Minotaur or Achilles; and finally, the Salamis, upon which he has counted, has been attached, for the time at least, to the Mediterranean. A few errors would not have called for remark, but the article in question seems to be such a studied bungle and the action of the Admiralty is spoken of in so patronising a manner, that it is just as well to call attention to the fact that the critic and adviser is scarcely competent to give an opinion.

As there has been reason to believe that a blunder of a serious nature was committed some time since owing to the bulkheads alluded to in the orders for ventilation not being sufficiently distinguished, it has now been arranged that all bulkheads of watertight compartments shall be distinguished by letters, and the Admiralty considering it desirable that a uniform system of nomenclature should be adopted has directed that the transverse bulkheads are to be distinguished by capital letters A, B, C, &c., commencing at the foremost longitudinal bulkheads by the two letters of the transverse bulkheads at which they terminate (such as AB, BC, CD, &c.), as well as by such other marks (middle line, magazine, &c.) as may appear necessary. The watertight doors are also to have distinguishing marks, using the letters of the bulkheads to which the doors are fitted, and the words starboard, port, middle line, hold, engine-room, lower deck, main deck, or other parts of the ship, so that the position of each watertight door in the ship may be known by these indications. All the distinguishing letters are to be painted in conspicuous characters in prominent positions. The various compartments are to be distinguished as far as possible on the drawing of the watertight compartments by their chief contents, such as magazine compartment, torpedo-room compartment, &c. The above particulars will be shown in the drawings of the watertight compartments furnished by the dockyards to the Captains of ships.

The selection of Rear-Admiral Dowell, C.B., for the appointment of second in command of the Channel Squadron, has given general satisfaction. He has seen varied and active service, and if something more active than experimental cruising should be required of the ships now forming the Channel Squadron, he will prove an able second to the popular Admiral who holds the command. But we should like to see him in a more powerful ship than the Black Prince, the first of our ironclads.

Should the Siberian Fleet on the homeward passage from San Francisco make an attempt at forcing the Suez Canal, which it is understood will be closed against them, the duty of keeping them out will devolve upon M'Killop Pacha, better known to the Service as Captain M'Killop, and another British naval officer, Commander George Morice, or Morice Bey. Whether the Russian squadron will care to try to fight its way through is very questionable, seeing that it is composed of wooden vessels, and might depend upon getting a very warm reception from the Turkish ironclads at the other end of the journey. Still, it is plain that the orders just issued to M'Killop Pacha to keep the Canal free from interference applies to the supposed designs of the Russian vessels now in American waters. Even if the Admiral in command were satisfied to come as far as the entrance to the Canal, there to do his worst on being refused admission and a free passage, he might work a considerable amount of damage to the thoroughfare, especially if he were prepared to sacrifice one of his ships in order to bar the passage. In these remarks we have left the possible part to be played by England out of the question, but it should not be forgotten that the Admiral in command of the Mediterranean has already received orders to repair with his squadron to the western entrance of the Canal, and if by the time the Russian Fleet should arrive from the East we should be actively engaged in the struggle now going on, we may be sure that the Russian Admiral in command would as soon think of flying overland as attempting to show his nose in the Canal.

All applications of retired officers to be permitted to accept employment in the Turkish Navy have been refused by the Admiralty, whether the applicants still draw their retired pay or have commuted. It is impossible for leave to be granted in the face of England's Declaration of Neutrality, even were their Lordships ready to permit some of the best of our retired officers to join another Service, and thus become unavailable for our own if required by any turn of events, the right to call upon retired officers to serve in time of war having been recently affirmed.

The appointment of a civilian to the Vernon as "Electrician" at a salary of £500 per annum will not be made as intended, as it is believed that the staff will be quite capable of superintending this important branch of torpedo operations with the occasional assistance of Mr. Abel, of the War Office, who will occupy the position of Consulting Electrician to the Torpedo School-ship. When the Navy is more advanced in this mode of warfare it is possible that an officer may be found who will have made himself so perfect in the science of electricity that he may be given the appointment of Electrician to the Vernon.

"If the officer appointed for navigating duties should be senior to the senior officer appointed for executive duties, he will, in the absence of the Captain, succeed to the command of the ship. But he is not to take upon himself the routine duties of the executive officer except by order of the Captain or in case of necessity." Such is the wording of Clause 8 of the latest Circular on navigating and pilotage duties, and much discussion has it led to, there being a very great difference of opinion as to the meaning of the words "the officer appointed for navigating duties." Many commanding officers take it to include those of the original Navigating Class, and as such it seems to be read by that class, if we may judge from a letter which we publish to-day; while, on the other hand, it is thought that their Lordships only intend it to apply to officers of the executive who may be appointed for navigating duties under the new system. This view is borne out by the manner in which the Circular is framed, the preceding and some following clauses being confined to dealing with the case of executives accepting navigating appointments; and there are many Commanders who do not accept the intention of the Admiralty to be that a Staff Commander shall, if his seniority in that rank be greater than that of the Commander in his, succeed to the command of the ship in the absence of the Captain. The present vagueness of the Circular upon this most important point is much to be regretted, as it can only lead to misunderstandings and unpleasantness where these officers may clash, and the sooner the Admiralty informs the Service plainly what is really to be understood by Clause 8 the better it will be.

Mr. Stevens, late Captain of the Barracouta, is not, we are informed, altogether satisfied with the result of the recent court-martial. It was suggested, when a member asked that the proceedings of the court might be laid on the table of the House, that there was some suspicion of a flaw in the prosecution, and we believe that Mr. Stevens is desirous of having the minutes submitted to the law officers of the Crown, or some high legal functionary, in order that this question may be decided.

The London Brigade of the Naval Artillery Volunteers are to have the gunboat Cherub placed at their disposal for drill purposes and cruising during the summer months. The Cherub is tender to the Coastguard ship at Harwich, but will come round to the Nore for the convenience of the Volunteers.

The Rev. C. E. Hodson, M.A., Chaplain R.N., has, we are informed, joined the Romish Church. Mr. Hodson served with the Arctic Expedition, and last month took up his appointment as Chaplain of the Aboukir, but on arrival at Port Royal he notified that his religion had undergone a change on his passage out from England.

The state of the Detached Squadron ships is not such as will admit of their doing much further service without being docked, &c., but they are held in readiness for re-commission, so that they may take the place of ironclads in the First Reserve should the more powerful vessels be required for sea service.

Suda Bay, where the Alexandra, Swiftsure, Devastation, Hotspur, and Raleigh were recently anchored under the command of Vice-Admiral Hornby, is a deep indent on the north coast of the western part of the Island of Crete between Akroteri (Cyamon Prom), and Cape Drepano, the entrance to which is covered by the Island of Suda and others. *It lies* to the east of the larger but less sheltered bay of Khaiva, and is described by Spratt as "one of the most capacious, safe, and easy of access in the Mediterranean." Here it was that the Syrens drowned themselves after they were outsung by the Muses; but, for all that, we dare say that the Bay of Suda was not very interesting to the Fleet.

The Temeraire is ordered to be ready to take her departure from Chatham Dockyard before the end of June. The final trial of her engines is expected to take place on the 11th prox., but it is very doubtful if she will be ready by that date.

Ruby, composite screw corvette, is now in the Medway at Sheerness, and is expected to be put in commission under the command of Captain R. H. Molyneux.

Workmen are engaged laying down the grounding for the launching of the Garnet, now building at Chatham, on June 30. She is a clipper-built screw corvette, 1,864 tons and 2,100-horse power.

Orders have been sent to Chatham for the Cormorant to be got ready for launching, but no date is fixed.

Much delay has been occasioned in completing the repairs of the Penelope, at Chatham, in consequence of alteration in her boilers.

The want of a military spirit among our painters such as that which leads artists not only in France, but in Germany and Russia, to select battle pieces and incidents of war for the exercise of their skill, is all the more remarkable when we see what success and popularity attend the steps of those who walk in that way with any genius. See Miss Thompson's exhibition, "Quatre Bras," "The Roll Call," "Balaclava," &c., thronged every day, and look in at other exhibitions in the same street, and you may conclude that military subjects are not disagreeable or unattractive. M. Philippoteaux has painted for the Royal Academy a "Battle of the Alma" which we never heard of. As described in the catalogue, the battle occurred on October 27, 1854, which will not agree even with old style. The battle we wot of was fought on September 20, 1854. The Highlanders are seen in the picture—where they certainly were *not* in the fight—in the thick of it—and the Guards rather in rear on their right, are coming on in a beautiful line, which they surely did not show after they crossed the river, even when Hood dressed up the Grenadiers, for the broken masses of the Light Division, closely followed by the Russians, had made gaps in the centre of the Brigade, and thrown the Scots Fusiliers into such disarray that the officers had a fight to save the colours from momentary danger. Although the general effect of the steep banks over the Alma near the sea where the French attacked is rendered fairly well, the ground in front of the British is exaggerated and untrue in its rugged and tumulary character; but, taking the picture as a battle piece, it is full of life, and abounds in good points characteristic of the French painter's work.

A correspondent, "Indignant," calls attention to a very discreditable practice of the police at Aldershot. It is quite right to punish soldiers who misbehave, but it is wrong to degrade the Queen's uniform. We trust the matter will be inquired into, and steps taken to prevent the recurrence of such scenes as are suggested in our correspondent's letter.

Whatever may be the preparations of the Government for coming events, the activity which prevails in the department of military stores, as regards changes of pattern, "approved and sealed," is of a most gratifying character. By recent official lists we observe that, in addition to former comprehensive changes, we are to have a new "Cavalry bucket," new waterproof "saddle covers," new "pewter measures for field hospitals," new "intrenching tools" (let us hope better than the old), that "graduated arcs," iron "barrows," "limber boxes," and "brass-headed brooms for tropical climates" have engaged the attention of the authorities. It is, perhaps, of more importance than these details to mark the wrought-iron carriages of the 38-ton gun, of the 35-ton gun, of the 9-inch (Sultan type) gun, of the 10-inch (Sultan pattern), of the 20-pounder, of the 64-cwt. 64-pounder, the steel carriage of the 69-pounder, the wrought-iron field carriage of the 25-pounder have been finally settled; that the carriages for the 64-pounder converted 71-cwt. cast-iron guns, for land service, have been sealed and approved; that the wrought-iron platforms of the 38-inch guns have also been decided upon, and the various recoil arrangements perfected. Beside these even "galvanized iron coal tubs" and the "sockets for rocket sticks" lose their importance; nor do the "galvanized iron buckets for Moule's dry earth batteries" attract much attention.

Mr. Kennett, who has had considerable experience under the Red Cross of Geneva, has been charged with the distribution of the funds and stores of the Stafford House Fund for the Relief of the Sick and Wounded Turkish Soldiers, which has had, we are told, the best possible effect, moral and material.

Mr. M. E. Perruche, of Constantinople, informs us that he is ready to represent houses wishing to supply the Turkish Government with stores; but we need scarcely remind our readers that operations of that kind in warlike material or contraband of war are strictly forbidden by the Government of the country.

Of the maps issued by Mr. Stanford, to enable the public to follow the operations of the war, the most useful is that of "Turkey in Europe and her Tributary States." It is clearly drawn and well marked, and it will enable the possessor to mark the larger movements and to note the positions of the belligerents in a satisfactory matter.

The Russian Colonel, Baron Kaulbarc, who was sent to study the organization of the Prussian Army at the request of the Grand Duke Nicholas in 1875-76, has published in the *Voënnyï Sbornik* a very interesting report, for the knowledge of which we are indebted to our excellent contemporary the *Bulletin de la Reunion.* His observations may be summed up in one word:—"The characteristic cachet of the Prussian Army is the instruction of its troops with a methodical and systematic direction to one end only—a state of preparation for war. Such is the final result which is constantly kept in view in the organization of its exercises and of its labours."

The following are the troops detailed to take part in the summer drills at the Curragh, viz.:—The 3rd, 5th, and 7th Dragoon Guards, and 19th Hussars; B and C Batteries D Brigade Royal Horse Artillery; A, B, C, D, and F, and Depôt Batteries 14th Brigade Royal Artillery; 1st Battalion 1st Foot, 2nd Battalion 14th Foot, 2nd Battalion 18th Foot, 93rd Foot, 104th Foot, and 1st Battalion Rifle Brigade.

The bursting of one of the boilers on board the French ironclad frigate the Revanche has caused the death of no less than twenty-seven poor fellows, while ten more are mortally hurt, eighteen severely wounded, and twenty-five slightly. The explosion is said to have had the effect of the discharge of an immense mortar, splinters of iron raking the vessel. Many of the men struck down first were then enveloped in steam. At the first moment there was a panic, and a number of men jumped overboard, one being drowned. It is said that the boiler which burst had served for eleven years, and was condemned a few months ago.

Owing to the want of accommodation in the London District, consequent upon the rebuilding of Knightsbridge Barracks, it is probable that when the 8th Hussars move to Hounslow, on the close of the Aldershot season, two troops will have to be detached to Hilsea. In this case, the two troops of the 20th Hussars now occupying that station would be recalled to head-quarters, one troop from Brighton being provided for at Shorncliffe.

An experiment is now under trial, the result of which, if successful, will be such a change in the periodical issues of clothing to Cavalry regiments as will save a considerable sum to the country, whilst at the same time it will prove no inconsiderable boon to the soldier. The idea is that the full-dress tunic should be issued every two years in future, instead of once in twelve months, a smart and useful patrol jacket being supplied annually, at Government expense, for use on ordinary parades. The stable jacket will still be retained, but will be worn only when the men are off duty.

The commanding officers of the following Militia regiments have been communicated with as to the formation of second battalions during the present training season—viz., the Royal Berks, Royal Glamorgan, Hampshire, 1st, 3rd, 4th 5th, and 7th Royal Lancashire, Leicester, 2nd Royal Surrey, East York, North York, 1st, 3rd, 4th, and 5th West York, Aberdeenshire, and Edinburgh. The replies received in some cases are not such as to hold out any hope, the existing battalions being below—in one or two instances much below—their establishment. In the case of the Lancashire regiments, it is likely the original intention of maintaining two battalions of seven companies each will be abandoned, and that the establishment of each battalion will be fixed at six companies.

The chances of Militia officers being allowed to assume the gold lace, to which they have so long aspired, is, if all we hear be true, most remote, notwithstanding the recommendation of the Militia Committee, which seemed to imagine that the only way of improving the Militia was by sweeping away all distinction existing between it and the Line. One recommendation of the Militia Committee may meet with approval, *i.e.*, the suggested change of uniform in the case of the vast number of Rifle regiments which are now maintained. What with Militiamen and Volunteers in black and green tunics, we are literally flooded with Rifles, a distinct arm, the value of which is only detracted from as matters stand. Let those regiments affiliated with the two Rifle regiments—the 60th and Rifle Brigade—be clothed as Riflemen by all means, but the regiments associated with red-coated corps ought to be converted into Infantry without loss of time, and it is satisfactory to learn that that portion of the Committee's recommendation which points out the inconvenience of the present arrangement meets with approval.

The new equipment which Surgeon-Major Oliver is now in London superintending the manufacture of does away with a difficulty which has long been perplexing our War Office. The introduction of the breech-loading rifle raised the question as to the best means of keeping men fully supplied with ammunition when under fire in face of an enemy. It is this requirement which Dr. Oliver's equipment has been principally constructed with a view of meeting; and though the invention has yet to be reported upon, its adoption is already spoken of as an almost foregone conclusion, so many advantages does it possess over the valise, which has from the first been unpopular.

We have now the shortest staff for a bayonet of any Army in the world, and theorists say that it is of no consequence, as the bayonet will never again be used. If our readers will, however, glance at any account of the capture of the Quarries at the siege of Sebastopol, of the battle of Inkerman, or the various operations at Lucknow during the Indian mutiny, they will see that occasions will continue to occur in which hand-to-hand fighting will take place. It does not, therefore, seem wise to sacrifice altogether the cold steel for the bullet. It is inevitable that the former will come into play at the storming of field works or houses, the capture of bridges, &c. Besides, the British soldier likes to close with his adversary, and it seems a pity to baulk so laudable a desire.

The Distinguished Service Reward, vacant by the appointment of Lieutenant-General H. Smyth, C.B., to the Colonelcy of the 2nd Queen's, has been given to Major-General E. S. Claremont, C.B. General Claremont served as Assistant Commissioner at the head-quarters of the French Army throughout the Eastern campaign of 1854, and up to August 6, 1855, including the battles of Inkerman, Alma, Balaclava, and siege of Sebastopol (medal with four clasps, Brevet of Major and Lieutenant-Colonel, C.B., Officer of the Legion of Honour, and Fourth Class of the Medjidie). Was also employed at the head-quarters of the French Army during the Italian campaign in 1859, and was present at the battles of Magenta and Solferino (medal). Promoted to Commander of the Legion of Honour in 1869. Was present in Paris as Military Attaché during the greater portion of the period of its siege and bombardment by the German Army in 1870. He joined the Army February 9, 1838, and became Major-General December 7, 1871.

The Army.

1st Life Guards. We are authorized to announce that chairman of the year, the annual dinner of the regimental club will not take place.
in consequence of the death of the Earl of Shrewsbury, the

2nd Life Guards. Capt. Doyle, the *Irish Times* says, is about to rejoin his regiment from the Staff at Portsmouth.

3rd Dragoon Guards will leave Dublin for the Curragh on the 7th proximo. Capt. Stevenson is retiring upon half pay, not selling, as it was at first thought probable.

7th Dragoon Guards have left Newbridge, and have gone under canvas in Donnelly's Hollow at the Curragh for the drill season.

3rd Hussars. Capt. Jervoise will accompany Sir Philip Wodehouse, the late Governor of Bombay, to England. Lieut. Fuller and Rdgmr. Rant have passed the higher standard examination in Hindostanee.

4th Hussars. Lieut. Ramsay arrived home from India on Tuesday in H.M.S. Euphrates.

5th Lancers. The *Times* says "Lieut. the Duke of Montrose joined the Staff on Tuesday of Gen. Sir Hastings Doyle, commanding the Southern Military District, but will join his regiment, the 5th Lancers, on Lieut.-Gen. Sir J. Garvock taking over the command at the beginning of July."

9th Lancers. Capt. Bushman has arrived home from India in the Euphrates.

11th Hussars. Major Garnett and Lieut. Verelst have arrived home from India in H.M.S. Euphrates.

12th Lancers. By latest accounts from Madras we (*Irish Times*) learn that the health of the 12th Lancers and 14th Hussars, stationed in that Presidency, had undergone a marked improvement. On their first arrival from England both regiments suffered most severely from change of climate.

19th Hussars. The squadron, under Brevet Major Fairbrother, from Athlone, and the troop from Castlebar, under Capt. Fairlie, arrived at the Curragh last week. Capt. Webster's troop left Longford on Monday, and the head-quarters and another troop, under Lieut.-Col. Craigie, marched the following day. Nothing could exceed the regret with which all ranks refer to the retirement of Col. Jenkins, who has brought the regiment into the highest state of discipline and efficiency, and this without ever adopting those extreme measures which render life in many of our smartest regiments almost unbearable. Col. Jenkins has published the following farewell order:—"Officers, non-commissioned officers, and soldiers of the 19th Hussars,—No language that I could use would convey to your minds the intense regret I feel in thus announcing to you that my official connection with you is soon to cease. Indeed, I should have a heart of stone if I could take leave of you without deep emotion, after having been so closely and intimately associated with you for nearly nineteen years, during fifteen of which it has been my pride and pleasure to command you. It has not been your lot, as yet, to have seen any active service, but you have taken a prominent part in many large camps of exercise in India, in the Autumn Manœuvres of 1872-73 at Aldershot, and at the Curragh. On all occasions you have received the unqualified approbation of the general officers under whom you have served. In 1870 you received the thanks of the Indian Government for the excellent spirit in which you received the sudden order to return to England and the good order in which it was carried out. I also well remember how cheerfully you bore the discomforts caused by the incessant rain on the bleak, inhospitable Downs of Dartmoor, and I feel convinced the same soldierlike spirit will continue to pervade your ranks whensoever and wheresoever you may be called upon, either in peace or war, to undergo hardships, and to encounter dangers in the cause of your Queen and country. It is my firm belief that I leave you in a state of the highest efficiency, and fit to take your stand in the foremost ranks of any army in the world; but, seeing that perfection is not attainable in this world, I hope that you will never relax in your exertions, not only to maintain your present renown, but, if possible, to add to it. In conclusion, I desire to offer my most hearty thanks to all ranks (especially to my Staff, both past and present) for the cordial assistance I have at all times received from you, and for the good feeling you have one and all invariably evinced towards me personally during my command. I assure you that I shall always watch your career with deep and affectionate interest. I pray to God that every blessing may attend you as a regiment and individually, and that your fair fame may remain unsullied to the end of time. Farewell!"

Royal Artillery.

"C. R. L." writes:—"It is understood that there will be a Birthday *Gazette*, and, probably, many old warriors are looking forward to some recognition of past services. Few, however, among the recipients, will have better earned the honours of the Bath than Major-Gen. A. Huyshe, Royal (late Bengal) Artillery, who has seen forty-five years' active service; and as he is not the man to memorialize, I trust you will permit me to speak on his behalf in your columns. Gen. Huyshe served as brigade-major of Artillery in the Gwalior campaign of 1843-44, and was present at Maharajpore. Those who are conversant with Indian history will never forget the day of Chillianwallah, which was at best a drawn battle. In that action, as is well known, the 14th Dragoons rode over our guns and tents in panic flight. Capt. Huyshe commanded a troop of Horse Artillery, and supported the 14th, but when they bolted he, with the devotion of a true soldier, wheeled round his guns, advanced them twenty-three yards, and opened fire on the advancing Sikh Horse. But they were upon him, and he and his men were soon engaged in a hand-to-hand conflict, Capt. Huyshe only escaping death at the hands of two assailants by a timely bullet from the pistol of the late Capt. Stuart, of the 14th, who, with the rest of his officers, strove to rally his men. Capt. Huyshe was also engaged at Goojerat, where he captured Sikh and Afghan colours, and after which the late Lord Gough presented him with a Sikh gun. In more peaceful fields Gen. Huyshe is equally distinguished. He wrote the 'Artillery Drill Book,' he was Inspector-Gen. of Artillery in India, and trained some of the officers who now add C.B. and K.C.B. to their names; he commanded the Artillery at Aldershot and Woolwich, where he received the commendation of H.R.H. the Commander-in-Chief; and he is known throughout his regiment as one of the best and smartest officers it has ever produced. Surely, then, the Bath would find a worthy recipient in Major-Gen. Alfred Huyshe at the approaching Birthday *Gazette*? I need hardly say I write this letter without his knowledge, and, indeed, have not learned these particulars from him."

An Indian paper contends that Major-Gen. Sir Arnold Kemball, K.C.S.I. (late Bombay), who accompanied the Turkish Army in the Servian campaign, might have been nominated to Constantinople instead of Mr. Layard. However, it suggests that Sir Arnold Kemball is just the man to place at the critical moment at Teheran. He would be "capable of counteracting Russian intrigues and of detecting in good time any inclination on the part of the Shah to take advantage of the troubles in Europe in order to add to his dominions a slice of Turkish territory in Asia."

Brevet Col. J. E. Michell, C.B., is to revert to Garrison Artillery, from the A Brig. R.H.A., on appointment to the command of a brigade of the Indian Army. Gen. Michell takes command of the Sealkote Brigade.

According to the *Irish Times* "the period of service of Major-Gen. J. H. Lefroy, C.B., R.A., as Governor of Bermuda, expired on April 8, but he will not return to England, until the arrival of his successor, Brigdr.-Gen. R. M. Laffan, Royal Engineers."

Major F. C. H. Lyon, C Brig. R.H.A., is about to resign his commission.

The *Whitehall Review* says:—"The many friends of Col. Lynedoch Gardiner, R.A., her Majesty's Equerry, will be glad to learn that he will shortly become a major-general, and that his promotion will not necessitate his vacating the appointment he so worthily fills in the Queen's household. Some of the most prominent soldiers about the Court are officers who wear on their breasts no order of any kind testifying to the services they have performed for their Sovereign and their country. Col. Gardiner is a case in point; for, excellent soldier though he is, he has not even been given a Companionship of the Bath, though it cannot be denied that he fully merits that honourable distinction."

The following officers arrived home from India on Tuesday in H.M.S. Euphrates, viz.:—Col. W. F. Swinhoe, 9th Brig. (late Bengal); Major E. C. W. Raynsford, B Brig. R.H.A. (late Bengal); Lieut. A. N. Rochfort, 2nd Brig.; Rdgmr. G. L. Wilkinson, 6th Brig.; Qrmr. T. Gibson, N. M'Leod, and Vet.-Surg. J. Hammond, 5th Brig.

Lieut. C. D. Dean-Pitt, 3rd Brig., has been appointed an aide-de-camp to Sir Richard Temple, Governor of Bombay.

Col. H. E. L. Thuillier, C.S.I. (late Bengal), is shortly to vacate his appointment as Surveyor-General and Superintendent of the Topographical Survey of India.

Royal Engineers.

On the retirement of Major-Gen. Walker from the post of Chief-Engineer and Secretary to the Government of Madras, Public Works Department, Madras, Col. J. Mullins was appointed his successor. Col. Mullins, however, held the appointment for only a short time, after which he resigned, and Col. E. A. Foord was nominated to the post. It is now strongly rumoured that even Col. Foord is not likely to keep the place long, and that the Government will be called upon to find some other officer for the post.

Lieut. M. H. Gregson and Lieut. F. R. de Wolski arrived home from India on Tuesday in H.M.S. Euphrates.

4th King's Own. The 2nd Batn. and depôt 1st Batn. left the Curragh on Thursday for Dublin, and took over Beggar's Bush Barracks.

5th Fusiliers. Capt. Ormond, 1st Batn., has arrived home from India in H.M.S. Euphrates.

7th Fusiliers. Brevet Major Colvin, 2nd Batn., is on leave to Calcutta until Sept. 1, on private affairs, and Sub-Lieut. Minchin to Bombay to Oct. 15, to study the native languages.

8th King's. Capt. Wheeley and Lieuts. Oakeley and Wade, 1st Batn., have arrived home from India in H.M.S. Euphrates.

9th Regiment. Lieut. Shuckburgh, 2nd Batn., has arrived home from India in the Euphrates.

11th Regiment. Sub-Lieut. Fairbrother, 1st Batn., has arrived home from India in H.M.S. Euphrates.

13th Light Infantry. Lieut. Parr, 1st Batn., has joined the Staff of Sir Bartle Frere, Bart., G.C.B., G.C.S.I., as aide-de-camp, on his Excellency's arrival at the Cape as Governor and Commander-in-Chief. Who Lieut. Parr's successor is to be in the fort adjutancy of Natal has not transpired.

14th Regiment. The left-half battalion of the 2nd Batn. proceeded on Monday by rail from Belfast to the Curragh for the drill season. The head-quarters and remainder of the battalion was to have moved yesterday. Viscountess Templetown presented new colours to the battalion at Belfast on Saturday last. The Right Hon. Gen. Viscount Templetown, G.C.B., accompanied by the Viscountess and Major-Gen. Bell, C.B., commanding the Belfast District, arrived at the barracks at 12 o'clock, when the regiment, under command of Col. Thomson, was paraded at the upper end of the barrack square. Lady Templetown, in handing the colours to the two officers deputed to receive them, addressed Col. Thomson as follows:—"Col. Thomson, as wife, daughter, and sister of soldiers, no one can feel more deeply impressed than I do with the importance of the ceremony you have done me the honour of asking me to undertake; and I can assure the 2nd Batn. of the 14th Regt. that it is with very great pride and pleasure I present them to-day with their new colours. Your regiment stands high in its numbers, high in its reputation, and high also in the honours recently attained in its new designation. I wish also to add, I feel very happy, in the presence on this occasion of the distinguished general now in command of this district, in presenting to you these beautiful colours, just blessed by the Lord Bishop of this diocese. I commit to your charge the precious emblems of the honour and renown of your gallant regiment, knowing that whenever and wherever you may be called upon, you will guard and carry them forward through the dangers and difficulties of every conflict, and hold them firm on to its end. In bidding you farewell, I beg you to accept my sincerest wishes for your honour, welfare, and success."

15th Regiment. Lieut. Shortland, 2nd Batn., has arrived home from India in H.M.S. Euphrates.

16th Regiment. Capt. Tabb, 2nd Batn., arrived home from India on Tuesday in H.M.S. Euphrates.

17th Regiment. Capt. Hunt, 2nd Batn., has leave from India to England for six months, on urgent private affairs. and arrived on Tuesday in H.M.S. Euphrates. Lieut. Stacpole, 2nd Batn., and Private J. Stanley, 2nd Batn., have passed the higher standard examination in Hindostanee.

22nd Regiment. Capt. Butlin, 2nd Batn., has been appointed station Staff officer at Shahjehanpore, vice Lieut. Bromfield, resigned. Lieut. Curteis, 2nd Batn., arrived home from India on Tuesday in H.M.S. Euphrates.

23rd Fusiliers. Lieuts. Mainwaring, Clough, Evans, Whiting, and Sir R. A. W. Colleton, and Sub-Lieut. Griffith, 1st Batn., were examined at Dublin on Monday as to their qualifications for promotion.

25th Regiment. Capt. Coulson, 2nd Batn., arrived home on Tuesday in H.M.S. Euphrates from India.

32nd Light Infantry. H.M.S. Himalaya, with the head-quarters and service companies on board, *en route* from the Cape, is expected at Portsmouth almost daily now. The regiment will be stationed at Devonport.

40th Regiment. Major Shipley has been granted leave from India to England for six months, on urgent private affairs.

43rd Light Infantry. We (*Bangalore Spectator*) regret to have to record the death of Sub-Lieut. Hobart, attached to the 23rd L.I., on April 11. He took ill with cholera on the 7th, but gradually grew worse, and succumbed to exhaustion and general break up of the system.

44th Regiment. Lieut.-Col. Hand and Capt. Odell arrived home from India on Tuesday in H.M.S. Euphrates.

Royal Marines.

The following promotions have taken place:—Lieut. A Allen, R.M.A., to be capt., vice Durnford, retired; Gen. A. Anderson, C.B., R.M.L.I., having attained the age of 70 years, has been placed on the Retired List of his rank from the 7th inst., under the provisions of Clause 4 of H.M.'s Order in Council of Feb. 22, 1870.

Consequent on the retirement of Gen. A. Anderson, C.B., R.M.L.I., the following promotions have taken place, viz.:—Lieut.-Gen. G. C. Langley, C.B., to be gen.; Major-Gen. H. Marriott to be lieut.-gen.; Col.-Commandant P. C. Penrose, C.B., to be major-gen.; Col. 2nd Commandant J. H. Stewart to be col.-commandant; Lieut.-Col. and Brevet Col. J. W. A. Kennedy to be col. and 2nd commandant, vice Stewart; Capt. and Brevet Major W. H. W. Bennett to be lieut.-col.; Lieut. E. N. W. Holbrook to be capt.; Lieut. J. A. Sweny to be capt. vice Coppin, retired.

51st Light Infantry. Major Farrington has been appointed commandant of the Murree Convalescent Depôt, vice Major Shipley, 40th. Lieut. Boxwell has arrived home from India in H.M.S. Euphrates.

59th Regiment. Capt. Griffiths, on vacating his appointment as garrison instructor at Mhow, has been granted leave to England for fifteen months on private affairs. Capt. Powys has been granted leave from India to England, to appear before a medical board, and arrived home on Tuesday in H.M.S. Euphrates.

62nd Regiment. Capt. Kelly arrived home on Tuesday from India in H.M.S. Euphrates.

63rd Regiment. Major Kinahan, says the Lahore paper, has been obliged to return to Europe owing to ill-health, and in all probability will retire from the Service very shortly.

66th Regiment. Lieut. Hassard has been appointed interpreter.

72nd Highlanders. Lieut.-Col. de la P. Beresford arrived home from India on Tuesday in H.M.S. Euphrates.

74th Highlanders. A correspondent writes:—"The head-quarters have been moved from Penang to Singapore, consequent on the departure of the 80th Regt. for the Cape. Col. M'Leod is in command. Lieut.-Col. Jago commands the detachment of two companies at Penang, Capt. Hamilton is in command of the company at Malacca, and Capt. Wallace of the company still remaining in Perak, which is divided between Banda Bahru and Qualla Kangsa. The *Straits Times* thus remarks on the first performance of the 74th's band in public—'Welcome the coming, speed the parting guest,' is a good and honest sentiment, and it cannot, therefore, be taken as unkind that while retaining a grateful and kindly remembrance of the pleasure afforded the community by the band of the 80th Regt., we should bear a ready and unhesitating testimony to the acquisition we have attained by the presence in Singapore of the band of the 74th Highlanders. They played for the first time here at the Botanical Gardens, and it is only just to say that even the most favourable anticipations were far more than realized. Amongst the pieces was a selection from *Il Trovatore*, which was rendered in a manner which afforded, we are sure, a surprise to all present, and certainly proved an effective contrast to anything that has ever been heard here before of band music. It was grand and imposing, and though no noisy plaudits followed its finish, the hushed stillness in which it was listened to (rarely usual here) proved ample testimony to its influence on those gathered around.' Lieuts. Carey and Pagan, who were left at Malta to complete their course in the garrison instructor's class, arrived at Penang by the P. and O. s.s. Khiva on March 17. The latter has proceeded to join his company at Banda Bahru."

78th Highlanders. Brevet Lieut.-Col. Fielden has, says the *Standard*, sent in his papers to retire from the Service on account of ill-health.

80th Regiment. Lieut. Swinburne, not Lieut. Saunders, obtains the company about to be vacant by the promotion of Brevet Major Rowland.

83rd Regiment. The depôt companies have accompanied their affiliated battalion, the 86th, to Aldershot from Ireland.

86th Regiment. "The regiment," the *Irish Times* says, "arrived in Dublin yesterday (Monday) morning from the Curragh, and proceeded to Kingstown, where it embarked in the Assistance for Portsmouth, *en route* to Aldershot, where it will be encamped on Rushmoor-common. This gallant corps is much regretted at the Curragh, and some disappointment is felt that it has not been allowed to spend some time in the capital of Ireland. When the barracks at Downpatrick have been completed the depôts will return to this country to form the 63rd Brigade Depôt."

88th Connaught Rangers. The embarkation of the regiment for the Cape of Good Hope, which was expected to take place about the 20th inst., has been postponed to the 8th prox., as the Orontes will not be ready sooner.

89th Princess Victoria's. Capt. Richmond was a passenger in H.M.S. Euphrates, which arrived home from India on Tuesday.

92nd Highlanders. Capt. Brooke will most probably fill the vacancy at the depôt caused by Capt. Papillon's appointment to the adjutancy of the 3rd Aberdeen Rifle Volunteers. Capt. Singleton, now on the Supernumerary List, rejoins the establishment, vice Capt. Papillon, and will embark for India in September to take up duty with head-quarters.

93rd Highlanders left Dublin on Thursday for the Curragh. Lieut.-Col. M'Bean, V.C., the *Irish Times* states, will shortly be called upon to vacate his command under the sixty years' rule.

95th Regiment. Henry Bird, late of the regiment, a pensioner in receipt of 1s. per diem, died at Lichfield on the 9th inst., aged ninety-two years. He served in the Peninsula, and was discharged to pension in consequence of wounds received on Dec. 12, 1811. He was granted the Peninsula medal and one clasp.

97th Regiment. Lieut. Cautley arrived home from India on Tuesday in H.M.S. Euphrates.

109th Regiment. Surg.-Major Thornton, who has been in medical charge of the regiment since July 23, 1870, is returning to England, with a view of retiring.

Rifle Brigade. Major Wood, 4th Batn., arrived home from India on Tuesday in H.M.S. Euphrates.

Army Service Corps. No. 11 Comp. was to have embarked at Dublin yesterday for Birkenhead, *en route* to Aldershot.

Medical Department. The *Civil and Military Gazette* regrets exceedingly to hear by telegram from Calcutta that Dr. N. H. Stewart, Depty. Surg.-Gen., Meean Meer, who left Lahore on April 12 for England, reached Calcutta in such a critical state that his life was despaired of. He was too ill on arrival to go on board ship. Surgs.-Major A. Guthrie, M.D., H. Kelsall, J. Davidge, A. F. S. Clarke, W. T. Martin, M.D., J. M'Creery, H. C. Gillespie, M.D., and J. Hector, M.B., and Surg. W. J. Fawcett, M.B., arrived home from India on Tuesday in H.M.S. Euphrates. Surg.-Major R. Waters, M.D., who distinguished himself a short time back by riding overland to Europe, has been appointed surgeon to Sir Richard Temple, Governor of Bombay. Surg. J. J. Lamprey has elected to join the African Medical Department, and has sailed for Sierra Leone.

Veterinary Department. We regret to learn of the death, which occurred in London on the 26th ultimo, of Staff Vet.-Surg. W. Partridge, on the Half-Pay List. Mr. Partridge served in the Crimea from Feb., 1855, to the end of the war, and received the war medals; served in India with the 17th Lancers throughout the whole of the Central Indian campaign; employed at Alicante, in Spain, assisting in purchasing mules for the Abyssinian Expedition, and received the thanks of H.R.H. the Field-Marshal Commanding-in-Chief and the Secretary of State for War for his services there. He suffered severely during the Crimean campaign from ague, fever, and rheumatism, and towards the termination of the Central Indian campaign from dysentery, rheumatism, and fever. He was carried on dhoolies for fourteen days, admitted into the Officers' Hospital at Calcutta, and invalided home. The illness contracted on foreign service laid the foundation of a bad state of health, and which continued with intermissions during the remainder of his service. He joined the Veterinary Department Nov. 8, 1854; was promoted first class vet.-surg., June 29, 1862; Staff vet.-surg., Oct. 7, 1871; and was placed on half pay on the recommendation of a medical board July, 1875.

THE AUXILIARY FORCES.

MILITIA.

Royal Berks will train at Aldershot.

Devon Artillery, occupying Tregantle Fort, will vacate it to-day, and go under canvas outside for the remainder of the training.

East Kent. Col. Pennefather and the officers gave a ball to a numerous assemblage at the Music Hall, St. Margaret's-street, Canterbury, on the 9th inst. Interest was attached to the proceedings from its being the occasion of the *débût* of Miss Howell, daughter of Col. Howell, 2nd Batn., the young lady being presented by the subalterns wtih a handsome bouquet as a *souvenir*, and as a slight token of the universal respect in which her father is held. On the following morning, the 10th inst., the regiment was inspected by the hon. col., Major-Gen. Bingham, C.B. The officers and a large party subsequently sat down, to the number of about eighty, to luncheon in the mess-room, at the Fountain Hotel.

3rd Royal Lancashire. The regiment, to the number of about 700 men, has completed its training at Preston, where it was visited by its hon. col., Lord Winmarleigh, who rode at its head on the occasion of its inspection, much to the satisfaction of officers and men. The inspecting officer was Col. R. W. Lowry, C.B., 12th Brigade Depôt, who spoke in high terms of the regiment, and expressed the great pleasure he would have in reporting most favourably of it.

1st Royal Middlesex will again undergo its training at Aldershot.

3rd Royal Middlesex will proceed to Aldershot for its training.

4th Royal Middlesex is to undergo its training this year at Aldershot.

Nottingham. The regiment assembles on Monday at Newark for training.

Royal Antrim. Mr. J. J. Rowan, late 62nd Regt., has been recommended for a company.

Kerry. The recruits assembled at Tralee for preliminary drill consist on parade of 1 capt., 1 lieut., the adjt. (Capt. Phibbs), the qrmr., 23 sergts., 7 drummers, and 134 rank and file.

King's County. The following are assembled at Birr for preliminary drill, viz.:—Two subalterns, the adjt., 21 sergts., 7 corporals, 6 buglers, and 100 privates.

Queen's County. Capt. G. Trench, late capt. Royal Dragoons, has been recommended for a company.

Tyrone Fusiliers is ordered to assemble for training at Omagh on Thursday next.

The following regiments assembled on Monday for training, viz.:—The Hereford, at Hereford; the Royal Montgomery, at Welchpool; the Norfolk Artillery, at Great Yarmouth; and the Suffolk Artillery, at Harwich.

Orders have been issued for new clothing to be prepared and issued forthwith to the following Militia regiments, viz., the Royal Anglesey and Royal Monmouth Engineers, and the Royal Cardigan, Sligo, and Wicklow Artillery, on their conversion from Infantry regiments.

"Paterfamilias" sends us particulars of a hard case under the proposed new Militia regulations. He says:—"My youngest boy has been brought up for the Army, and I decided to send him through the Militia in order to save the time necessary for study for competitive examination and to devote it instead to Hindostanee and Persian, to fit him for the Indian Staff Corps. He has passed the requisite Civil Service examination, is gazetted to a Militia regiment, and has the promise of a nomination for 1879. As he will not be 19 until October, 1878, he could not have a nomination before 1879. Now, under the new regulations—that is to say, if they are carried out by Mr. Hardy, as sketched in his speech the other day—my boy is excluded, and all we have done for him is thrown away, the cost of Militia uniform into the bargain. If Mr. Hardy would not exclude officers already gazetted, and who have received promises for 1879, no hardship would be done, no new cases could arise nor be manufactured, and the public service could not suffer."

Mr. Briggs asked the Secretary for War on Thursday whether he would inform the House how many of the 38,000 recruits enlisted last year for the Militia were under 18 years of age, how many were between 18 and 25, and how many were over 25 years of age. Mr. Hardy said there was no return in the War Office on the subject. It would be necessary to communicate with every Militia adjutant in the kingdom to obtain such information as the hon. member desired. He did not think it was worth while to make investigation, and therefore he was not prepared to call on the Militia regiments to make a return. Sir A. Gordon asked the Financial Secretary to the War Office whether he would expedite the preparation of the Index to the Militia Committee Report, so that it might be delivered to members by the end of the Whitsuntide holidays. Mr. Stanley hoped that the Dijest of the evidence and the Index would be laid upon the table either on the Thursday or the Monday after the Recess.

YEOMANRY.

North Devon Hussars. The annual eight days' training was concluded on Thursday at Barnstaple. On Wednesday the regiment was inspected in Youlston Park, the seat of its col., Sir Arthur Chichester, Bart. The inspecting officer was Lieut.-Col. Mussenden, 8th Hussars, who said he should be pleased to make a favourable report. The men had gone through their drill in a very satisfactory manner. The officers afterwards lunched at Youlston House, and the men had an *al fresco* meal in the park, marching back to Barnstaple about 3 o'clock.

VOLUNTEERS.

"A Chaplain of Twenty-two Years' Standing" writes:—"If chaplains of Volunteers are required 'to be present at a certain number of parades, in order to make themselves efficient,' as your correspondent informs us is the case, by all means let them wear a Volunteer's uniform, both while learning the goose step, and, if they please, when they have made themselves proficient in the art. I simply take exception to their assuming, according to individual caprice, the captain's, major's, or colonel's uniform of the commissioned chaplains of the Regular Army."

"An Old Soldier" writes:—"I wish to suggest, through the medium of your paper, that there should be a revision of the 'Field Exercise' for Volunteer regiments. I think at present there is too much in the Red Book for regiments to learn who have so little time for drill. I would limit the battalion manœuvres to some three or four movements, and have the whole of the Light Infantry drill and the principles of it thoroughly got up. I think if this were done that the Volunteer regiments would become much more efficient soldiers, instead of doing as they mostly do now, viz., try to learn a lot of movements which would be practically of no use on actual service. The fancy movements may be useful as drill and for show to Regular troops, who have little else to do; but I feel sure any old soldier who has seen and known what fighting is would say that regiments who know thoroughly their Light Infantry and a few such movements, as being able to advance and retire in line and column steadily, deploying from quarter column, and, may be, one or two other simple movements, would be commanded by generals in action with much more confidence than regiments who know the whole Drill-Book indifferently."

THE INDIAN ARMY.

3rd Bengal Cavalry. Capt. G. T. Morris, squadron officer, has been appointed acting assist. garrison instr. at Lucknow, vice Lieut. H. A. Sawyer, Bengal S.C.

6th Bengal N.I. Capt. F. W. Crohan, General List, attached to 2nd N.I., has been appointed wing officer, vice FitzGerald, appointed to 3rd Bengal Cavalry. Surg.-Major J. C. Amesbury is the inventor of a range-finder which appears to have some features in common with Gen. Berdan's instrument. It far exceeds it, however, in portability, as instead of requiring a cart for transport, it can be carried in the coat-pocket. It gives the distance of any object within a range of three thousand yards. Dr. Amesbury is said to intend patenting his invention in England.

8th Bengal N.I. Lieut.-Col. A. Taylor, second in command, commands during the absence of Col. Carey on furlough in England.

26th Bengal N.I. At a parade ordered for the purpose at Mean Meer, Subadar-Major Abdoolah Khan has been decorated with the 2nd Class Order of British India. This native officer joined the regiment in 1875, bringing with him 400 men.

45th Bengal N.I. Lieut. H. N. M'Rae, wing officer, has been appointed qrmr., vice Capt. C. L. Woodruffe, who has vacated on completing five years' service.

Central India Horse. The Indore correspondent of the *Times of India*, writing on the 16th ult., says:—"Major-Gen. Sir H. Daly has left for England on three months' leave, leaving Col. Watson, V.C., C.B., Central India Horse, in charge of the Residency. Col. Watson is not new to the appointment, having officiated for Sir Henry when on leave two or three years ago."

3rd Goorkhas. Capt. R. E. K. Money retains his appointment as qrmr. on the completion of his five years, and is to officiate as wing commander during the absence on furlough of Major G. C. Gregory; and Lieut. C. Pulley, wing officer, has been appointed adjt., vice Smith, vacated on promotion.

5th Hyderabad Infantry. Lieut.-Col. T. T. Turton, commandant, has been granted furlough to Europe for two years.

1st Punjab Cavalry. Major G. C. Bird, squadron commander, has returned to India and resumed duty.

7th Madras N.I. Capt. R. Stokoe, adjt., has arrived home from India on furlough.

28th Madras N.I Capt. G. Godfrey has returned to India and resumed duty as adjt.

33rd Madras N.I. Capt. H. E. D. Bayley, adjt., has arrived home from India on furlough.

34th Madras N.I. Major W. O. Foord, wing subaltern, has arrived home from India on furlough.

35th Madras N.I. Capt. S. L. Bagshawe, adjt., has been granted furlough to Europe, on private affairs, for one year, and for an additional year on medical certificate.

38th Madras N.I. Capt. K. F. Stevenson, qrmr., has arrived home from India on furlough.

1st Bombay Light Cavalry. Major C. J. Anderson, second in command, commands the regiment in the absence of Col. Blair, V.C., on furlough in England.

3rd Sind Horse. Lieut. E. V. P. Monteith, squadron subaltern, has arrived home from India on furlough.

3rd Bombay N.I. Surg.-Major C. Johnson has been appointed civil surgeon at Ahmedabad, and is succeeded as medical officer by Surg.-Major P. W. Cockell.

4th Bombay N.I. Col. A. P. Chesshyre, second in command, has been granted furlough to Europe for eighteen months.

6th Bombay N.I. Capt. E. R. Reay, qrmr., has been granted five months' furlough to England.

22nd Bombay N.I. Lieut.-Col. W. Blakeney, second in command, is about to return to duty in India.

30th Bombay N.I. The appointment of Lieut. G. C. Fuller, 3rd Hussars, as second wing subaltern, has been cancelled at the officer's own request.

The Army Gazette.

INDIA OFFICE, May 16, 1877.

Her Majesty has been pleased to approve of the following admissions to the Staff Corps made by the Government in India:—

BENGAL STAFF CORPS.

To be Lieuts.—Lieut. S. C. F. Peile, 109th Foot; Oct. 12, 1875. Lieut. E. D. H. Daly, 15th Hussars; Oct. 12, 1875. Lieut. C. Hogge, 22nd Foot; Dec. 30, 1875.

BOMBAY STAFF CORPS.

To be Lieut.—Lieut. F. W. S. Jackson, 11th Foot; Jan. 15, 1876.

THE CURRAGH CAMP.

(From a Correspondent.)

The first "field-day" of any importance took place on the 10th inst. The troops on the ground were as follows:—B Bat. D Brig. R.H.A., three squadrons 7th Dragoon Guards, 2nd Batn. 4th Regt., 75th and 86th Regts., under the command of Col. Bray, 4th Regt.; one squadron 7th Dragoon Guards, D Bat. 14th Brig. R.A., musketry detachments Dublin County Militia and Kildare Rifles, under the command of Lieut.-Col. Wadeson, V.C., 75th Regt., the former force being an advance-guard, the latter a rear-guard. The idea was that a rear-guard of an army corps, retreating from Moddenstown on Newbridge, takes up a temporary position on the line of Gibbet Rath, Hare Park Hospital, with orders to hold the position for an hour against the advance-guard of an army corps advancing from Moddenstown. Those who have been stationed at the Curragh Camp will be familiar with the names of the several roads and places mentioned. The advance-guard was formed in "columns of route" on the Tully East, Moddenstown, Cunningham, and Suncroft Roads, and, upon the signal gun being fired from Gibbet Rath, was to debouch upon the Curragh, and so commence the fight. The 2nd Batn. 4th were sent on towards Kildare, and were to advance into the open and, by a flank movement, attempt to turn the enemy's right, whilst the 86th and 75th Regts. were to advance in skirmishing order direct upon the Gibbet Rath. The smoke of the signal gun had scarcely evaporated into space when the crack, crack of the Martini or Snider rifle was heard, as long lines of skirmishers advanced or retired through the dense gorse of the Curragh. The effect was exceedingly picturesque, the lovely green and yellow blossom contrasting strongly with the bright scarlet of the soldiers as they flitted through the bushes. The Gibbet Rath was very strongly defended, and the occupants poured a heavy and destructive fire upon the advancing or attacking force. Soon the 2nd Batn. 4th Regt. came upon the field, and created a diversion and a commotion, especially amongst the Cavalry of the enemy, for the thick gorse effectually prevented the latter from acting with effect, whilst it favoured the advance of the Infantry. The enemy, finding their flank so violently threatened, gradually retired, a strong force still holding the Gibbet Rath until it was gallantly driven pell-mell out of it by a point-blank bayonet charge. The "Cease fire" was then sounded, and the enemy took up a new position, but were soon obliged to retire precipitately before the furious advance of Col. Bray's force. The day was brought to a close by the usual march past. There was a good sprinkling of spectators at the saluting base, and they were evidently much pleased with the raree show. The Royal Horse Artillery and the Cavalry looked splendid; the horses were in a little too good condition—owing, I suppose, to their winter's inactivity. I was particularly struck with the fine appearance of the Militia regiments, and felt that England was quite safe as long as she could call into the field such splendid material. The head-quarters of the Royal Scots marched into camp to-day, and the men seemed to be a fine set of fellows. There are to be only seven regiments of Infantry, three of Cavalry, and some guns this summer here, the Militia regiment already here being the only one whose training will take place at the camp. If I might be so bold, I would beg to point out to the spectators of military displays, especially to the ladies, the danger of taking up a position in an enclosure which is sooner or later sure to be the scene of "deadly" contest. I was an eye-witness to-day to several ladies being in the very thick of a bayonet charge, and I can assure them that a prod from a bayonet is not at all to be desired.

HUNYADI JÁNOS.

NATURAL APERIENT WATER.

"Most palatable and agreeable."—Prof. Macnamara.
"Richest in Aperient Salts."—*Lancet.*
"Invaluable for Women and Children."—*London Medical Record.*
"Convenient and Sure."—Inspector-General Macpherson, M.D.

Scots Guards	Mr. Clarke.

At the Grand Military Concert for the Benefit of the Royal Cambridge Asylum.

BY Special Desire, Mr. CUSINS will CONDUCT his Princess of WALES MARCH.

MDLLE. TIETJENS has (by permission of Mr. Mapleson) kindly consented to SING at the

GRAND MILITARY CONCERT, for the benefit of the Royal Cambridge Asylum for Soldiers' Widows, Saturday, 26th May, at the Royal Albert Hall. Prices:—Private boxes from two guineas; amphitheatre stalls, 10s 6d; arena, 7s; balcony (two front rows), 5s; other rows, 4s; admission, 2s. Tickets at the Royal Albert Hall and the usual Agents.

ADAMS'S

NEW PATENT DOUBLE ACTION, CENTRAL-FIRE, BREECH-LOADING
REVOLVER.
AS EXCLUSIVELY ADOPTED BY H.M.'s WAR DEPARTMENT.
JOHN ADAMS, Managing Director,
Contractors to H.M.'s War Department.
391, STRAND, LONDON, W.C.
The only address.

Reprints of special articles on competitive trial at the Royal Arsenal, Woolwich, from the *Times, Daily Telegraph, Engineer, Pall Mall Gazette*, &c., &c., together with Price Lists and other particulars, can be obtained on application.

Breech-loading Rifles, Guns, and Appurtenances of all kinds.

N.B.—See *General Orders*, March, 1877.

WILKINSON AND KIDD,

SADDLERS AND HARNESS MAKERS
To Her Majesty and H.R.H. the Prince of Wales,
5, HANOVER SQUARE,
REGENT STREET, LONDON, W.
(*Removed from Oxford Street.*)
ESTABLISHED 1786.

BUTLER'S MILITARY BAND INSTRUMENTS are all guaranteed first-class, both as to Tone and Workmanship, at prices much under those usually charged.
Manufactory—29, HAYMARKET, LONDON,
And at ELLIS'S QUAY, DUBLIN.

NOTICES TO CORRESPONDENTS.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

Letters cannot be received in answer to Advertisements.

Remittances should be made payable to Mr. RICHARD JAMES WOOD, o whom all business communications should be addressed.

CIVILIAN.—There is no means of ascertaining the dates, as they are not fixed upon until a few days before.

A. J. G. C.—Certainly they are.

ENQUIRER.—Refer to paragraph elsewhere.

OLD WELLINGTONIAN.—Certainly.

CORPORAL.—Boys' service does not count.

MESSRS. MORTEN AND CUTLER.—Thanks for the copy of counsel's opinion. There can be no question of the power of the Crown as represented by the Admiralty, and we see no use in agitating the matter.

BOOKS RECEIVED FOR REVIEW.

Army & Navy Gazette.

LONDON, SATURDAY, MAY 19, 1877.

The general total of the troops originally embarked for the East under Lord Raglan was 933 officers, 1,257 Sergeants, 432 drummers, &c., and 23,473 rank and file. The first battalions which embarked were those of the Brigade of Guards (February 23, 1854), who were conveyed in steamers to Malta, and the friendly occupation of Turkish soil did not begin till the first week in April, when the head-quarters and a battalion of the Rifle Brigade, as advance-guard of the Light Division, landed at Gallipoli, already in French possession. All through the latter part of February and the months of March and April the despatch of British troops to Gallipoli and Scutari went on, but it was not till May 29 that the first portion of the force could be dispatched to Varna, where by degrees the whole army was collected and echelonned, with its left at Devna and its right on the Bay. It was at the end of June that the allied Powers resolved to make a descent on the Crimea and attack Sebastopol. They had the control of the sea, a vast armada of men-of-war and such fleets of powerful merchant steamers and great transports (600 in all) as never were assembled in modern war. Making allowance for delays of all kinds—for the fire at Varna and the outbreak of cholera, and for the making of *chalandes*, flat-bottomed boats, &c.—there was a good deal of time spent on our side in moving the troops down to Varna and embarking them, so that the French became impatient, and St. Arnand sailed without us. The British had less than 1,000 Cavalry, and had only fifty-six guns. And yet, when we did land at Old Fort on September 14, the army had neither tents nor knapsacks, nor transport of any kind—no baggage train, no field train, not a single ambulance or field hospital, no reserve ammunition. It was, in fact, a mere flying column, dependent on the Fleet as its base of operations. If the Government were called upon to send in a hurry—and if a Government is obliged to wait, and to defer preparations till some event arises all of a sudden, or till it is foreseen to be imminent, it must act in a hurry—a corps of 30,000 Infantry, with Cavalry and guns, say 45,000 men, 5,000 horses, and 136 guns, to any point which might be at a distance of fourteen days' steaming from our shores, the time to be taken in the complete equipment of the force, so as to land it in a condition fit to take the field, will—or would—be far greater than that which we have heard assigned as the Government allowance for the operation. If there were magazines and stores at Haulbowline, Plymouth, Portsmouth, and other places which are railway termini, and suitable for the embarkation of troops, the operation would be facilitated; but only those who are practically acquainted with the work, and who know what such a business is when it comes to be worked out, instead of being done on paper, can understand the enormous difficulties of providing for an army of 45,000 or 50,000 men from one great central magazine. We shall not go into details connected with the fitting of ships for horses and guns, arm-racks, magazines, and the like, but shall content ourselves with the simple remark, justified by experience of thep ast, that the period within which it is calculated that 50,000 men could be placed *in situ* somewhere in Europe is ludicrously inadequate in the present state of preparation. The men are forthcoming, no doubt, and we hope the reserves will not fail. The Cavalry are excellent, and the Artillery will be always equal to its reputation. There we stop. Once more, let us call attention to the fact that the whole force originally embarked for the East in 1854 was under 25,000 men, and that our allies began with about the same number. In the course of the year 1854 8,197 men went from the provisional depôt battalions at home to join the service companies. There were embarked for Malta and the East in 1855 15,656 men, and 2,449 in 1856, making 26,302 sent out from the depôt battalions, which were thus reduced to 7,267 men. The number of volunteers from the Militia from November 1, 1854, to July 1, 1855, was only 7,480, but the total number of Militia battalions from November 20, 1854, to May 1, 1856, was 32,186. The total raised at depôt battalions and the total of volunteers added together gave about 65,000, all told, for active service. These are, we hope, useful facts and figures at the present time, and it is not necessary now to do more than set them out for reflection.

We have from time to time for many years appealed to those responsible for the armament of our ships, forts, siege train, and field artillery to reconsider the decision to ignore the breech-loading system of ordnance, which, arrived at under the influence of prejudice, passion, and obstinate conceit, and founded on comparisons between very imperfect specimens of breech-loading guns and a muzzle-loading system of great excellence, has driven us in a direction quite in antagonism to that of the most experienced and scientific artillerists in Europe. We do not ask or expect that the Government should entertain any proposal to lay aside the immense stores of muzzle-loading guns with which the country is provided in the same hasty way as they condemned the Armstrongs, of which, however, some rare specimens may be seen still in Indian field batteries, but we would pray the authorities to keep a close watch on what is going on at Essen and elsewhere. The Navy could scarcely refuse to admit the advantages of breech-loaders if the new shield guns prove successful, and for forts and defences such ordnance must prove of inestimable value. There is not the least chance of our Artillery being called upon just now to act against any enemy; but if we were engaged in war, say with Russia, we should be encountered by guns of greater calibre, throwing, of course, shells and projectiles of greater power, just as we should be, as is admitted even by Woolwich, exposed to the action of more powerful field ordnance if we were engaged in a war with Germany. The best way of putting it is—that our field artillery is inferior in power to the field artillery of Russia and Germany. *Ought* it to be so? Why is it so? *As* to the facts, there are the official returns and reports. The Austro-Hungarian Army has been also equipped with a new Uchatius gun, which exceeds the corresponding British gun in calibre, is lighter, and is as accurate.

Prince Albert Victor and Prince George of Wales were examined at the Royal Naval College at Greenwich last Monday and Tuesday, the 14th and 15th instant, precisely in the same manner as ordinary candidates for Naval Cadetships. Both Princes passed a very satisfactory examination, and in some of the subjects exhibited a more than usual degree of proficiency. They have been instructed in their mathematical studies by the Rev. W. H. Drew, Professor of Mathematics at King's College.

His Royal Highness the Field-Marshal Commanding-in-Chief will hold a levée at one o'clock on Monday, May 28, at the Horse Guards, Whitehall, the number being limited to 150.

There is to be a social gathering of the former pupils of the Wellington College on June 19, and the fact speaks well for the influence exercised by the institution over the gentlemen who have educated for the public service, and for their career in life within its walls. This is the age of "dinners," and a very good age it is, nor can there be any more pleasant way of renewing the memories of one's boyhood than is offered by occasions which "give back to worn life the early pinions' play," and restore "the wild freshness of morning," if it be not too "fresh" and a little too late.

A correspondent writes to us:—"Your account of the 7th Léger at Inkerman led me to refer to the *Gazette*, and to compare the casualties reported there with those of the French regiment, and I have been astonished to find that, if Mr. Kinglake's account be true—and no one can question his desire to tell the truth when he can see it without any veil of French grey in his eyes—our officers and men bore charmed lives on occasions when our allies suffered severely, as if Fate punished them for showing the white feather which Mr. Kinglake has provided so plentifully for their *képis*. Fourteen officers named were killed and wounded, forty-two non-commissioned officers and rank and file were killed, and 153 non-commissioned officers and rank and file were wounded out of the 7th Léger, which Mr. Kinglake says was 900 strong; but, as it was only one battalion of the regiment, I may safely set it down at less than 700, and 209 casualties out of that number was not a bad score. But of the 55th Regiment, whose deeds Mr. Kinglake enlarges upon—at least, he gives *thirty* of them led by Daubeney the credit of breaking through the great trunk column of Russians, 2,000 strong—I cannot find that any officer was killed; 14 rank and file were killed; 5 officers, 5 sergeants, and 63 rank and file were wounded—Daubeney himself 'slightly,' and, I premise, not in the passage of arms with the trunk column. Again, the historian describes how Pennefather and his many officers, all mounted, cheered on the French and led them to the charge. How was it that not one of them was then touched—not one at the time, certainly, while the French were getting it pretty hot? *Gazettes* are stubborn things, and play the deuce with the play of fancy and prejudice on the part of a fine historian like Mr. Kinglake."

The *Bulletin de la Reunion*, &c., last week contained the beginning of an article on the constitution of the English Army, which promises to be of interest. It will of course be very French. It does Englishmen good sometimes to be reminded that they are not all born demi-gods, and we are not likely to remain in ignorance of that fact when we listen to our neighbours. At the very outset, in speaking of Marlborough and of Wellington, the writer of this article recalls the fact that the former was a pupil of Turenne and the latter a pupil at Angers.

The authorities are said to be busy arranging the lists of those who are to be the happy, and who may be sometimes unconscious, recipients of the Queen's Birthday honours, and we hope the Admiralty and the War Office will find it less difficult to come to terms now than they have found it to be on former occasions. When one looks about and sees the gallant, distinguished, and meritorious officers, naval and military, and the useful servants of the public who have been passed over from time to time, and compares them with the C.B.'s and K.C.B.'s who are, he is sometimes tempted to accuse those who guide her Majesty's choice of want of judgment; but we believe there is no official duty which is discharged with more painstaking and laborious investigation, and with more complete conscientiousness.

We understand that the Household Cavalry will be represented in any Cavalry force which may be sent abroad for active service, and that they will not be left out in the cold as they were in the Crimea. This restitution will be due to the Commander-in-Chief, Sir C. Ellice, and others who upheld the claims of these gallant regiments to maintain their old reputation in case of need.

The Government, if not the country, are placed in considerable difficulties in shaping the course best suited to the policy which has been announced in reference to present complications in the East. Any indications of a warlike tendency must be avoided. Nevertheless, it is necessary to prepare for what may occur. Preparations cannot be made, no matter what pains may be taken, without "leakage;" and secrecy, thus defeated, causes suspicion, and is, besides, inoperative. But if preparations be not made in anticipation of events, the march of the latter may be too rapid. Then the blame will fall on the Government, and they will be asked, "Why did you not prepare to meet this contingency?" Suppose the *contingency* does not arrive, and that the Government have prepared *for it*, they will be censured for needless distrust and for purposeless extravagance. Should there be great activity in the dockyards, and should there be any appearance of fitting out an expedition, there will be, we are told, clamour in the country, and there are possible interpellations and demand for explanations out of it. The scheme of an Anglo-Franco-Austro-Hungaro-Danish alliance, though regarded in some quarters with great favour, offers difficulties to which we need not now more particularly refer. The departure of the British Fleet to the Port Said entrance of the Suez Canal seemed to indicate either a policy or an apprehension, neither of which commends itself, as far as we can understand it, to men of judgment. There is not any danger to the Canal from the Russian Fleet, either from the Red Sea side or from the Mediterranean, which needed the appearance of the Fleet at such a very disagreeable anchorage. The Russians cannot come into the Mediterranean without their presence being reported at Gibraltar, which is in telegraphic communication with the Bay of Suda, which Admiral Hornby left with his ships; nor can they come into the Red Sea without its being known at Aden, which also is in telegraphic communication with the Mediterranean stations. Even if they were to make an attempt to enter the Canal or obstruct it, which we do not think they would dream of doing, it could be frustrated with ease by the means at the disposal of the Egyptian Government. If the British Fleet were stationed off Port Said as a base for the landing of an expeditionary corps, the selection of such a spot as the bare sands of the coast near Lake Menzaleh indicated a deplorable ignorance of the country, which affords neither fresh water nor food nor shelter, which is exposed to dust storms and hot winds, to extreme heat, and to the visitations of such plagues of the camp as small-pox, ophthalmia, fever, and dysentery. Indeed, we cannot suppose that such an idea was entertained for a moment, and we are, therefore, at a loss to imagine why the Fleet was sent there. The reasons for the visit of H.R.H. the Duke of Edinburgh to the Khedive are patent enough. It is little more than a year since the Grand Duke Alexis and the Prince of Wales were enjoying the hospitality of the Viceroy, who is now visited by one of the Royal Family under such very different circumstances.

The Navy.

GAZETTE.

ADMIRALTY, May 11, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Lieut. William Moore has been this day placed on the Retired List of his rank.

May 14, 1877.

In accordance with the provisions of H.M.'s Order in Council of April 30, 1877, Engineer William R. Davey has been placed on the Retired List from this date.

Royal Marine Artillery—The following promotion has taken place in the Royal Marine Artillery, consequent upon the retirement, under the provisions H.M.'s Order in Council of Feb. 22, 1870, of Captain and Brevet Major Edward Congreve Langley Durnford, viz.:—Lieut. Alexander Allen to be Capt.; May 8, 1877.

May 17, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Fleet-Surg. Charles Douglas Shephard has been placed on the Retired List of his rank from the 9th inst.

Royal Marines—The undermentioned promotion has taken place in the Royal Marine Light Infantry, viz.:—Lieut. John Alfred Sweny to be Capt., vice Capt. Charles Francis Coppin, retired at his own request, under the provisions of H.M.'s Orders in Council of Feb. 22, 1870, and Feb. 5, 1872; dated May 4, 1877.

APPOINTMENTS.

Captains—Sir W. N. W. Hewett, K.C.B., to the Achilles; Sholto Douglas, to the Resistance.

Lieutenants—James J. L. Sison, to the Malabar, to date from June 1; J. L. Heane, to the Lord Warden, additional for service in command of the Tyrian, tender, vice Duthie, sick.

Midshipman—William F. Peel, to the Swiftsure.

Fleet-Surgeon—G. V. M'Donogh, to the Euphrates.

Staff Surgeons—Edward J. Sharood, to the Cambridge; and A. Turnbool, to the Duke of Wellington, for Harbour Hospital.

Surgeon—William F. Spencer, to the Squirrel.

Chief Engineers—George F. Booth, to the Resistance; and Thomas Edgar, to the Achilles.

Engineers—John Wright, George Brewer, and William L. Brunt, to the Achilles; William C. Archibald and Edward W. Marsh, to the Resistance; William C. Hilder and James Stirling, to the Resistance, as additional.

ACHILLES, Capt. Sir W. N. W. Hewett, K.C.B., which is to take the place of the Resistance in the Channel Squadron, was recommissioned at Devonport on the 17th inst.

ALBATROSS, Com. E. Rice, was at Panama by last accounts.

AMETHYST, Capt. A. J. Chatfield, is on the Coast of Chili.

ARGUS, Capt. R. Harris, left Bermuda for Halifax on April 21 (arriving there about April 27) to bring down the mail.

ASSISTANCE, Capt. Prattent, arrived at Kingstown on Saturday.

AVON, Com. L. C. Keppel, is on south sub-division of the West Coast of Africa.

BELLEROPHON, Capt. J. A. Fisher, flagship of Vice-Admiral Sir A. C. Key, was at Bermuda on April 21; the ship was undocked on April 11, and was refitting in the Camber. The Admiral is to be addressed at Halifax.

BLACK PRINCE, Capt. E. H. Howard. Rear-Admiral W. M. Dowell, C.B., hoisted his flag on board as second in command of the Channel Squadron on the 17th inst.

BULLFINCH, Com. R. M. Lloyd, has been ordered to Nassau to relieve the Zephyr.

CHARYBDIS, Capt. T. E. Smith, left Shanghai on March 28 for Hong Kong, her crew having completed a period of as nearly as possible three years and six months' service on the China Station. The vessel is reported to be in excellent order. Her new crew has joined at Hong Kong; the relieved crew comes home in the Tamar.

CONTEST, Lieut.-Com. G. W. Allen, was at St. Helena by last accounts.

CYGNET, Lieut.-Com. R. F. Hammick, was off Appi by last accounts.

DARING, Com. J. G. Hanmer, left Realejo on Feb. 19, and arrived at Acapulco on Feb. 25; she will go to Esquimalt.

DRYAD, Com. J. E. Stokes, is to be sent to the Jamaica Division. She was put out of dock on April 23.

ECLIPSE, Capt. G. E. Erskine, was to rejoin the flag at Bermuda about the end of April, and will be senior officer at the Newfoundland Fisheries, with the Pert and Zephyr under her orders.

ENCOUNTER, Capt. R. Bradshaw, was to leave Bermuda about the end of April for Antigua, as senior officer on the Barbados Division.

EUPHRATES, Capt. W. H. Cuming, arrived at Portsmouth from Bombay with a large number of officers, invalids, and time-expired men on Monday.

EXPRESS, Lieut.-Com. Hon. A. C. Littleton. A Reuter's telegram from Gibraltar, dated May 11, states that nine Spanish smugglers ran a boat ashore the previous night in Camp Bay, and resisted the officers of the cutter of the Express by throwing stones. The men were made prisoners and brought before the magistrate for the assault. They were fined £5 each, or two months' imprisonment with hard labour.

FANTOME, Com. T. M. Maquay, is at the Sandwich Islands.

FALCON, composite gunboat, of improved Arab class, made her official trial at the measured mile outside Plymouth Sound last week. Her dimensions are:—Length, 157ft.; beam, 29 feet 6 inches; and tonnage load displacement, 774 tons. Her machinery, which, as well as the vessel, was constructed by Messrs. Laird, consists of a pair of horizontal direct-acting compound engines of two cylinders; the high-pressure cylinder is 31½ inches, and the low-pressure cylinder 54 inches in diameter, stroke two feet. The screw is on Bevis's patent feathering principl,e and the blades can in a few minutes be turned from their working pitch to a position right fore and aft, bringing the edges of the blades in the direction in which the vessel is sailing, and the lengthy process of lifting the propeller is avoided.

FLIRT left Greenock last week for St. Kilda, with provisions, seeds, and agricultural implements for the inhabitants. An agent of the Highland and Agricultural Society accompanies the vessel, to instruct the natives in the use of the machinery, and advise them as to the best means of cultivating the land. A number of the crew of the Aurora were sent with the Flirt to assist in landing the implements and stores, which, it is expected, will be a difficult undertaking, unless the weather should be exceptionally favourable.

FOX, Staff-Com. J. G. Dathan, arrived early at Plymouth on the 17th inst.

IMMORTALITE, Acting Capt. Gerard Noel, will be ready to pay off at Portsmouth on the 21st inst.

JACKAL, Lieut.-Com. H. A. Digby, has been docked at Devonport and had bottom cleaned and recoated with composition.

MALLARD, Lieut.-Com. Warry, was off Jackin by last accounts.

MINOTAUR, Capt. Lord W. T. Kerr, flagship of Rear-Admiral Beauchamp Seymour, C.B., Commander-in-Chief of the Channel Squadron, will leave Portsmouth for Devonport on May 26. Admiral Seymour will then assume the command of the squadron, which will be formed of the following vessels:—Minotaur, Black Prince (flagship of Rear-Admiral Dowell), Achilles, Defence, Resistance, Valiant, Lord Warden, and Thunderer.

NARCISSUS, Capt. Lord Charles Scott. Rear-Admiral Lambert, C.B., commanding the Detached Squadron, struck his flag on board on Monday. She has been placed alongside Devonport Dockyard to prepare for paying off, all standing.

NEWCASTLE, Capt. R. G. Douglas, belonging to the Detached Squadron, will be paid off at Sheerness, all standing.

OSBORNE, Com. H. L. Pearson, is expected at Portsmouth about the 21st inst. from the Mediterranean.

OSPREY, Com. the Hon. Henry Holmes A'Court, left Sheerness on the 12th inst., at 1.30 p.m., for a week's cruise off the Scillies. She arrived at Plymouth on the 17th inst.

PEARL, Capt. L. Brine, was signalled passing the Lizard steering east on the 17th inst. 5 p.m.

PIONEER, Lieut.-Com. E. Hotham, was expected at Little Poppo on April 9 from Sierra Leone.

PLOVER, Com. H. B. Stewart, was at Belize on April 15; she will be employed in taking soundings between Cuba and Jamaica.

RESISTANCE, Capt. S. Douglas, was recommissioned at Devonport on the 17th inst. A large portion of the officers and crew of the Resistance turned over to the Achilles.

ROCKET, Lieut.-Com. C. R. Harris, was at British Columbia by last accounts.

ROVER, Capt. T. Barnardiston, left Bermuda on April 10 for Jamaica, where she arrived on April 23; she would visit ports on the coast of Cuba.

SEAGULL, Com. Maxwell Heron, was in the Gambia, but is ordered to Whydah.

SHAH, Capt. F. G. D. Bedford, flagship of Rear-Admiral de Horsey, was at Valparaiso on April 6, having arrived on April 2. The Admiral would leave Valparaiso on April 10 for Coquimbo, where he would remain about fourteen days, and then go to Callao and Panama.

SIRIUS, Capt. G. L. Sulivan, was off Little Poppo on April 9, doing duty as senior officer's ship. She would leave for Cape Coast in time to meet the Danae.

SPITEFUL, Com. A. T. Powlett, would leave Whydah for England, on the arrival of the Seagull.

URGENT, Com. R. H. Boyle, went out of harbour at Portsmouth on Monday; she will be towed clear of the Channel by the Valorous.

VALIANT, Capt. W. S. Brown, has had a trial of engines, which was considered very satisfactory, and the vessel has been put out of the basin at Devonport. The completion of her defects, additional ventilation, &c., will have to be done afloat.

VALOROUS, Capt. L. F. Jones, sailed from Spithead on the evening of the 14th inst. for Queenstown and Killybegs. She left Queenstown on the 17th inst.

VOLAGE, Capt. H. Fairfax, was at Port Stanley, Falkland Islands, on April 2. She left Monte Video on March 10, in company with the Shah, and parted company on the night of March 12, and arrived at Port Stanley on the 23rd, having visited places on the Coast of Patagonia. Capt. Fairfax intended leaving for Chupat on April 18, and will be in the River Plate about the middle of May.

ZEPHYR, Lieut.-Com. W. G. Le Cocq, would rejoin the flag at Bermuda.

Incomparably the most powerful vessels in the Turkish Navy, both for offence and defence, are the sister ships the Messudieh and the Menduhieh. With a displacement of 9,140 tons, a mean draught of water of 26 feet, and engines capable of developing 7,200-horse power, they can attain a speed of between thirteen and fourteen knots an hour. About the water line they are protected by a belt of armour, consisting of iron plates 12 inches thick in the middle of the ship, 7 inches thick at the bow, and 5 inches at the stern. In the centre of the vessel is a casemate, protected likewise by 7 inches of armour on the sides and by transverse bulkheads formed of 6-inch iron plates. A German military paper reports that shortly before the present war was proclaimed a series of experiments were carried out by the Russian artillerists against targets representing the various portions of the side of the Turkish ironclads. The 12-inch armour, it was found, could be penetrated by the projectile of the heaviest gun in the Russian Service, a 40-ton piece of ordnance of 12 inches calibre, at 1,500 yards; but at 4,000 yards it could not be pierced. The 7-inch armour on the bow was penetrated at 340 yards by a 9-inch gun weighing 15 tons, and at 4,000 by the 12-inch gun. The 5-inch armour on the stern was pierced by the projectile of a 9-ton 8-inch gun fired with a charge of 35lb. of powder at 430 yards, and by an 11-inch 28-ton gun at 4,000 yards. The projectile from this latter piece of ordnance, fired with a charge of 91lb., penetrated the 7-inch armour on the casemate at 2,100 yards; while the 6-inch plates, of which the transverse bulkheads of the ships are formed, were pierced at a distance of 1,300 yards by the 9-inch guns, and at 4,000 yards by the 11-inch. The Messudieh and the Menduhieh themselves are each armed with twelve 10-inch guns in the casemates and three 7-inch on the upper deck, arranged to fire fore and aft as well as on the broadside. The only weak point of these powerful ironclads seems to be that the rudder-post is somewhat exposed.—*Pall Mall Gazette.*

NAVAL COURT-MARTIAL.

A court-martial assembled yesterday on board the Duke of Wellington for the trial of Capt. J. A. Hume, late of the Immortalité, on three charges—First, for having on Dec. 2 last, on board that ship, at Singapore, indecently assaulted W. Rogers, ordinary seaman; second, for having assaulted Rogers on the same day on an occasion separate from and subsequent to the first; and, third, for having assaulted Rogers on the same day on an occasion separate from and subsequent to the second. The court comprised Vice-Admiral Beauchamp Seymour, President; Rear-Admiral Foley, Capts. Herbert (Excellent), W. H. Whyte (Warrior), J. C. Wilson (Thunderer), G. H. Parkin (Asia), Boxer (Active), and Arthur (Vernon). Mr. G. P. Martin, Deputy Judge-Advocate of the Fleet, and Captain G. J. Blake, barrister, instructed by Mr. Harvey, Admiralty Law Agent at Portsmouth, prosecuted.

Wm. Rogers deposed that on Dec. 22 he was doing duty as captain's messenger, and was walking with the sentry near the prisoner's cabin. Prisoner beckoned him to come in, and he went. The prisoner then directed him to go to the ward-room to fetch the *Saturday Review*, but before he could leave the cabin the prisoner caught hold of him, put his arms round his neck, kissed him, and said he was a naughty boy not to write to his friends. Witness tried to get away, but prisoner pulled him towards him, after which he (witness) got out of the cabin and went for the paper. On returning the prisoner acted in a similar manner, and witness again left the cabin and told the sentry what had happened, and that he would put some paint on his hand and mark the captain if he tried it on again. The prisoner called him into the cabin again and assaulted him a third time. He put his hand, which was covered with red paint obtained from a gun-slide, on the prisoner's jacket, just at the back. He reported what had happened to the commander, and subsequently he repeated his statement in the presence of the prisoner, whose jacket was found to be marked. Witness was made a prisoner from that time up to Dec. 29, when he was released by the prisoner's order.

Milton Peckett, the secretary, corroborated Rogers' evidence as to the report made to him.

The Master-at-Arms and Com. Noel (acting captain) having been taken, the court adjourned till to-day, when Mr. Fegan, barrister, will assist the prisoner in his defence. Upon the application of the prisoner the cross-examination of the witnesses was postponed.

The Report of the Council of the Royal Naval School, New Cross, just issued, states that the following old pupils, amongst others, have distinguished themselves since the issue of the last Report, viz.:—Capt. G. S. Nares, R.N., F.R.S., in recognition of his distinguished services, has, on his return from the Arctic Expedition, been nominated a K.C.B. Lieut. H. M. Tudor Jones passed out in May last first at the examination of sub-lieuts. at the Royal Naval College, Greenwich, with 1,372 marks out of a maximum of 1,500. As he had previously obtained first class-certificates in seamanship and gunnery, he was immediately promoted. Lieut. G. Shergold Smith, who gained the Yarborough Scholarship and first Naval Cadetship in 1860, and who also distinguished himself in the Ashantee war, was appointed, in the spring of last year, leader of the Nyanza Expedition, sent out under the direction of the Church Missionary Society. Mr. F. C. T. Jones, who passed first out of 42 successful candidates for admission to the Britannia in Nov., 1875, gained the first place, of his year, at the Christmas examination. Mr. P. G. Huggins, who, in Nov., 1875, successfully competed for a Line appointment, has just left Sandhurst with a first-class certificate. Mr. L. T. Pease, who, in August, 1875, passed for the Royal Marine Light Infantry, is one of the four who were selected in August last, to qualify for the Royal Marine Artillery. Mr. W. R. Woodrow passed in Nov. last third out of 15 candidates for the Woods and Forests Department of the Indian Civil Service. Mr. E. H. Tuck, who gained the Gold Medal in 1874, passed, in June last, for admission to Cooper's Hill College, 6th out of 50 successful candidates. Mr. W. Gillies, of whom mention was made in the Report for 1872, has, at the recent examination for appointments in the Indian Medical Service, passed 9th out of 46 candidates. Mr. F. J. Allan has just passed his first professional examination for the degree of M.B.C.M. of the University of Edinburgh; he has also obtained honour certificates in chemistry, anatomy, physiology, and surgery; and in March last he was elected a Fellow of the Botanical Society of Edinburgh. The following pupils were specially prepared under the direction of the Principal, the Rev. E. B. Slater, and passed direct from the School:—For the Line, Messrs. A. Carden, D. Cole, and H. J. Evans; and Mr. J. C. W. D. Nicol as a Queen's Cadet. For Assistant Clerkships, R.N.—Mr. C. S. Moore, in June, 1876, 2nd out of 6 successful candidates; and Messrs. H. Robinson—winner of the Prize nomination—and J. H. F. Campion, in November last, 1st and 2nd respectively, out of 25 candidates. For Naval Cadetships—Messrs. J. W. Bushnell and E. E. Anson, in June last, 15th and 21st respectively out of 70 candidates; and Mr. W. P. Lodder, 27th out of 60 candidates at the November examination. The Clothworkers' Scholarship, so kindly founded by that Company in 1875, was awarded to Mr. W. A. G. Woods (son of the late Dr. W. H. Woods, R.N.), who obtained in October last, by open competition, a Sizarship at St. John's College, Cambridge, being fourth on the list of 50 candidates; since which he has passed, in his first term, his "little go" examination in the first class, he having elected to be examined a year before the requisite time.

The first anniversary of the opening of the Sailors' Rest, Fore-street, Devonport, was celebrated on the 11th inst. One hundred seamen, marines, and soldiers accepted Miss Weston's invitation to supper, which was held in the hall of the Institute. The idea, which was most successfully carried out, was the imitation of a public dinner without intoxicating drinks, to show the men how a thoroughly convivial and enjoyable evening could be passed without the aid of the decanter or beer jug. After supper, dessert being supplied, glasses were filled, and the first toast of the evening, "Prosperity to the Sailors' Rest," was proposed by T. Carbis, seaman gunner, H.M.S. Cambridge, and drank with due honours and loud applause, the company standing.

The appointment of Harbourmaster at Labuan is now vacant. Salary £400 per annum. A retired naval officer is wanted to fill the post. Applications should be made to the Colonial Office, where particulars as to the duties to be performed can be ascertained.

FURNISH ON THE NEW HIRE SYSTEM.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea. —"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices, 9, Southampton-street, Strand.

THE DROWNING OF MR. WINGFIELD.

The Court of Inquiry appointed by the First Lord of the Admiralty to investigate the circumstances attending the lamentable death of Mr. Harold Wingfield, the young midshipman of H.M.S. Newcastle, off Singapore, in December last, sat yesterday morning at 10.30 o'clock, in the Board Room of the Capt. Superintendent's office at Sheerness, where the ship is at present stationed to pay off.

The Court consisted of Vice-Admiral Chads, Commander-in-Chief at the Nore (President); Capt. T. Brandreth, Superintendent of the Dockyard; and Capt. D'Arcy-Irvine.

Major Walter Wingfield, of the Royal Body Guard, the father of the unfortunate gentleman, was in attendance, and was permitted to put questions to the witnesses after their examination in chief. The young widow of the deceased was also present, and was greatly distressed.

It transpired that there had been a preliminary examination on board the Newcastle, and it was proposed to read over the statements then made, and then append any additional testimony that might be deemed desirable.

It was stated that the inquiry would be conducted in an open court, but not even the officers in charge of the dock-gates appeared to know anything of the matter, and there were scarcely half-a-dozen persons present.

On the court being opened, the President asked the captain of the Newcastle to describe the incidents of Dec. 13, when the fatal accident occurred, by which the lives of Mr. Wingfield and three other men were sacrificed.

Capt. R. Gordon Douglas then handed in a statement which he had made in writing, addressed to the rear-admiral, and said that he had nothing to add to the account which he had there given of the occurrence. It was in answer to a command to explain the circumstances alleged in an article inserted in the ARMY AND NAVY GAZETTE of Feb. 3 last, from the Lords Commissioners of the Admiralty, and a copy of the journal was enclosed. The capt. said that H.M.S. Newcastle was descending from Hong Kong to Singapore on Dec. 13 last, when, about 3 p.m., he heard the cry of "A man overboard." He rushed up from his cabin to put the helm hard aport, but finding that Commander Davies had already ordered the helm hard astarboard, and hearing him say that he was coming on the port tack with the head-yards square, he desired him to carry on. The ship was then running with the single-reefed topsails, topgallant sails, between eight and nine knots an hour. On running aft to the bridge he saw a man in the water thirty or forty yards astern of the ship, which was then rounding to. In the excitement of the moment he lost sight of the man, and never saw him again. He ordered the men to keep their eye on the men in the water, and then superintended the lowering of the first cutter, Commander Dacres coursing on with the sails. The boat was clear of the ship in about five minutes, although the men, failing to unhook the sails, it was dragged nearly broadside, and two men jumped out, leaving only ten to work the twelve-oared cutter. One of the life-buoys had been lowered, but a large heading block aloft had fallen and disabled the other. The commander asked him to wear, but he said it could not be done with such a sea, the Newcastle being bad at staying. Everything was done to rescue the men consistent with the safety of the cutter and ship. He considered the accident was caused by disobedience of his orders in working the log-line from the mizen chains. Mr. Wingfield had fallen over himself on a former occasion in a similar way. He had ordered the line to be worked inward. The life-buoy, owing to a sudden jerk of the chain, fell on its side. Lieut. Bethell was the officer on watch; when the cutter had been away an hour, he ordered the signal to return to be raised. No man on board had the slightest hope that either of their lives could be saved; none was expected. The Newcastle was always an uncertain ship with anything like a sea on. She dragged to leeward considerably. In his opinion she could not have got considerably further. The boat was about half-an-hour reaching the ship. She must have been between two or three miles off. She was called at four p.m., and arrived at 4 30. It was a gloomy afternoon, and there was a haze. It was dark about six or soon after. The port boat was fitted with Reece's patent. The starboard boat had been fitted with Bristowe's hooks, but on one or two occasions the men had lost faith in them, and they were taken out and supplied with the ordinary Service fittings.

At the suggestion of Major Wingfield, witness was asked if anything was done to lower the other boat, after the first had been launched, and if not, why? He said that under no circumstances whatever would he have permitted the other boat to be lowered under the then conditions of the ship and the state of the sea. Knowing the ship well, he had no hesitation in saying it would have been fatal to have hove to, and he could not have stayed. In reference to his allegation that Mr. Wingfield had shown great rashness, he said that the latter was on duty at the time as midshipman on watch.

By the Court: When the signal was given to the cutter to return, there was danger of her losing sight of the ship, although it was easier than to see the cutter from the ship.

Capt. Douglas asked to be permitted to add that Capt. Trupp had expressed his opinion that no man could have held up long in such a sea. He regretted to say that Mr. Wingfield had evinced a great desire repeatedly to throw himself overboard, and that he heard Green say he was anxious to obtain a medal. He had thrown himself over twice without any cause.

Evidence was then given to show the origin of the accident to Miles, capt. of the mizentop, who fell overboard while attempting to catch the log-line. Mr. Wingfield leaped into the sea after him, and was followed by Hesk and Reid, two A.B. men, who jumped over from the forecastle to help the struggling men. Timms, the naval instructor, said the ship was turned to as he was reefing the life-buoy. He saw it going astern. Danberry, single midshipman, saw the first two men in the water immediately after the alarm was given, but he did not see any life-buoy. After the boat was lowered the ship turned, and he saw no more of them.

J. W. Robinson, coxswain of the first cutter, said the boat was lowered into a very rough sea, but if the men had been above water he believed they should have seen them. They had to pull hard to windward, and made very little way—about two miles an hour. At the time the call was given to return, he thought they had reached the spot where the men had been seen in the water, but could not be certain. It was a very difficult sea to swim in, and even a good swimmer could not have kept afloat an hour. In his opinion, they never saw the life-buoy from first to last. Not one of the men had any hope that either of the men could be saved, when they returned to the ship. They could only see the ship when they rose with the waves.

Major Wingfield wished to know if they continued their search after the call? He asked if the men were on their oaths?

The President said some of the witnesses were on oath. This was merely a preliminary inquiry for information, and not a judicial one.

Major Wingfield said that Mr. Ward Hunt had stated that any one might put questions, and he was anxious to know where the previous examination of the witnesses just called had taken place, and when.

Witness said that his previous statement had been made to the captain-commander of the Newcastle, in the after-cabin, in the presence of the captain and the paymaster. (Each statement was read over, and the witness asked if he had anything to add.)

The President: Do you think that sufficient efforts was made to search for the bodies?

Witness thought that nothing more could have been done?

Major Wingfield asked if a life-buoy could sink? He could not otherwise account for its not being seen by any of those men.

The answer was "No."

Another witness stated that he saw Miles in the water with Mr. Wingfield, and he saw the latter put a life-belt round his neck. He saw them come into collision once or twice, and then lost sight of them both. Did not think they could see the life-buoy. The third man who jumped over went in the direction of the life-buoy, and must have reached it, he thought. They were about three miles off when the call was made, and were thirty or forty minutes returning. Did not think they had quite reached the spot where the men were. All the witnesses admitted that Mr. Wingfield was a first-class swimmer, and might have kept the water (with his clothes on) for another hour.

The Court had a short adjournment for luncheon, and re-assembled at 3.15.

The engineer, and Lieuts. May and Field were examined, and gave similar evidence.

Mitchell, coxswain of the second cutter, said it was manned, but not lowered. From this point he saw the four men in the water, and the life-buoy in the centre between them. He saw one on the buoy and another close to it. The others were all 100 yards off. The buoy was righted then.

The President asked if there were any more witnesses to be examined?

Major Wingfield said he wished to hear the opinions of the other chief officers of the ship not included in the captain's examination on board. It would be very satisfactory if they could be heard. He suggested the commander, for example.

The President: Let him be called.

Commander Dacres was then examined as follows: I was on the forecastle assisting the watch, when I heard a cry which I thought was "A man overboard." I am not sure. I immediately ran out, when I heard the cry repeated. I crossed the quarter-deck and saw two men in the water. Could not say who they were. I saw the life-buoy close by them. I ran on the bridge and gave orders for heaving to. The captain came on deck shortly afterwards, and, as he came up the ladder and ordered to come to with the mainyard square, I told him what I was doing, and he said, "Very good, carry on." I saw the captain attending the lowering of the lee boat. I went over to the starboard side of the bridge just as she touched the water, and saw the coxswain steer the boat off. She got broadside on, or nearly so. The order was given to overhaul the calls, and she cleared the ship. When I saw the boat clear I asked him if I should wear. He said, "No, square the mainyard." I then saw the captain go to the compass, putting his hand over it, and hail the boat to pull in the direction she was then going, which was head to wind. After a short time I went to the mizentop to see if I could see anything of the men, and look after the boat. There were two signalmen with glasses—or may be three. I told them to keep a careful look out in the boat. When I reached the top the men had been lost sight of. Could not say what time had elapsed. In such a case it is difficult to estimate time. It seemed very long, but may have been a short time. I also gave orders to look about for the men. I waited on the mizentop till I saw the boat safely turned, after the call had been put up.

By the Court: I saw neither men nor life-buoy. They had been lost sight of by the men there before I reached them. The boat was about two miles off when she turned, I should think. From the time the cry was given, "A man overboard," till the boat cleared the ship, I should say about five minutes had elapsed, although I can't speak as to time. Judging from the rate at which we were running, I could not say how far the ship was from the men at that time. The ship was going about eight knots, and the wind was still coming up. My notion in asking the captain if I should wear was that we might get nearer to the boat a little; but, in making sail, it was my idea we should make that up. If we had filled and made sail in the wind, I think we might have stayed. I did not suggest that we drifted about a mile away, and the boat, in my opinion, was two miles off from our original position. The weather was more cloudy than hazy.

The Court: Can you suggest anything else that could have been done?

Witness: I can suggest nothing more than I have already said. I do not think anything more could be done to save life. It was dark a little after six, I think, at that time.

The Court: Could the ship have stayed with screw down?

Witness: I think so, as the Newcastle screw makes very little difference.

The Court; Have you been steaming lately?

Witness: I cannot say with certainty.

The Court: Is it usual in your squadron to use the screw with a fair wind?

Witness: Coming down from Hong Kong the screw would not come up or down. The screw was down, but not all the time.

The Court: Do you think the boat was called back prematurely?

Witness: I think the boat might have remained longer away; although, when the boat's crew returned, I noticed that two or three of the men were very much fatigued.

The Court: Were you at all anxious about the safety of the boat?

Witness: Yes; but only during the time of her turning round.

(The log was here referred to. It alleged that the screw was up and the fire out at the time of the occurence.)

The Court: Did any one suggest that the boat should remain longer away?

Witness: No one.

The Court: Was any question asked on the boat's return about the life-buoy—whether it was seen, or otherwise?

Witness: The boat was hailed by both the captain and myself as to whether they had seen either men or life-buoy. They said they had not.

The Court: Then, in your opinion as commander of the ship, everything was done that could be done under the circumstances to save the lives of the men?

Witness: I repeat, yes, with the reservation which I made before in my evidence.

Capt. Douglas asked if he gave any reason on the bridge why witness should not wear?

Witness: I heard no reason given. I heard no remark made about the distance of the boat from the ship. The duties of a signalman in the daytime is to let go the life-buoy and hoist the pennant.

The Court: Were the crew of the first cutter picked men?

Witness: The lifeboat crew are not picked men.

Was a second boat called away in order to be lowered?

Witness: The lifeboat's crew and the watch below went, to the best of my belief, into their boat immediately on their arrival on deck, and, without any further calling away. When I turned round, after seeing the first boat in a precarious situation, I saw that the crew in the boat had received no orders to lower.

The Court: When were the life-buoys last tried?

Witness: The order of the ship is to slip the life-buoys, with the rope attached to them, every Saturday. I cannot recall to my remembrance the last time that I saw them slipped before this occurrence. They were usually tried once a week. There was no sentry in charge of them. There were two circular life-buoys on the bridge. The life-buoy was in the water when I ran out. I saw it bobbing up and down, but cannot say whether it was floating exactly perpendicular or not—as I had only a cursory glance at it.

Lieut. Poë said that he saw two men in the water, one of them with a life-belt round him, about fifty yards off. After consulting with the other lieutenants, he went to Com. Davies and asked if they ought not to work up the ship to them. He replied "Yes." He then requested the commander to ask the captain to do so. He said he had already done so, and the captain had refused. (The commander, on being recalled, said he did not remember any such conversation as this, or any whatever with Lieut. Poë). In answer to the captain, witness said he had never known the Newcastle to stay in such wind and weather. She was tolerably sure in staying in fine weather, but not bad.

Lieut. Schonberg corroborated this latter statement, and also the statement of Lieut. Poë as to the conversation about working the ship towards the men in the water. Mr. Poë told him what the commander and the captain had said on the subject. It was a lumpy sea, but not a dangerous one, although bad to make head against.

The Court: On reflection, do you really think the ship could have worked up to the men in such a sea without danger to herself?

Witness: I think so, with the aid of steam; but it is doubtful if in time to save the men.

Lieut. May said he had, indirectly, spoken with Lieut. Poë about the expediency of working up to the men.

Lieut. Field gave similar evidence, saying that he had found out that the steam could be got up in fifty minutes.

Chief Engineer Hill deposed that the fires were laid, but the boilers were not up. The screw was up. Steam could be got up, in a great emergency, in fifty or sixty minutes. She was a very doubtful ship when stayed.

Paymr. Burniston said that he saw two of the men clinging on to the life buoy, and they were the two last men who went over. The life-buoy was floating on its side.

Capt. Douglas wished to state emphatically that no representation whatever was made to him by the lieutenant as to the expediency of working the ship towards the spot where the men had been seen. No further evidence of a material nature was given.

Major Wingfield begged to thank the court for the kindness with which they had allowed him to question some of the witnesses on points which he should be excused for regarding as very important in this inquiry.

The President then ordered the court to be cleared, the sitting having lasted till nearly half-past 6.

In answer to Mr. Childers, Mr. Hardy said on Thursday he had not yet received any communication from the India Office or the Treasury with regard to his plan of Army Promotion and Retirement. As soon as a decision was arrived at on the subject he would lay the papers on the table. He proposed on the earliest occasion he could, after they were laid on the table, to make a statement with the view of affording an opportunity for the discussion of those points to which members might wish to call attention.

H.R.H. the Field-Marshal Commanding-in-Chief was to have proceeded to Aldershot on Thursday to make a minute inspection of the troops at the station, but the weather was so unpropitious that the visit was postponed. The troops were to have been paraded as follows, viz.:—3rd Brigade, at 10-15 a.m., on the parade ground, E, F, G, and H Lines, North Camp, in two lines, facing west. Royal Engineer troops and companies, at 11-10 a.m., on parade ground, I Lines, facing east. 1st Brigade, at 11-30 a.m., on general parade ground, facing north. R.H.A. and R.A., at noon, in front of Infantry Barracks, facing south. Cavalry Brigade, at noon, in front of East and West Cavalry Barracks, facing north. 2nd Brigade, at 12-45 p.m., on their parade ground, when vacated by R.A. Men specially equipped, as directed in A.A.G.'s memo. of the 15th inst., to form on left of Royal Artillery, at noon. The Army Service Corps (all branches) and Bucks Militia to be in readiness to parade—the former after noon, and the latter after inspection of 3rd Brigade. All recruits and dismounted men of mounted corps to parade in rear of their respective regiments. The C.R.A., C.R.E., A.A.G., and A.Q.M.G. to meet the Lieut.-General at Farnborough Station at 9-45 a.m.

Mr. John Holms asked the Secretary of State for War on Thursday if he would inform the House on what day after the Witsuntide Recess he will further consider the Army Estimates in Committee of Supply. Mr. Hardy was unable to give accurate information on the subject, but hoped that they would be taken on the second Monday after the recess.

The undermentioned officers have joined the 42nd Army Signalling Class at Aldershot:—1st Dragoons—Lieut. Ames. 16th Lancers—Lieut. Babington. 18th Hussars—Lieut. Warner. 19th Hussars—Lieut. Smith. 20th Foot—Lieut. Dunne. 52nd Foot—Capt. Butler. 76th Foot—Lieut. Logan. 77th Foot—Sub-Lieut. Law. 96th Foot—Capt. Willoughby. 107th Foot—Lieut. W. J. Haynes. 108th Foot—Capt. Justice. Rifle Brigade—Lieut. Hon. G. Bennet. Bombay S.C.—Lieut. F. H. Forgett. engal—Major Wavell. Bengal Infantry—Lieut.-Col. R. Worsley. Madras Cavalry—Major W. C. Stevens.

The *Cologne Gazette* gives the following particulars respecting the autumn manœuvres which are to be carried out this year by three of the German army corps in the presence of the Emperor. The 7th, 8th, and 12th Corps, and a division of Cavalry under the command of Major-General von Wichmann, are the forces which will be reviewed. On Sept. 3 there will be a grand parade of the 7th Corps. On the 4th the whole corps will manœuvre, and from the 6th to the 8th, both days inclusive, the two divisions of which it consists will be opposed to one another in the field. On Sept. 10 the 8th Corps will parade before the Emperor, on the 11th it will execute manœuvres, and from the 13th to the 15th the divisions will operate against one another. On Sept. 17, the 12th Corps will be formed up on parade for the Imperial inspection, on the 18th it will manœuvre against a marked enemy, and from the 20th to the 22nd the one division will manœuvre against the other.

WAR NEWS.

The works for the defence of Constantinople will be constructed by the inhabitants of the city. The defensive works between Buyuk Tchekmedji, on the Sea of Marmora, and Lake Derkos are to be carried on by the forced labour of the population.

Many Turks resent the idea of even a friendly occupation of Constantinople by the English. "If England wants to help us," they say, "she should do so on the Danube or in Asia. If she comes to Constantinople it will be to keep it for herself. We will not have the English here."

A Russian military expedition has been organized at Krasnovodsk, on the Caspian, and is proceeding in a south-easterly direction towards the country of the Akhal Turcomans. This tribe recently tendered their allegiance to Persia, and are at present reported to be perfectly quiet. In well-informed quarters here the object of the expedition is believed to be the acquisition of fresh strategical positions.

Official telegrams from Batoum giving details of the battle fought near that place Friday week state that the fighting, which lasted eight hours, was of a most determined and sanguinary character. The Russian corps which attacked the Turkish positions left 4,000 dead on the field.

Tiflis, May 12.—Lieut.-Gen. Oklobgio announces that after securing the fortified position of Uukhaestate he sent forward on the 11th inst. two advanced columns against the Khatzubani heights, skirting the river Kintrisoi. This strong position was stormed by our troops, who all worthily upheld the old renown of the Army of the Caucasus. Our artillery was handled with admirable effect. The losses on our side were twelve men killed, and nine officers and 107 men wounded. The Turkish losses were enormous. The Khatzubani heights mentioned in the above official telegram are situated near Batoum.

At two o'clock this morning (May 14) six ships conveying a Turkish force attempted to cross the Danube near Giurgevo in the direction of the Island of Mocan. The Roumanians, having received reinforcements from Giurgevo, compelled the Turks to retreat after a brisk exchange of musketry.

Roumania is entirely in the hands of Russia, having neither money nor troops.

An Imperial ukase orders the incorporation of the 4th, 13th, and 14th Corps in the Danubian Army.

Gen. Tchernajeff will receive a command in the Army of the Caucasus.

The following telegram has been received from the Grand Duke Nicholas, dated Ploesti, 14th inst.:—"I reached Ploesti this morning in good health, having met with a cordial reception on my journey hither from the municipal authorities, the clergy, and the people, who welcomed me with loud hurrahs. Bread and salt were presented to me. A guard of honour, composed of Bulgarians, was posted before my quarters at Ploesti. At two o'clock Prince Charles arrived to welcome me. I received him at the station with a guard of honour. After a stay of two hours the Prince returned to Bucharest. To-morrow I shall proceed to Bucharest to return his visit, coming back to Ploesti in the evening. Our divisions have had no encounter with the Turks. The Roumanian troops have had a few unimportant engagements in the direction of Widdin and Oltenitza. The weather is hot and sultry. The health of our troops is perfectly satisfactory. I have decorated the officers who distinguished themselves on the occasion of the blowing up of the Turkish monitor."

Adjt.-Gen. Tsemeka telegraphs as follows from Odessa, May 19:—"Of the four ships' boats despatched from the steamer Constantine two arrived at Poti on the morning of the 12th inst. The other two succeeded in returning to the Constantine, which arrived safely at Sebastopol this morning without any loss in killed or wounded. The steamer Argonaut, which was ordered to cruise between Ontchakoff and Odessa, on arriving at the Sulina mouth of the Danube, met four Turkish ironclads, who gave her chase, but soon desisted from the pursuit. This morning the Argonaut returned to Ontchakoff."

Five Turkish monitors bombarded Soukhoum Kalé on May 15 for two-and-a-half hours. A portion of the town sustained considerable damage. An attempt of the Turks, however, to land a body of troops was brilliantly repulsed by five companies with two pieces of artillery, the enemy leaving a number of killed on the shore. On our side there were neither any killed nor wounded; there being only six Cossacks missing. The enemy's ships remain stationed before Soukhoum Kalé.

It is reported that a serious engagement has been fought between the Turks and some Russian detachments which have crossed the Danube at Potbashi; but the result is uncertain.

The *Stamboul* states that the Sultan has determined on the admission of Christians into the Army. A draught of 200,000 men is to be equally levied among Ottoman subjects, without distinction of race or creed.

It is officially announced from Batoum that a squadron, under Hussein Pasha, landed some forces at Soukhoum Kalé, and, aided by 10,000 revolted Circassians, took and destroyed the town.

The Russian movement of concentration upon Kars from Poti, Akhaltsik, Alexandropol, and Erivan has come to a standstill a few marches from the frontier. The delay is partly occasioned by the necessity of establishing stores for victualling the troops on Turkish soil, and partly by the Russian generals even now recognizing the change effected in the primary conditions of warfare by the universal adoption of the needle-gun.

The telegraph is still at work between Constantinople and Kars, so the latter city cannot be surrounded by the attacking forces.

It is intended to establish a sort of Mutual Insurance Company against Turkish bombs and shells in the Russian seaport towns.

The 10th Russian Army Corps at Odessa has received orders to proceed to the Crimea to prevent the spread of the Tartar insurrection.

The Czar is going soon to Kieff to stay there during the summer campaign.

The Russian garrison at Soukhoum Kalé was commanded by General Kramtschenko. The Turks first bombarded a town called Otschamschir, lying to the south of Soukhoum Kalé, in order to deceive the enemy as to their real design.

In spite of the unequivocal warnings of Austria, Servia continues her armaments.

An official telegram published at Constantinople announces the capture of Soukhoum Kalé by the Turks, and the rising of the Mussulman Circassians in the adjoining country, who massacred the Russian garrison, and burned the town.

A Turkish ironclad has left Soukhoum Kalé for Batoum to obtain muskets and ammunition for distribution among the Circassians, who, it is announced, continue fighting against the Russians.

The following official despatch was received at Constantinople on Wednesday:—

"Attacked both by sea and land, Soukhoum Kalé has fallen into our possession. The enemy, completely defeated, has fled in confusion, after suffering heavy loss. The inhabitants everywhere welcome our troops with open arms. Insurrectionary movements against the Russian rule have broken out in Circassia and several points of the Caucasus."

A Russian Infantry corps of 52,000 men, with a proportionate force of Cavalry and Artillery, is marching in the direction of Zimnitza, opposite Sistowa. It is believed that the Russians will attempt to cross the Danube with the main body of the army between these points.

INDIA.

Rumour says, the *Times of India* has it, that Major-Gen. Beale, lately commanding the Deesa Brigade, is to have a division this year; but that will soon be known, as Gen. Montgomery vacates Mhow early next month. But Gen. Schneider, from Aden, must not be left out of the calculation. Then Gen. Aitchison has got an extension of his appointment as adjutant-general till October, when he will go as brigadier to Bombay in place of Gen. Gell. Who goes to Aden? Report says a colonel of Artillery from Bengal, but it is only rumour at present. An Artillery officer used to command at Nusseerabad, but the gunners are ousted from that now, and have nothing. By all means give Aden to a gunner, but we hope it will be a Bombay one.

A Bombay contemporary understands that last year the officers of the frontier force were precluded from obtaining the usual privilege leave, and that now matters are more settled, and leave again open, Government have very liberally extended the period of leave to ninety days.

Col. C. M. Macgregor, C.S.I., Bengal S.C., left Lahore on his way to Simla to resume his appointment as first assist. qrmr.-gen. on April 18. His official report of his travels and explorations between Mekran and the River Helmund is anxiously expected by the Government and by the public; but the latter will probably, the *Civil and Military Gazette* thinks, have to wait.

At the examinations held on March 1, 1877, and following days of the officers attending the twenty-second course of garrison instruction in Madras and Bombay the following qualified in Part II., Examinations A and B (G. O. 275 of 1873). Officers of British regiments whose names appear in the following list are held to have passed the special Army examination laid down Horse in Guards' G. O. 65 of 1870:—Major W. N. Wroughton, Madras S.C.; Capt. A. R. Heyland, 1st Bombay Cavalry; Jerrard, 33rd Foot; W. Stainford, 36th Madras N.I.; J. I. Tinling, 17th Bombay N.I.; T. Walker, Royal Horse Artillery; and Williamson, 43rd Foot; Lieuts. Curran, 33rd Foot; Eagar, 83rd Foot; Fawkes, 2nd Batn. 16th Foot; and Strachan, 43rd Foot.

The following sub-lieuts. having undergone the course of instruction in Madras and Bombay, have passed the qualifying examination for the rank of lieut., and have been classified for the antedate of their commissions as under:—First Class—Sub-Lieuts. Ventris, 44th Foot; Marling, 83rd Foot; Paget, 68th Foot; Burn, 14th Hussars; Neild, 45th Foot; Stock, 56th Foot; Anson, 83rd Foot; Fairbrother, 1st Batn. 11th Foot; Coney, 45th Foot; Rayner, 66th Foot; Forbes, 43rd Foot; Minchin, 7th Foot; Knoker, 1st Batn. 21st Foot; MacMahon, 67th Foot; Palmes, 14th Hussars; Harrison, 15th Foot; Gibbings, 108th Foot; Presgrave, 1st Batn. 21st Foot; Prichard, 43rd Foot; and Jackson, 3rd Hussars. Third Class—Sub-Lieut. Harrison, 56th Foot.

Capt. St. V. A. Hammick, 43rd Light Infantry, who has been employed for some time past as a garrison instructor, has been appointed assist. adjt.-gen. of a division of the Madras Army from April 16, 1877, vice Col. A. C. M'Master, Madras S.C., retired on completing his five years' tenure. Capt. Hammick, who holds the Staff College certificate, served in the New Zealand war in 1864-65, and was mentioned in despatches as having "performed his duty as acting adjutant with great coolness and courage under a heavy fire" in the action of Te Ranga (medal). He joined the Army May 12, 1861, and became captain Feb. 26, 1870.

Lieut.-Col. G. de la P. Beresford, Madras S.C., assist. adjt.-gen. at Army head-quarters, Madras, has been granted furlough to England for two years on private affairs.

During the absence of Lieut.-Col. Beresford, Madras S.C., on furlough in England, Lieut.-Col. G. A. Arbuthnot, Madras Cavalry, officiates as assist. adjt.-gen. at head-quarter Fort George.

On assuming the Governorship of Bombay, Sir Richard Temple has appointed Lieut. C. D. Dean-Pitt to his Staff as aide-de-camp, and Surg.-Major R. Waters, M.D., as medical officer.

Col. W. Q. Pogson, Bengal Infantry, whom the major.-gen. commanding the Oudh Division some time ago summarily removed from the command of the 6th Bengal N.I., has, the *Times of India* hears, laid his case before the Army authorities at home, and is likely to be reinstated.

Major-Gen. W. Forbes, on the Retired List, late Bengal Army, died on May 6 at Dover, of heart disease. The deceased joined the Army in Jan., 1841, and retired with the rank of major-gen. in Sept., 1875. He served the campaign of 1842 in Afghanistan under Gen. Pollock, and was present at the forcing of the Khyber Pass (medal), and took part in the Sutlej campaign of 1845-46, including the battle of Ferozeshah (medal).

Brigdr.-Gen. J. W. Schneider, C.B., Bombay Infantry, from the command of the Aden Brigade, has been selected to succeed Major-Gen. C. S. Montgomery, C.S.I., Bombay Infantry, on the Divisional Staff of the Bombay Army. Gen. Schneider commanded the Contingent, Infantry, and Irregular Cavalry of the Rajah of Sattara in the campaign in the Southern Maratha Country in 1844-45, including the storm and capture of the forts of Punalla and Pounghur; commanded the Kolapore Infantry at the suppression of the mutiny in the late 27th Bombay N.I. in July and August, 1857; also at the recapture of Kolapore in Dec., 1857 (medal); served with the Abyssinian Expeditionary Force in 1868 with the rank of brigdr.-gen.; commanded the 1st Brigade, 1st Division, which led during the advance in Magdala, and was engaged at the battle of Arogee, and in the assault on Magdala (C.B. and medal). He joined the Army Dec. 11, 1840, and became col. Jan. 1, 1867. During his command at Aden he displayed great ability and intelligence.

Col. F. A. E. Loch, C.B., Bombay S.C., commanding the Sind Frontier Force, succeeds Gen. Schneider, C.B., as Brig.-Gen. on the Bombay Establishment. Gen. Loch served in the Punjab campaign of 1848-49, and acted as Extra Aide-de-Camp to Gen. Dundas, commanding the Bombay column; during the siege and until the surrender of the fort of Mooltan (medal with clasp); was present at the mutiny of the Bengal troops at Nusseerabad on May 28, 1857; wounded at the first attack on, and subsequent capture of, Awah; at the siege and capture of Kotah, and pursuit of the rebels into the Gwalior Territories. Served with Smith's Brigade in Central India; at the recapture of the fort of Chandaru, at the action of Kotah ke Serai, and capture of Gwalior (brevet of major). Siege and capture of Powree; surprise and pursuit of the rebels under Maun Sing at Noondree, Nov. 14, 1858 (medal with clasp). He joined the Service April 7, 1844, and became col. Aug. 15, 1868.

A telegram from San Francisco, received at New York on Wednesday, announced the departure of the Russian corvette Vastock with sealed orders. The remainder of the Russian vessels were to have followed during the week.

Brevet Lieut.-Col. T. W. Prevost, half pay, late 42nd Highlanders, having vacated his appointment as Staff Officer of Pensioners at Carlisle, the *Irish Times* announces the appointment of Major C. H. Rhoddy, half pay late Ceylon Rifles, to succeed him from Jan. 1, last.

ERRATA.—By a typographical error, we were made to say last week that Lieut.-Gen. Sir John Garvock entered the Service Sept. 4, 1865, instead of Sept. 4, 1835. In last week's read in the article "On the 7th Léger at Inkerman," "Bréger" for "Bréqer," "Rincheval" for "Rinccheval," "Quinemant" for "Quinernant," "Drevou" for "Drevon."

THROAT IRRITATION.—The throat and windpipe are especially liable to inflammation, causing soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use glycerine in the form of jujubes. Glycerine, in these agreeable confections, being in proximity to the glands at the moment they are excited by the act of sucking, becomes actively healing. Sold only in 6d. and 1s. boxes (by post for 14 stamps), labelled "JAMES EPPS and Co., Homœopathic Chemists, 48, Threadneedle Street, and 170 Piccadilly, London."

THEATRES.

OPERA COMIQUE.—Mr. Charles Mathews appears to be bent on giving a very extensive exhibition of his *repertoire* during his present engagement, and though there is nothing new about any of the impersonations, their weekly change has furnished a great part of what novelty London playgoers have enjoyed of late. During the week *Used Up* has been given to a fair amount of patronage. The principal part was played by the veteran comedian in the style which is peculiarly his own, and not yet approached by any living actor; but those who could recall the same performance a quarter of a century ago experienced, at least, a slight shade of disappointment. There was no longer the perfect ease and grace which were so charming; in their stead was a labouring after lightness, which, in time, became painful. It is difficult to avoid thinking that if Mr. Mathews had retired when he made his threat in 1861, his reputation would have stood much higher than it does at the present moment. But, for all that, we have no actor who could render Sir Charles Coldstream so well in parts, and so we must come to the conclusion that all has been for the best. Praise must be given to Mr. J. H. Barnes for his manly and effective reading of the blacksmith; also to Mr. Maclean, Mrs. Young, and Miss Hollingshead, for the good service they did in the cast of the piece. *Used Up* was preceded by *A Husband's Secret*, and followed by *A Cosy Couple*; in the latter, of course, Mr. Mathews appeared. *Married for Money*, and the burlesque of *Don Cæsar de Bazan* are announced for Monday.

STRAND.—Mr. Sydney Grundy's comedy, *Mammon*, after having been successfully produced at morning performances at the Strand and Gaiety, has been included in the regular evening programme of the former house, in conjunction with Mr. J. S. Clarke in *Toodles*, and the company in the ever-welcome *Trial by Jury*. *Mammon* is really a very good play; interesting in story, powerful in characterisation, and effective in incident; while for those who look for a moral in their amusements, it offers, as the auctioneers say, special advantages. The young writer has covered himself with glory by his successful transfer into English of such an impracticable piece as the *Montjoye* of Octave Fueillet to the positive approval of the British Philistine. It may be whispered that more probability would attach to one situation had the scene been French instead of English; but even as it stands it is sufficient for its purpose. Mr. W. H. Vernon has at last a chance of showing what a good actor he still is, despite the years in which he has wasted his abilities upon unprofitable farces. Miss Ada Swanborough raises the small part of the wife to importance, and by her excellent activity lends great aid to secure the triumph of the last scene, to witness which no one will regret a visit.

DEATH.

DE BATHE.—May 12, at Hope Hall, Pendleton, Manchester, of empyema, in her sixteenth year, Cicely, third daughter of Lieut.-Gen. Sir Henry de Bathe, Baronet.

Advertisements.

Warranted waterproof, and as soft as a glove. Gentlemen with tender feet have been known to wear these boots for two years without repairing.

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly, London,

ARMY MEDICAL DEPARTMENT,
12th May, 1877.

AN EXAMINATION of CANDIDATES for COMMISSIONS in the MEDICAL DEPARTMENT of her Majesty's ARMY will be held in London on the 13th August next, and following days:—

1. Candidates having two qualifications—one to practice medicine, and the other surgery—under the Medical Act, and who are not under 21 nor above 32 years of age at the date of the London examination, are eligible to attend.

2. Those gentlemen who may be selected for appointments will receive £250 per annum and allowances in addition, after passing the examination at the Army Medical School at Netley.

3. The tenure of appointment will be limited to ten years, and on the completion of that period of commissioned service, surgeons, unless they be specially selected for further employment in the Department, will be entitled to receive, in lieu of all pension on retirement (pension for wounds excepted) the sum of £1000.

4. Application for admission to the examination should be made in writing, without delay, to the Director-General of the Army Medical Department, London, by whom a printed schedule containing further particulars will be furnished.

5. There will be 50 appointments offered for competition.

(Signed) W. M. MUIR, Director-General.

INDIAN MEDICAL SERVICE.—Notice is Hereby Given that an examination of candidates for nineteen appointments as Surgeon in her Majesty's Indian Medical Service will be held on Monday, the 13th August next, and following days.

Copies of the Regulations for the Examination, together with information regarding Pay and Retiring Allowances, &c., of Indian Medical Officers, may be obtained on application at the Military Department, India Office, London, S.W.

The necessary Certificates must be submitted to the Military Secretary so as to reach his address at least a fortnight before the date fixed for examination.

ALLEN JOHNSON, Colonel,
Military Secretary.
India Office, 15th May, 1877.

ENTRY OF ENGINEER STUDENTS IN HER MAJESTY'S DOCKYARDS.

My Lords Commissioners of the Admiralty having decided to offer 45 vacancies to be competed for, NOTICE is HEREBY GIVEN that a Competitive Examination for these vacancies will be held on TUESDAY, the 11th September, 1877, and following days, in London, Edinburgh, Glasgow, Dublin, Belfast, Cork, Leeds, Bristol, Liverpool, Newcastle-on-Tyne, Chatham, Sheerness, Portsmouth, and Devonport.

The age of Candidates must be not less than 14 nor more than 16 on 1st May, 1877.

The parents or guardians of all engineer students will be required to pay each year in advance the sum of £25 during the first three years of the student's training. The engineer students this year and next year will be entered at Portsmouth Dockyard only, and board and lodging will be provided for them in the Dockyard, where they will be required to reside.

A small weekly rate of pay (annually increasing) will be given to each engineer student during his six years' training. The engineer students will be under the supervision of the Captain of the Steam Reserve and a staff of competent officers, and subject to such rules and regulations as their Lordships may deem necessary.

Parents or guardians will be required to enter into a bond to the amount of £300 that the students, *after completing their training, will enter the Naval Service.*

References as to respectability and good conduct will be absolutely necessary.

The Lords of the Admiralty having, by recent changes, *very materially raised and improved the* position of the Engineer Officers of the Royal Navy, desire, by early publication of the above regulations, *to encourage more general competition for these* appointments.

For further particulars apply, by letter only, to the Secretary of the Admiralty, Whitehall, London.

Application to be permitted to compete will not be entertained after 31st July, 1877.

By command of their Lordships,
ROBERT HALL.
Admiralty, S.W., 16th May, 1877.

"SANITAS."—The only true Antiseptic & Disinfectant Combined. Non-Poisonous, Sanitary, Medicinal, Preservative. For use in Houses, Hospitals, and all Public Institutions, Stables, Warehouses, Factories, and all places where noxious, infectious, or bad smelling emanations exist.

"SANITAS"—Has Sanitary Powers equal to both Carbolic Acid and Ozone, and has no injurious action on clothing, furniture, carpeting, &c. It is the best preservative of Skins, Paste, Albumen, and all Animal matters liable to decomposition, such as Meat, Fish, Poultry, &c.

"SANITAS"—Is strongly recommended against Small-Pox, Typhoid Fever, Scarlet Fever, Hay Fever, Rheumatic Complaints, Foot and Mouth Disease, &c.
NO HOUSE SHOULD BE WITHOUT "SANITAS."

"SANITAS"—"This solution has considerable advantage over most of the substances which have been from time to time proposed as either disinfectants or antiseptics; it is neither corrosive nor poisonous, and, as it leaves no stain on textile fabrics, and does not injure them, it can be directly applied to clothes, carpets, furniture, etc. IT POSSESSES AN AROMATIC ODOUR, AND IS, THEREFORE, IN THAT RESPECT SUPERIOR TO CARBOLIC ACID, now so much employed."
(Signed) ARTHUR HILL HASSALL, M.D.,
Senior Physician to the Royal Free Hospital.
(Signed) OTTO HEHNER, Public Analyst.

"SANITAS"—May be had of all Chemists and Wholesale Druggists.
Prices.—Bottles, first quality only, 1s., 1s. 6d., 2s. 6d.
Per Gallon—First Quality, [illegible]s. Second Quality, 10s.
Special quotations for large Orders.
Odourless "Sanitas" at same prices.
For Pamphlet and full particulars enclose stamp to the "SANITAS" COMPANY, 57, Moorgate-st., London, E.C.

DINNEFORD'S FLUID MAGNESIA

The best remedy for ACIDITY of the STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION; and the safest aperient for delicate constitutions, ladies, children, and infants.

DINNEFORD & Co.,
172, New Bond Street, London, and all Chemists

COLCHESTER, ESSEX, on the outskirts of the town, within 10 minutes walk of St. Botolph's and the Hythe Stations on the Wivenhoe Branch of the Great Eastern Railway, and only two miles from the main line station, from whence there is an excellent service of quick trains to London.—An exceedingly attractive Freehold Residential Property, known as Scarlett's, situate on the east side of the garrison town of Colchester. It comprises a substantially-built and and well-arranged residence, in capital order, including three reception rooms, four principal bed and two dressing rooms, two secondary bed rooms, bath room, and suitable domestic offices, with cellarage in basement. The residence occupies a dry and elevated position, commanding extensive and pleasing views over an undulating country, placed nearly in the centre of about 20 acres of very ornamental land, approached by two carriage sweeps, with entrance gates, surrounded by lawns and pleasure grounds, tastefully studded with choice specimen shrubs, conifers, and other trees of great beauty and luxuriant growth, intersected by shaded and winding walks, leading to productive kitchen gardens, with conservatory, vinery, and forcing pits, well-stocked orchard, and productive closes of pasture land. In the rear is a small farmery, gardener's cottage, and the requisite outbuildings. The whole occupying a charming position, and, with the exception of about two acres, is in hand, and will be sold with possession.

MESSRS. BEADEL are instructed by the Proprietor to offer for SALE by AUCTION, at the Mart, Tokenhouse yard, London, on Thursday, the 7th of June, 1877, at 2 o'clock precisely, in one lot, the above very attractive FREEHOLD PROPERTY. Particulars, with plans and conditions of sale, may be obtained of Horace Philbrick, Esq., Solicitor, 50, Old Broad-street, E.C.; at the Mart; and of Messrs. Beadel, 25, Gresham-street, London, E.C.

W.C

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall.—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, amongst other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO [illegible] Strand, London, W.C.

THOMAS WHITE'S

CELEBRATED CAMPAIGNING KIT,

CONSISTING OF

BEDSTEAD, BEDDING, BLANKET, PILLOW, BATH, WASHSTAND, BASIN, CAMP-STOOL, BUCKET, LANTERN, POLE-STRAP, LOOKING-GLASS, PYJAMAS, AND SLEEPING CAP.

ALL OF WHICH ARE CONTAINED IN HIS

LOCK-UP WATERPROOF BAG.

Which, when packed with the above articles, supplies room for clothing and other necessaries. The chief feature in this Kit is T. White's FOLDING BEDSTEAD (recently improved), weighing 16lbs., price 30s.; or his larger sized ditto, 18lbs., price 35s., intended for officers entitled to carry extra weight. Also his CANTEENS for company messing, to cook for and dine three or more officers, as supplied and thoroughly tested during the Manœuvres of 1871, 1872, 1873, 1874, and 1875. This Canteen was used by Sir Garnet Wolseley, G.C.M.G., K.C.B., his Staff, and the 42nd Highlanders (the Black Watch), and other regiments during the Gold Coast campaign, and is recommended and patronized by the highest military authorities.

The above Campaigning Kit, or Canteens, and in most instances both, have been supplied to his Majesty the Emperor of Germany; H.R.H. the Duke of Cambridge, K.G., &c.; H.R.H. the Duke of Connaught, K.G., &c.; H.S.H. Prince Edward of Saxe-Weimar, C.B.; the late General Sir Hope Grant, G.C.B.; Generals the Right Hon. Sir John Michel, G.C.B.; Sir R. Walpole, K.C.B.; Sir Charles Ellice, K.C.B.; Major-Generals Sir Charles Staveley, K.C.B.; Sir Alfred Horsford, G.C.B., Military Secretary; J. S. Brownrigg, C.B.; Henry Smyth, C.B.; Lord Mark Kerr, C.B.; D. Lysons, C.B., Q.M.G.; Sir Thomas MacMahon, Bart., C.B.; Sir E. Greathed, K.C.B.; G. V. Maxwell, C.B.; Hon. A. Hardinge, C.B.; C. Shute, C.B.; W. Parke, C.B.; A. J. Herbert, C.B.; and Sir Garnet J Wolseley, G.C.M.G., K.C.B., besides some thousands of officers of nearly every branch of and regiment in the Service.

THOMAS WHITE,

CAMP AND BARRACK FURNISHER,

Begs leave to inform Commandants of Corps, Presidents of Messes, and Officers generally, that he

IS PREPARED TO SUPPLY ON HIRE

EVERYTHING NECESSARY FOR OFFICERS' MESSES,

Including

MARQUEES, FURNITURE, BOARDED FLOORS, PORTABLE KITCHENS,

WHITE'S CELEBRATED FIELD RANGE,

Cooking Utensils, Cutlery, Electro-Plate, Crockery, China, Glass, &c.

The same will be securely packed and forwarded, accompanied by an experienced assistant, if desired, to any part of the United Kingdom.

THOMAS WHITE'S

STANDING CAMP TENT KIT,

As supplied by him for 12 years to the National Rifle Association at Wimbledon, and to Officers at Aldershot when under canvas, consisting of the following articles:—

Wood Folding Camp Bedstead
Hair Mattress
,, Pillow
Folding Chair
Sponge Bath
Water Can
Tent Pole Strap
Strip of Matting
Tripod Washstand.
Looking Glass
Basin
Lantern

Can be had on hire, in any number, to meet the requirements of regiments or County Rifle Meetings. The weight of each Kit complete is about 80lbs. The Kit includes everything necessary for camping out, and is looked upon by the large number of officers who have used it in England Ireland, and Scotland as a great convenience, saving them the trouble and annoyance of looking out, packing, and conveying their own goods (which are often unfitted for the purpose) to the camping ground.

P.S.—The Campaigning Kit is for Sale, and not for Hire; the Standing Camp Tent Kit is for Hire only.

Full details, Illustrated Price Lists, and Estimates for Officers' Messes, may be had post free on application to

THOMAS WHITE, CAMP FURNISHER, ALDERSHOT.

DR. J. COLLIS BROWNE'S

CHLORODYNE.

THE ORIGINAL AND ONLY GENUINE,

Which is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever Croup, and Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout Cancer, Toothache, &c.

From Lord FRANCIS CONYNGHAM, Mount Charles, Dec. 11, 1868.

Lord Francis Conyngham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half-a-dozen bottles sent at once to the above address.

*** Earl Russell communicated to the College of Physicians that he had received a despatch from her Majesty's Consul at Manilla, to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, Dec. 31, 1864.

CAUTION.—BEWARE of PIRACY and IMITATIONS.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. COLLIS BROWNE was, undoubtedly the INVENTOR of CHLORODYNE; that the story of the Defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See *Times*, 13th July, 1864.

Sold in Bottles, at 1s. 1½d., 2s. 9d., and 4s. 6d. None is genuine without the words "Dr. J. COLLIS BROWNE'S CHLORODYNE" on the Government stamp. Overwhelming Medical Testimony accompanies each bottle.

SOLE MANUFACTURER
J. T. DAVENPORT, 33, Great Russell Street, Bloomsbury, LONDON.

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.

President, the Duke of SUTHERLAND, K.G.

The Turkish dominions having now been invaded, and hostilities having actually commenced, the suffering among the Turkish soldiers is very greatly increased, and as will be seen from the annexed statement by Captain Burnaby, who has just returned from Asia Minor, they are in the greatest need of clothing, of food for the hospitals, and of medical stores and surgical instruments.

The Committee, therefore, appeal strongly to their countrymen for subscriptions to enable them to mitigate the horrors of the war by sending out to the Turkish soldiers such additional succour as is now most urgently needed.

STATEMENT BY CAPTAIN BURNABY.

"Regent's Park Barracks, April 27, 1877.

"In the course of my recent travels through Asia Minor, I visited several Turkish military hospitals, and conversed with the surgeons in charge. They often complained to me of the great scarcity of drugs, and said the authorities at Constantinople found it impracticable to supply many of the necessary specific medicines and surgical instruments, all of which have to be obtained in Europe.

"If people in this country could only realise to themselves the sufferings which the wounded will undergo when being operated upon without chloroform and with worn-out surgical instruments, I think they would willingly subscribe to the Stafford House Fund.

"The soldiers from the southern parts of Anatolia suffer very much from the change of climate, and are utterly unsupplied with warm underclothing. Many a time I have met battalions of Redifs on the march, the men with bare feet and wading through deep snow while the thermometer stood at zero. Many were frost-bitten on the march to Erzeroum and Kars. A supply of warm stockings and flannel shirts and blankets would save thousands of lives."

Communications to be addressed to T. Gibson Bowles, Esq., 2, Harriet-street, Lowndes Square, S.W., or to H. Wright, Esq., Stafford House, Joint Honorary Secretaries.

Subscriptions will be received by Major-General Sir Henry Green, Hon. Treasurer, Stafford House, S.W.; and will be acknowledged in the published list.

ROYAL UNITED SERVICE INSTITUTION, Whitehall Yard, FRIDAY, May 25th, Captain J. C. Colomb, late R.M. Artillery, on "Russian Development, and our Naval and Military Position in the North Pacific." To be followed by a Discussion.

By Order of the Council,

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON SEA, near Ramsgate, in 1 hour and 45 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE."
"The situation of the palatial establishment on a cliff somewhat removed from the town, though conveniently proximate thereto, is an advantage greatly augmented by its superb suite of ozone and various other health-giving baths, its well-constructed rink, its excellent and cheerfully appointed table d'hôte, and all other liberal additions of comfort, luxury, and amusement since the hotel has come into the present enterprising hands."—"Daily Telegraph," March 29.

THE "GRANVILLE" HOTEL.
The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL.
"Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

A. J. BODDINGTON, Secretary.
17 Prince Albert Street, Brighton.

HOLLOWAY'S PILLS.—This cooling medicine has the happiest effect. When the blood is overheated and a tendency to inflammatory action is set up in the system. one Pill, taken shortly before dinner, does away with the indigestion, fulness, and flatulency, indications of a weak stomach or disordered liver. A few Pills taken at bed-time act as alteratives and aperients. They not only relieve the bowels, but regulate every organ connected with them, overcome all acrid humours, and encourage a free supply of all the secretions essential to our well being. Holloway's Pills thoroughly cleanse and perfectly regulate the circulation, and beget a feeling of comfort in hot climates and light temperatures which is most desirable for preservation of health.

SOVEREIGN LIFE ASSURANCE COMPANY.

EXTRACT FROM REPORT OF THE DIRECTORS, MAY, 1877:—

The Directors have again the pleasure of reporting a material advance in the amount of new business effected by the Company during the past year.

The Policies issued were 474 in number, assuring £249,060, or nearly £50,000 in excess of the preceding year. The average amount of each Policy was £525, and the new premium income represented was £8,295 3s. 10d., or £2,100 more than in 1875. The increase on the Total Revenue from Premiums and Interest was £4,995.

The sum paid for claims by death during the year was not in excess of the amount anticipated; but the aggregate disbursements on account of policies falling due exceeded that of any former statement, owing to an increased number of Endowment Assurances having arrived at maturity. Nevertheless, £23,000 were added to the Funds of the Company.

PICCADILLY, LONDON, W.

A large private trade of highest class and character, yielding to its patrons the full advantages of their position.

LANE'S PRIVATE HOTEL (Nos. 1, 2, and 3, ST. ALBAN'S PLACE, CHARLES STREET, St. James's, S.W.), for Officers in the Army and Navy, Members of Clubs, and others. Most eligibly situated in the immediate vicinity of the principal Club Houses. Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

KINAHAN'S LL WHISKY.
UNIVERSALLY
RECOMMENDED BY THE MEDICAL PROFESSION. A pure old spirit, mild, mellow, delicious and most wholesome. Dr. Hassall says, "The samples were soft and mellow to the taste, aromatic and ethereal to the smell. The whisky must be pronounced to be pure, well matured, and of very excellent quality." Wholesale—20, Great Titchfield Street, London, W.

FALKNER'S "REAL MALT" WHISKEY.
The same as supplied to the principal Clubs and Regimental Messes. Has been esteemed in Ireland for the last century as the FINEST IRISH WHISKEY procurable, being pure as distilled, and refined by age only.
LONDON 40, CHARING CROSS.
DUBLIN, 83, GRAFTON STREET.

SCHWEPPE'S MALVERN SELTZER.
SCHWEPPE'S SODA WATER.
SCHWEPPE'S LEMONADE.
SCHWEPPE'S POTASS WATER.
Consumers are particularly requested to ask for SCHWEPPE'S, and observe Trade Mark on Labels (a Fountain), as many imitations are offered to the Public.—To be obtained from the leading Chemists, Wine Merchants, and Grocers.

E. LAZENBY and SON'S PICKLES, Sauces, and Condiments—E. Lazenby & Son, sole proprietors of the celebrated receipts and manufacturers of the pickles, sauces, and condiments so long and favourably distinguished by their name, beg to remind the public that every article prepared by them is guaranteed as entirely unadulterated.—92, Wigmore Street, Cavendish Square (late 6, Edward's Street, Portman Square), and 18, Trinity Street, London, S.E.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated sauce are particularly requested to observe that each bottle prepared by E. LAZENBY and SON bears the label used so many years, signed, "*Elizabeth Lazenby.*"

In consequence of Spurious Imitations of
LEA and PERRINS' SAUCE,
which are calculated to deceive the Public, LEA and PERRINS have adopted A NEW LABEL, bearing their Signature—
LEA AND PERRINS,
which signature is placed on every bottle of
WORCESTERSHIRE SAUCE,
and without which none is genuine.

Sold Wholesale by the Proprietors, Worcester, Crosse and Blackwell, London; and Export Oilmen generally.

Retail, by dealers in Sauces throughout the World.

COCKS' READING SAUCE
Is the best and most economical Sauce ever manufactured for
FISH, ENRICHING SOUPS, GRAVIES, &c.
It only requires a trial to convince the purchaser of its excellence.
CAUTION.—The genuine is protected by Trade Mark, viz., CHARLES COCKS' Signature on a white ground across the Reading Arms.

SUPPLEMENT.

AND

ARMY NAVY

JOURNAL OF THE MILITIA

GAZETTE

AND VOLUNTEER FORCES.

SATURDAY, MAY 19, 1877.

THERE is, apparently, a growing feeling that the manner in which the discipline of the Royal Naval College is maintained is not altogether satisfactory, and that the present President is not as happy as was Sir Cooper Key in his relations with the officers voluntarily studying at this establishment. Not long since we alluded to the discharge of three Lieutenants for "irregular attendance." The impression was that these officers had at least been frequently absent from the College on occasions when they should have been at their duties. But we soon learnt that the irregularity complained of was nothing more than being "late for school," and, as such a punishment as standing the naughty scholars in the corner was hardly suitable, they were sent away altogether. Is it to be wondered at, bearing in mind the absolute freedom from close attention to study usually enjoyed by the naval Lieutenant while afloat, that he should find regular hours for schooling irksome? There is no doubt that where large numbers are concerned, be they officers or men, it is absolutely necessary to enforce regularity and conformity with the routine laid down for the control of the establishment, but it is scarcely requisite that ward-room officers should be treated as mere boys, and be reminded of those days when they were classed as "the young gentlemen." "An Old Collegian" ventilated his grievances in these columns some time ago, and an evening contemporary has also been appealed to in the matter, and we hope the serious attention of the Admiralty may be given to the causes of the discontent and annoyance now felt by many who have entered the College while on half pay for the purpose of improving their professional knowledge. Another question which has been raised is the supervision exercised over these officers' wine bills, and it is actually stated that an officer has been discharged because he incurred a wine account of something over £4 in the course of a month. The necessity for maintaining the strictest sobriety in a Service such as the Navy is so apparent, and the advisability of checking any approach to the introduction of an extravagant mode of living in messes so great, that we can scarcely condemn the present system of keeping a wholesome check upon wine accounts, provided this power is exercised neither offensively nor unnecessarily. The fact that a naval officer is considered "always on duty" while on board his ship debars him from enjoying the same freedom as in the sister Service, and the liberties of a civilian are far removed from him; and when it is remembered that every drop of liquor taken by an officer on board is put down in his account, and that the bill is limited to an amount which would satisfy very few men living on shore, it must be acknowledged that the Navy is a remarkably sober Service. The number of officers tried by court-martial for offences against sobriety is very small when it is borne in mind that these cases are never overlooked, and that many have been put on trial and punished for "appearing excited," as was the case recently on board the Crocodile, although witnesses were called to prove the prisoner's sobriety. Under these circumstances it does appear to be stretching the regulations rather far to interfere with an officer who is on half pay and voluntarily attending the College, by hauling him over the coals for having nearly expended a five-pound note in wine in the course of a month. To one who entertains his friends at the mess this limit simply means that, if he ventures to put on the table anything beyond "Gladstone claret," he will be compelled to confine himself to nothing more expensive than beer for the rest of the month, so as to keep his account within such limits as may find favour in the eyes of the President. Surely officers who have long reached years of discretion might be relieved of some of this supervision and interference. As it is, there exists in the Navy too strong a tendency to continue far into life the use of leading-strings.

We called attention recently to the irregularity of punishing a man twice for one and the same offence, as we have reason to know has been done in a ship on a foreign station, and it would now seem that this peculiarity has not been confined to seamen, but has also been applied to officers. A correspondent informs us that in a small vessel on a distant station a junior officer who committed some impropriety was reprimanded for his fault, and afterwards, to his surprise, application was made to the Commander-in-Chief for him to be brought before a court-martial for this identical offence. The application was granted, and he was tried, but we believe the matter has now been brought under the notice of the Admiralty.

What has become of the scheme for improving the position of Assistant-Paymasters? Can the Treasury have set aside Mr. Hunt's good intentions, or is the question "burked" once again? The sum required to put these officers on a proper footing with regard to others of similar age and seniority would be but trifling, and their present prospects are lamentable.

One would imagine that the unfortunate negro on the East Coast of Africa read our papers and Parliamentary debates on fugitive slaves, for since there has been so much stir on behalf of the runaways they have been increasing, and by one mail we hear of three having been received in boats cruising in search of slave dhows.

Rear-Admiral Rowley Lambert struck his flag on board the Narcissus, as Rear-Admiral commanding the Detached Squadron, on Monday last at sunset. The ships of the squadron have all received paying-off orders, but they will not be dismantled, nor will any stores be returned or their guns landed.

The senior officer of the Royal Marines, General Alexander Anderson, C.B., has been retired on reaching the limit of age, and has consequently been the means of giving a step throughout the corps. By the retirement of this officer, Colonel Penrose, C.B., has been advanced to the Generals' List, and by his promotion a Good Service Pension for Colonels, £150 per annum, has been placed at the disposal of the First Lord of the Admiralty.

The Chairman of the Goodenough Memorial Committee has been informed by the Admiralty that a deed of trust has been prepared under which the Admiralty will take over the bust of this lamented officer and will place it in the Painted Hall at Greenwich. The scholarship or testimonial which has also been founded by the fund subscribed to keep the name of one so respected and beloved alive in the Service has met with the full approval of the Admiralty, and it has been arranged that the officers who may win this distinction shall be notified in the "Navy List" by having a certain mark or letter placed against their names.

The number of troop-boats which have recently been ordered by the Government is thirty. Twenty of the same class were ordered to be built and delivered at Devonport and Deptford some time since, so that the delivery of the latest order in the course of next month will place fifty of these boats at the disposal of the Transport Department.

It will be remembered that some time ago a lamentable accident with fatal results occurred on board the Dryad owing to the bursting of valve-boxes. An examination of these boxes by a court ordered to inquire into the circumstances of the case proved that they were most defective in construction, and it was apparent that the imperfect manner in which they were turned out of hand was the main cause of the accident. The Dryad was fitted at Devonport, and, though this machinery was supplied by contract, some suspicion of a want of careful supervision naturally attached to the officials of the yard at which she was prepared for the pendant. Many months have now elapsed since the news of the explosion and deaths reached England, but, in justice to those to whom some suspicion, however slight, was attached, we are glad to give prominence to the fact that the Admiralty have just communicated to Rear-Admiral Willes, Superintendent of Devonport Yard, the expression of their opinion that the Chief Engineer and Inspector of Machinery, Mr. Trickett, as well as his assistant, Mr. Nicholl, must be altogether exonerated from any blame in the matter. This is understood to be the result of further inquiry and the application of tests to those valve-boxes which were allowed by them to be fitted on board. This is as satisfactory to the Service as it is to the officers mentioned, for, with the many break-downs which have recently occurred with contract-made machinery, it is more than ever of importance that the Service shall be able to feel every confidence in those who are responsible for detecting defective workmanship or "scamping."

RUSSIA AND INDIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As an officer of the Indian Army, I have naturally given some thought and consideration to the subject of the invasion of India, both during my service in India and whilst on a visit to those parts of Russia whence any expedition undertaken by that country for such a purpose would start. For the reason that I do not hold an invasion of India by Russia likely to be attended with the slightest chances of success, unless her invading army followed the route indicated by the great Napoleon,* the remarks which I propose now to make will be limited to the review of the present or future practicability of such a weighty undertaking by this route. We learn from Capt. Terentyeff's book, entitled "Russia and England in the East," translated into English by a gentleman in the Calcutta Foreign Office, to which allusion is made in Capt. Burnaby's "Ride to Khiva," that Capt. Terentyeff, of the Imperial Russian Army, is of opinion that Napoleon's project for the invasion of India, if considered feasible in the reign of the Emperor Paul I. (more than seventy years ago), is much more so at the present day. This opinion, so far as I was able to gather whilst in Russia, is shared by a large number of Capt. Terentyeff's brother officers, and though with the great mass of them "the wish is undoubtedly the father to the thought," and no more, it seems that they can be induced, or are permitted, to occasionally give to the world—though unfortunately in a language which is a sealed book to the majority of Englishmen—the benefit of their views on a subject so closely connected with the future of Great Britain as an Asiatic Power. Now, whether we consider a Russian invasion of India by any route a practicable undertaking or the reverse (and on this question opinion is greatly divided), it may be well (1) if we direct our attention to the position in which Persia may now be said to stand with regard to Russia—that of a mere outlying province of the already huge Empire of Russia, and If (2) we consider beforehand the probable results of Russian ascendancy in Afghanistan (Cabul), the present ruler of which country is showing a disposition to yield to Russian influences, and to waver in his friendly relations with the Indian Government. In the case of Persia two remarkable circumstances have of late given colour to the belief above stated, which is held by many out of England, at any rate. The first of these is this. Shortly after the return of the Shah to his own country from visiting civilized Europe, the people of Great Britain were pleased at hearing that an Oriental potentate had taken all his lessons to heart, and had become so enlightened as to grant a liberal concession to Baron Reuter for the construction of railways throughout Persia, and for the general improvement of that country. Unfortunately, however, the Shah "had reckoned without his host." He had done all this without asking the permission of the Government of the great Tsar. This omission led to the fact that the British public heard no more, and will probably hear no more, of "the liberal concession" made by the Shah of Persia to Baron Reuter for the general improvement and opening out of his kingdom. The Russian authorities were naturally very averse to having additional light cast, in such a fashion, upon a country lying within easy reach of the Army of the Caucasus; and so the great scheme for the introduction of foreign capital and foreign interests into Persia somewhat suddenly collapsed. The second circumstance to which I have alluded is of a much more recent date, and it is to be found in the remarkable admission† made by the Shah's

---

* This will be found in a paper in the Russian language published at Moscow in 1847. The title of the work is as follows—"Project for an Overland Expedition to India, submitted to the Emperor Paul Petrovitch (Paul I., son of Peter III.) of Russia by the First Consul of France, Napoleon Bonaparte."

† I read this in one of the leading Russian papers (the *Moscow Gazette*), and a reprint appeared, if I mistake not, in some of the English journals.

Government, to the following effect:—"Looking to the probable neutrality of England in the Eastern Question, the Government of the Shah will adopt a conciliatory policy towards Turkey, *unless the Russian Government should bring great pressure to bear on the policy of the Persian Government.*" There surely is a remarkable admission of either weakness or dependence involved in the concluding clause which I have emphasized. The Russian Government has, as we have since heard, actually exercised this pressure, for Persia has been forced to mobilize her Army to act against Turkey if required. The far-seeing Muscovite thus hopes to split up the Moslem forces into the two great factions "Sunnis" and "Shiahs," whereof the Sultan of Room (Constantinople) and the Shah of Persia are the respective heads. These circumstances, then, added to the observations of Englishmen who have long resided in the countries south of the Caucasian Range, may be said to give at least some strength to the notion that Persia has ceased to exist as a wholly independent State. The question then arises: With the following points in her favour, would Russia, unassisted by allies, find the invasion of India, by Napoleon's route, an altogether impracticable undertaking at the present day? The points in her favour are:—1. An almost complete system of railways (constructed with English gold) that would enable her to concentrate, without any very great difficulty, any number of troops at Vladikafkaz, situated at the northern entrance to the pass through the mountains of the Caucasus. 2. A splendidly-constructed military road through and across these mountains, by which reinforcements could be brought from Vladikafkaz to Tiflis, the head-quarters of the "Army of the Caucasus," which, on a peace footing, is computed at 90,000 men of all arms. (The distance between these places is 197¾ versts, or 131 5-6ths English miles.) 3. A sufficiently good road connecting Tiflis with Baku, a port on the Caspian. 4. The power open to her, in the summer months, of bringing an army down the Volga to Astrakhan on the Caspian Sea. 5. A most efficient fleet of steamers and other vessels on the Caspian (well called a Russian lake) by which she could convey an army, without the slightest possibility of opposition, from either Astrakhan or Baku, or both, to Astrabad, the point indicated in Napoleon's scheme, situated on the south-east shore of the Caspian. Capt. Burnaby tells us at page 429 of his book of the arrangements made by the Russian Government with certain steam navigation companies to transport, when required, stores and troops, &c., at certain rates, from Astrakhan, Petrofsk, and Baku to the east coast of the Caspian. Arrived at this point, and previously assured of either the cordial co-operation or the passive indifference of the ruler of Afghanistan, it is apparent that Russia could move without opposition along the route indicated by Napoleon until she came into collision with the advanced posts of the British Indian Army either at Quetta or Peshawur. In one of the appendices to Capt. Burnaby's book will be found a portion of this route, and also a pronunciation of Russian opinion as to the importance of it at the present day. (It is significant to notice that the treaty recently concluded between the Khan of Khelat and the Indian Government has not only excited the suspicion and anger of the Amir of Cabul, but also has "aroused the bitter comments of the Russian Press.") It seems to me, then, that with the comparative facilities which Russia now possesses, and with the increased facilities that each succeeding year appears to bring to her, she would not think of invading India *except* through Persia and Afghanistan (supposing, of course, her intrigues in the latter country to have been completely successful); that she would never dream of using her Central Asian Army except for the purpose of damaging by its near presence British *prestige* in India, and of creating, in fact, a diversion and a scare amongst our easily-excited native fellow-subjects. It should always be remembered that, in Central Asia, Russia has to move forces through countries far away from any very secure base of operations over immense distances and bad roads, and that she would have, in the event of any distinctly aggressive move towards British India, to take her Army over passes which are said to be extremely difficult, if not quite impracticable for the passage of artillery. Against the argument that a Russian invasion of British India, even through Persia and Afghanistan, is practicable, nay, even possible, it will be advanced that Russia is just now not in a position to undertake anything of the kind, that she is bankrupt, or next door to it, that her Army is not yet remodelled on the German system, that it is not in an efficient state, that the Turks in Europe and Asia are not yet crushed, &c. I believe there can be no sort of doubt but that the finances of Russia are in a most unsatisfactory condition. Indeed, one act alone of the Russian Government has avowedly admitted this to be the case. I allude to the enforced payment from the first day of the present year (old style) of all customs due in gold. The highest bit of metal currency in Russia is of the value of 6d. The object of this arbitrary enactment is said to be to obtain a sufficient quantity of gold to keep up the credit of the Russian Government in the London and other European markets, where that Government is a debtor to a large amount. Yet, notwithstanding the present straitened position of the Russian Government (produced largely, no doubt, by the almost stagnant state of trade in the country), I suppose few who have visited Russia will deny that there is enormous wealth in the land, and that if the Tsar asked for a loan to carry out some very popular undertaking, money for the purpose would be forthcoming. A practical proof of this is likely to be afforded in a very short time. I have no doubt that the means to enable the Russian Government to pitch into the hated Turk will be found in Russia. One of the things which struck me very much while I was in Russia was the belief existing amongst people of many classes that Russia's acquisitions in Central Asia, expensive and unprofitable, from a money point of view, as they have proved, are but the costly means to a highly remunerative end, and that end is India. Another was the widespread notion that in the event of England and Russia being engaged in war, the latter Power could certainly reckon on aid from America and Italy, and that countless Alabamas would sweep British commerce from the seas, &c. I was repeatedly told by Russians with whom I conversed, when travelling or on other occasions, that the future field of strife between Russia and England will be the countries adjacent to India. This idea is no doubt in some measure but one of the many demonstrations of the roving and aggressive proclivities of the Russian character, derived from Tartar blood. Yet we should keep before us the fact that the mind and nature of the Muscovite are essentially Oriental, and that they will always compel him to look towards and covet countries which he considers to be more blessed than his own. Hence it comes to pass that the real and undeveloped wealth of his own land remains exactly in the state in which he has inherited it from his fathers. Much has appeared of late in the English papers on the subject of the inefficient state of the Russian Army—I mean as to organization, equipment, &c. I believe many of these statements to be wild, and others to be wholly untrue. I have not had the privilege of attending any of the Russian autumn manœuvres, at which the best troops of the empire are assembled; but I have seen Russian troops on the march, and I have noticed bodies of them at different times, and the impression which they have always conveyed to my mind is that of a young-looking body of men, very mixed as to size, but rough-and-ready in appearance, and very serviceably clothed. Some of the Cossacks whom I saw in the Caucasus are particularly fine men; and if the Cossack element of the Russian Army is throughout of the same description, Russia has in them some truly splendid soldiers. (A picture appeared in the *Graphic* not many months ago purporting to represent some Cossack troopers on the march. This picture amused the Russians, I believe, very much, and it certainly was not a correct representation, so far as my observations enable me to speak.) The officers of the Russian Army, especially those about St. Petersburg, are, as a rule, exceedingly fine and very intelligent looking men. What, then, are the immediate chances for and against a Russian invasion of India? The present Emperor of Russia is deservedly lauded and esteemed as being a man of distinctly pacific tendencies. Yet, it is a striking feature of his reign that Russia has been most active in the extension of her territory; notwithstanding, too, most solemn assurances to the contrary. What this may augur for the reign of his successor (the present Tsarevitch), who is said to be "a man of war," is sufficiently apparent. In short, everything points to the conclusion that Russia "is moving on," and must continue to "move on." She has been baulked in her great and no longer concealed desire—for Russians openly assert it—to drive the Turks out of Europe, "partly by the individual action of the Emperor, who has laboured from first to last to keep back his people from a wanton war," in spite of all that has been said to the contrary. She has been baulked in a great measure by the determined attitude of England several months ago, *i.e.*, before the unpatriotic agitation about "Bulgarian atrocities" and "Christian massacres." (I was in Russia during a period of most intense excitement, and I well know how anxiously Russians looked to the attitude of the British Cabinet, and how they hoped that our present Government would be ousted from office immediately Parliament opened.) She has been baulked, too, by discovering the fact, at almost the eleventh hour, that the "sick man" had more than a "kick left in him." But she will assuredly return * when she can to the accomplishment of this object. Foiled, again, in this quarter, the Russian will be active elsewhere—either in Persia, Asia Minor, Central Asia, or towards Kashgar (Yarkund) and Afghanistan (Cabul). A recent telegram tells us that Gen. Kaufmann has at last contrived to fasten a quarrel on the Amir of Kashgar. He has asked for large reinforcements "to guard against the Amir of Kashgar, who has assumed a threatening attitude towards 'Holy Russia!'" From this we see that the progress of the Muscovite towards his great Indian goal is only arrested by the course of events on the other borders of his huge Empire. Whether the secret societies, which undermine the whole fabric of the Russian Constitution,† will, on the termination of the reign of the present Emperor, prove powerful enough to bring the unwieldy Empire down with a crash, or whether the military party, having organised and equipped an army, which, in point of numbers at least, the world will have never beheld, shall gain the ascendancy and divert the attention of the Russian people from social matters to the "glories of war," is a problem that the future alone can solve. We may, in any case, I think, fairly conclude by saying that the safety of India from Russian covetousness and aggression lies:—1. In the continuance of the reign of the present Emperor. 2. In the temporary, or, it may be, permanent rottenness of Russian finance. 3. In the bribery and corruption which, eating like a canker into the very vitals of every institution and department in Russia, would cause a question like the invasion of India to assume such financial proportions as would frighten even a Russian Chancellor of the Exchequer. 4. In the probable and possibly early disintegration of the huge and unwieldy Russian empire. 5. In the hollowness of the triple alliance, which can never unite the German, the Austrian, and the Russian so long as the Baltic Province Question remains unsettled, and the Slavonic protectorate puzzle is still unsolved. 6. In the approaching violent agitation ‡ of the Eastern Question which will undoubtedly excite the bitterest feelings of hostility towards Russia on the part of Moslems generally, and our Indian Mussulmans in particular. Sir George Campbell has lately been assuring the British public that there is no bond of feeling between the Mahommedans (Sunnis) in India and the "Sultan of Room" (Constantinople). Now, I venture to assert that the opinions of nine out of ten Indian officers (military or civil) who have ever conversed on the subject with any intelligent representative of the feelings of our Indian Mahommedan fellow-subjects, would be of a contrary nature. Be this, however, as it may, we would prefer to follow the guidance of an undoubted authority like Sir William Muir, who has openly testified to the difficulties which the Indian Government may have to face should the feelings of our Indian Mahommedans be roused by the action of Russia. 7. In the early prospect of Russia receiving, whilst in her lustful pursuit of conquest, such a blow as will prevent this disturber of the peace of the world from recovering either her position in Europe or her *prestige* in Asia. 8. And last, but not least, in the watchful attitude of our Home and Indian Governments. One word yet remains. Many of our great English authorities, when writing on Russia, have given the whole weight of their influence and endeavours towards the movement for eradicating what they term "English distrust of a great and friendly (?) Power." Now, if the millennium had arrived, and, consequently, if all nations could remain in undisputed possession of what they had already acquired, an outburst of love and affection for Russia on the part of the English people would be much to be desired; but so long as the Russian character retains its Tartar elements and its Oriental type, so long will Englishmen who have not allowed themselves to be carried away by feelings of pure sentiment turn with suspicion and distrust from a people who connect double-dealing with diplomacy, and from a nation whose interests are being secretly shaped, so as to clash in the future with their own.—I am, &c.,

WALTER E. GOWAN,

London, March, 1877. Capt., H.M.'s Indian Army.

P.S.—Whilst apologising for the great length of this communication, I beg to be allowed to state that my only object in writing thus fully is to give my countrymen the benefit of those convictions which a study of the Russian language and a close observation of Russian character during a recent residence in that country have enabled me to form.

---

* Russia has returned somewhat sooner than was expected to the pursuit of her old game of annexation under the cloak of Christian sympathy, &c.

† Witness the manifestations at the Kazan Cathedral in St. Petersburg, I think in October last; and in ghastly contradiction to the assertions of the Russian Press, that it was an affair of no moment, the hideously severe and cruel sentences dealt out by Russian justice to some twenty individuals.

‡ Russia has declared war against Turkey, and has informed Europe that her sole object in doing so is to free her brethren (the Slavs) from the oppression of the Turkish yoke. If this is so, is she justified in carrying the war amongst the Mahommedans of Asia Minor? If this is so, is she justified in seeking to filch territory not in Europe—notably the much-coveted port of Batoum in the Black Sea?

ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I am much obliged to your correspondent "Common Sense," who is quite unknown to me, for his advocacy of my unfortunate case in your issue of April 28. The question seems to me to be not one of "common sense," but of "common justice." Nobody believes that service in India can be a crucial test of administrative ability there or elsewhere. Sir W. Muir does not believe it himself, because if he did, he would not have promoted Mr. John Small, who never saw India. "The greatest fool in the world" may serve in India for twenty years, and yet come out "the greatest fool in the world." The real question is: Suppose the rule to be the best that can exist, to be an infallible test of administrative ability, to be most important to the welfare of the country in general, and to the efficiency of the department in particular—bestow any eulogy upon the rule you please—still the real question remains: Why, when this local rule was found to be so excellent, that it was resolved to make it general in its application, was this resolve not made public for the information of those whom it most concerned? When Sir W. Muir said to me in June last—"I think I see my way to giving you your promotion," why was this "general" rule not mentioned also? When Sir William, again, in November following, said to me—"The names of the two officers just above you have gone in for promotion, and you shall be in the next Gazette," why was I left in ignorance of the "generalizing" of this rule? And, therefore, I ask publicly, is it in accordance with the laws of English justice that the prospects of an old officer, of acknowledged experience and general service, should be destroyed at the very moment of expected success by the "generalization" of a local rule, however excellent, which has never been promulgated as such to the department, either virtually or by Warrant, letter, circular, or memorandum. It is hard, sir, to lose, to all intents and purposes, twenty-seven years of continuous service to my country in peace and war, but I feel it much harder to bear that I should be pronounced "unfitted" for administrative duties in my profession by the head of my department, who has had an ample opportunity of judging from personal experience, and who, I know, has been pleased more than once to express a very different opinion, not only to myself, but to many others.—I am, &c.,

R. COOPER TODD.

11, Bouverie-place, Folkestone.

SIR,—Surely it is not intended to disfranchise a considerable number of the medical officers because they have not served in India, and for causes over which they have no control! Nearly two-thirds of the administrative appointments are made for service at home and in the colonies; hence the absurdity of such an arrangement is self-evident. Tropical service is much the same everywhere, and a man who has treated and looked after British soldiers, say in the West Indies, is as capable of taking care of them in India. I believe I am correct in stating that a somewhat similar rule was formerly in force as to brigade commands in that country, but, owing to its inconvenience and unfairness, has been some time abolished.

A. M. D.

INDIAN RETIRING ALLOWANCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Several Warrant officers of the Indian Army have represented to the Government of India the inconsistency in the scale of retiring allowance, and I would ask to be allowed to notice the same in your columns, in view to its coming under the observation of the India Office authorities, to whom the matter has been referred. The regulations which were framed last century may have answered the time when there were few Europeans in India. They allow a man with twelve years' service who invalids and remains in India a much higher rate of pension than one who completes his full term of service, and desires to return to England, or to proceed to one of the colonies. At the present day this equality appears absurd. No other class in the Army receives a higher pension by remaining in a certain country, nor is any inducement held out to invalid before the completion of the term of service required for pension. Should a Warrant officer live to retire in the rank of deputy commissary (sad to say, very few do) he would receive in England £15 a-month, but in India 240 rupees—*i.e.*, £24 a-month. Government must acknowledge that the few who retire in the grade of deputy commissary after a service of thirty to forty years in India in responsible appointments well deserve the 240 rupees a-month for the few remaining years of their lives; then why should they not be allowed to draw it in any of her Majesty's dominions, and not be mulct £9 a-month on embarking at Bombay? I consider that the time has arrived for a revision. If it is considered that the Indian rates of pension are too high, then take the mean of the Indian and English rates, or say deputy-commissary £240 a-year assistant-commissary £180, deputy assistant-commissary £13 conductor £100, sub-conductor £80. A Warrant officer inv liding after serving half the prescribed period, to recei four-fifths of the pension of his rank; if of less service, th the reduced allowance sanctioned for the next lower gra This would be a very fair scale, and would involve no ex expenditure. Few Warrant officers live to enjoy a pension, and the small increase to the English rates would be counterbalanced by the saving effected in the pensions of those who invalid to suit themselves with short service.—I am, &c.,

W. O.

London, May 1.

THE NAVIGATING CLASS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I can assure you the navigating class are much obliged to you for assisting in obtaining the change of Admiralty Circular of Oct., 1876, about navigating and pilotage duties of the Fleet, by another issued last week, dated March, 1877, which gives acting navigating sub-lieutenants, on passing, all their seniority on Sub-Lieutenants' List, if they choose to accept it; and as Art. 8 of the October Circular is repeated in March, some captains have given their decision that, as staff-commanders and navigating-lieutenants by Art. 11 of the same Circular are to have the same appointments and do the same duties as before—viz., navigating duties—therefore, each will be "the officer appointed for navigating duties" in the ship to which he belongs, and as their seniority has been for many years according to date of commission with commanders and lieutenants respectively, so those captains intend to allow (by Art. 8) in their absence the officer appointed for navigating duties, whether he be staff-commander, lieutenant, or navigating-lieutenant, to take command according to seniority, which will enable the navigating officer to have authority to do those duties he is responsible for, and not depend on the inclination or willingness of an officer much his junior to carry out his directions. Often in difficult circumstances the senior officer's power or authority is disputed, and when the captain or flag officer hears of it, very often they have said—"Why don't the Admiralty give you authority to do your duty?" and order the disputing lieutenant to do what the navigating officer requires; but, in the meantime, the damage has been done. Now, by this Circular the authority will be acknowledged by seniority, so that in navigation and pilotage, about moorings, &c., in the absence of the captain he will be able to carry out his duties. This is what most of the navigating officers wish, and not transfer to the Executive List, which Mr. Hunt says he expects to be done in a few years, as will be seen by only half of the navigating-lieutenants promoted last Oct. choosing to accept the offer to go on the Lieutenants' List. What many navigating officers wish is, that the Admiralty should give staff-commanders and navigating-lieutenants retired pay, according to the small scale of age and service as commanders and lieutenants, and not transfer except for that object; and as there is only about an average of one promotion a-year for staff-commanders to staff-captains, by making the maximum retired pay of staff-commanders £450 a-year, it would prevent so many applicants to every vacancy in dockyards; and instead of making it promotion by seniority, the Admiralty would be able to select those they thought most fit, because those passed over would, by serving, not lose in their retirement. If these suggestions should be carried out as to retired pay, and anticipate by a few years what will be a general rule to those beginning to serve now, and in some measure those who have served long and well, will get what would not injure the advancement of any other officer, and fairly satisfy their claims.—I am, &c.,

A READER.

ARMY REORGANIZATION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the last letter which you did me the favour to publish I suggested that among the probable ill-effects of the changes in Army reorganization now proposed, one would be an increase of Parliamentary interference in the Army, as opposed to the authority of the Commander-in-Chief at the Horse Guards, nominated by the Crown. This, one can understand, is just what the extreme section of the Liberals would, viewing the matter only in a political light, desire. A little reflection should make it clear, however, that the discipline of the Service must suffer from divided authority. "No man can serve two masters" is a truth superlatively true when the man is a soldier; and as it is not generally desired that the Government of this country should become Republican, it seems unnecessary further to weaken the influence of the Sovereign over the Army. There was, I believe, an instance not long since in which an officer declared at a public meeting assembled in opposition to the Government, at a moment of intense political excitement, that he should not draw his sword, if ordered to do so in defence of Turkey, against Russia. The officer referred to was a member of Parliament. Here we have an example how the spirit of military discipline can be subordinated to political animus, or a sense of responsibility to Parliamentary constituents. The events of the last eight months might suffice to make our rulers pause before they transfer more power from the Horse Guards, in matters of military discipline and regulations, to the elective branch of our Legislature. All modern history proves how unfit popular assemblies are to make laws for soldiers. What a sad spectacle does ours now present to Europe of divided counsels in a crisis of paramount national importance! With what astonishing fatuity have we blinked at, and so favoured, Russian designs upon Constantinople—designs which again began openly to shape themselves as soon as France succumbed to Germany, once or twice upon even an indirect show of resistance on our part, single-handed, notably upon the order for our Fleet to move to Besika Bay! Russia seemed to draw back, and although this happened in less than eight months after the Turkish Government (acting, it is said, upon the advice of Ignatieff) had declared itself insolvent. Nevertheless, national vanity felt flattered by the effect created by this apparent hint to Russia. War on the part of that Power seemed to be really averted. The deposition of the Sultan Abdul Aziz following so closely after, on May 30th, was, by the enemies of Turkey and England alike, attributed to British influence; the Russian Ambassador, whose power over the Sultan had been great, retired from Constantinople, and for a time conspiracy appeared to be defeated. The attitude of our Government was at that time very dignified; its characteristic was calm determination. The Opposition made no sign. But in September all was changed. The Government, hitherto so popular and so strong, was suddenly shaken to its foundations by news of atrocities in Bulgaria, and by the way in which this news was put before the people by more than one eloquent tongue and too facile pen. History will declare whether the faction had anything to do with the concealment from the English people of certain facts—to wit, that the perpetrators of "the atrocities" were not only Ottoman Turks, but in numerous instances Circassians, who, driven from their homes in the Caucasus, when the Christian Russians annexed their country, were given an asylum, 150,000 of them, in Turkey seventeen years before; that in many instances the atrocities were committed by Mussulman, converts of the Slav race, and not by "the one great anti-human specimen," or Ottoman race; and, lastly, that prior to any Christian massacres, the Christians in Bulgaria had, at the instigation of Russian pan-Slav agents, commenced a rebellion against the Turkish Government, and massacred many unoffending Mahommedans. From that time all has been vacillation on the part of Government, and Russia has steadily advanced; and now, with marvellous assurance, the Opposition, having thwarted the original policy of the Government, affects to hold it responsible for failing to preserve peace. Cant has triumphed for the time, and we find war declared on behalf of freedom and Christianity by the Power that, in 1873-74, massacred Christians of the Uniat Greek Church in Poland for refusing to join the Ritualistic and Orthodox Greek persuasion, of which the Czar is Head, or Pope; while at home we have seen a suicidal change of front all at once executed under the influence of exaggeration and fanaticism, and England, with forty millions of Mahommedan subjects, countenancing a new crusade. Our Opposition orators have suddenly discovered that Russian soldiers are the worthy vindicators of humanity, and that Christianity is to be preached by "that evangelical weapon the breechloader," while Turks, who were "Bono Johnnies" during the Crimean war, are now "the one great anti-human specimen." What a satire is to be read now in the epitaph composed by the great Liberal scholar and orator Lord Macaulay for the monument to our soldiers at Scutari, in which they are declared to have died "in defence of the liberties of Europe!" It is a significant fact that for twenty years, while the Turks paid seven and ten per cent. on money borrowed from us, we heard no abuse of them by the men who, since they became bankrupt, have been loudest in denouncing them, and it is also little calculated to allay suspicion as to the disinterestedness and purity of these agitators' motives to remember that during the same period the Russian Government, which previous to the Crimean war had borrowed only £12,000,000, has since raised £147,000,000 by foreign loans, of which about £102,000,000 are due to England. In 1854 Russia had half-a-million sterling to pay as interest on her foreign debt. Now she has increased the sympathy of foreigners, for the most part English, in her stability, by owing them as interest on money received some £10,000,000 a year. It is but fair to remember these things when we have the sins of Turks studiously paraded before the British Lion, while their pious invaders are lauded as the champions of Christianity. In the present divided condition of our country the prospect is not reassuring. "We have peace without tranquillity, greatness without intrinsic strength, the present time uneasy, the future dark and threatening." This iniquitous crusade, and, above all, the soldierly and noble proclamation of the Sultan, will excite every Mahommedan pulse in India. Already we begin to feel its effect upon Afghanistan, while for Europe we may well suspect that with France for the present only convalescent, Germany will balance any gain to Russia on the Black Sea coasts by an intrusion of her own upon the Baltic. The gospel preached to us daily in the *Times* is that the strong can do no wrong. Certainly this is not the time to select for tampering with the soldierly *esprit de corps* which more than anything else has hitherto borne our noble Line Infantry regiments, even in spite, at times, of blundering commanders, triumphantly through so many battles, proudly even through some disasters.—I am, &c.,

C.

April 30.

The Proclamation of the Sultan will be understood throughout the East as a threatened *Jehad*, or fight for the Mussulman faith. It indicates desperation. We may thank Christian bigotry for it.

TERRITORIAL REGIMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It may be asked whether the problem of bringing the Line and Militia together in close association cannot be achieved by means less radical than the changes recommended by the Military Forces Localization Committee? It is maintained that something must be done to prevent localization becoming a mere sham, and in this we all agree; but the measures to bring this about might be modified so far as to make it more acceptable to the mass of the Army, who would then view it as a desirable, instead of a repugnant reform. It is true no change can be introduced without bearing hardly on some, but let the measure of hardship be minimised as much as possible. For instance, if some plan like the following was laid down as the basis of the reform, it would, while producing the effect intended—that is the localization of our regiments—give at the same time greater elasticity to our military organization, and would also retain the numerical designations of most of our regiments. We know that our present number of Line battalions enables us to keep one half abroad and one half at home; but we also know that we have no margin, as it were, left for contingencies, and there is always a likelihood, therefore, of the present system of relief either being unduly taxed or collapsing altogether. Looking at this (and also at the war, which has probably, ere this, broken out, and which might any day draw us into its vortex), we should increase our present force by adding twenty-eight or thirty more second battalions to one single battalion regiment. I think if this was done we could leave intact the numbers of our regiments up to the 77th or 78th. The regiments above that number could either be linked to corresponding ones of the same county association, becoming their second battalions, or could remain simply as at present linked, with their officers and men interchangeable. And by a readjustment of our present Brigade Depots, reducing their number from sixty-eight to forty-two, or forty-five, we could retain at the headquarters of each of these depots a battalion, which, being permanently associated with it, would make localization a reality. The question of cost would be, of course, one of the chief arguments used against the adoption of any scheme like the above, but even this might be surmounted if economy in other branches of our military administration were duly practised. I will only note here that we are the only nation in Europe that still go on retaining the excessive number of companies (10) in a battalion. The Germans, French, Russians, and Austrians consider four service and one depot company sufficient for a battalion. But we are told we cannot follow this rule, our battalions having so much foreign service to perform. To this I would answer, let the battalions on foreign service have eight companies, if it is proved that a less number would not be sufficient; but why keep the battalions at home on this excessive establishment?

F. O.

If the above scheme is carried out with the present number of battalions, and the existing Sub-Districts under the heading "North British," it is evident that there must be sad giving up of famous names, serious disruption of old associations. It is natural to suppose, therefore, that the first aim of those in power will be not only to reduce this regrettable necessity to the very smallest possible limit, but also to take care that the designations adopted by the reconstituted regiments shall be those which bid fair to remain in the future—as they notoriously have been in the past—the most valuable adjuncts to that great factor, *esprit de corps*. It is consequently submitted, for reasons which will appear as we proceed, that it would be advisable to add to the battalions now posted to Scotland two national regiments which at present appear relegated to South Britain. For let us glance at the problem before us. We have to deal with completely separate corps, and it is proposed to reduce these by just half the number, or into double regiments. The task, moreover, is greatly complicated by the requirements of the roster for home-foreign service, according to existing stations. With twelve battalions, as now allotted to the six Sub-Districts above, it is not possible to comply with the last clause, and to complete the work satisfactorily. It would surely be far preferable, then, to make a slight change in the programme, and to even allow of certain temporary deviations from the letter of the theory, in order to insure a really strong union and a final and complete success. Going carefully through the list of regiments, and putting aside those which, already consisting of two battalions, are fortunately not affected, it is believed that a verdict must be found for retention, as primary titles, of the following:—Cameronian, Royal Highland, the Black Watch, Ross-shire Buffs, Cameron, Argyllshire, Gordon and Sutherland Highlanders. The grand difficulty is to link these seven to the others not chosen; bringing in, whenever possible, part of the so-to-speak lapsed title, and making one selection in each case upon the not easily reconciled grounds of historical propriety and the exigencies of the public service. Hereunder is a proposed solution, taking the Highland Brigade first. To the Royal Highland Regiment should be, as a matter of course, rejoined its old second battalion, now the 73rd. There would be no opposing traditions to get over, no heart-burnings to smooth down. Quite the contrary. But there remains the troublesome fact that both are abroad. If circumstances should render this objection insuperable, give the rightful place of the 73rd to its sister, the 90th. The Perthshire Volunteers would thus become absorbed into what has always been considered as, *par excellence*, the representative regiment of their native county. The 71st and 78th are left as proposed in the official scheme. The Cameron Highlanders, now allied to the 42nd, and in such a manner as to entail complete wreck of identity for both, receives the old second battalion of the Black Watch. The Perthshire by this means gets back its Highland character, if not its original connection. The 74th and 91st are placed together. Both were raised in the West Highlands, and from much the same sources. The 75th joins the 92nd. It thus obtains partial restoration of its old traditions, and escapes total suppression and loss of nationality. The 93rd are united with the 72nd, a regiment formed like it in the northern counties, and which has, besides, no clan name to lose. This completes the Highland Brigade, which, as reformed, would stand—each regiment with one battalion at home, one abroad—thus:—Royal Highland, the Black Watch, 42nd—90th; Highland Light Infantry, Ross-shire Buffs, 71st—78th; Queen's Own Cameron Highlanders, 73rd—79th; Princess Louise's Argyllshire Highlanders, 74th—91st; Gordon Highlanders, 75th—92nd; Sutherland Highlanders (Duke of Albany's), 72nd—93rd. There remains the "Cameronian" Regiment. To it join the 99th—although both are, for the moment, at home—and add the title, "Duke of Edinburgh's," 26th—99th. In conclusion, let it be remembered with hope by all who love our glorious Service and its memories, that Mr. Hardy is reported to have said that the scheme, as officially printed, is not final, that regiments disposed to seek more kindred fellows will receive full justice. The writer of the foregoing rough notes but desires, while yet there is time, to draw the attention of stronger pens than his own to the point he has worked up to—the necessity for revision in the exceeding harshness of the present linking. He is one who believes that localization is thoroughly sound in theory, and that it is, if due pains be only taken, susceptible of being carried into practice without trenching upon traditions which may rightly be called sacred. Leaving to English and to Irish officers the task of showing where the shoe pinches in their cases, he ventures to claim for his own countrymen treatment more liberal, consideration more careful than that suggested in the published list.

SIR,—Should the highly obnoxious territorial scheme be forced upon the Army, let us see if we cannot in some slight manner preserve the highly-valued traditions of the British Infantry. You are, doubtless, aware that though the Prussian Infantry all wear scarlet collars and cuffs, their shoulder-straps, both officers and men, vary in colour. If amalgamation of regiments be finally decided upon, let regiments now wearing different facings adopt blue collars and cuffs, and let each retain cloth shoulder-straps of their old colours on which their former number and badge should be retained, officers' shoulder-straps to be faced with gold. For Highland corps I suggest the universal use of the Royal Stuart tartan. The term "Royal" is too freely lavished in the new scheme. I am glad to see in the appendix to the report that it is proposed to keep the old battalions intact with their numbers, badges, and battles. I conclude that the accoutrements, cap-plates, &c., will have to bear the brigade numbers of the territorial regiment. A universal blue cuff and collar would simplify matters still more.—Yours, &c.,

A GENERAL OFFICER WITH THIRTY-EIGHT YEARS' REGIMENTAL SERVICE.

April 5.

THE SYSTEM OF ATTACK.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the present system of attack great difficulty is sometimes experienced in practising the movement in which the supports close on the shooting line before the final rush on the enemy. This difficulty is due to the fact that a great many more men are present in the "attacking line" companies than would be the case in actual warfare. As it should be the object of peace manœuvres to reproduce as accurately as possible a picture of actual war, I would suggest that the casualties which occur when exposed to hostile fire should, in practice, be represented by men falling out. Each of the commanders of the leading companies—*i.e.*, the attacking line—should be provided with tickets to the amount of 30 per cent. of the number of men in his company. These, with the aid of the section leaders, he would serve out to the men as they advanced to the attack. Each man receiving a ticket would fall out and lie down. Similarly, the "supporting line" companies should have tickets issued to them to the extent of 12 per cent. of their numbers. The total strength thus lost in an attack would be 21 per cent., certainly not an excessive allowance. The men would be practised in filling up the gaps which necessarily occur in such a movement, and the confusion incidental to the attack could be organized and practised in peace time. It is obvious that this system would apply equally as well to the defence as to the attack, and that it may be used to realise many different cases, such as a sudden gap made in a line by a shell, &c. The object of the tickets is to ensure the detection of men falling out without permission.—I am, &c.,

WALTER H. JAMES, Lieut. R.E.

SIR,—It is possible the British Army may ere long find itself face to face with an enemy. A good deal has been written and said about the new form of attack. Now, it occurs to me that there is a very simple method, and one which I have not yet seen advocated, for forming your first or attacking line with support. Let the base of all attack movements in the open be from the line formation. First, form line whatever your attacking force of Infantry may consist of, section, half company, company, battalion, or brigade, and so on *ad infinitum*. Select whatever may be necessary, be it (as before stated) section, company, any particular companies, battalion, or even brigade, according to circumstances, and let the front rank only of the selected portions receive the word "Quick march"; these can be opened out, *i.e.*, extended from any flank or named man, and compressed again at pleasure. The rear rank will next follow also in rank entire as support, and, if necessary, can form loose files by word of command, "Fours deep." The remainder can be manœuvred in reserve exactly as circumstances, ground, &c., may call for. I think that even half-drilled recruits would easily pick up this simple method of forming for attack; and commanding officers would not be puzzled when just coming under fire with intricate movements requiring a good memory and cool head even upon the parade-ground. If you think this suggestion worthy of insertion, I shall feel much flattered.—I am, &c.,

MILITIA ADJUTANT.

PROMOTION AND RETIREMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

"Sceptic" writes:—"A strong feeling having gained ground in the Army that the present state of political affairs may be the means of postponing, and, in case of war, entirely annulling the retirement scheme for officers, and this opinion being strengthened by the marked reticence of the Secretary of State for War with regard to the time when this measure is to be introduced, also his statement made some time since implying prolonged delay by the Treasury, and the present advanced state of the Session, are all creating a feeling of distrust and irritation, which is none the less mischievous because suppressed to the outer world. Allow me, therefore, to point out that it is the continued doubt surrounding this question which constitutes essentially its injurious feature. There are in nearly every regiment some officers who have been "holding on" for years in the hope of being able to retire on better terms than those offered by the Army Regulation Act of 1871. These form a by no means desirable class to retain in the Service. They may go through their duties in conformity with regulations; but there is a great difference in a duty performed mechanically and one wherein heartiness and zeal are exercised, and this especially in a Service which much must necessarily depend solely upon the true loyalty of its members; and at whose instigation are we retaining this effete element at the cost of those who have made the Service their profession, whose interests are centred, and who seek their rewards in it, and not out of it? These will soon be brought to a state of apathy and disgust which stagnation and the hopelessness of success must inevitably engender. Retirement will remove the existing evil, promotion will avert an impending one. But what hinders a clearance and perpetuates this state of stagnation? It is the feeling of hope which many officers still entertain. Fulfil this hope or dissipate it if you like, but do not prolong it, and the evil will speedily be mitigated. It, therefore, cannot be too emphatically urged that an immediate declaration should be extracted from the Government whether it is intended to bring the Army Retirement Scheme before Parliament this Session, or postpone it to the next, or entirely to dispose of it; for, next to the scheme itself, nothing would be so effective a means of creating retirement and promotion as the certain knowledge that nothing further was to be obtained from the country." [Our correspondent may read Mr. Hardy's statement in the House on Thursday night with some benefit.—Ed. A. and N. G.]

INTER-REGIMENTAL MATCH.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your paper of the 28th ult. you call attention to the officers' and sergeants' inter-regimental rifle matches having been kept open for entries an extra fortnight this year, and also announce that, unless better supported, Capt. Thompson will not have anything more to do with them. It seems a pity that these contests should cease, and I, therefore, wish to show the reason why several regiments have ceased to enter. When the matches first commenced, five officers from each regiment constituted the team. With the result of the shooting for the year 1875, issued from Aldershot, Aug. 4, seven new propositions were annexed for the consideration of regiments, to be carried out if agreeable to the majority of competitors in the following year. Early in the year 1876 the conditions of the next match were published, and it was then found that the number of each team to compete had been reduced to four. This was not one of the seven propositions submitted for consideration, and it bore on its face the possibility of favouritism to some particular regiment, for I know one regiment which, when on home service, particularly wished the number reduced from five to four, because it had that number of first-class shots, and the fifth man spoilt its average. I know some regiments which have decided never to enter under the present system, and I am certain the match might be continued annually with increased interest and far larger entries if the numbers to constitute regimental teams were made ten, or even more; and I hope, at any rate, before the whole thing is allowed to die out, that a match under these conditions may be tried. All thanks are due to Capt. Thompson for having, I believe, originated the contest, and the trouble he has taken in it; but if he will not continue his services unless under the present system, I feel sure there are other officers interested in rifle shooting who would undertake them.—I am, &c.,

KENNEBEC.

ARTILLERY ORGANIZATION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your leader in your last issue calling attention to the reorganization scheme for the Royal Regiment of Artillery, which is to come into operation in July, and the effect it will have on the position of the lieutenant-colonels, and reduction of Brigade Staffs as affecting the sergeant-major and quartermaster-sergeant of the absorbed brigades, forces on my mind the anomaly of keeping upwards of twelve hundred officers on the roll of one regiment. Just think for a moment if the whole of our Cavalry regiments constituted for the officers one regiment, and that on every step of promotion or vacancy an officer was to be removed from Lancers to Dragoons or Hussars, what little interest or *esprit de corps* an officer would have whilst serving with any Cavalry regiment to that which he now has; and, to add to the confusion of an arrangement such as this, it were possible to throw in as a prize, or, as an apple of discord, the occasional selection from amongst these Cavalry officers for filling up vacancies in the Household Brigade of Guards, just imagine the difficulty and confusion and labour in keeping all these thousand officers in control and good temper! Now, such is the actual position of the officer of the Royal Regiment of Artillery; only, instead of the Household Brigade as a prize, we have the jacket of the Royal Horse Artillery, the acquirement of which is the ambition and test of family patronage of every young officer of the regiment; and, once worn, although relinquished when becoming a captain, is again sought for as the dearest prize in the Service. How much better would it have been in carrying out this reorganization that every double brigade should be like the first and second battalion, or the linked battalion system, and the officers of this double brigade to be in every sense the officers of that regiment, and that the Royal Artillery be divided into three regiments of Royal Horse and eleven regiments of Royal Artillery, to which and to each regiment the officers should be exclusively posted, and take promotion in that double regiment as officers in the Line do in regiments having one or more battalions. The linked home or foreign service portions of the Artillery regiment would be better divided into half garrison and half mounted, so as to be able to select from the large body of officers and men those best adapted for mounted or garrison work, transferrable at the discretion and judgment of the senior colonel, and so obviate the necessity of turning drivers into gunners. Just think for a moment the great good it would do to have officers and men constantly serving together, instead of as now. The officers are half their lives running about, on every step of promotion, from one branch of the Service to another, from one end of the world to another, leaving foreign stations on promotion to come to batteries at home or elsewhere, going on leave on promotion, going on leave on coming home from foreign stations, going on leave on being ordered to proceed to a foreign station, staying at home on leave until their battery returns from abroad, and when the battery comes home again transferred to some place to replace a Staff appointment, or to replace somebody else who has got a Staff place, or an arsenal or other employment. Whilst all this is eternally going on, just think how the Service must suffer, and how it must affect the actual duties of regiment or interest of the men of the battery with which they are for the time connected or serving with. In fine, the first and best improvement to the Regiment of Artillery would be dividing these twelve hundred officers into the fourteen separate regiments which now constitute brigades, and the lieutenant-colonel's portion to be under his control and government, just as much as a lieutenant-colonel of Infantry or Cavalry have their regiments, and should have his Staff, and move with them home and abroad just as other regiments are now constituted. The Artillery stations to which batteries proceed are, on arrival, placed under a colonel of the regiment already stationed there. He knows none of the men coming under his command. They, on leaving, go elsewhere under another strange commanding officer, and so the Artillery Service is passed through without *esprit de corps* or knowledge of each other, just as if the captain of a man-of-war was stationed for five years on board, receiving every other year fresh men to join his ship and compose his crew. Then look at the travelling expenses alone which these 1,200 officers incur constantly moving here and there on one appointment or another. Quite different if each served together in the usual regimental system, where each vacant promotion or appointment would be filled up in the brigade he belonged to. This Artillery system of 1,200 officers taking seniority promotion, replacing each other in different parts of the world, destroying all local interest in the portion of the regiment they chance to serve with, is so monstrous, so expensive to the country, so expensive to the officers, so wasteful, so absorbent of the strength of the regiment, so destructive to the *esprit de corps*, so injurious to the soldier and non-commissioned officer, creating Staff and acting Staff officers, and swallowing up the men in dribblets of detail as servants, batmen, orderly men, fatigue men, and so hide them away that few are left for ordinary duty, that sufficient are not left to form an ordinary parade, except when occasional pressure is exercised. Do, Mr. Editor, please call the attention of the Service to this glaring system of the Royal Regiment of Artillery

May 1, 1877. BY ONE ON THE SHELF.

THE PAY OF ARTILLERY OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As the impression that the officers of the Royal Artillery are more highly paid than those of the Infantry of the Line seems to be very general both in and out of the Service, may I ask you, in justice to the former corps, to give publicity to the following facts. The actual daily pay of officers of both Services is shown by the following:—Infantry—Lieutenant-colonel, 17s.; major, 16s.; captain, 11s. 7d.; lieutenant after ten years, 7s. 6d.; after three years, 6s. 6d.; lieutenant, 6s. 6d.; second lieut., 5s. 3d. Artillery—Lieutenant-colonel, 18s.; major, 14s. 6d.; captain, 11s.; lieutenant after ten years, 7s. 10d.; after three years, 6s. 10d.; lieutenant, 5s. 7d.. In addition to the above, lieutenant-colonels of Infantry receive 3s. a-day command pay and £20 a year non-effective pay, thus making their total daily pay £1 1s. 1d. Only one out of every four lieutenant-colonels of Artillery receives 3s. a-day command pay, and none of them any non-effective pay. Therefore, one-fourth get £1 1s. a-day, and three-fourths only 18s. a-day. The senior major of every Infantry battalion receives £20 a-year non-effective pay; therefore, one-half the majors of Infantry receive 17s. 1d. a-day, and the other half 16s. a-day. A major of Artillery receives 1s. 6d. a-day command pay, which he forfeits when on leave, but none of them receive any non-effective pay, thus making their total daily pay, when not on leave, 16s. The Infantry major is always entitled to forage for a horse. The Artillery major is only so entitled when he is required for field officer's duty, under which circumstances he is compelled to have a horse. He is, therefore, put to constant expense in buying and selling horses as he moves from one station to another. There is also an impression abroad that Artillery officers have some mysterious allowances which increase their pay. I wish they had, but they have not; there are no such things. The above facts prove that no lieutenant-colonel of Artillery gets the same pay as lieutenant-colonels of Infantry; though one-fourth come within about 35s. per annum of this amount, the remainder get about £54 a-year less. The major of Artillery, if he avails himself of the ordinary two months' leave, gets £4 10s. per annum less than the junior majors of Infantry, and £24 10s. less than the senior majors. If he takes no leave he gets equal pay with the junior majors of Infantry, whether the latter take leave or not; but majors of Artillery are always at a disadvantage with those of the Line (who always draw forage allowance for a horse) in that at one station they are compelled to buy a horse to do field officer's duty, and in the next station they move to they may not be allowed forage for it. The captain of Artillery gets £10 5s. a-year less than the captain of the Line. If he commands a battery during the major's absence on leave, he gets 1s. 6d. a-day command pay. The lieutenant of Artillery gets about £6 a-year more than in the Line. There may be deep, inscrutable reasons why this seeming disproportion of pay should be kept up; if so, perhaps, some of your correspondents may be able to suggest them. But, while things remain in this state, officers of the Royal Artillery should certainly have the full credit of serving their country for less pay, coupled with more hard work, than those of other arms of the Service; and this honour and glory is not now, I fear, very generally accorded to them, there being a widespread impression both in and out of the Service that they get much harder work because they get much better pay. Young men wishing to enter her Majesty's Army would do well to consider the above facts, and decide whether they prefer the Line with little work and little pay, or the Artillery with hard work and still less pay. They may pass a very happy life in either, but many may think the question of choice worth some consideration, particularly if about to face the terrors of the examination for the R.M.A.—I am, &c.,

GUNNER.

SOLDIERS IN CUSTODY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Through your columns devoted to the Service, I would beg leave to suggest some remedy to render the sight to be witnessed in Aldershot on every Friday morning less garish. Nothing in Doré's illustrations of the groups depicted in the adventures of "Don Quixote" is so grotesque, or can equal the grim humour with which the police here fasten together with handcuffs in twos or threes the miserable human elements which compose the clearing out of the Aldershot police-cells on the day after the weekly sitting of the bench of magistrates. The man without a shirt, the vagabond without a hat, the little tatterdemalion, the sturdy beggar, the old debauchee, the genteel youth, the gipsy—all mixed up with an equal number of soldiers. They are fastened indiscriminately—here to a tall soldier in blue, there to a taller or smaller in red, handcuffed to each other in the most fantastic and miserable of grouping by which vice and misfortune could be possibly linked together. Some Friday morning as few as four or six only, at other times as many as twenty, and almost always followed by one or two female unfortunates, or with occasionally a young girl charged for petty theft. All these prisoners, conducted through the public streets to the railway station, *en route* for Winchester Gaol, for terms of imprisonment varying from two or three weeks to longer periods, or for trial, gather a crowd of spectators! On arrival at the station the handcuffing compels them to drag each other up the step into the railway carriage, to be exhumed in the same fashion, and to resume the same street procession at Winchester to the gaol. The substitution, in the absence of a covered conveyance, of a garb, in place of a military uniform, would render the miserable scene less garish and less offensive to the public eye, and, whilst punishing crime, would disassociate it from her Majesty's uniform. To effect this, the Superintendent of Police might have so many suits of county gaol clothing in charge, which could be made use of, and the prisoner's clothing sent in a bundle ticketed to Winchester. And this system of uniform by handcuffing might be dispensed with, and, when used, be part of the sentence from the bench, and not left to the discretion of the police constable to link the soldier to the miserable vagabond outcast, to the degradation of the Service.—I am, &c.,

INDIGNANT.

The following officers have leave from Malta to England to Sept. 15, viz.—Capts. Taylor and Carr, and Lieut. Barton, 27th; Brevet Major O'Malley, 71st; Lieuts. Hadfield, Powis, and Prior, 98th; and Major Jervis, Capt. Macleane, and Lieuts. Walker, Cooke, and Evans, 101st.

THE RUSSIAN INFANTRY.

The Russian Infantry has lately been completely reorganized, and it is now, like other branches of the Service, formed very much after the German pattern. The recruits join at 21 years of age, and serve for 6 years in the Active Army and 9 in the Reserve. The reservist can only be called out twice in peace, during his 9 years' service, for a 6 weeks' training. The Infantry comprises Guards, Grenadiers, Line, and Rifles. We shall first consider the Guards. These consist of 12 regiments organized in 3 divisions of 4 regiments each. Each regiment has 4 battalions of 4 companies. The names of the Guard regiments are as follows:—1st Division: Prevbrajenski (raised 1682), Semenovski, Ismailovski, Suchina. 2nd Division: Moscow Grenadiers, Pavlovski, Finland. 3rd Division: Lithuanian, Keksholm Grenadiers, St. Petersburg Grenadiers, Volhynski. The 1st and 2nd Divisions are stationed at or near St. Petersburg, the 3rd at Warsaw. The Grenadiers form 16 regiments in four divisions, and of these 3 bear the numbers 1-3; the 4th is called the "Caucasus Grenadier Division." The regiments have three battalions, as have all Russian Line regiments not stationed in the Caucasus. The regiments of Caucasus Grenadiers have four battalions. The Line regiments form 41 divisions of 2 brigades of 4 regiments. There are, therefore, 164 Line regiments. The 41st Division was formed in 1875-6 out of the Caucasus frontier battalions, which, originally 24 in number, now form only 7 battalions. The divisions are regularly formed—*e.g.*, the 1st Division consists of the 1st, 2nd, 3rd, and 4th Regts. The regiments have been entirely renumbered since the Crimean war. Then each of the 21 divisions had 2 Line and 2 Rifle regiments—*e.g.*, the 1st Division had the 1st and 2nd Line and 1st and 2nd Rifle Regiments. The whole were renumbered by divisions from 1 to 84 in 1856-59. Thus, the 32nd Rifles, the "Kazan" regiment, well known to our gallant veterans of the Alma, is now the 64th. The 85th and 88th Regts. were formed from 12 Finnish battalions, and the 89th and 160th by changing Reserve into Line regiments. There are three exceptions to the regular series of regiments. The 4th Division contains the 13th, 14th, 3rd, and 4th; the 1st Division the 1st, 2nd, 71st, and 72nd; and the 18th Division the 69th, 70th, 15th, and 16th Regts. Each regiment bears a name by which it is more generally known, and many have honorary colonels or "chiefs." The army corps organization existed in Russia till 1864, when a divisional administration was substituted for it. An ukase of March 3, 1877, however, prescribed the formation of one corps of Grenadiers and eight of the Line, which, together with the Guard corps and the six (7th to 12th) already mobilized on the Pruth, gives the Russian Army 16 army corps of two or three divisions of Infantry and one or two of Cavalry. The Caucasus Grenadiers, 19th, 20th, 21st, 38th, 39th, 41st, and Caucasus Dragoon Divisions, all stationed in the Caucasus, and the 2nd, 3rd, 23rd, and 40th Divisions at Kazan, Nijni-Novgorod, Helsingfors, and Saratov, have been left out of the army corps organization. We read in the *Politische Correspondenz*, of Feb. 22, that the 39th, Caucasus Grenadier, and Caucasus Dragoon Divisions are already formed into an army corps; and in the *Allgemeine Zeitung*, of April 8, that the 3rd and 40th Divisions have been sent, presumably formed in one corps, to reinforce the Army of the Caucasus. The following table shows the distribution of the divisions:—

Corps.		Infantry Divisions.		Cavalry Divisions.
Guard.	...	1st, 2nd, and 3rd Guard.	...	1st and 2nd Guard.
Grenadier.	...	1st, 2nd, and 3rd Grenadier.	...	14th.
I.	...	22nd, 24th, 37th.	...	1st.
II.	...	25th, 26th, 27th.	...	2nd.
III.	...	28th, 29th.	...	3rd.
IV.	...	16th, 30th.	...	4th.
V.	...	7th, 8th.	...	5th.
VI.	...	4th, 6th, 10th.	...	6th.
VII.	...	15th, 36th.	...	7th.

IX.	...	5th, 31st.	...	9th.
X.	...	13th, 34th.	...	10th.
XI.	...	11th, 32nd.	...	11th.
XII.	...	12th, 33rd.	...	12th.
XIII.	...	1st, 35th.	...	13th.
XIV.	...	17th, 18th.	...	Don Cossacks.

The head-quarters of the corps are distributed as follows:—Guards, St. Petersburg; Grenadiers, Lublin; 1st, St. Petersburg; 2nd, Wilna; 3rd, Riga; 4th, Minsk; 5th, Radom; 6th, Warsaw; 13th, Titomir; 14th, Kiev. The head-quarters of the 7th and 12th Corps were in the field when the corps were formed, so their peace station is not yet known. There are two establishments on which the Russian Infantry can be placed—viz., the peace and the war footing. The "increased peace" and "cadre" establishments were abolished in 1874. Regiments of 4 battalions have 3 battalions of Infantry and one (the 4th) of Rifles, each of 4 companies. This formation will ultimately be extended to all the regiments of the Army, but at present they each consist of 3 battalions each of 4 companies of Infantry and one of Rifles. The 7 divisions in the Caucasus are exceptional. A company of a 4-company battalion consists of 216 privates; that of a 5-company battalion 180. The following table shows the strength of the regiment:—

	4-Batn. Regt.		3-Batn. Regt.	
	Peace.	War.	Peace.	War.
Officers	70	86	60	76
Volunteers	64	64	60	60
Non-commissioned officers	100	320	150	270
Musicians	75	75	68	96
Privates	2000	3600	1500	2700
Non-combatants	141	244	128	159

On mobilization each Line regiment forms a reserve battalion. A reserve regiment of 4 battalions is formed for the Guard corps. Each battalion has 4 companies of 216 armed and 9 unarmed men. In a battalion the commandant, 4 captains, the master-of-arms, and two clerks belong to the standing Army; the remainder of the *personnel* come from the Reserve or Militia. There are, therefore, in all 168 reserve battalions of Infantry formed, which can be combined in brigades and divisions and sent to the front. In addition, 192 Ersatz battalions are formed (12 Guard, 16 Grenadier, and 164 Line) to instruct recruits, gather reserve men, and furnish drafts to fill up the vacancies caused by war in the ranks of the active battalions. Each battalion has a cadre of 12 officers, 40 non-commissioned officers, 10 drummers, 64 corporals, 2 officials, 45 non-combatants and 18 orderlies, and a variable effective of 16 officers, 32 volunteers, 1,000 men, 100 non-combatants, and 16 orderlies. When a draft is sent to the front, more reserve men are called up, the youngest classes first, to fill up the vacancies in the variable effective. We now come to the Rifles. These troops are organized by battalions which are grouped by four into brigades. There are eight such brigades, called the Guard, 1st-5th, Caucasus, and Turkestan Rifle Brigades. The Guard battalions are named as follows:—Emperor's Tsarskoe Selo, Finland, and Imperial Family's Battalion. The Line battalions are numbered 1-20, 1st-4th Caucasus, and 1st-4th Turkestan Battalions. The brigades are formed regularly, as in the Infantry divisions. Previous to 1870 the battalions were attached to divisions of Infantry. On mobilization, an Ersatz battalion is formed by the Guard and each of the six European brigades having the same composition as the Infantry Ersatz battalions. A battalion of Rifles on the war footing has four companies, each of 5 officers, 18 non-commissioned officers, 180 riflemen, and 5 buglers; or, 208 of all ranks. A battalion has 836 combatants, 98 non-combatants, 4 ammunition, and 10 other waggons. In addition to the Line Infantry regiments, there are frontier battalions formed in Asia and the Caucasus. These are distributed as follows:—Orenburg, 2 battalions (which are, however, at present stationed at Kokand and Tashkend); Turkestan, 15; Western Siberia, 4; Eastern Siberia, 6; and the Caucasus, 7 battalions. These are consecutively numbered within their own districts. The Caucasus battalions contain 3 companies of Infantry and 1 of Rifles, the other 4 of Infantry and 1 of Rifles. Their strength is as follows:—Caucasus Battalions—Officers, 21; volunteers, 16; non-commissioned officers, 80; musicians, 18; privates, 900; non-combatants, 31; horses, 88. Others—Officers, 26; volunteers, 20; non-commissioned officers, 90; musicians, 31; privates, 900; non-combatants, 60; horses, 53. Russia possesses also 24 fortress battalions, distributed as follows:—Novogeorgievsk, 4; Kronstadt, Sveaborg, and Brest-Litovsk, each 3; Dünaborg, Ivangorod, and Kertch, each 2; Wiborg, Robruisk, Warsaw, Bender, and Alexandropol, each 1. Those battalions can be formed into regiments of 4 battalions, and thus made available for service in the field. Each battalion consists of 20 officers, 80 non-commissioned officers, 16 volunteers, 18 musicians, and 900 men on the war footing. Lastly, we come to the local troops. These are distributed as shown by the following:—Battalion cadres—Europe, 8; Caucasus, 1; local command cadres—Europe, 35; Caucasus, 12; local battalions—Europe, 10; Caucasus, 2; Asia, 8; local commands—Europe, 468; Caucasus, 2; Etappen commands—Europe, 21. In war the battalion cadres become regiments of 4 battalions, and the local command cadres battalions of 2 or 4 companies. These troops perform escort, guard, and police duties in the interior. In peace their strength, in Europe and the Caucasus, amounts to 74,677; in war to 132,920 of all ranks. If we sum up the strength of the Russian Regular Infantry we find that there exist on the war footing, in all, 874 field, 199 Ersatz, and 103 local battalions distributed as follows:—Field troops—Guards, 48 battalions; Grenadiers, 36; Caucasus Grenadiers, 16; 35 Infantry divisions of 12 battalions, 420; 6 Infantry divisions of 16 battalions, 96; Rifles, 32; frontier battalions, 34; fortress battalions, 24; reserve battalions, 168; total, 874 battalions; Ersatz troops, 199; local troops, 103; general total, 1,176 battalions. In the above enumeration we have purposely placed the fortress and reserve battalions (the latter corresponding to the German 4th battalions) among the field troops, as they are available for service beyond the frontier. It must also be noted that some of the local battalions are, in reality, only half-battalions. The organization of the Russian Infantry has undergone a great change since the Crimean war. Formerly each regiment had a reserve battalion, in which recruits were trained. They now join the active battalions at once, and the training, which is very similar to that of the German soldiers, is carried on by the company officers. The uniform of the Infantry is simple and practical. It consists of a dark green tunic and trousers, a black cloth képi (schapka), with a plume similar to those worn till lately by our Light Infantry, long boots, a long great-coat, and a hood. In the Guard the tunics have scarlet turnbacks for the first 3 regiments of the 1st and 2nd Divisions, yellow for those of the 3rd; the 4th regiments have dark green turnbacks. The Preobrajenski regiment wears a black leather helmet with a black plume, the Pavlovsk regiment a "grenadier" cap. The Guard regiments have facings, which are dark green for the 3rd and 4th regiments of divisions, red and blue respectively for the 1st and 2nd regiments of the 1st and 2nd Divisions, and yellow for those of the 3rd. A band, on which is the regimental number, is worn round the cap, and is red for the 1st Regiments of the 1st and 2nd Divisions, yellow for the 1st regiment of the 3rd Division, and blue, white, or dark green for the 2nd, 3rd, and 4th Regiments respectively of all three divisions. The first three battalions of the first three regiments of all three divisions have white belts, all other troops have black belts. The plume is white and the shoulder-strap red, for the Guards. Grenadiers and Line have dark green collars and képi-borders. The 1st regiments of divisions and the Caucasus, Orenburg, and Turkestan Frontier battalions have red slashes on the collar and red cap-bands; the 2nd regiments and Siberian battalions light blue, the 3rd white, and the 4th none. Grenadiers have yellow shoulder-straps, the 1st brigade of each Line division red, and the 2nd brigade light blue, with the number of the division. Rifle battalions have crimson facings, with turnbacks for the Guards, except the Finland Guard Battalion, which has light blue. Fortress and local battalions have dark green shoulder-straps. The knapsack is made of calf-skin, and the mess-tin is strapped on to it. Two pouches hold the ammunition. We have been thus particular in enumerating the distinctive details of uniform, as without them it is impossible to recognise a regiment. The Berdan rifle has been adopted as the weapon for the Russian Infantry. By the latest accounts the Guards, Rifles, and sixteen Line divisions are at present armed with Berdans. The 1st, 18th, 22nd to 37th, and 40th Divisions, and the local troops have Krüka, and the Caucasus, Orenburg, Turkestan, and Siberian troops have Carle rifles. We have now only to consider the Cossack Infantry. These are composed of 6 Kuban Rifle, 9 Orenburg Infantry, 12 Transbaikal, 2 Amur battalions, and a Siberian half-battalion; or, in all, 29½ battalions, with effectives varying from 600 to 920 privates The Russian Infantry is at present in a transition state both in its organization and in its *personnel*, and the impending war will show us whether the new free soldiers fight better than the serfs, who never used to know when they were beaten.

THE RUSSIAN CHANCES.

Writing from Kischeneff on the 10th inst. the Special Correspondent of the *Daily News* says:—

Without venturing to indicate in advance what may be the intentions of the Russian strategists in regard to the crossing of the Danube, and without being in possession of any definite, far less communicable, information respecting the subsequent movements they may have so far decided on as the plan of the campaign, it may nevertheless not be unseasonable to make a few remarks regarding the initial differences which make themselves apparent between the obstacles which the Russians have had to overcome in previous offensive operations against Turkey and those which now confront them. It will, I think, be abundantly apparent that the prospects of the campaign now commencing are infinitely more favourable than those to which Wittgenstein had to look forward when he led his army across the Pruth in May, 1828. Wittgenstein had under his command three army corps, having a total strength, on the maximum reckoning, of 84,000 men. The Grand Duke Nicholas crosses the Pruth in May, 1877, in command of six army corps, having an effective strength of 216,000 soldiers already seasoned by a winter and spring spent practically in the field. Sickness was decimating Wittgenstein's army while as yet it was in the Principalities—sickness the germs of which it had carried from Bessarabia—and his sanitary arrangements were of the most feeble and rudimentary character. The Grand Duke's army of to-day underwent a special inspection before the frontier was crossed, and the weak and sickly were strictly weeded out. The health of the marching army is reported excellent; surgeons are in full complement, ambulance trains and hospital equipments have taken precedence in the railway, even of munitions of war, and the Roumanian civil and military hospitals open their doors to receive the Russian sick. Wittgenstein's men had to tramp every verst of the way through a country practically roadless, from far in the interior of Russia down to the pontoon bridges on the Danube; and every pound of supplies, every load of munitions of war had to be conveyed by road transport—if the word is applicable to a region where at that time the roads were mere tracks. To-day the Russian battalions may travel from the place of their mobilisation to the bank of the Dannbe by railway; those who march find in Moldavia and Wallachia on the main routes chaussées which will compare with our best turnpike roads in England, on the side routes roads which are, it is true, deep in mud in wet weather, but afford excellent travelling in dry; and the railway, which has conveyed such of the troops as do not march, is available for the conveyance of provisions and munitions of war, solving in a great measure the hardest problem of every offensive war, the difficulty of maintaining that steady current of supplies which is necessary for the subsistence of an army in an enemy's country. In 1828 Wittgenstein had to cross the Danube in the face of eleven Turkish fortresses more or less formidable—Widdin, Nicopolis, Rustchuk, Giurgevo, Turtukai, Siiistria, Hirsova, Matchin, Braila, Isatchia, and Tulcha, not to mention Turnan and the tête-du-pont of Kalafat. One of these fortresses, Braila, delayed one of his corps before it from May the 11th to June 18th, but Braila is now a peaceful trading city of Roumania, rather nervous just at present on the subject of shells from Turkish gunboats. Giurgevo is no longer of Turkey, but of Roumania, and is an open town. To-day at Kalafat no Kuchuk Pacha as in 1828, no Osman Pacha as in 1854, sits watching for his chances on the flank and rear of a force essaying to cross the Danube. Nicopolis, Tutukai, Hirsova, and Isatchia are fortresses no longer even of the Turkish type, but practically open places having stuck about them a few crumbling batteries armed with honeycombed guns; Silistria till three months ago stood as when the Russians, repulsed by the efforts mainly of Butler and Gly recoiled in 1854 from before its battered ramparts and yawning breaches; Widdin is a piece of patchwork; Rustchuk is indeed formidable if adequately armed, not as a fortress, for the fortress of Rustchuk proper is rotten and obsolete, but as an entrenched camp, on a fine site, commanding if not indeed forbidding, the crossing of the river on its frontier. Matchin was a place of strength before rifled cannon came to be used in sieges. Wittgenstein had no siege train, and his men sickened and died waiting in the trenches while the weary work of mining was sluggishly proceeding. There has gone towards the Danube already, not one, but several siege trains, such as would do credit to any army in Europe. The Turks have a fine and a deserved reputation for the desperate defence of fortified places, and history tells us how at Braila, Varna, and Silistria the "peaceful inhabitants" manned and fought the breach regarded as defenceless by the "professional soldier." Rifled arms of offence are sad foes to unscientific heroism. A Maid of Saragossa is incompatible with Krupp and Armstrong as contemporaries; and I do not think it would be rash to hazard the prediction that never more in civilised warfare shall we have occasion to witness the *ultima ratio* of the storming of a breach. The history of the Franco-German war is studded with sieges, but the student of it will search in vain for the story of the mustering of a forlorn hope.

Time is everything in such a campaign, for even under the most favourable circumstances it would be a severe strain on Russia that the mass of her army should have to winter in Bulgaria. Wittgenstein indeed crossed the Pruth in the early part of May; but he did not find himself in condition to cross the Danube till the 9th of June. It was not until the 11th that the whole of his 3rd Corps—constituting his army of invasion—was across the great river. Impeded by the resistance of Braila, Rudjevitsch marched slowly, and had only got 75 miles down the Dobrudscha on the 25th June. There he waited eight days for the fall of Braila, stayed another week at Bazardjik for the 7th Corps, which had had been besieging that fortress, to come, and finally was in a position near Varna only in the middle of July. It took him thus 34 days to march the 180 miles between Isatchia and Varna, but deducting the halts I have named he did the distance in 20 days,—which is at the rate of nine miles a day, very good marching under the circumstances. But I wish more particularly to contrast the time made in 1828 with that on which we may count in 1877. There can be no doubt that if the Russian left determines to cross at Isatchia, with intent to march down through the Dobrudcha, Schackosky will be across at the latest before the 1st June. He will have no occasion to make the halts which were enforced on Rudjevitsch till Braila should have fallen and the reinforcements released from its siege should have come up. Sherman on that famous march of his from Atlanta to the sea averaged 16 miles a day *de die in diem*. But assuming that Schackosky marches in 1877 at no faster rate than Rudjevitsch in 1828, he would have reached the vicinity of Varna in 20 days, or at the latest about the 20th of

June. By all accounts there is little prospect of his encountering serious opposition from the Turks *en route*. In twenty days from now, that is by the 1st of June, there can be no doubt that the centre and left of the Russian army will be on the Danube, if not across it. From no point between Kalarash and Giurgevo is the Danube distant so much as a hundred miles from Schumla. There seems no reason apparently why the Russian main body, having left investing forces to deal with Silistria and Rustchuk, if needed, should not be in front of Schumla by the same time that the left is in the neighbourhood of Varna. There would remain then the alternatives of a concentration of centre and left against Schumla, or of the left operating separately, while the centre should "hold" the Turkish army in Schumla, or actively proceed against that entrenched camp, as might be resolved on. Such a position attained by the beginning of July leaves at the command of the Russians four available months for subsequent operations, and the withdrawal across the Danube before winter time of such troops as the exigencies of the situation might not render it expedient to winter in Bulgaria. There is no reason so far as I can see—for I have no expectation that the Turks will stand up for a day against the Russians in the open field if they ever meet them there—why the Russians in 1877 should not do as did the Russians under Diebitsch in 1829, and concentrate their columns south of the Balkans on the 27th of July. Before then circumstances may have occurred which will materially alter the intentions which they now express respecting their line of action subsequent to the crossing of the Balkans.

General Fadieff holds, in his "Opinions on the Eastern Question," that for 150,000 Russians to reach Constantinople, the number he considers capable of accomplishing that feat, it would be necessary for 250,000 men to cross the Danube. The Russians do not aim at reaching Constantinople, but it is quite certain that the strength Fadieff names for crossing the Danube is available for that purpose. Six corps are already within reach of the Grand Duke Nicholas's hand, viz., four which constitute the army bearing the technical name of "the army of operation," and two more constituting the army of Odessa. The total strength of these six corps is 216,000 men, 49,200 horses, and 648 cannon. In addition to this great force, three more corps are fully mobilised, and are being drawn down into Bessarabia as the troops of the army of operation march out. This represents a further strength of 108,000 men, so that the Russian army now mobilised available for the invasion of Turkey reaches a total strength of 324,000 men. I am not in possession of particulars respecting the composition of the three corps last named, but the following are the details of the composition of the six corps constituting the army of occupation and the army of Odessa:—

I.—ARMY OF OPERATION (ROUMANIA).

Commander-in-Chief—Archduke Nicholas Nicolaieff.
Chief of Staff—General Adjutant Nepokoitschitsky.
Sons Chef—Major-General Levitsky.

8TH CORPS.

Commander—Lieutenant-General Ravetsky.
Chief of Staff—Colonel Dmitrowsky.

9TH INFANTRY DIVISION.
1st Brigade—33rd and 34th Regiments.
2nd Brigade—35th and 36th Regiments.

14TH INFANTRY DIVISION.
1st Brigade—53rd and 54th Regiments.
2nd Brigade—55th and 56th Regiments.

8TH CAVALRY DIVISION.
1st Brigade—8th Dragoons, 8th Uhlans.
2nd Brigade—8th Hussars, 8th Don Cossacks.
14th Brigade—*Field* Artillery.
9th Brigade—Field Artillery.

9TH CORPS.

Commander—Lieutenant-General Baron Brudener.
Chief of Staff—Major-General Schnitnikow.

5TH INFANTRY DIVISION.
1st Brigade—17th and 18th Regiments.
2nd Brigade—19th and 20th Regiments.

31ST INFANTRY DIVISION.
1st Brigade—121st and 122nd Regiments.
2nd Brigade—123rd and 124th Regiments.

9TH CAVALRY DIVISION.
1st Brigade—9th Dragoons and 9th Uhlans.
2nd Brigade—9th Hussars and 9th Don Cossacks.
5th Brigade—Field Artillery.
31st Brigade—Field Artillery.

11TH CORPS.

Commander—Lieut.-General Prince Schackowsky.
Chief of Staff—Colonel Biskupsky.

11TH INFANTRY DIVISION.
1st Brigade—41st and 42nd Regiments.
2nd Brigade—43rd and 44th Regiments.

32ND INFANTRY DIVISION.
1st Brigade—125th and 126th Regiments.
2nd Brigade—127th and 128th Regiments.

11TH CAVALRY DIVISION.
1st Brigade—11th Dragoons, 11th Uhlans.
2nd Brigade—11th Hussars, 11th Don Cossacks.
11th Brigade—Field Artillery.
32nd Brigade—Field Artillery.

12TH CORPS.

Commander—Lieut.-General Wannowitz.
Chief of Staff—Major-General Duckmasson.

12TH INFANTRY DIVISION.
1st Brigade—45th and 46th Regiments.
2nd Brigade—47th and 48th Regiments.

33RD INFANTRY DIVISION.
1st Brigade—129th and 130th Regiments.
2nd Brigade—131st and 132nd Regiments.

12TH CAVALRY DIVISION.
1st Brigade—12th Dragoons, 12th Uhlans.
2nd Brigade—12th Hussars, 12th Don Cossacks.
12th Brigade—Field Artillery.
33rd Brigade—Field Artillery.

ARMY OF BLACK SEA.

Commander-in-Chief—General-Adjutant Temocko.
Chief of Staff—Major-General Goremykin.

7TH CORPS.

Commander—Lieutenant-General Prince Barclay de Tolly-Weimarn.
Chief of Staff—Major-General Sanowsky.

15TH INFANTRY DIVISION.
1st Brigade—57th and 58th Regiments.
2nd Brigade—59th and 60th Regiments.

36TH INFANTRY DIVISION.
1st Brigade—141st and 142nd Regiments.
2nd Brigade—143rd and 144th Regiments.

7TH CAVALRY DIVISION.
1st Brigade—7th Dragoons and 7th Uhlans.
2nd Brigade—7th Hussars and 7th Don Cossacks.
15th Brigade—Field Artillery.
36th Brigade—Field Artillery.

10TH CORPS.

Commander—Lieutenant-General Prince Woronsow.
Chief of Staff—Baron Wolski.

13TH INFANTRY DIVISION.
1st Brigade—49th and 50th Regiments.
2nd Brigade—51st and 52nd Regiments.

34TH INFANTRY DIVISION.
1st Brigade—133rd and 134th Regiments.
2nd Brigade—155th and 156th Regiments.

10TH CAVALRY DIVISION.
1st Brigade—10th Dragoons, 10th Uhlans.
2nd Brigade—10th Hussars, 10th Don Cossacks.
13th Brigade—Field Artillery.
34th Brigade—Field Artillery.

An Infantry division consists of 4 regiments, each having 3 battalions, and of 3 batteries, 9-pounders, and 3 of 6-pounders, each of 8 guns.

A division is equal to 16,000 men, 48 guns.

A Cavalry division consists of three regiments of regulars and one of Don Cossacks.

The 7th Cavalry Division has two batteries of regular horse artillery of six guns each, every other division one battery regular horse artillery, and one battery of Don Cossacks (horse) of six pieces each.

	Men.	Horses.	Guns.
Army of operation (4 corps).........	144,000	32,800	432
2nd Army (2 corps)......................	72,000	16,400	216
	216,000	49,200	648

There are in addition four battalions of Sappers, three battalions of pontoniers, ten regiments of Cossacks of the Caucasus and Ural, one brigade of Rifles, one battery of mitrailleuses, three batteries of mountain guns, one company of Marines of the Guard, and two companies of railway artificers.

THE EAST INDIA CLUB.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I was, in common with many members of the old "East India United," glad to read the remarks in your last issue. That the club is in want of members there can be no doubt whatever; but new candidates for election can hardly be expected to come forward while the club retains its present name. Of the officers who yearly obtain commissions in her Majesty's Service, not one in twenty is aware that he is eligible for admission to an old-established house whose name implies an exclusiveness which no longer exists. The "United East India Service" is a thing of the past, whereas the comfortable old house in St. James's-square is a present fact to many who have never set foot in India. New Service clubs, some proprietary, are springing up in all directions, and are joined by many young officers ignorant of the fact that an old establishment is open to them. It is not for me to say a word in praise of a club which I have used for years; but I may, perhaps, be permitted to note with pleasure the "run" upon our house, at various times, of honorary members temporarily deprived of their bachelor homes.

May 16. OMEGA.

IMPERIAL AND COLONIAL RESPONSIBILITIES IN WAR.

A paper on the above subject was read a few evenings ago by Capt. J. C. Colomb, R.M.A., at a meeting of the Royal Colonial Institute at the Pall-Mall Restaurant. The chair was occupied by the Duke of Manchester, the president of the institute, and there was a large attendance. The lecturer expressed his opinion that there was no such thing as a distinction between Imperial and colonial responsibility, and that in war all must share, according to their ability, the Imperial burden of defence. Some colonies were doing much towards providing military means to resist attack, while others were doing little or nothing. Canada, with a population of about 3,500,000, furnished an example to the English race. Her commercial progress in peace did not blind her to the necessity of being prepared for war. Glancing at the possible condition of the Pacific Ocean, he said the Russian naval force in the Pacific was practically independent of European arsenals, and that of America entirely independent of Atlantic dockyards, while our Pacific fleets had to rely for support on Portsmouth and Plymouth, and could only receive stores and reinforcements round the Cape or through the Suez Canal, and our military force was caged at the other side of the world. In view of such developments in the North Pacific, Australia was virtually concerned in the honour and supremacy of British naval power in that region. Not only was Australia deeply concerned in the proposed Canadian Pacific Railway, but it was a matter of vast importance to us at home. As he had for years persistently pointed out, these islands must not only be guarded against invasion, but also be secured against investment. After referring to other advantages of this railway, and strongly urging its construction, he said that, with regard to telegraphic communication, while Russia could put her Pacific armies and fleets in motion three minutes after the order was given from St. Petersburg, we could only send messages through United States' officials, who were not responsible to us if they never reached their destination. In adopting the principle of "fragmentary defences," which deprived us of the power of concentrating naval power or military force, we were forgetting our past history, and doing our best to deprive all British territory and all British sea lines of intercommunication of efficient naval protection in war. Our fleets would want other things besides military garrisons at their bases. In these days they would need dockyards near at hand, providing sufficient means of repair; and they would require a sure, steady, and certain supply of coal and telegraphic communication. A great Imperial dockyard at the other side of the world was a most apparent necessity, and there were economical as well as strategical aspects of the question of an Imperial dockyard at Sydney. We must hold together on the sea. To do so England and her colonies must combine, and the British Empire "grapple to its soul with hooks of steel" the strategic points of power on the sea. Capt. Colomb concluded by urging the value of an Imperial Commission—such as he suggested ten years ago, and had humbly pleaded for many times since—which, he said, would let in a flood of Imperial light upon the "parochial" English mind, and let the world know we meant to stick together in defending each other. (Applause.)

Mr. E. J. Reed, M.P., in the discussion which followed, said the paper called to mind many defects in reference to very great Imperial questions. We were, for instance, a great naval nation, without a single particle of naval system. We were constantly building vessels which could not go away from our own shores. England, he contended, ought never to spend any money on vessels unless they could proceed to sea if requisite. Not only could we not organise our home arrangements with any approximate success, but he thought we failed very miserably indeed when they looked further afield. Of all the important points in the paper none excited so much interest in his mind as the reference to our possessions in the North Pacific. The circumstances of our different possessions varied, but those in the Pacific were precisely those which Russia might aim at for permanent possession and occupation. We ought, therefore, to bestow the greatest possible care on them. He entirely concurred in the establishment of a dockyard and naval station in the southern seas, and said it would be advantageous in a pecuniary sense to their country to establish such a station and dockyard. He believed the colonies would take an important part in this establishment. He should be delighted to see a Royal Commission appointed, as Capt. Colomb had advocated. After a few remarks from other gentlemen, the discussion was adjourned to Friday next.

THE VICTORIA CROSS.

The following is a list of the officers now serving on full, retired, or half pay who wear the Victoria Cross:—

Lieut.-Gen.	Sir C. Dickson, K.C.B., Royal Artillery.
"	Lord H. H. M. Percy, K.C.B.
"	J. Travers, C.B., Bengal Infantry.
Major-Gen.	E. W. D. Bell, C.B.
"	Sir S. J. Browne, K.C.S.I., C.B., Bengal S.C.
"	M. C. Dixon, C.B., retired full pay, Royal Artillery.
"	T. de C. Hamilton, retired full pay, 68th Foot,
"	F. F. Maude, C.B.
"	Sir D. M. Probyn, K.C.S.I., C.B., Bengal Cavalry.
"	W. Olpherts, C.B., Royal (Bengal) Artillery.
Colonel	R. H. M. Aitken, retired full pay, Bengal S.C.
"	J. Blair, Bengal Cavalry.
"	W. M. Cafe, Bengal Infantry.
"	Hon. H. H. Clifford, C.B., half pay, late Rifle Brigade.

We (*Irish Times*) are glad to learn from a private source that Lieut.-Gen. Sir Neville Chamberlain, G.C.B., G.C.S.I., is recovering from his recent severe illness, and that he will not vacate his command of the Madras Army unless he finds himself absolutely compelled to do so, a contingency which is happily considered to be unlikely.

REVIEWS.

Russia. By D. Mackenzie Wallace. (Cassell, Petter, and Galpin.)

The peculiar advantages enjoyed by Mr. Wallace from his long residence in the country, his intimate acquaintance with its language, and his untiring energy in prosecuting his researches into questions of importance, render it impossible that he could fail in preparing a highly interesting work on Russia. The points to which he has principally directed his attention are the study of the communal tenure of land and the results of the recent emancipation of the serfs. These subjects appear to have, in Mr. Wallace's opinion, altogether eclipsed in interest several others, such as the military strength of the country, the exact state of its finances, the comparative positions of its commerce during the last half-dozen years, and its general administration. We should naturally have looked forward with pleasure to a lengthened discription of each of these important subjects, as no one can doubt that they would have met with able treatment at the hands of the author. However, the two volumes now published are in this respect very disappointing. The reader may, if he wish, become intimately acquainted with the nature and condition of the Russian peasant, but he will not add materially to his already acquired knowledge on some questions regarding the status of the Russian Empire, which are of far greater importance. Mr. Wallace gives ample evidence in his Preface of the interest he took in his study of the manners and customs of the Russian peasantry. He says:—"In March, 1870, I arrived, for the first time, in St. Petersburg. My intention was to spend merely a few months in Russia, but I unexpectedly found so many interesting subjects of study that I remained for nearly six years—till December, 1875. During that period my winters were spent, for the most part, in St. Petersburg, Moscow, and Yaroslaff, whilst the summer months were generally devoted to wandering about the country and collecting information from the local authorities, landed proprietors, merchants, priests, and peasantry." The amount of material which, from one source or another, became available for Mr. Wallace's purposes, was, of course, very large; in fact, the accumulation of six years of busy labour. He mentions that in the present work he has only used such material as seemed most likely to interest the general public, and attributes any merit it may possess to the assistance so liberally afforded to him by Russians of all classes. There can be no doubt of the difficulty of selection which must necessarily arise when dealing with such a mass of material; but it will, at the same time, be felt that the author exhibits a singular want of judgment when wholly ignoring or only partially glancing at subjects of very far greater interest than even the condition of the Russian peasant, or the consequences of the abolition of serfage. The "Mir" is explained at very great length in the 8th chapter of the first volume, and no doubt presents an interesting subject for enquiry. It appears that a Russian village is something very different from a village in an Englishman's sense of the term, and that the villagers are bound together by ties quite unknown to the English rural population. In the latter the isolation of individual families may become quite perfect; each minds its own business, no one else's; but amongst the families composing a Russian village such a state of isolation is impossible. Every family is more or less affected by the conduct of others in the same village, because all the families are collectively responsible for the taxes payable by each individual family. Everything is ordered by the Commune, and it would appear that this powerful institution understands the meaning of "backshesh." Any member may absent himself and take employment elsewhere with the consent of the Commune, and if he remits his taxes regularly he will probably not be interfered with; but it does sometimes happen that a member in the enjoyment of a handsome salary has been suddenly summoned back to his village, however, some little bird whispers to him that it may be squared by judicious backshesh, and the money thus extorted enables the Commune to make merry. In case the reader wishes to accompany Mr. Wallace in endeavouring to master the mystery of the "Mir," and satisfy himself as to how it works, we can only refer him to the 8th chapter, in the full conviction that if its study does not make him understand both theory and practice, nothing will, but at the same time in the earnest hope that he will not become a convert to such pernicious doctrine as that taught by the Mir. In the 31st and 32nd chapters of the 2nd vol., Mr. Wallace treats at considerable length the question of the results of the emancipation of serfs both as regards the landed proprietors and the peasantry, and with respect to the former he thus writes:—"On all proprietors the emancipation had, at least, one good effect—it dragged them forcibly from the old path of indolence and routine, and compelled them to think and calculate regarding their affairs. The hereditary listlessness and apathy, the traditional habit of looking on the estate with its serfs as a kind of self-acting machine, which must always spontaneously supply the owner with the means of living, the inveterate practice of spending all ready money, and of taking little heed for the morrow—all this, with much that resulted from it, was readily swept away, and became a thing of the past. I remember once asking a proprietor what effect the emancipation had on the class to which he belonged, and he gave me an answer that is worth recording. "Formerly," he said, "we kept no accounts and drank champagne; now we keep accounts, and content ourselves with beer." Mr. Wallace considers that on the whole the proprietors in some regions receive larger revenues than before the emancipation, but that their material condition has not improved in consequence of the increased cost of living and the difficulties of administration. We must refer the reader to the 32nd chapter of the 2nd vol. to enable him to understand Mr. Wallace's theories regarding the more difficult question of the consequences of emancipation to the peasantry. He admits that many evils exist, but believes that they may be greatly remedied by a careful revision of the financial system in general, and of the land dues in particular, and, still more, by a well-organized and extensive system of emigration. With regard to the future, he by no means desponds, but accepts the bold and successful way in which Russia solved the difficult problem of emancipation of the serfs as a pledge that she will, in due time, also overcome the agrarian difficulties that still lie before her. While cheerfully admitting the care and research evidenced by Mr. Wallace in enquiring into the habits and customs of the Russian peasantry, in explaining the mystery of the "Mir," and pointing out the result of the emancipation of the serfs, we must, at the same time, express our regret that we have not, by the perusal of these volumes, increased our store of information by one particle as to the condition and status of the Army of Russia, or learned more as to her financial position than we can at any moment glean from the current number of the "Statesman's Year Book."

Capt. P. Geraghty has been appointed a Military Knight of Windsor on the Lower Foundation. Major Geraghty served in the Eastern campaign of 1854-55 including the battles of Alma, Balaklava, Inkerman, and Sebastopol (medal with four clasps and Turkish medal). Served in the Indian campaign of 1857-58 as adjt. of the 20th Regt., and was present at the actions of Chanda, Umeerpore, and Suttanpore, and at the siege and capture of Lucknow (medal with clasp). He was promoted to an ensigncy from the ranks, Nov. 5, 1854; became lieut., Feb. 17, 1855; capt., Sept. 10, 1858; retired upon half pay, July, 1862; and afterwards was employed for many years as Town-Major of Kingston, C.W., and Montreal. He retired upon full-pay pension April 1, 1870, and subsequently commuted his retired allowance.

Major von Vietinghoff, Military Attaché to the Imperial German Embassy, was examined on Tuesday before the committee of the House of Commons, appointed to inquire into the best means of providing civil employment for soldiers and sailors who have served their time. The chairman explained the nature of the inquiry, and, having suggested that the committee were very desirous of knowing how the system of granting civil employment to soldiers in Germany was regulated, witness stated that non-commissioned officers and privates were entitled to civil employment after twelve years' entire service. All the higher engagements in the War Offices were held by men who had served in the Army. The lower engagements in all the Government offices were filled from the military service. When the Service was in thorough working order there would be 122,089 positions to be given to non-commissioned officers. The salaries they would receive ranged from a little under £45 per annum upwards. The men were very much in favour of the system, and, in a great many instances, it was a great inducement for them to join the Army.

Lieut.-Col. Sir J. S. Cowell Stepney, of Llanelly, Carmarthenshire, died on Tuesday at the age of eighty-six. He entered the Coldstream Guards in 1809, and served in that regiment during six campaigns. He was present with the regiment in the retreat from Busaco, lines of Torres Vedras, advance to Santarem, affairs of Redinha and Foy d'Aroućе, battle of Fuentes d'Onor, siege of Ciudad Rodrigo, covering army of Badajoz, battle of Salamanca, affair of Larena, siege of Burgos (where he led a storming party, Oct. 18), retreat into Portugal and subsequent advance into Spain, affair of Osma, battle of Vittoria, affair of Tolosa, siege of St. Sebastian and affair on the Bidassoa, after which he left the Army for England in command of a detachment in charge of the garrison of St. Sebastian as prisoners of war. In 1814 he was at the bombardment of the French fleet at Antwerp, in 1815 Waterloo campaign and capture of Paris. He received the war medal with four clasps and the Waterloo medal, and was one of the last surviving Knights of the Guelphic Order of Hanover. He retired from the Army on June 15, 1830. He was afterwards a Deputy-Lieut. for Carmarthenshire, of which county he was High Sheriff in 1862, and was for some years a member of Parliament for the Carmarthen Boroughs.

A Parliamentary return shows that the total amount of money raised and issued out of the Consolidated Fund, under the provisions of the Military Forces Localization Act, up to March 31, 1876, was £808,000; and the total amount expended was £913,702 8s. 1d., showing an excess of expenditure of £105,702 8s. 1d. Sir W. Dunbar, having called the attention of the War Office to the matter, was informed that "no communication was made to the Treasury for further funds on account of the balance of £105,000 due under the Military Forces Localization Act," and he has, he says, been led to infer that, inasmuch as at the date of the excessive expenditure in question, "the Defence Loan Account showed a balance of £115,000 in favour of the Lords Commissioners of her Majesty's Treasury," a portion of that balance was applied to localization purposes. "I can, however," Sir W. Dunbar says, "feel no hesitation in stating that, inasmuch as it appears from the Consolidated Fund Accounts that the amount advanced from the loan for defences was not replaced till August in the following year (1876-77), an earlier adjustment of the account should have taken place, even if such an advance was necessary at all, in a case where Parliament has distinctly provided the means by which the necessary expenditure is to be met."

ADMIRALTY CIRCULAR.

We stated a few weeks since that it was the intention of the Admiralty to establish certain rules under which the boilers of ships in commission were to be periodically tested by water pressure, and we now give the regulations on the subject as laid down by Fleet Circular No. 6:—

In order to establish a definite and uniform practice in regard to the testing of the boilers of her Majesty's ships and vessels in commission, and for the guidance of officers in command as to the safety of working the boilers at the original or reduced load on safety-valves, my Lords Commissioners of the Admiralty are pleased to direct that in future the boilers of her Majesty's ships and vessels in commission are to be tested by water pressure, at the intervals hereinafter specified, and in the manner described.

1. In the case of ships having new boilers or boilers repaired for a commission of four years, the boilers are to be tested by water pressure at the end of two years' service, and, subsequently, at half-yearly intervals during the remainder of the commission.

2. As regards ships whose boilers have been repaired for shorter periods of service, the boilers are to be tested by water pressure at the end of six months' service, and, subsequently, at half-yearly intervals.

3. During the application of water pressure the boilers are to be carefully examined, and proper gauges are to be used to detect any change in the form of the furnaces, combustion-chambers, &c.

4. The water pressure is to be double the working pressure, provided that during the examination no indications of weakness are observed. Should, however, any indications of weakness be shown, the test is to cease, and the working pressure is then to be limited to one-third that of the test pressure arrived at before such indications were seen.

5. The water pressure is intended to supplement, not to supersede the occasional drill testing. Should the latter test reveal unusual thinness of any plates, the water pressure is to be very carefully applied, in order that injury may not be caused by over pressure.

6. The result of the test is to be forwarded in duplicate on Form S, No. 153 (specimen annexed), of which a supply will be forwarded. One copy should be sent direct to the Secretary of the Admiralty, the other to the commander-in-chief or senior officer of the station.

7. In those cases where there is a captain's ship's book on board, a copy of the Form S, No. 153, is also to be placed in the first of the spare blank folios at the end of the book.

8. The parts of boilers most liable to wear are the shells about the water-line, the uptakes, the sides of furnaces, and the combustion-chambers; but by the use of additional stays at these parts, when they become worn, the durability of boilers may be very much extended.—By command of their Lordships, Robert Hall.

Report of Test of the Boilers by Water Pressure.—At what port or place tested. Date of test. Greatest pressure applied, lbs. Load on safety-valves previous to test, lbs. When boilers were made. By whom made. When boilers were first used on board. Load on safety-valves when first used, lbs. Date of last repair. For what duration of service repaired. Effect of test on plates of furnaces, plates of combustion-chambers, plates of shells, tube plates, stays of furnaces and combustion-chambers, and stays of shells. Estimated durability of boilers with such repairs as can be done on the station.

THE ARCTIC EXPEDITION.

The following is the Report made by the Admiralty Committee to the Lords Commissioners of the Admiralty on "The Cause of the Outbreak of Scurvy in the Recent Arctic Expedition; on the adequacy of the provision made in the way of Food and Medicine, and on the propriety of the Orders for provisioning the Sledge Parties":—

13, Delahay-street, March 3.

Sir,—You will be pleased to acquaint the Lords Commissioners of the Admiralty that, in pursuance of the instructions contained in your letter of Jan. 9 last, we, whose names are hereunto subscribed, having heard and duly considered the evidence of the commander, of the principal officers, and certain of the inferior officers and men of the late Arctic Expedition, of officers and men who have taken part in previous Arctic voyages, of the Medical Director-General of the Navy, and, after communication with the Royal Colleges of Physicians and Surgeons, of eminent medical authorities, have to report as follows on the matters submitted for our inquiry:—

First. The cause of the outbreak of scurvy.

We attribute the early outbreak of scurvy in the spring sledging parties of the Expedition to the absence of lime-juice from the sledge dietaries.

We are further of opinion that the long winter, extending over 142 days, involving during that period absence of sunlight, confinement during the greater part of the twenty-four hours to a lower deck, of necessity not free from damp, and an atmosphere comparatively vitiated, accompanied by exposure to extreme changes of temperature and deprivation of fresh meat—especially in the Alert—had not been without effect on the health of the officers and men, notwithstanding the apparent good condition in which they started on their sledging journeys. [To this paragraph of the Report a note is appended stating that the number of days on which fresh meat was issued was—Alert, 14; Discovery, 53.]

These predisposing causes of scurvy were aggravated by the severe cold and arduous labour encountered by the sledging parties immediately on leaving their ships, followed by the usual results, inability for some days on the part of those concerned to take their proper allowance of food and to obtain sufficient sleep.

How far, with due regard to the length of the travelling season, dependent upon the breaking up of the ice in the Arctic Sea, these evils could have been mitigated by a recourse to short journeys, utilized for laying out depôts of provisions and other preparatory purposes, prior to those of a more extended character undertaken to effect the main objects of the Expedition, we are not prepared to say, but it is obvious that the adoption of such a system would have afforded an amount and description of that previous training so essential to the success of sledging, far more efficacious than the exercise obtained during the winter, but limited by its severity.

Secondly. The adequacy of the provision made by the Admiralty in the way of food, medicines, and medical comforts.

We find that the provision made in the way of food, medicines, and medical comforts was in every respect adequate for the performance of the special service in which the Expedition was engaged, and more complete than that made for any previous expedition which has proceeded on Arctic service.

In reference to which we forward the following returns:—

(1) Provisions, medicines, and medical comforts supplied to the Expedition on leaving England, and received back into store on its return.

(2) Savings during the winter of 1875-76.

(3) Reports on such articles of provisions as have been analyzed by direction of the Committee.

(4) Report of survey on certain articles of provisions to which exceptions were taken in the evidence tendered to the Committee.

Thirdly,—The propriety of the orders given by the Commander of the Expedition for provisioning the sledge parties.

We find that the orders of the Commander of the Expedition for provisioning the three extended and principal spring parties did not include lime-juice, thereby deviating from the 11th Article of the Memorandum of Recommendations and Suggestions of the Medical Director-General furnished by their Lordships for his information, and that the reasons assigned for such deviation being insufficient, the said orders were not proper.

We forward a paper on scurvy drawn up by the medical member of the Committee, which will bring to their Lordships' notice the prevailing view of the medical profession in regard to this disease, some exceptional cases of immunity from scurvy deserving of further investigation, together with such suggestions in regard to the prevention and treatment of the disease, the use of lime-juice and other anti-scorbutics as the professional evidence tendered to the Committee leads them to consider may prove of general interest.

In the memoir entitled "Description of Travelling Equipments," furnished by Rear-Admiral Sir F. Leopold M'Clintock for the use of the Expedition, we find the following recommendation:—"With a view to retain and to add to our present knowledge of Arctic Travelling Equipment, I request that at the close of the Expedition this manuscript compiled by me for its use may be returned to the Admiralty, accompanied with the remarks on each article of those officers and men who have been most employed in sledge travelling, and gathered from them after all the sledging has terminated."

We bring this recommendation to their Lordships' notice in the hope that it will be complied with; and we are of opinion that analogous reports in regard to the food, medicines, and medical comforts of the Expedition will prove of equal service.

For their Lordships' further information we add—

(5) A summary showing the days on which the Committee sat, and from whom the evidence was received.

(6) Index of papers which were called for by the Committee, and which will form the Appendix to the Evidence.

(7) Index of papers which were called for by the Committee, and not placed in the Appendix, but which should be preserved for future reference.

We have directed our secretary to forward to you evidence, accompanied by the requisite *Appendix and Index, as soon as* it can be prepared.

J. HOPE. JAMES DONNET, M.D.
RICHARD COLLINSON. THOMAS R. FRASER, M.D.
E. A. INGLEFIELD.
To Rear-Admiral Robert Hall, C.B.,
Secretary to the Admiralty.

A question put by Mr. Mitchell Henry, on Thursday evening, added yet another episode to the proceedings of the session. The hon. member inquired whether the foregoing Report of the committee on the existence of scurvy among the crews of the Alert and Discovery was the original Report, or whether it had been in any respect "modified or mitigated in consequence of pressure from the Admiralty or from any other official quarter?"

To this Mr. Hunt (who appeared in his place for the first time since his recent indisposition) replied, in a rather warm tone, that the question was of an insulting character alike to the Admiralty and the committee, and that he declined to submit to such an insult.

Mr. Henry protested that there was nothing insulting either expressed or intended by his inquiry, and added that he was willing to put the question in any form that the First Lord might desire.

Mr. Hunt repeated that the question was insulting, inasmuch as it implied that the Admiralty had applied pressure to the committee to induce them to modify their Report.

Mr. Henry then inquired simply whether the Report had in any respect been modified; but to this Mr. Hunt declined to give any answer.

Mr. Butt then intervened, remarking that the First Lord had not conformed to the usual practice of answering questions put to him, and reminded the right hon. gentleman that, on his own showing, he was bound to answer a question reflecting upon himself, which, however, Mr. Henry's question did not.

The Chancellor of the Exchequer gave it as his opinion that the question as put did convey a serious reflection upon the Admiralty, and that Mr. Henry had no right to put it.

Mr. Henry urged that his question was a definite one of considerable interest to the public, and that he was entitled to a definite answer. He also submitted that the language of the First Lord as applied to him was disorderly. Dr. Playfair disapproved of the reticent attitude of the First Lord, which he attributed to the circumstance that he was in ignorance of the feeling which existed among medical men on the subject. He asked the right hon. gentleman whether the published Report was the original one passed by the committee, or whether it had been in any respect modified.

This brought up Mr. Hunt, who explained that the Report laid on the table of the House was the only one he was acquainted with. It was dated March 3, and there had not been any delay in presenting it. Mr. Hunt added that the only communication made by the Admiralty to the committee was to thank them for the pains they had taken in conducting the inquiry. Mr. Henry then gave notice that after the holidays he should ask the First Lord whether the Report on the table was the one originally come to by the committee, or in any sense a modification of it.

NAVAL HALF PAY.

The award of half pay to certain officers and officials, in addition to the emoluments of office, was made known a few weeks since, and we now give the full text of the Order in Council under which this new regulation comes into force:—

Whereas his late Majesty was pleased, by Order in Council of Feb. 4, 1833, to extend to the officers of the Royal Navy and Royal Marines certain regulations under which the officers of his Majesty's land forces were at that period allowed to receive half pay: and whereas we are of opinion that the regulations under which half pay should be in future granted to officers of the Royal Navy and Royal Marines should be assimilated to those now in existence in regard to your Majesty's Land Forces as amended subsequently to the above date, so far as the same may be applicable thereto; we therefore most humbly submit that the said Order in Council of Feb. 4, 1833, be cancelled, and that your Majesty will be graciously pleased by your Order in Council to declare and direct that from and after March 31, 1877, the regulations under which officers of your Majesty's land forces are, by an Act passed in the thirty-third and thirty-fourth year of your Majesty's reign, cap. 96, allowed to receive half pay, shall extend to and may be adopted generally in the payment of half pay to the officers of your Majesty's Royal Navy and Royal Marines so far as they may be applicable to the respective Services.

The said regulations are as follows, viz.:—

REGULATIONS AS TO HALF PAY.

The following regulations shall be observed with respect to the application of any sum granted by this Act, or by any Act that may hereafter be passed for the half-pay officers of her Majesty's Forces, that is to say:—

1. No person shall receive half pay who (*a*) was under the age of sixteen years at the time when the regiment, troop, or company in which he served was reduced; or (*b*) did not do actual service in some regiment, battalion, troop, or company in her Majesty's Service, except in cases in which the commission was received under circumstances which did not, according to the regulations of the Army, require the officer to serve; or (*c*) has resigned his commission, and has had no commission since such resignation.

2. No part of any sum granted for half pay as aforesaid shall be allowed to any person by virtue of any warrant or appointment, except to such person as would have been otherwise entitled thereto as a reduced officer.

3. No person shall receive any part of any sum granted for half pay for any time during which he holds any other military employment of profit under her Majesty, or in her Majesty's colonies or possessions beyond the seas, except the holders of any Staff or garrison appointments, or appointments in the Militia, Yeomanry, Volunteer, or other reserve forces of her Majesty, who may, with her Majesty's approbation, signified by one of her Majesty's principal secretaries of State, receive the half pay to which they would respectively be entitled if they held no military employment of profit under her Majesty.

4. No person shall receive any part of any sum granted for half pay for any time during which he holds any civil employment of profit under her Majesty, or in her Majesty's colonies or possessions beyond the seas, except as hereafter mentioned, that is to say:—(*a*) Such persons as hold appointments in her Majesty's household may receive the full amount of their half pay. (*b*) Where the annual emoluments of any civil employment of profit held by any person entitled to half pay do not exceed three times the amount of the highest rate of half pay attached to the rank, by virtue of which he claims to receive half pay, such person may, with her Majesty's pleasure to that effect, signified by the commissioners of her Majesty's Treasury through one of the principal Secretaries of State, receive the half pay to which he would be entitled if he held no such employment of profit; (*c*) where the annual emoluments of any civil employment, held by any person entitled to half pay, exceed three times the amount of such highest rate of half pay, as aforesaid, but fall short of four times the amount, the holder of such employment may, with her Majesty's pleasure, signified in the manner aforesaid, receive so much half pay as, added to the emoluments of his civil employment, will together make up four times the amount of such half pay; (*d*) where the Commissioners of her Majesty's Treasury are of opinion that the employment of military officers in the colonies or elsewhere, in civil situations of responsibility with small emoluments, will be conducive to economy, and thereby beneficial to the public service, the said Commissioners may authorise the receipt of half pay by military officers, notwithstanding their employment in a civil situation.

5. In every case the officer authorised to receive half pay with the salary or emolument of any military or civil employment shall specify in his declaration, by this Act required, the other military or civil employment which he may hold.

6. An account shall be laid before Parliament in every year with the Army Estimates of the number of officers who are allowed to receive half pay with civil employment, specifying the names of such officers with the respective amounts of their half pay and their emoluments, and distinguishing in every such account the officers to whom such half pay has been allowed subsequent to the last account.

We do also humbly submit that your Majesty will be graciously pleased to sanction the following propoals, viz.:—

I. As regards Aides-de-Camp to the Sovereign:—An officer of the Royal Navy or Royal Marines, while holding the appointment of aide-de-camp to your Majesty, shall, if not on active service, be entitled to receive half pay in addition to the emoluments of such appointment.

II. As regards Lords Commissioners or Secretaries of the Admiralty, Controller of the Navy, and Director of Naval Ordnance:—An officer of the Royal Navy, while holding office as a Lord Commissioner or Secretary of the Admiralty, or as a Controller of the Navy, or Director of Naval Ordnance, shall be entitled to receive half pay, in addition to the emoluments of such office.

III. As regards officers holding naval employments of profit:—An officer of the Royal Navy or Royal Marines, when permitted to accept naval employment of profit in your Majesty's colonies or possessions beyond the seas, shall, in any special case in which the Lords Commissioners of the Admiralty shall, with the concurrence of the Lords Commissioners of the Treasury, deem it advisable, receive the half pay to which he would be entitled if he held no such employment of profit.

IV. As regards Naval-Instructors:—Naval-instructors who may be in holy orders, but who have not been appointed chaplains in the Royal Navy, shall be entitled to receive half pay. And that in the several excepted cases before mentioned, in which half pay is allowed to certain officers, your Majesty's pleasure to that effect shall be signified to the paymaster-general by any two of the Lords Commissioners of the Admiralty.

The Lords Commissioners of your Majesty's Treasury have signified their concurrence in these proposals.

STEERING GEAR.

An important trial of steering gear was made at Portsmouth on the 11th inst. under the superintendence of Capt. Waddilove, of the Steam Reserve, and in the presence of Mr. Barnaby, the Director of Naval Construction; Capt. Parkin, the newly-appointed Captain of the Steam Reserve at Portsmouth; and Mr. W. B. Robinson, the Chief Constructor of the Yard. The trial was important, not only because of the comparative novelty of the appliance, but also in consequence of the number of the special class of vessels to which it will be fitted. As has already been stated, the Jarrow Shipbuilding Company contracted to construct, from designs by Mr. Morgan, a fleet of twelve twin screw iron gunboats, of great breadth and buoyancy, having a displacement of 363 tons, and expressly adapted for river navigation and warfare. Six of these—viz., the Medina, Medway, Sabrina, Tay, Spey, and Tees—have passed through their steam trials and been received at Portsmouth; two more, the Dee and the Don, will be brought from the Tyne to Portsmouth during the present week; while the other four, the Tweed, Trent, Slaney, and Esk, are in a forward state, and will be taken shortly to Sheerness to complete for sea. At the steam trials it was considered by the Captain of the Steam Reserve that their steering, in consequence of deficient rudder area, was somewhat defective, and as there were a number of improvements in their fittings suggested, it was finally agreed that the Medina should be completed as a sample ship, and tested preparatory to the finishing of the others. The vessel having been bark-rigged, received her armament of three 64-pounders on board, and had her fittings perfected, went out to Spithead on Friday for a crucial trial of her steering gear, her draught on the occasion being 5ft. 2in. forward and 6ft. aft, or about 3in. less than her estimated load immersion when all her weights and stores have been received. Besides the stern rudder, the Medina class are fitted with a rudder at the bow, which can be worked singly or in connection with the other, by means of a clutch, from the wheel-house forward. The auxiliary rudder lengthens the craft considerably; and as it is an encumbrance, and has a tendency to foul the anchor chains, its utility has been so questioned that one part of the trial on Friday was to ascertain whether it was absolutely necessary for the management of the craft in the oftentimes tortuous navigation of a river. The circles were all made with the engines at full speed, the revolutions being about 180 per minute. With both rudders hard astarboard and the engines driving ahead, the vessel circled to port in 2min. 53sec., the diameter of the circle being 212 yards. The starboard circle in the same circumstances was made in 2min. 58sec., the diameter being 240 yards. Both engines going full speed astern, the starboard circle was completed with both rudders in action in 5min. 2 sec., and the port circle in 5min. 34sec., the diameter of the former being 195 yards, and of the latter 169 yards, considerably more time being occupied in moving round a smaller circle. The bow rudder being brought amidships and the stern rudder pushed hard aport, it was attempted to circle to starboard with the use of the latter only, the engines continuing full speed astern. Sufficient steerway, however, could not be obtained to enable the floating boxes to be overtaken, and the circle to be completed, from which it appears that in going astern the bow rudder is necessary to perfect the steering of these handy little craft and enable them to manœuvre in confined waters. In going ahead the stern rudder, now that a 16-inch keel has been fitted to the ship, and greater grip is obtained, was found amply sufficient, the Medina answering the helm in an entirely satisfactory manner. On Saturday morning an experiment was made on board for the purpose of ascertaining the time it would take to unship and ship the bow-rudder. The rudder, which weighs half a ton, is fitted with a shackle over its centre of gravity. By this it is lifted from its pintles by means of a purchase from the bowsprit, and then pivoted on deck by a purchase made fast to the fore-yard. The double operation was successfully performed in about sixteen minutes. The only thing which requires improvement is the fixing of the bow-rudder, which is to be altered so as to allow it to lie close against the bows, and out of the way of the anchor gear.

The British ironclad squadron from Crete, under the command of Vice-Admiral Hornby, arrived off Port Said on Wednesday, and leaves to-day for the Piræus. H.R.H. the Duke of Edinburgh, accompanied by Mr. Vivian, the British Diplomatic Agent and Consul-General, had gone to Cairo.

So startling an incident as the blowing-up of a turret-ship cannot, the *Standard* thinks, fail to excite considerable attention, although with regard to the recent incident of this kind on the Danube it is not quite clear that the catastrophe was occasioned by the enemy's fire. The Turkish vessel so suddenly destroyed was subject at the time to a vertical fire from the Russian batteries at Ibraila. The range was about two miles, and vertical fire was probably adopted owing to the difficulty of striking the vessel's side, the turret-ship—or rather monitor—lying in a channel where she was partly protected by a low island. Judging by the experiments carried out at Eastbourne last autumn, it would appear extremely difficult to hit an object at any distance by means of a high angle fire. All that can at present be said in regard to the affair at Matchin is that the Russians were firing shells at a high angle in the direction of the Turkish monitor, and while they were so doing there was a great explosion on board the ship, the vessel forthwith sinking. It is stated that out of two or three hundred persons on board only one or two were saved. Although one mast out of three remained standing, the vessel was practically destroyed, and the suddenness of the catastrophe, coupled with the wholesale sacrifice of life, has made the incident a very impressive one.

☞ It is particularly requested that applications for copies of the Army and Navy Gazette, *and Advertisements, shall* not *be sent to the Editor, but to* Mr. Richard James Wood, AT THE OFFICE, 16, WELLINGTON STREET, STRAND, W.C., *to whom all business communications shall be addressed and remittances made payable.*

The subscription to the paper is 7s. per quarter, or 28s. per annum payable in advance, *inclusive of postage to any part of the United Kingdom; to India, £1 10s. 4d. per annum;* viâ *Brindisi, £1 14s. 8d.*

THE bait, or the bribe, held out to England by the conspiracy for the dismemberment of Turkey is Egypt. If not a stale, it is certainly not a new temptation. Over and over again English statesmen have rejected it. They have turned away with disgust from the consequences of the very obvious lure. Will the statesmen of to-day swallow it? If they do the mouth of England is shut for all time to come. She can neither cry "Murder!" or "Thieves!" no matter what is going on under her eyes. And it was an immense comfort to England to cry aloud and spare not! A good shout relieved her conscience—a groan of execration did her moral system a deal of good. And it was so economical, too! But now, if the hook be in her tongue and the bridle within her lips, she must needs go as her drivers would direct. She is of theirs—one with the partitioners of Poland—the annexers of Alsace-Lorraine—the plunderers of Denmark—the oppressors of the Caucasus! The pleas that were urged by these public thieves and plunderers would be hers—her only one—"our interests"—the interests of humanity and progress. The partition of Poland—"the bloodiest picture in the book of time"—was justified because Poland was ill-governed, and "the interests" of Russia and Prussia demanded that they should carve Poland up and devour it. The destruction of the Republic of Cracow was "necessary" in the interests of Austria; Schleswig-Holstein was seized "in the interests of Germany"—that is, Prussia and Austria joined in robbing Denmark in the name of Germany; and then the robbers fell out, and the Prussians, being the stronger, tore the prey from the Austrian eagle. It was necessary for "the interests" of Germany that France should be despoiled of Alsace-Lorraine, and we see the results of the spoliation. Not all yet. It was necessary for the interests of Russia that Circassia should be overrun and annexed. It was done. And now we see that Circassia is a thorn in the side of Russia, although the exile of Circassians to Bulgaria had a good deal to do with the atrocities which have given the holy zeal of Russia for oppressed Christians such a healthy stimulant. Now the tempter whispers, "Take Egypt"! Now, what have we to get by annexing Egypt, which we cannot have at present? It is said that, in the first place, we shall be better able to secure the Suez Canal; and, in the second, to assure our communications with India by having a larger base of operations than are afforded to us by Malta—Gibraltar—England. There is not a trace of solid sense in that assertion. Nay, not only is there no sense—there is an outrage upon sense in it. The occupation of Egypt would entail on England the establishment of her power by military force. What is Egypt? To the party of annexation here it means, perhaps, Alexandria, Cairo, the Suez Canal, and picnics to the First Cataract. To those who understand Egypt it means 5,000,000 more Mahometans added to the Queen's Mahometan subjects—the whole of Darfur! Kor[illegible]an! Nubia! all the Nile! the western shores of th[illegible] Red Sea! the Desert! myriads of Arab tribes! vast regions almost unknown! incalculable responsibility! the jealousy of the world! indignant reclamations which can only be met by the shibboleth, "It is necessary in our interests"! It is said that the Khedive would not be averse to transfer such allegiance as he owes the Sublime Porte to the Queen. Whether that be true or not, it is plain enough, we think, that the Khedive could not, by any possibility, expect to sub-govern Egypt under English supremacy as he governs it now. It is true that his rule is scandalously misrepresented here, and that in the pursuit of sinister designs, either stock-jobbing or political, the Khedive has been systematically traduced as a Slave-Trade encourager, a dishonest financier, an aggressive tyrant—which he is not; but it must be admitted that the *corvée* still exists, that the peasantry labour under a tremendous taxation, and that there is a system of "backsheesh *in excelsis*" which we could not in decency tolerate. Then there is an Egyptian Army, and an Egyptian Navy, and Egyptian officials, and a system of laws for the people, as well as of internal administration, quite unworkable by any British machinery in their entirety and present condition. The end of this war no man can foresee. In the fiery furnace of battle the substance of policy fuses and runs into strange shapes. At present the anxiety of Russia for the welfare of Christians in Europe seems to find a solace in resolute enterprise against the possessions of Turkey in Asia Minor. The plateau of Armenia—let the *Times* write what it will—overlooks the plains of Mesopotamia, and the possession of it would lead Russia not necessarily, indeed, by the Valley of the Euphrates to trouble India, but to Syria, where her frontier would become—the Suez Canal! "What stuff and nonsense! Russia would never dream of taking Syria!" Perhaps not. But will anyone tell us what is to prevent her, in case of a war in which strong alliances would guarantee that she should have nothing to fear in Europe, from pushing an army down to the *British frontier* on the Suez Canal whilst she is making a demonstration towards the north-western frontier of India? The Egyptian Army, within the memory of man, marched out of Egypt and drove the Turks out of Syria, and defeated them not very far from the eastern shore of the Dardenelles. It is a well-worn track between Egypt and the Holy Land. Not all the power of England could protect the ninety-nine miles of Canal between Port Said and Suez against an enemy, who, armed with pickaxes, shovels, and dynamite, could destroy it almost where he pleased. But let it be admitted that such attempts are out of the question—there is still the question of annexation as distinct from either temporary occupation or friendly supervision. The latter we may be said to exercise at present, for the Khedive has placed his revenues, railways, and internal trade and commerce in English hands. Annexation means the British flag hoisted in lieu of that of the Sultan. That flag must be protected by British bayonets and guns. Egypt, very pleasant in certain months of the year, is very trying for Europeans in the summer and autumn, and there is no escape from hot winds, disease, ophthalmia, &c., such as is afforded by hill stations in India. The fellahs, who are said also to long for the transfer of Egypt from the Khedive to the Queen, are probably influenced in their longings, if they exist at all, by the hope of reduced taxation; but the British soldier is a far more expensive article to keep up than the Egyptian. Whatever may be the merits of British administration generally, it is certainly exceedingly costly, as India knows. The various bondholders are not likely to forego their claims because Great Britain has assumed the Khedive's liabilities. Will the fellaheen be very happy when they find they have changed one set of tax-collectors for another, that the collectors have white faces instead of brown, that they are Christians instead of Mahometans—in fact, that, as to that vital matter, they have gained nothing at all? The fanaticism which the enlightened and liberal policy of the ruler of Egypt has known how to keep within bounds would become a troublesome "factor" in the little Eastern Question we should create for ourselves when Giaour governors were established at Cairo, Damietta, Sioub, and the like. We should have to put down Mahometan uprisings as the French had, but the consequences of severities to us would be very different. "*A quoi bon,*" Egypt, then? If England once loses the command of the Mediterranean, her hold of Egypt would not enable her to regain it, and as long as she has that command she can do pretty much as she pleases with Egypt. No Khedive would ever venture to close or to injure the Canal, to irritate a Power which could land a corps at Port Said and at Suez, which could take possession of Alexandria and march on Cairo itself, and, if need be, repeat the Gothic outrage of submerging vast tracts of populous and fruitful land. If the Khedive could resist such an expedition, he could also, and with greater ease, resist permanent annexation. Let us leave Egypt as it is. There is neither honour, glory, nor profit to be had from taking what does not belong to us and is not necessary to our interests.

All who are interested in the efficiency of the Service must have been puzzled some few days ago by the announcement in the daily papers (since proved to be a fact) that a Sergeant and eighteen men from certain battalions of the Guards and the Line were to be sent to the Royal Artillery and Army Service Corps to be instructed as drivers for regimental transport work *in the event of our national interests* rendering it necessary that an army corps should be despatched to the East during the present struggle. The question must have arisen in the minds of all thoughtful soldiers, "Have we no transport on the establishment of the Army, that we find it necessary to withdraw marksmen from the ranks to perform duties that could be done by men of much less value to the Service than the trained soldier would be were we actively engaged in the field?" Is this the result of all the Royal Commissions and War Office Committees that have sat for years past, and are even now sitting, on our administrative organization? And must we confess that were it necessary to send into the field to-morrow even so small a force as one army corps, it could not move a yard from the spot where it might be landed until the requisite transport was provided and organized, a work that could not be got through under many weeks? The old idea that it takes at least one campaign before we, as an army, ever get into working order, must not be allowed to obtain now-a-days. The distinctiveness of war and the rapidity of movement render a succession of campaigns almost impossible in this age. It is, therefore, a matter of vital importance that the moving power of an army should not be the last part of its organization to claim the attention of those who are responsible for its efficiency in time of need. It may be said that the Army Estimates provide for a transport corps of 1,000 animals. Truly, but it belongs to the Commissariat Department, and it appears because this department is not under the Horse Guards the military authorities do not care to use it for regimental transport, preferring, it would appear, to provide for themselves by reducing their fighting power to the extent of an officer and a section per battalion, which must be kept complete under all circumstances. Can it be possible that the careful training which has been bestowed on the Transport Branch of the Army Service Corps, and the experience which it inherited from the Military Train, and has been gaining ever since, is to be thrown away for the sake of an idea? Surely not. The Transport Branch of the Army Service Corps is commanded by officers to whom no exception would have been taken years ago, when they were in the Military Train, even if it became necessary to place the command of the rear-guards and the roads under Transport officers, as on the Gold Coast, where Colonel Colley, C.B., and a number of Line officers worked the transport of the expedition, because they were combatant officers; but now these officers, having stood by their men when the Military Train was disbanded and the Army Service Corps raised, are apparently not considered fit to carry out the special duties at which they have been employed, in several instances for nearly a quarter of a century, because they are styled Commissaries and Deputy-Commissaries, and are under the War Office, instead of Majors and Captains, as formerly, under the Horse Guards. When will such petty jealousy cease to exist? Not, we fear, until the army is in the field and it is found out, possibly too late, that a well-ordered and thoroughly-efficient Transport is its greatest necessity. During our mimic campaigns on Salisbury Plain, Cannock Chase, and Dartmoor, it became evident to all experienced eyes that the improvised regimental transport would soon become a constant drain on the then "Control" transport from the want of proper care and knowledge on the part of the officers and men working the horses; galled withers and shoulders are ruinous to a transport corps, and that there will be hundreds of animals rendered non-effective from this cause alone, if the large force of regimental transport is not worked by officers and men specially trained for the Service, must be perfectly clear to any unprejudiced mind. A Committee is now sitting at the War Office on the Commissariat and Transport and the Ordnance Store Departments, and we sincerely hope that its recommendations will at length enable Mr. Hardy to establish these important Services on a sound basis; but if the action taken falls short of creating three distinct Services on a military footing and under the Horse Guards to the same extent as the Royal Engineers, the whole being supervised in each army corps by a chief of the Administrative Staff co-equal to the chief of the Executive Staff, we shall never have that mobility without which all our historical British pluck will be of little avail. That the military transport of an army is inseparable from its commissariat is a theory prevalent amongst old Commissariat officers, and so pertinaceously reiterated by them as possibly to be now in some quarters believed. We venture, however, to demur to this theory. (1.) The duties are dissimilar. (2.) The Commissariat have quite enough responsibility without being saddled with the discipline and economy of the transport, a force which in some campaigns has been in the proportion of one animal to every three combatants, and never less than one to seven. (3.) The Commissary-General of Supplies, having the transport as part of his establishment, would naturally lean to the demands of his own department, to the disadvantage of others. Were a distinct department established, having a responsible chief, and no fifth wheels as to approving requisitions (except in cases where they go beyond the regulations) we have every reason for believing that the present Transport Branch of the Army Service Corps could in a very short time be developed into a transport corps equal to the requirements of such a force as we are ever likely to send into the field. There would then be the feeders, the equippers, and the carriers, each similarly organized, but with separate responsibilities, working together for the good of the Service under the Staff officer, who would be the General's left hand; and where the comfort of the soldier is concerned their motto should ever be: *Tria juncta in uno.*

We have on several recent occasions referred to the utter stagnation in promotion that has long been felt in three of the new Line regiments added to the Army on the amalgamation of 1862—viz., the 19th, 20th, and 21st Hussars. But, as a matter of fact, nothing can be more gloomy and hopeless than the prospects of the great majority of officers in all twelve of the late Indian regiments. Their position is a peculiar one in many respects. At the time they transferred their services to the Crown they were guaranteed all the rights and privileges they enjoyed in the Indian Service, one of these few privileges being promotion by seniority, and another the claim to certain pensions, graduated according to length of service. Now this claim to pension, coupled as it is with the option of serving on for a still higher pension, instead of quickening, promotion, and acting as an incentive to retirement, has, as might naturally be expected, had a precisely opposite effect. No sooner has an officer served sufficiently long to entitle him to a pension of one rank than he thinks he may as well serve on the few years more that will give him one of a grade higher Thus a man is lured on from Captain to Major, from Major to Colonel, and, finally, is induced to hold on and on till he has completed thirty-eight years' service, when he becomes entitled to £750 per annum. Of course when one of these officers reaches the top of the regimental tree, there he often remains an inevitable fixture. The five or six officers immediately junior to him may console themselves for their bad luck by the thought that they are, at any rate, qualifying for higher rates of pension by continuing to serve on, but those below them have no such consolation. In nearly all the regiments the five or six senior officers are entitled to pension. The five years rule of command cannot be made applicable to them, nor in any way can they be forced to retire without a direct violation of the Parliamentary guarantee given them. The Majors, moreover, cannot look for commands in other corps; for, say the authorities, "as we we cannot bring in officers over your heads, we will not transfer you over the heads of others." Thus there is, as it were, an impermeable stratum of officers who are entitled to serve on for any length of time, and who most effectually bar the way to the promotion of their juniors. The effect of this state of things, which must, as time runs on, inevitably grow worse and worse, has for several years past been evident enough. In many of the regiments the two or three senior captains have from twenty to twenty-five years' service, while their senior subalterns have, as a rule, served far longer than those of any other of the Line regiments. These subalterns, indeed, who have no claim to pension, and who are in every respect on the same footing as those of other corps, have for a long time past realised the hopelessness of their position, and are urging on the authorities their claims to promotion in other corps, as there is no chance of any in their own. Scarcely a levée is now held by his Royal Highness the Commander-in-Chief that is not attended by some of them for this purpose. As regards future appointments, it can only be regarded as a positive misfortune for any young officer to be posted to one of these regiments, inasmuch as he must thereby be necessarily placed at a great disadvantage. His promotion will be infinitely slower than that of his contemporaries, or he must be transferred for promotion when he has sufficient service, and, therefore, can never hope to rise in his own corps. The question is—Where can a remedy be found? It seems to us that there is but one way of solving the difficulty, and that is by dealing with the senior officers in the same way that the War Office is now preparing to do with the rest of the Army—*i.e.*, to offer them some additional inducement to retire. There are many ways of doing this if only the India Office could be moved to liberality. The Horse Guards makes no secret of its anxiety to inaugurate a more healthy state of affairs; but that department, unfortunately, can only suggest the means, and has no control over those money-bags which in some of the public offices, from all appearances, are in such safe keeping.

An Admiralty Circular, of the 5th September, 1873, provides that "all Captains of Marines of eight years' standing, while embarked in her Majesty's ships, are to have the temporary rank of Major, in order to place them on an equality with Lieutenants of the Royal Navy of the same standing, and during such time they are to receive the extra pay of two shillings a-day allowed to Brevet Majors; such rank and pay to be retained when officers and men are temporarily landed from the Fleet for drill, or other duty, or when landed for warlike operations as part of a combined force of seamen and Marines under the command of a naval officer, but not in cases where the Marines are acting with her Majesty's Land Forces." This proves that the Admiralty possess the power of legislating for those serving under them while wholly and solely engaged with the Fleet, and not with the Land Forces; and we would suggest that, as an act of consideration, their Lordships might extend this boon by allowing a portion of subalterns' time to count towards temporary or local rank. In the Indian Staff Corps an officer has the local rank of Captain after twelve, and of Major after twenty years' service. The senior subalterns of Marines are now in their eighteenth year of service, and as many of the Captains who are receiving the benefit of the above-quoted Circular were not more than twelve years subalterns it would be some recompense to the unfortunate officers who have so long been left in the junior grade if that portion of their time from twelve years was allowed to count towards the eight years required to rank as a Major afloat. The object of the Circular of 1873 was to place Captains of Marines on a more equal footing with Lieutenants in the Navy, who rank as Majors after eight years' service as Lieutenants; but, in consequence of a much longer previous service, all the Captains of Marines so ranking are older men than their messmates holding equivalent rank; and even if this further concession were made of counting all service above twelve years, there would be no fear of the Marine officer becoming second to the naval executive, as the Captain of Marines must even, under these circumstances, reach twenty years of service and thirty-eight years of age before he could enjoy the temporary rank of Major afloat.

The diligence with which the boats of the London are kept constantly cruising on the look-out for slavers is known to have done much to check the traffic in slaves. Yet the profit on a cargo of these wretched creatures is enough to tempt slave dhows to risk capture, and there is evidently some life left in the trade. The latest news from the London is the capture of three dhows and nearly one hundred and seventy slaves, and the prize money and head money will well reward our officers and men engaged on this unpleasant work for the zeal they have displayed.

At the anniversary meeting of the Royal Geographical Society in the hall of the University of London, Burlington-gardens, on Monday next, at one o'clock, the Royal (Founder's) Medal for the Encouragement of Geographical Science and Discovery will be presented to Captain Sir George S. Nares, R.N., K.C.B., for having commanded the Arctic Expedition of 1875-76, during which the ships and sledge-parties respectively reached a higher northern latitude than had previously been attained, and a survey was accomplished of 300 miles of coast-line, facing a previously unknown Polar Sea; also for his geographical services in command of the Challenger Expedition.

News has been received at Chatham that her Majesty's ship Fawn, while engaged on surveying service at Massowa and the Red Sea, captured a slave dhow near the former place.

It is reported that the Monarch will leave Malta on Saturday next to rejoin the Channel Squadron.

The Swedish corvette Nor-Koping, which is on a cruise of instruction with naval cadets, put into Plymouth Sound yesterday owing to an outbreak of scarlet fever. Three patients, two of them cadets, have been taken to the Royal Naval Hospital for treatment. The Nor-Koping will remain in the Sound for some days, as it is feared other cases will have to be landed.

A court-martial was to have assembled at Devonport yesterday morning for the trial of a Navigating Sub-Lieutenant charged with drunkenness; but, the accused having applied for permission to resign, the proceedings were adjourned *sine die.*

The Rev. C. E. Hodson, whose perversion to the Romish Church we mentioned last week, has, we are informed, placed his resignation in the hands of the Admiralty. It will, of course, be accepted.

The Greenwich Hospital pension of £50 a-year which became vacant by the death of Paymaster-in-Chief John Thomson has been awarded to Paymaster Henry S. Dyer.

Mr. Rowsell, Director of Admiralty Contracts, who is acting as the Commissioner of Inquiry, had returned to Malta on the 15th inst., and resumed his inquiries into the system of levying the Bread-tax.

Rear-Admiral Foley has issued a notice, on taking office as Superintendent at Portsmouth, that anonymous communications will be put in the fire, but representations with the name of the writer will receive attention.

Rear-Admiral Lambert is, we are sorry to hear, suffering from the effects of having fallen and broken a rib.

The retirement of Navigating-Lieutenant George White has been made compulsory under the non-service clause of the retirement scheme.

There seems to be considerable doubt as to the ultimate destination of the Active. First she was ordered to be recommissioned with much dispatch for "particular service," then a short commission on the North American Station was named for her, and, lastly, she was told off to relieve the Tourmaline. Since that order was given letters have been received from the Tourmaline to the effect that she is by no means the failure she was supposed to be, and therefore there would seem to be no good reason why the Active should be sent to her relief, except that the latter ship is larger and has better accommodation for the Commodore. That would now seem to be the only reason for inflicting upon the Active the inconvenience of a turn over; but whatever their Lordships may intend to do with her, it would be well if they would let it be known without unnecessary delay, as there is nothing so uncomfortable as the uncertainty which has so long hung over the future of the ship. Officers have no idea whether they are fitting up cabins for their own use or for that of others, neither can they tell whether they should take out supplies for a commission on one station or another, or whether they may not find themselves homeward bound again in another ship in the course of a few months. Any sympathising Naval Lord who has experienced the annoyances and inconveniences which arise from such uncertainties on fitting out, might favour the Actives the "straight tip."

The Cracker will be ordered home from the Brazils as soon as the Elk arrives on that station. The Cracker will pay off at Portsmouth.

The week's cruise of the Osprey in the Channel having been concluded, she has received her orders for the Pacific.

The Good Service Pension of £150 a-year vacant by the promotion of Major-General Penrose, R.M.L.I., C.B., has been awarded to Colonel Commandant J. H. Stewart, who has succeeded to the command of the Plymouth Division.

Staff Commander John Millard has returned to Malta from the Fawn, having been engaged in surveying Massowa and other Red Sea ports.

We learn with regret that Captain C. T. Curme, of the Steam Reserve at Devonport, is so indisposed as to have applied for sick leave. It will be remembered that his predecessor in this appointment was compelled to resign through ill-health.

Commander Joseph W. Crabb, who died on the 15th inst., in his eighty-ninth year, entered the Navy in September, 1801, as a Midshipman on board the Royal Sovereign, and served until May, 1806, in the Mediterranean. On June 16, 1809, Mr. Crabb, who had assisted in the capture of several vessels, was promoted to the rank of Lieutenant, and in the following January, while in pursuit of an enemy's vessel, he received a severe wound from a shot, which was never extracted. He was present in March, 1811, at the capture of a French 20-gun storeship, and on July 4 of the same year commanded the boats in the cutting out the St. François de Paule from under a two-gun battery near Port Hercule, on the Italian coast; and in the evening of the same day with Captain Augustus Clifford he captured three merchantmen near Civita Vecchia. In November, 1811, after a severe fight of four hours, he took the 26-gun storeship Persanne. Mr. Crabb was last employed as First-Lieutenant of the Orontes, in the Channel, from June until October, 1816. He was promoted to the rank of Commander on the Retired List in July, 1851. He was the senior officer on the "M. N." List of retired Commanders.

We hear with much regret that Staff-Captain Braddon remains in such ill-health that there is little prospect of his being able to return to his duty as Assistant Master Attendant at Portsmouth. He will probably be surveyed by a medical board as to his fitness for any further service.

Lieutenant Rawstone, R.M.A., has been appointed Assistant-Professor of Fortification at the Royal Naval College.

Colonel Forbes, of the Chatham Division of Royal Marines, has been selected for the command of the depôt at Deal, vacant by the promotion of Colonel Stewart.

The desirability of having the Lively ready for service as soon as possible, the Salamis and Helicon being both required for dispatch service in the Mediterranean, has induced the Admiralty to order her round to Sheerness, and the whole of her machinery repairs, including fitting her with new boilers, will be undertaken by a private firm.

Owing to the unpleasant nature of the cruising to which the ships of the Detached Squadron have been subjected, and the lengthened absence from England, the Admiralty has granted the crews of the vessels an additional week's leave of absence.

The Tenth Section of the German official account of the Franco-German war of 1870-71, translated in the Intelligence Department by Captain F. C. H. Clarke, Royal Artillery, has at length appeared. This forms the First Section of Part II., and treats of the investment of Paris and capture of Toul and Strasburg, being the opening of the second phase of the war against the Republic.

Captain George H. Phayre, R.N., whose death has been announced, served as senior Lieutenant of the Enterprise when commanded by Admiral Sir Richard Collinson, K.C.B., during his Arctic search for Sir John Franklin.

As there has lately been some scarcity of artificers of the shipwright class in the Navy, increased pay was authorised by Order in Council about a month since for such as were skilled workers in wood and iron. While the private trade remained brisk, even these inducements did not attract many from the shipbuilding yards, but a strike having occurred on the Clyde, the Admiralty has taken the opportunity of placing before the men the capital opening there is for their class in the Navy. The malcontents who have gone on strike are said to have received their Lordships' communication with satisfaction.

The Mediterranean Squadron, under the command of Vice-Admiral Hornby, has arrived in the Bay of Salamis.

Rear-Admiral Dowell, C.B., returned from leave on Thursday and re-hoisted his flag in the Black Prince at Devonport.

A novel invention, in the form of a repeater pistol and sabre combined, has been brought to England by Mr. W. J. Gurd, a Canadian, for submission to the War Office. The invention is at present only in a rough form, but after it has undergone careful mechanical manipulation it promises to become a weapon unique in character, and one which might be found of considerable service to the men of the mounted arms in the field.

On the departure of Colonel G. Colclough, C.B., for Ireland, the command of the Field Artillery in the Woolwich District has been given to Colonel G. C. Brown, Royal (late Bombay) Artillery, promoted at the close of last year from the F Brigdae Royal Horse Artillery in India.

Nothing can be conceived more ungentlemanly and contrary both to good feeling and good taste, than to attempt to injure in private life a public official on account of official conduct. Yet this is what a large number of the members of the Junior United Service Club have, at the instigation of certain unworthy members of the Army Medical Department. A few days ago Surgeon-General Munro, C.B., came up for election at the Club in question, and, to the astonishment and disgust of all right-minded persons, received an unanimous number of black-balls—upwards of 100, we hear. Dr. Munro is an officer who is a credit to his own, and would be a credit to any profession. He is a most distinguished, able, and courteous officer, and his only offence is that he has been employed in carrying out the Unification Scheme. No one is more opposed than ourselves to this scheme, but we cannot but admit that in carrying it out Dr. Munro is only obeying superior orders, and we are quite sure that he is acting conscientiously. To try and punish him in private life, through this anonymous action, is simply to be guilty of unmitigated snobbism, and to prove that certain members of the Army Medical Department, at all events, deserve unification, or any other nation which can be provided for them. They have disgraced both their club and their profession, and we hope that the majority of both will show by public protest that they are indignant at the outrage inflicted on Dr. Munro.

"Lord Peck" informs us in the "Library Table," of which the first number of the third volume has just been published in America, that—"Everything indicates that Russia is adapted to be the ruler and renovator of Asia," including, we presume, Persia, India, and China. Perhaps Lord Peck will tell us what "everything" is—for that universal certainly does not include the particulars of the renovation of Poland or the good government of Russia, or civilization and progress according to European ideas. These latter, however, stink in the nostrils of the Panslavist.

The Stafford House Committee has its hands very full, and its purse will very soon be empty. The *Lancet*, quoting a correspondent of the *Journal de Genève*, gives a distressing account of the miserable condition of the sick and wounded of the Turkish Army. If these things be done in the green wood what shall they be in the dry? What will be the state of these unfortunates as the war goes on, when they are already, as we learn, "in want of medicines, bedding, litters, ambulances, and surgical and medical necessaries of all descriptions"? Our contemporary publishes the following summary of accounts presented by the Russian Society for the Aid of the Sick and Wounded in the Army (the Red Cross Society), at a meeting held in St. Petersburg on the 13th of May. This summary refers to the six months then expired. Within this period the expenditure of the Society for the maintenance of ambulances for 16,000 sick and wounded had been 4,034,600 roubles, of which sum 782,600 had been expended in the organisation and establishment of the ambulances, 129,600 in medicines, 564,520 on the sanitary staff, 2,115,450 for the maintenance of the sick, 86,400 for washing, 241,110 for the maintenance of the sanitary staff, and 115,020 for transport. During the same period there had been expended 210,000 roubles on sanitary convoys, 600,000 roubles had been transmitted to the principal representative of the Society on the Danube, 300,000 roubles to its principal representative in rear of the army there, 300,000 roubles for the Army of the Caucasus, 60,000 roubles for the Crimea and Odessa, and 150,000 roubles to the several depôts in St. Petersburg (60,000), Kischinew (30,000), Jassy (30,000), and Bucharest (30,000). The grand total of the expenditnre for the six months was 5,954,600 roubles. The receipts and assets of the Society during the same period were as follows:—Balance in hand, 651,764 roubles; receipts from April 25 to May 12, in offerings and subsidies, 356,000 roubles; from the Minister of War for the maintenance of sick soldiers, 350,000 roubles; total, 1,357,764 roubles.

The capture of Ardahan by the Russians in the afternoon of the 17th is far more than a counterpoise to the capture of Soukhoum Kaléh by the Turks. The position is of great strategical importance, but of no actual strength. The moral influence of its fall on the Khoords will be considerable. Its possession gives the Russians an advanced base of operations against Erzeroum, and secures their communications with their frontier fortresses and their lines of supply. We doubt whether the Turks can spare a sufficient number of disciplined troops and adequate *matériel* to enable even such a skilful leader as Klapka to turn the rising in Circassia into a formidable diversion. But there is little precise information here respecting the actual state of the Caucasus, and the strongest proof of the importance of what has been done so far is no doubt to be found in the great activity and anxiety manifested by the Turks to turn their success into a solid occupation. They sent off on the 18th a force of 10,000 men, forty guns, and 50,000 stand of arms from Constantinople, which are to be commanded by Fazli (? Fazil) Pacha, who would appear, therefore, to be senior to the officer who, under orders of Hassan Pacha (the Admiral who took the place), was at the head of the troops. If Schamyl's son is to lead the Circassian levies, it is not easy to see the *rôle* which is reserved for the veteran Klapka. Any way, he will have a formidable antagonist in General Loris Melikoff, whose Armenian origin recommends him to the population of the country, and who has displayed courage and perseverance in his operations. It is quite impossible, however, that he should be equally distinguished for veracity, for no one can believe that in an assault by some 9,000 men, which lasted from 6 p.m. to 9 p.m., there were not more than 200 killed and wounded.

The voyage of Prince Bismarck to Berlin appears to have startled France, and to have given rise to fresh rumours of war in Paris. This shows that a great deal of uneasiness reigns with regard to the ulterior intentions of Germany and the precise meaning of Field-Marshal Von Moltke's recent utterance. The Berlin correspondent of the *Avenir Militaire* furnishes us with the following information respecting the compensatory measures alluded to by the Chief of the German Staff. He makes the subjoined extract from a Prussian military paper:—"France has a decided advantage over Germany by the fact that its war cadres are held *ready in time of peace*; besides, in the immediate neighbourhood of the frontier, near Metz, there are no less than twelve regiments of Cavalry on a complete war footing, formed into two divisions, and provided with batteries, whilst on the German side there is only one Cavalry division, consisting of seven regiments. The garrisons of Alsace-Lorraine will probably be reinforced by four regiments of Infantry and two or three regiments of Cavalry. There will then be in Alsace-Lorraine fourteen regiments of Infantry, one battalion of Rifles, ten regiments of Cavalry, one regiment of Field Artillery, one regiment of Foot Artillery, one Bavarian regiment of Foot Artillery, one battalion of Pioneers, and one battalion of Military Train." The correspondent of the *Avenir* declares that the Prussian officers are well aware that Germany has more Infantry regiments concentrated in the direction of the frontier than France has, and they also know that the French effectives are 100 or 200 men weaker per regiment in France than in Germany. As for the Cavalry, they know perfectly well that if the French have twelve regiments on the Meuse, whilst the Germans have only seven in Alsace-Lorraine, there are a sufficient number of squadrons contiguous to the frontier to compensate for this difference. The writer then adds—"The augmentation of the effectives of the regiments stationed in the region of the 15th Army Corps, and the augmentation announced in the number of those regiments, is not, then, a compensatory measure. On the contrary, it is a measure having for its object to give to the military forces of Germany on the frontier a great preponderance over the French forces. What makes this a master-stroke is that M. de Moltke has succeeded in persuading Europe that these are compensatory measures, and to make it appear that France is animated with warlike intentions." It is difficult for us to decide on the merits of the assertions made upon both sides. We can only point to two facts, to which we alluded on a previous occasion. In the first place the armies of Paris and of Lyons are within striking distance of the German frontier. Secondly, if Field-Marshal Von Moltke wittingly made a false statement, the language he used in the Reichstag and the military measures he has since adopted are all the more serious.

We lately announced the intention of the War Office to establish a mounted police force at Aldershot. The corps, which is now in process of formation, will consist of 71 non-commissioned officers and men—viz., one sergeant-major, 7 sergeants, 13 corporals, and 50 privates.

We learn from Cape Town, under date May 1, that "Lieut.-Gen. Sir Arthur Cunynghame proceeds to Natal to inspect the troops, and will afterwards visit the Transvaal."

The Army.

3rd Dragoon Guards. The move of the regiment from Dublin to the Curragh will take place on the 5th, instead of the 7th inst., as previously arranged. The young horse party will start by road for Cahir on the 4th, the dismounted men and families proceeding by rail the same day.

4th Hussars. Lieut. Rose has been granted leave from India to England, on medical certificate.

11th Hussars. Lieut.-Col. Annesley has passed the higher standard examination in Hindostanee.

13th Hussars. Lieut. Wheeler, a probationer, officiating squadron officer 15th Bengal Cavalry, is about to be admitted to the Bengal S.C.

18th Hussars will arrive at Aldershot to-day from Colchester.

Royal Artillery.

Lieut. W. J. Tydd, 8th Brig., has, the *Times* says, been appointed private and military secretary to the Governor of the Gold Coast. He entered the Army July 7, 1869.

Col. H. L. Chermside, C.B., 1st Brig., having proceeded to India for duty, has relieved Col. R. C. Romer in command of the Kilkee District.

The following letter has been sent by Col. Gardiner to the Editor of the *Whitehall Review*:—"Sir,—It is not allotted to every officer to gain honours in the field. It was my misfortune that the battery of Royal Horse Artillery, which I commanded at the time of the Crimean war, got no further than Scutari, and that the enemy opposed to the same battery during the Indian mutiny were fugitives, not combatants. I was only a subaltern during the Canadian rebellion of 1838, and the last service in that country, for which I volunteered in 1861, proved bloodless. I have, therefore, no special claim to the decoration suggested for me by the *Whitehall Review*. As this question has been unnecessarily raised without my knowledge and against my wishes, I shall be obliged if you will permit me to state an opinion, which, I have no doubt, is shared by my military friends.—Yours faithfully, Lynedoch Gardiner."

A short and ready way has, the *Times* hears, been decided upon to accelerate the promotion which has been long stagnant in the Coast Brigade. Six of the captains senior in age are to be retired upon full pay, and as many lieutenants will be promoted in their stead. The retiring captains are averse to the step, as they were just looking forward to an augmentation, as an opening for further advancement; but seeing that four of the lieutenants have held that rank for upwards of seventeen years, it was regarded as imperative that something should be done to give the brigade a move on.

Brevet Col. L. W. Penn, C.B., 6th Brig., has been transferred from Aden to Kirkee.

Lieut. J. C. Shirres, 3rd Brig., has passed the higher standard examination in Hindostanee.

Capt. W. A. Roberts, A Brig. R.H.A., officiating remount agent at the Presidency in India, has been confirmed in that appointment, and vacates the adjutancy of his brigade.

Lieuts. F. Howard, C Brig. R.H.A., and C. E. Brown, 11th Brig., have been assigned local rank as capts. in India, the former from March 3, the latter from March 24, 1877.

Royal Engineers.

The officers had their annual dinner on Saturday at Willis's Rooms, when H.R.H. the Duke of Cambridge presided. There were present—Lieut.-Gens. Sir F. Chapman, K.C.B., Sir L. Simmons, K.C.B.; Major-Gens. Sir H. Harness, K.C.B., Montagu, C.B., Sir Harry Ord, C.B.; Cols. Laffan, Grant, Inglis, Stokes, C.B., Ewart, C.B., Nugent, C.B., Yolland, Hon. G. Wrottesley, Gordon, Ravenhill, C.B., Roberts, Nicholson, C.B., Graham, and Pritchard; Lieut.-Cols. Davidson, Warrand, Stotherd, Noble, Leach, Du Cane, C.B., Crossman, Hawthorn, Gosset, and Home; Majors Martin, Dawson-Scott, Donnelly, Carey, Steward, De Montmorency, Marindin, Trench, Wheatley, Sim, P. Smith, J. Hills, Judge, Festing, Frankland, Keith, and Seddon; Capts. Brine, A. C. Hamilton, Hogg, Ferguson, Sim, Vetch, Fellowes, Grover, Seton, E. O'Brien, Halkett, Ardagh, Cautley, Fraser, Wynne, Marsh, Sale, R. G. Scott, Anstey, Plunkett, M'Hardy, and Beamish; Lieuts. Todd, Edwards, E. Wood, Greer, Haynes, Watson, Courtney, Hare, G. Barker, Lewis, Ord, Darwin, Addison, Maycock, Rainsford-Hannay, and Mason; and Mr. R. Mitchell-Campbell.

Although it has been denied that there is any probability of Lieut.-Gen. Sir Lintorn Simmons, K.C.B., R.E., being employed in connection with any expeditionary force it might be found necessary to dispatch to the East we (*Irish Times*) have the best grounds for stating that were a force ordered from England to Constantinople it is highly probable that Sir Lintorn Simmons would have the offer of a high command, and that he would under any circumstances accept service.

Lieut. R. R. Pulford has been assigned local rank as capt. in India, from March 24, 1877.

Major A. T. Storer, at Birr, is negotiating an exchange with Major R. Grant at Malta.

1st or Royal Scots. The wing of the 1st Batn., stationed for some time past in Richmond Barracks, Dublin, were to have joined head-quarters on Thursday. The non-effectives and families, except three women per company, move into Linen Hall Barracks and remain until August next, when they will be moved to the Curragh, where the battalion winters. Capt. Hughes, 1st Batn., has applied for permission to retire from the Service. Lieut. Beley, 2nd Batn., has passed the higher standard examination in Hindostanee.

3rd Buffs. Capt. Kerr, 1st Batn., has passed the higher standard examination in Hindostanee.

4th King's Own. The 2nd Batn. left the Curragh on the 17th inst. for Dublin, seven companies going into Beggars Bush and three into Linen Hall Barracks.

5th Fusiliers. The 2nd Batn. and depôt 1st Batn. moved on Wednesday from Woolwich to Chatham.

9th Regiment. The head-quarters of the 1st Batn. embarked at Tilbury Fort on Tuesday in H.M.S. Assistance for Ireland. The Assistance is expected at Kingstown to-day, when the regiment will disembark and proceed by road to Dublin, where it takes over the Richmond Barracks.

12th Regiment. Capt. Boyes has been posted to the Peshawur District, on appointment as brigade-major on the Bengal Establishment. Capt. Gavin, 2nd Batn., is about to retire from the Service. Lieut. Robinson, 2nd Batn., has passed the higher standard examination in Hindostanee.

13th Light Infantry. Capt. Leet will vacate his appointment as depty.-assist. adjt.-gen. for musketry, at Cork, on July 1.

14th Regiment. The head-quarters of the 2nd Batn. arrived at the Curragh on the 18th inst., and joined the remainder of the battalion.

16th Regiment. Major Horne, 2nd Batn., has been granted leave from India to England from April 15 to Oct. 15, on urgent private affairs.

18th Royal Irish. The 2nd Batn. will be moved from the Curragh to Kilkenny and Waterford after the drill season. Capt. Phipps' five years as depty.-assist. adjt.-gen. for musketry at Edinburgh expires on July 1.

22nd Regiment. Capt. Davies, 2nd Batn., has applied for leave to England.

24th Regiment. A letter, dated Cape Town, April 24, says that "Lieuts. Carrington and Browne, 1st Batn., have started from Cape Town with a party of fifty mounted men for Natal."

29th Regiment is expected to leave Chatham early next month for Aldershot. Capt. MacGregor is to be relieved in his duties as garrison instructor of the Home District at the end of June.

33rd Regiment. The depôt companies have moved with the 76th Regt. from Chatham to Aldershot.

45th Regiment. Lieut. Hudson has been granted leave from India to England for six months, on private affairs.

47th Regiment is expected at the Curragh on Monday next from Jersey, from which station it is at present *en route*. It will be quartered at Athlone after the drill season.

Royal Marines.

A detachment, consisting of 1 lieutenant, 1 sergeant, 1 corporal, and 18 gunners R.M.A., and 1 corporal, 1 drummer, and 32 privates R.M.L.I., has embarked for service in the Achilles.

Col. Stewart, R.M.L.I., recently appointed commandant of the Plymouth Division, has been granted leave of absence for six weeks, expiring on June 30. During Col. Stewart's absence Col. Wright will remain in temporary command of the Division.

54th Regiment. Lieut. Wedderburn, a probationer, wing officer, 3rd Punjab Infantry, is about to be admitted to the Bengal Staff Corps.

56th Regiment. Capt. Leckie has leave in India, on private affairs, to Aug 12. Sub-Lieut. Harrison has passed the lower standard examination in Hindostanee.

59th Regiment. Brevet Major Lawson and Capts. Chisholm and Elias have been appointed a committee of paymastership, Capt. Chisholm officiating on the responsibility of the committee.

62nd Regiment. Lieut. Carter has passed the higher standard examination in Hindostanee.

63rd Regiment. Major Kinahan has been granted leave from India to England, on medical certificate.

67th Regiment. Lieut. White has been granted leave from India to England, on urgent private affairs.

68th Light Infantry. Referring to the death of Capt. Bolden, recently announced, the *Times of India* says:—"Capt. Bolden was mauled by a tiger near Mandulghur, in Shahpoora State, eighty miles from Nusseerabad, on April 18. He died on the 22nd, after the amputation of a leg. He was about firing from an elephant's pad, when the elephant swerved, throwing him into the tiger's jaws. Medical aid arrived after an interval of twenty-four hours." The following is an extract from Brigade Orders:—"Nusseerabad, April 23, 1877.—No. 275.—The brigadier-general commanding announces with deep regret the death of Major Bolden, of the 68th Light Infantry, owing to wounds received from a tiger when out shooting near Mandulghur on the 18th instant. The melancholy event took place at Mandulghur on the morning of the 22nd instant. In Major Bolden the public service has lost a distinguished officer of high ability, and the officers and men of the 68th Light Infantry a beloved friend and comrade."

70th Regiment. Lieut. Pears, a probationer, wing officer, 3rd Punjab Infantry, is about to be admitted to the Bengal Staff Corps.

73rd Regiment. Lieut. Swiny has been granted leave from India to England from April 20 to Sept. 15, on private affairs.

75th Regiment will leave the Curragh on Monday for Kingstown, where it embarks for conveyance to Guernsey.

88th Connaught Rangers. Major Hall is about to retire upon half pay.

89th Princess Victoria's. A correspondent writes:—"The officers of the right wing gave a ball on March 23 at Thayetmyo, where they have been stationed during the past year. The weather for some time previous was exceedingly warm, the thermometer averaging 102 deg. inside the bungalow, and it was feared that the heat would somewhat mar the pleasure of dancing. Happily, such was not the case, for the evening turned out cool, and, together with the punkah, the temperature of the ball-room was kept somewhat below 80 deg. The ball was given in the sergeants' mess, the room being prettily and tastefully decorated. On Easter Monday the first of a series of penny readings came off in the regimental theatre, and, for a first trial, were very good. One piece of the performance cannot be passed over without mention, viz., a cornet solo—"Morceau," by Suppe—played by Private Ryan, of the band, who rendered the piece with excellent execution and brilliancy, and who drew down the well-merited applause of an appreciative audience. Capt. Cuthbert and Sub-Lieut. Standen have passed the lower standard in Hindostanee."

90th Light Infantry moved to Aldershot on Wednesday from Gosport.

91st Highlanders. Referring to the departure of the regiment from Enniskillen for Belfast, the *Fermanagh Mail* says:—"During the stay of the regiment here the gentlemanly and courteous demeanour of the officers, and the orderly, soldierlike bearing of the non-commissioned officers and men won the esteem and respect of all classes of our fellow-townsmen, and their departure from amongst us, just at a time when their worth and character were only becoming really known, is greatly regretted. During the stay of the regiment in Enniskillen there was very little sickness among the men, a fact which speaks volumes for their good conduct."

93rd Highlanders moved on the 17th inst. from Dublin to the Curragh, where they remain for the winter.

99th Regiment. A party, under Lieut. Lang, of three non-commissioned officers and seventeen men of the detachment at Clonmel proceeded on Wednesday last to Cahir to take charge of the barracks till the arrival of a party of the 3rd Dragoon Guards. The detachment, under Capt. Kennedy, at Duncannon Fort, was withdrawn to Waterford on Tuesday. The moves of the detachments at Waterford, Clonmel, Dungarvan, Carrick-on-Suir to Templemore are suspended till further orders.

102nd Fusiliers. Major Duncan vacates his appointment as garrison instructor at Dublin at the end of June, when he will proceed to join his regiment at Gibraltar.

103rd Fusiliers. A detachment of 150 non-commissioned officers and men, with officers in proportion, will arrive in Dublin from Templemore on the 7th proximo, and move into Linen Hall Barracks. Lieut.-Gen. T. Tapp, C.B., major-gen. on the Retired Full-Pay List, late in command of the regiment, died at Fairfield, Bradford-on-Avon, on the 17th inst. He obtained his first commission as ensign in Jan., 1822, and during his military career had seen much active service. He served in the expedition from Aden and destruction of the Arab posts in 1840. He also served in the Punjab campaign of 1848-49 as depty.-assist. adjt.-gen. of the Bombay column, including the siege of Mooltan, attack of the Mundee' Ahwa, and suburbs, and storm of the city, when he was severely wounded, and was mentioned in despatches for "conspicuous gallantry." In the Persian campaign of 1856-57 he commanded the Cavalry Brigade and Poona Irregular Horse, including the assault of Reshire, surrender of Bushire, expedition to Borazjoon, and the night attack and battle of Kooshab, for which services he was mentioned in despatches and thanked by the Commander-in-Chief of Bombay and by the Governor-General in Council. For his distinguished services in the field he was nominated a Companion of the Order of the Bath and appointed an aide-de-camp to the Queen. His commissions bore date:—Lieut., April 21, 1824; capt., Aug. 17, 1840; major, June 7, 1849; lieut.-col., Nov. 28, 1854; col., Nov. 28, 1857; major-gen., March 6, 1868; and lieut.-gen., Oct. 2, 1874.

Rifle Brigade. The annual inspection of the 1st Batn., under command of Lieut.-Col. H.R.H. the Duke of Connaught, K.G., was made at Dublin on Monday by Major-Gen. Herbert, C.B. The battalion left Dublin on Thursday for the Curragh for the drill season. A detachment and the families, under Capt. Fryer, left Dublin on Wednesday for Fermoy, where they will be joined by the remainder of the battalion at the close of the drill season.

2nd West India Regiment. Extract from regimental orders by Lieut.-Col. G. D. Webber, C.B., commanding:—"Sierra Leone, West Africa, April 29, 1877.—It is with much regret that the lieut.-col. commanding has to record the death of one of the regiment's oldest officers, Lieut.-Gen. H. Wise Whitfeild, who died at Dover on March 30, 1877, aged sixty-eight years. Lieut.-Gen. Whitfeild was forty years and 182 days in the 2nd West India Regt., during which period he commanded it for fourteen years and 192 days, and won the esteem of every officer, non-commissioned officer, and man by his just treatment and strict discipline. The commanding officer feels sure this sad intelligence will be read with sorrow by all ranks. Officers will wear mourning for fourteen days.—By order (signed), C. F. Filliter, Lieut. and Adjt. 2nd West India Regt."

THE AUXILIARY FORCES.

MILITIA.

2nd Derby (Chatsworth Rifles) completed its annual training on the 19th inst. The regiment came up to its full strength in officers and men, with only fourteen absentees. The recruits were a very fine body of men. Lieut.-Col. Cavendish was in command.

Hampshire Artillery. This excellent regiment, numbering 400 men, under command of Lieut.-Col. Inglefield, R.A., was inspected at Gosport on Saturday last by Col. Turner, C.B., R.A. Both officers and men acquitted themselves most admirably, the appearance and drill of the latter testifying to the attention they have received during the training from commanding officer as well as adjutant. The regiment was dismissed on Tuesday.

Hampshire. Lieut.-Col. Briggs and the officers gave a ball in the Guildhall, Winchester, on the 17th inst. The regimental sports took place on Saturday.

East Kent. The regiment was inspected at Canterbury on the 17th inst. by Col. Kirby, commanding the 45th Brigade Depôt, at 6.30 a.m. The inspecting officer, at the termination, said he regretted they had had such bad weather for their inspection, but could not take his leave of them without saying a few words. He had seen them for five years, and every year there had been a decided improvement, both in the field and in quarters; and, although there was still much to be desired, he should be enabled to report most favourably of the two battalions.

4th Royal Lancashire. Col. Robertson, C.B., commanding the Liverpool Sub-District, inspected the regiment on Friday last at Warrington. Col. Mansergh was in command, and at the close of the inspection Col. Robertson expressed the very great satisfaction he derived at finding the regiment in such a high state of discipline and efficiency. The men were dismissed on Saturday.

Nottingham. The regiment assembled at Newark on Monday.

4th West York. It is with satisfaction that we are given to understand that the Militia regiments during this year's training have exhibited a marked improvement in every way. This happy result has probably been brought about by the more intimate connection existing now between the Regular and Auxiliary Forces. This regiment, under Col. Pollard, is a case in point, showing, as it does, to what state of efficiency a Militia regiment can be brought, if only the colonel and officers under his command act in unison.

Carlow Rifles. Capt. H. F. Morgan, late 28th Regt., has been recommended for the vacant company.

Limerick City Artillery. The detachment assembled for preliminary drill at Limerick consists on parade of 2 lieuts., the adjt., 18 sergts., 5 corporals, 5 trumpeters, and 103 gunners.

Tipperary. The detachment assembled at Cashel for preliminary drill consists of 1 capt., 4 subalterns, the adjt., qrmr., surg., 23 sergts., 8 buglers, and 194 rank and file.

Tyrone Fusiliers assembled at Omagh on Thursday for training.

Waterford Artillery has taken over Duncannon Fort from the detachment of the 29th Foot, in view of the training commencing on Monday.

The following regiments complete their training to-day, viz.:—Royal Carnarvon, Royal Cornwail and Devon Artillery, Hampshire, Huntingdon, Kent Artillery, 2nd Royal Lancashire, Royal Lancashire Artillery, Royal London, Royal Pembroke Artillery, 1st Tower Hamlets, Dublin County, and Kildare.

The following regiments assemble for training on Monday next, viz.:—2nd Devon, at Plymouth; South Lincoln, at Grantham; 5th Royal Middlesex, at Uxbridge; the 2nd Somerset, at Bath; 1st Batn. 1st Stafford, at Lichfield; 2nd Royal Surrey, at Guildford; Worcester, at Worcester; Edinburgh Artillery, at Edinburgh; 1st Royal Lanark, at Lanark; Carlow, at Carlow; Leitrim, at Carrick-on-Suir; Londonderry, at Londonderry; and Waterford, at Waterford.

The following officers have obtained certificates at the Dublin School, viz.:—Lieuts. Beamish, South Cork; Fitzgibbon, Roscommon; Dobbin, Limerick County; and Moore, 2nd Tower Hamlets; and Sub-Lieuts. D'Arcy, Louth; Thacker, Kilkenny; Stannill, Westmeath; and Quin-Harken, Leitrim.

In consequence of the concentration of troops at the Curragh, as at first contemplated, not having been sanctioned, the following regiments will now be trained at the undermentioned places:—The Cavan Regiment, at Cavan; North Down, at Newtownards; Fermanagh, at Enniskillen; Kerry, at Tralee; King's County, at Birr; South Mayo, at Westport; and Meath, at Navan.

YEOMANRY.

Cheshire. Orders are issued for the regiment to assemble at Chester on Friday next for training.

Denbighshire Hussars. Lieut.-Col. Neyland's smart regiment assembles at Wrexham on Saturday next for eight days' duty. Before next training the services will be lost of the most popular adjutant, Capt. Morrison, 5th Lancers, whose five years are expiring.

Royal 1st Devon assembled on Wednesday at Exmouth for training.

East Kent Mounted Rifles assembled at Dover on Monday for their annual training.

VOLUNTEERS.

The total number of Volunteers, exclusive of those now enrolled, who have joined and passed through the force since its establishment in 1859 to the present time is as follows:—Light Horse, 515; Artillery, 124,897; Engineers, 20,739; Mounted Rifles, 262; Rifles, 486,498; making a grand total of 632,911.

Cavan—Lieut. C. Harman resigns commission.

Royal South Down—Capt. R. Keown-Boyd resigns commission.

Royal Dublin City—Lieut. H. G. Kelly resigns commission.

King's County—Lieut. J. Drought to be Capt.

Royal Tyrone Fusiliers—Sub-Lieut. W. F. Fawcett to be Lieut.; July 1, 1874.

YEOMANRY CAVALRY.

Royal North Devon—Lieut. G. L. Lopes resigns commission.

Hampshire—Lieut. G. J. Drummond resigns commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

East Lothian—George Lord Binning, to be Sub-Lieut. The Hon. Henry Robert Hepburn Scott to be Sub-Lieut. (Supy.).

According to the *Irish Times*, Sir William Drake, K.C.B., Director of Supplies and Transport at the War Office, has submitted a scheme for the reorganisation of the Commissariat Service, which is to be fully considered by the committee recently assembled.

Pettman fuzes are again being made and issued in large quantities. Wherever it is possible, those already issued are being recalled to Woolwich and re-primed.

Epps's Cocoa — Grateful and Comforting. — "By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—*Civil Service Gazette*. Made Simply with Boiling Water or Milk.—Sold only in Packets labelled—"James Epps & Co., Homœopathic Chemists, London."

RUSSIAN DEVELOPMENT AND OUR NAVAL AND MILITARY POSITION IN THE NORTH PACIFIC.

Capt. J. C. R. Colomb, R.M.A., read a paper on this subject at the Royal United Institution yesterday. The subject was treated under two heads, "Historical" and "General," and then followed some brief remarks, which may possibly suggest useful topics for discussion.

This historical sketch opened in 1513 with the discovery of the Pacific, and we regret that want of space prevents our following the lecturer throughout his paper, which had evidently been prepared with great care and research, but his concluding remarks are worthy of consideration. The preceding year, said the lecturer, Henry VIII. had created the Admiralty Board in happy ignorance of the existence of that ocean which covers two-fifths of the whole world. That Board exists to this day, and on it rests huge responsibilities. They range from a tiny detail of boat construction to the principles and practice of a strategy which must hold the globe in its strong grasp. It must protect a commerce as boundless as the sea, and secure the communications of an "Empire on which the sun never sets." We expect it to do all this without either an "Intelligence Department" or a "mobilization scheme." Great importance is attributed to applying the principle of localization to military forces settled down in the shires of England, while but little heed is taken of the fact that the support, the supply, and the maintenance of our fleets all over the world is centralized under the roof of the Admiralty in Whitehall. We have spent millions on extending the dockyard accommodation and resources of home dockyards—as the sole base of operations which must cover the world. We are content to leave the great Pacific Ocean, with its 70,000,000 square miles of water, to the care of scattered ships, without any local power of expansion, without power of self-support, without adequate means of repair or stores of supply, without even a sufficiently protected base or any fixed system or plan of operations. If in these days an army marches on its stomach, a fleet cruises on its coals, but, as I have so frequently pointed out, we leave our coal lying about the world in unprotected positions at the mercy of any passing cruiser. I think I am quite correct in stating that if war breaks out to-morrow it would find our fleets without any system by which their supply of coal could be assured, when communications would not be perfectly safe. All these matters and things it is expected can be arranged for at any moment by the happy inspiration of the surviving representative in the direct line of that Board which Henry VIII. created, ignorant of the existence of more than half the world. It may be said it was absolutely necessary to spend millions on our home dockyards to meet the exigencies of a great naval war. When that event happens the enormous resources of private firms, situated within a few miles of such dockyards, will be, as regards private work, almost idle, while between our fleets and squadrons abroad and their dockyards oceans intervene. If I may revert to my very old theory—it more than ever appears to me now that had one-half the money which has been expended on dockyard extension at home since I humbly made the suggestion—ten years ago—been expended on the creation of a real dockyard in the other hemisphere, our naval position would be incomparably stronger now than it is. When a royal dockyard on the Thames was practically abolished, a fitting opportunity offered for seriously considering the necessity for an Imperial dockyard at Sydney, and a strong naval base in British Columbia. As science and mechanical contrivances advance so must the necessity for real, substantial, and complete means of repair increase. These great home dockyard extensions are an index and a solid sign of a national belief that we must be prepared for a great naval war. Let us for one moment turn to the purely military aspects of such a contingency. As many years ago I ventured to point out from this place, we cannot carry on a naval war without all our naval bases and coal depots being strongly garrisoned by purely military forces, but our mobilization scheme does not even mention a single naval base, does not provide for the security of a single coal depot. If we were plunged in a naval war to-morrow, and there are not sufficient garrisons forthcoming at once, the action of our fleets would be paralysed by having to protect their own bases from possible capture. The Admiralty would apply to the War Minister for garrisons for the Imperial strategic points, the War Minister would apply to the Admiralty for means of transport for troops and military stores, perhaps to be sent elsewhere. Standing at the edge of that ocean of administrative responsibility, which has neither been fathomed or explored, the War Minister, like Nunez, may look over it towards the Admiralty, whilst the Admiralty, far beyond his official view, may be like Albuquerque at the other side in the great "straits" of construction and "intent, perhaps, on being about to produce the most magnificent ship in the world." Thus, in the administration of our Imperial war, power is the opening history of the Pacific Ocean reflected. Following that history, we have seen on one side steady, persistent naval and military progress; on the other, a great nation with infinite resources recently tried in the furnace of a great war. Between them lies part of that vast ocean on which British commerce predominates, where there are interests of stupendous magnitude, and on the shores of which are thousands of English homes. How best to protect that commerce, to secure those interests, and to guard those homes, is neither a purely naval nor a purely military problem, it is a complex question only to be solved by a true application and a just combination of both Services. While the military mind apparently fixes itself on matters which ignore the Fleet, and the naval mind seemingly overlooks the Army, and the eyes of the Press and public are fixed on Turkey, it may be perhaps as well to have thus drawn attention, however inadequately, to a subject which refuses to separate the services, or to divorce two elements which are helpless by themselves. When we boast of our material wealth, our resources, and our scientific skill, let us remember they are for war purposes at present localized in these small islands, while the area of their application must extend over the whole globe. When we proudly point as a proof of all these things to the most magnificent ships in the world, let us remember the story of the little Aigun. Those who take no heed of arrangements for combining naval power with military force should remember this, that on Sept. 4, 1854, on the Coast of Kamschatka, English and French blood was shed like water "as a testimony against them." On the desolate shores of Avatchka Bay may still be seen the graves of those who that day fell helpless victims to this very principle, truly applied by our enemy, a willing yet useless sacrifice to their own country's neglect of Russian development in the North Pacific Ocean.

WAR NEWS.

Vienna, Friday Night.

Hobart Pacha will lead an expedition to the Crimea, accompanied by two monitors.

The Commander-in-Chief at Kars attacked the Russians on the 17th ultimo, and succeeded in driving them back.

The Commissariat Department of the Russian Army is said not to be working satisfactorily.

The Russians took Ardahan by assault on the 17th. Sixty cannon, an immense quantity of provisions and stores, and the camp, which had been occupied by fourteen Turkish battalions, fell into their hands. The Turks fled, pursued by the Russian Cavalry. The Turkish army, which numbered 12,000 strong, was driven back to Adramouth along the road to Erzeroum. Ardahan was only indifferently fortified, the Russians having during former wars blown up the ramparts, merely leaving a few remnants of the walls of the town, twenty-five feet high and six broad, which were unable to resist the modern heavy ordnance. The Russian loss in killed and wounded amounted to 235, among whom were five officers. The Russians have since been marching against the Turkish forces encamped near the Fountain of Dur.

Another brilliant engagement has taken place at Soukhoum Kaléh, where some battalions of Russian troops endeavoured to gain possession of the fortified positions taken from them on the 15th ultimo, but were repulsed.

The Russians have attacked Kars on two sides, but have been repulsed and driven back several miles by a gallant sortie of the garrison.

The Emperor will leave for the Danube on the 3rd proximo. His Majesty will be absent from St. Petersburg for about three weeks. He will be accompanied by Prince Gortschakoff and the Chancellor's two assistants, Baron Jomini and Mr. Hamburger.

At Tourtoukai and Sistovo the Turks are concentrating large masses of troops.

The Russians have withdrawn from Kaghizman.

The Turkish expedition to Soukhoum Kaléh started on Friday morning. It consisted of four large transports, four ironclad frigates, and one despatch boat, conveying 10,000 troops, five batteries of artillery, and 50,000 rifles.

The Russian official journal publishes an Imperial decree ordering the formation of two new divisions of Don Cossacks to reinforce the army in the field.

All Circassian Cavalry officers have been summoned to Constantinople for the purpose of organizing 25 Circassian regiments at Adrianople and Sofia.

Turkish war vessels have bombarded Adler and Igdyr. On the 19th inst. Gen. Tergukassoff despatched a detachment of troops from Surbchanes to Bayazid, having received information that the Turks contemplated operating against the latter place.

The Berlin papers publish intelligence from Bucharest stating that 72,000 Russian troops are concentrated on the Middle and Upper Danube—namely, 58,000 Infantry, 6,300 Regular Cavalry, 6,250 Irregular Cavalry, and 2,000 Engineers. The Artillery consists of 8 mitrailleuses, 6 field batteries, 3 batteries of Mounted Artillery, and 42 large siege guns.

We find in a letter from Jassy, published in the *Augsburg Gazette*, the following details about the Staff of the Grand Duke Nicholas:—"The health of the Commander-in-Chief is entirely restored; he works much; every morning he confers with the chief of the Staff, Gen. Nepogoitchitzky, and Major-Gen. Lawitzki. The former, who was engaged in the war of 1854 on the Danube, knows thoroughly all the country of the theatre of the strife. Gen. Lawitzki is still young, but has received an accomplished military education. The aides-de-camp of his Imperial Highness are men in the prime of life, all of whom have gained experience on the battle-field. The son of the Commander-in-Chief, the young Grand Duke Nicolas, serves as a captain on the Staff. Col. Harencamp has charge of the department for collecting information to supply the historical record of the campaign, and the correspondents of foreign journals have to address themselves to him. The bulletins will be drawn up by a young lieutenant of Uhlans, M. Chrestowski, known for his literary talents. There is at present only one foreign Military Attaché present, Col. Gaillard, who has been very favourably received. The greatest simplicity prevails about the Grank Duke; he leads the life of the soldier, and has no taste for the pleasures of the table."

The War Office, says the *Standard*, has it in contemplation to make a complete revision of pension districts, with a view of the number being reduced to fifty-eight.

The move of the head-quarters of the Dublin District from the Royal Barracks, Dublin, to the Curragh, is postponed until the 9th proximo.

The *Standard* says:—"The committee sitting to consider the case of the late Control Department officers have nearly concluded their inquiries. Officers belonging to various branches of the department have been examined, but the representatives of the late Military Train are disappointed at the fact that none of them have been called to state their grievances."

Orders have been received at Portsmouth that the Indian troopships, which are now lying there on the conclusion of the trooping season, are not to be disabled by taking in hand any important alterations, but only such work is to be done to them as could be completed in a few days, so as to enable them to proceed to sea if requisite.—*Standard.*

The 81-ton gun underwent a further trial on Wednesday at Woolwich. The charges of powder were the heaviest ever fired at Woolwich, being 425lb. at each round, the most consumed on any previous occasion being 380lb. The last round fired at the iron target at Shoeburyness was also of 425lb., and the object of the present experiment was to ascertain the velocity and pressure exercised by that charge on the chambered gun. Generally speaking, the results of the trial have shown that the heavy charge, when rammed up close, has produced velocities no greater than charges of 360lb. or 370lb. of powder, but when the density of the cartridge has been diminished by air spacing the more profitable consumption of the powder has been obtained, and a rate of speed attained which affords satisfactory evidence of the great gun's power.

THE QUEEN ADELAIDE NAVAL FUND.

The objects of this Fund are the relief of the orphan daughters of officers of the Royal Navy and Royal Marines, by grants in aid towards the education of the young, the maintenance of the aged, and the casual assistance of those who are in temporary difficulty. The Report for the years 1875 and 1876, made by the Committee of the Queen Adelaide Naval Fund, states that they have little more than the usual statement of their proceedings to record in order to maintain the interest of their subscribers and friends, and to secure that continued support so essential to the existence of the Fund. It affords them much pleasure to be able to state that, notwithstanding the limited resources at their disposal, they have been enabled, under the blessing of Almighty God, to relieve many sad cases of suffering among those who have been deprived of the comforts of a father's home. Ninety orphan daughters of officers of the Royal Navy and Royal Marines have sought assistance from the funds. So far as practicable, the circumstances and position of each applicant have been personally inquired into by the Ladies' Committee. Sixty-two of the most pressing cases received assistance in grants of money from £3 to £10. The Committee would gladly have awarded larger grants to the more necessitous applicants, whilst the circumstances of the twenty-eight who were refused, though not in such distress as those who were aided, were mostly of a nature to make the refusal a matter of pain. The Committee believe that those who carefully consider the statement of cases relieved will be convinced that there is an actual "needs-be" for the Queen Adelaide Naval Fund, that it is doing a noble work of charity, and that it deserves the warmest support of those whom God, in His mercy and goodness, has placed in positions of comparative ease and comfort. To them they appeal. Were it not for the existence of this Fund many of the applicants would be in the direst distress. Help, as far as means will allow, is afforded to every applicant, whether the father has or has not been a subscriber. Absolute necessity is the only condition. As in former years, three Queen Adelaide pupils have been maintained at the Royal Naval Female School. An important feature which the Committee would urge as a strong recommendation for the liberal support of this Fund by the charitable public is the small cost of its operations. By the balance-sheet it will be seen that in the course of two years the working expenses have not exceeded £25. With this exception the whole amount subscribed has gone to succour the distressed. The Committee again appeal to their friends and supporters to make the claims of the Society known far and wide, and also would invite the kindly co-operation of officers on active service to make collections among their shipmates to further the objects of the Fund, and to enable it to meet, in a satisfactory manner, the many cases of actual poverty which solicit their assistance. As years pass away the Society necessarily loses many of its old and valued supporters by death. The Committee deeply regret to have to record on their death-roll the names of Thomas Stilwell, Esq., who, from the establishment of the fund in 1850, had so kindly and efficiently been the treasurer; of Admiral A. B. Becher, a vice-president, who for years sat on the Committee, and aided the Society not only liberally from his own purse, but by advocating its cause; of Mrs. T. Lewin, Miss Tetley, and Mrs. Sargent, being among the earliest and most assiduous members of the Ladies' Committee. The Committee have the pleasure to announce that Admiral Sir Michael Seymour, G.C.B., Col. G. B. Rodney, Depty. Adjt.-Gen., Royal Marines, and the Rev. John Cawston, Chaplain of the Fleet, have kindly consented to be vice-presidents. The post of treasurer has been most kindly undertaken by J. P. Stilwell, Esq. The vacancies on the Ladies' Committee have been filled up by Mrs. Charles E. Green and Miss F. Melliss. The Committee cannot conclude this Report without an expression of gratitude to God that they have been privileged to be the means of affording comfort and assistance in many a sad and painful case. They venture to hope that the Report of their doings will merit the entire satisfaction of the supporters of the charity, and will induce those who have not hitherto contributed to give at once some small annual subscription to enable them to continue and extend the usefulness of the Fund. At present the funds are sadly inadequate to the relief of the very necessitous cases which come before the Committee. Donations and annual subscriptions are most earnestly solicited.

A number of Chinese naval cadets, lately trained in the Yang-Woo, under the command of Capt. Luxmoore, R.N., C.B., are expected to arrive in England shortly to gain some experience of our ships and dockyards. The training-ship Yang-Woo has been abolished by the Chinese Government on the ground of economy, and Captain Luxmoore has returned to England.—*Standard.*

It is understood that no more engineer students are for the present to be entered at Chatham Dockyard, on account of there being no regular factory there at present where the students can receive good practical instruction. It is stated the only dockyards where the students will be entered are Portsmouth and Devonport.

F. P. wishes to supplement the interesting list of successful former students of the Royal Naval School, New Cross, by the name of J. J. Barnard, who, after leaving the Naval School, passed successfully into the General Post Office; and having been invalided thence by reason of ill-health, and taken abroad to Tasmania, is now most usefully employed by the Government of the island as additional clerk to the Statistical Department of the Legislative Council.

The annual meeting of the Army Guild of the Holy Standard was held at St. Barnabas' Schools, Pimlico-road, London, on Wednesday last, at 3 p.m., the Warden, Lieut.-General C. W. Tremenheere, C.B., in the chair. The report of the Warden and Council, showing a large increase on the Muster Roll of the Guild, was proposed by Lieut.-Col. E. W. Childers, R.A., and seconded by Lieut.-Col. P. A. A. Twynam, 15th Regt., and, after some interesting discussion, adopted. Representatives from several garrisons in the United Kingdom were present. Refreshments were provided by the Council after the meeting, soldiers being admitted free of charge. At 6.30 p.m. there was a special service for the Guild in St. Barnabas' Church. The London Gregorian Choral Association supplied the choir. The Guild chaplain officiated, the Reverends McOdell and S. B. Windsor, G.H.S., being lectors; F. B. Baker, G.H.S., and a member of the L.G.C.A. cantors, and the Right. Rev. the Chaplain-General, P. C. Claughton, G.H.S., preacher. Seats were reserved for soldiers at the east end of the nave, and were well filled.

INDIA.

Col. E. P. Mignon, Bombay S.C., has been appointed comy.-gen. of the Bombay Army, vice Col. H. W. Holland, C.B., retired, and is succeeded as Depty. Comy.-Gen. by Lieut.-Col. M. W. Willoughby, Bombay S.C., Assist. Comy.-Gen.

Major A. G. F. Hogg, Bombay S.C., Depty. Qrmr.-Gen., Bombay Army, has been granted leave to England for six months, on private affairs.

Major-Gen. G. S. Montgomery, C.S.I., Bombay Infantry, has been permitted to proceed to England on vacating his divisional command in Bombay.

Brigdr.-Gen. C. T. Aitchison, C.B., Bombay S.C., Adjt.-Gen. of the Bombay Army, has been appointed a brigdr.-gen. on the Bombay establishment, vice Brigdr.-Gen. J. S. Gell.

Gen. Aitchison will for the present continue to perform the duties of adjt.-gen. of the Bombay Army.

Brigdr.-Gen. J. S. Gell, Bombay Infantry, commanding the Bombay Brigade, has been granted leave to England for twelve months, on medical certificate.

The following promotions are about to be made, viz.:—Major C. J. Griffiths, Bengal S.C., to be lieut.-col. and capt.; Brevet Major R. W. Sartorius, V.C.C.M.G., cadre of the late 72nd N.I., to be major from April 1, 1877, vice Col. H. Finch, retired; Major (Lieut.-Col. in Staff Corps) F. B. Foote, Infantry, to be lieut.-col. and capt.; (Major in Staff Corps and and Brevet Lieut.-Col.) F. M. Birch, cadre of the late 71st N.I., to be major, from April 1, 1877, vice Lieut.-Col. (Major in Staff Corps) C. J. Griffiths, removed from the list of regimental lieut.-cols.; Major W. D. Macturk, Infantry, to be lieut.-col., from April 1, 1877, vice Lieut.-Col. F. B. Foote, Bengal S.C., removed from the list of regimental lieut.-cols.: Major H. A. McNair, Infantry, to be lieut.-col., from April 1, 1877, vice Col. W. D. Bishop, retired.

Col. Nuttal, Bombay S.C., officiating commandant of the Land Frontier Force, vice Col. F. A. G. Loch, Bombay S.C., appointed to the Bengal Staff.

Major J. G. Watts, Bombay S.C., an officiating brigade major, has been appointed a brigade major on the Bombay establishment, vice Major C. F. James, Bombay S.C., whose period of service has expired.

Capt. W. W. H. Scott, 11th Bengal Cavalry, officiates as brigade major at Mean Meer during the absence of Capt. G. T. Halliday, Bengal Infantry, on furlough.

The term of service of Major R. Bythell, Bombay S. C., Fort Adjt., Asirgarh, having expired on July 30, 1876, he has been reappointed for a further period of five years from that date.

Major-Gen. J. Forbes, C.B., Bombay Cavalry, has been transferred from the Northern to the Mhow Division of the Bombay Army, vice Major-Gen. C. S. Montgomery, C.S.I., whose period of command has expired, and Brigdr.-Gen. J. W. Schneider, C.B., is posted to the Northern Division, on appointment to a divisional command.

Bridgr.-Gen. F. A. E. Loch, C.B., Bombay S. C., has been posted to the Aden Brigade, vice Bridgr.-Gen. Schneider, C.B., on appointment to the Brigade Staff.

The War Department have entered into a contract for the purpose of dredging and clearing the mud and rubbish out of the two commodious basins in the Royal Dockyard, Woolwich, which have since the close of the dockyard as a shipbuilding establishment remained entirely disused. The advantage which these basins offer for the rapid embarkation of troops, guns, and horses are so evident that it has been decided to put them into order for future use if required. —*Times.*

The perils that beset England's path consequent upon the Eastern imbroglio are apparently fully recognised by "My Lords." In reply to an application for a month's leave of absence by an engineer officer of high position in Devonport Yard, he was informed, by an exceedingly curt telegram, that his "application for leave at the present critical time is surprising, and cannot be granted." When it is remembered that the Chief Constructor proceeds on a month's leave, the relative value of the two officers, or professions represented by them, in the estimation of "My Lords" is apparent. —*Western Daily Mercury.*

From the most recent statistical researches, summarised in the handbook of Chassagne and Desbrousses, the consolatory conclusion results that in modern warfare battles have not become more murderous, despite the improvements in firearms. Those of 1870 were less so than the great battles of the first Empire, such as the battles of Moskowa and Leipsic. In the Crimea, the number of the killed was one in thirty-three of the effective force; in Italy, one in forty-five; in the war of 1870, one in fifty-three. The number wounded is almost uniformly one in seven.—*British Medical Journal.*

According to the *Times*, "range-finders for field guns are being introduced into the Service; they are being issued in the following proportions—viz., about 75 to 80 of the Nolan instrument and 25 of Watkins's. The Nolan range-finder has been considerably modified and reduced in size, so as to fit into a small leather pocket attached to the saddle, the instrument now being used in connection with a tripod, instead of, as formerly, being placed on a gun. The wooden roller for calculating the ranges has been done away with, a card being substituted, which gives the ranges due to various angles and bases without any calculation."

Notwithstanding reports to the contrary, we (*Irish Times*) understand that arrangements have lately been made by the Quartermaster-General's staff by which an army could be despatched from England at a few hours' notice for Eastern Europe. No orders have been issued, but the military authorities have not been unmindful of the complications which might at any moment arise. [We need not say that our contemporary is under a delusion—whether melancholy or otherwise we shall not stop to inquire. No such "arrangements" are possible—unless they be of the shadowy "Whistlerian" type of those visible at the Grosvenor Gallery. Not "a few hours' notice"—nor a few days—nor even a few weeks—would suffice for the despatch of "an army" from England for Eastern Europe."—Ed. A. & N. G.]

Errata.—In the extract from the *Daily News* correspondence which we published last week, the name of the Archduke Nicolas was followed by "Nicolaieff," instead of the word "Nicolaivitch." The first is the name of a place—the second the name of a person, "son of Nicolas." He is not an "*Arch*duke"—he is a "*Grand*" Duke. The name of the Russian officer who was sent to Berlin to report on the Prussian Army, as mentioned in last week's paper, is "Kaulbars," not "Kaulbare."

REVIEWS.

Two Months with Tchernaieff in Servia. By Philip Salusbury. (Chapman and Hall.)

It was quite unnecessary for Lieutenant Salusbury to write a preface in the form of an appeal *ad misericordiam* of the public, more especially of the critic. He has written a very stirring account of his experiences during what may fairly be called a wild-goose expedition, but one which required plenty of *pluck* to undertake and plenty of *luck* to pass through unscathed. He has accomplished both, much, no doubt, to his own surprise, and still more to the gratification of his friends, who in all probability regarded him as a doomed man. At all events, he managed to enjoy camp life in Servia, to witness at least one great battle, to become familiar with death in its most ghastly form, to bear testimony to the bravery of the Montenegrins as well as to the cowardice under fire of the Servians, except the artillerists, to see good service as Aide-de-Camp to General Dochtouroff, and to fail to make a friend of Tchernaieff. Nothing can be better than the spirit which dictated the following tribute to this General:—"No one has less cause to be grateful to Tchernaieff than myself, for he never treated me with common civility, and I never had a kind word from him, with one exception, the whole time I served under him. That one exception was when I volunteered to take the ammunition to Dochtouroff, there being no one else present who knew the way. It was an Artilleryman's work, and I would much rather have been with my General than bothering with ammunition. However, he thanked me, and even looked gratified. Why he showed such antipathy to me I don't know, but he did so. I am happy to say that he was the sole instance of a Russian who did not treat me as a friend, for from all the others that I met out in Servia I received friendships that I shall never forget, but from Tchernaieff none; and yet I say, in all truth, that a better-hearted, kindlier, or more courageous soldier never existed, and that, as even his enemy admitted, he was never out-generalled, but simply outnumbered." Lieutenant Salusbury's "Two Months" Tour in Servia" has much to recommend it, and very little for any but the "carping" critic to find fault with.

"Coming events cast their shadows before." Mr. Wyld's Staff map of the country between Odessa and Constantinople, which has just been issued, will soon, we believe, become very much used and very useful. It is true that the country between Odessa and the Danube is now only interesting as the scene of preparation, and it is curious enough that Odessa itself should be exposed to attack, and be much afraid of it on the part of the Turks, who will soon be called on to defend their own country with desperation. This map is clear and well marked, and the passes over the Balkans, the roads, and military positions are laid down with great distinctness.

Mr. Letts has published a strategical map of the valley of the Danube in broad colours. Its foreign origin is not disguised, for "on" still represents "or" in the names of the places, but the map is not the worse for that.

The twenty-sixth annual General Court of the Royal Cambridge Asylum for Soldiers' Widows was held at the United Service Institution, the Duke of Teck in the chair. Amongst the company present were the Duchess of Teck, Lady Gomm, Lady Hodge, Lady Louisa Fielding, and Gen. Sir. W. Codrington. The Report, read by Col. Stewart, showed that there were 54 widows in the asylum, six vacancies having occurred during the year. The lowest of successful candidates last year was admitted to one of them, two others were filled up, and it was now proposed to elect four widows by ballot from a list of thirty-five approved candidates. The committee, while regretting the resignation of Gen. Sir. E. Cust, had the satisfaction of announcing that Prince Edward of Saxe-Weimar had accepted the vacant office. In moving the adoption of the Report, Lord Hampton called attention to the fact that this institution was the only one that provided in any way for soldiers' widows. He was extremely glad to see the satisfactory character of the finances of the institution, as the interest on funded property was something over £600 a year, and to this they had been able to add a small amount during the past year.—Gen. Spencer Stanhope, in seconding the motion, remarked upon the small amount obtained from the general public.—In responding to a vote of thanks, proposed by Sir W. Codrington, the Duke of Teck expressed his great pleasure in presiding. The institution required enlargement, and he must ask all those who felt an interest in it to obtain subscriptions from their friends. He felt assured that if the public only knew that this was the sole institution for the benefit of soldiers' widows, and that they were only able to extend their benefits to between fifty and sixty poor women, their funds would soon increase.

"A number of officers representing the War Office and the Admiralty, amongst whom is Admiral Sir W. Mends, Director of Transports, are," says the *Standard*, "making investigations and experiments with a view to carrying out a new system which has been proposed for transporting the baggage train of an army sent abroad on active service. Hitherto the plan has been to dismember the waggons and pack them on board ship, while the stores which they are to contain are enclosed in cases and packed away also, necessitating delay and sometimes difficulty in getting them together when landed—perhaps in the face of an enemy—and loading up ready for the march. The idea now is to load the waggons before embarking, and lift them bodily into the holds of the transport ships, from which they can be as simply removed at the other end of the journey, and landed ready for instant service. The suggestion is as yet in its earliest stage, but the officers referred to have been at Woolwich making inquiries on the subject."

OUTFITS FOR INDIA AND THE COLONIES.

DETAILED LISTS of the necessary Outfit, with prices, &c., for every Climate and Appointment will be forwarded on application to

THRESHER AND GLENNY,
OUTFITTERS,
NEXT DOOR TO SOMERSET HOUSE, STRAND.

THRESHER'S KASHMIR SHIRTS. Especially adapted for Tropical Climates, being Light and Durable.

THRESHER'S JUNGRA SHOOTING SUITS. Made expressly for India. Impervious to spear grass.

THRESHER'S MILITARY SHIRTS. Made for wearing under uniform.

THRESHER'S INDIA TWEED SUITS. Manufactured entirely of Wool. Very light, strong, and elastic.

THRESHER'S CABIN TRUNKS. Manufactured for use on board H.M. Troopships and P. and O. Company's Steamers.

THRESHER'S INDIA GAUZE WAISTCOATS. Strongly recommended by medical men for wear in warm climates.

THRESHER AND GLENNY,
NEXT DOOR TO SOMERSET HOUSE, STRAND.
By Appointment to H.R.H. the Prince of Wales.

N.B.—Articles manufactured by THRESHER and GLENNY can only be procured at the above address.

APOLLINARIS.

The Queen of Table Waters."—British Medical Journal.

Incomparable for mixing with Wines and Spirits."—H. Vizetelly, "Wines of the World."

'More wholesome and refreshing than Soda Water."—C. Macnamara, F.R.C.S., Westminster Hospital.

"The Vogue in the Clubs."—The World.

Prices in London:—26s per 50 quarts; 42s per 100 pints; bottles included and allowed for.

MESSES AND CLUBS SUPPLIED ON REDUCED TERMS.

N.B.—All first-class tailors give credit, and it is only by the discount system noblemen and gentlemen who pay cash get the full value ready money entitles them to.

WM. PUGH (*from* Poole's), 5, CORK STREET, BOND STREET, W.

SCHWEITZER'S COCOATINA

Anti-Dyspeptic Cocoa or Chocolate Powder

Guaranteed Pure Soluble Cocoa, Without Sugar, Spice or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "The most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and Children.

Highly commended by the entire Medical Press.

In air-tight canisters at 1s. 6d., 3s., &c., by Chemists and Grocers.

MR. R. WILLSON,

COLT'S NEW GOVERNMENT ARMY REVOLVER,

After a severe competitive trial by the U. S. Ordnance Department in 1873 and 1876, has been exclusively adopted by the United States Government, and the whole of the United States Cavalry is now armed with them. It is made to take the 45-cal. regulation Service cartridge, and ammunition for them may be obtained from the Stores of an Army in the field.—See General Orders, May, 1877.

Length of barrel 5½ inches and 7½ inches.

In the trial of 1869, advertised by another maker, the Colt's pistol used was a muzzle-loader adapted to the use of metallic cartridges, which pistol has not been made or sold after that year.

Army & Navy Gazette.

LONDON, SATURDAY, MAY 26, 1877.

Happily for the naval Service and for those whom the Newcastle accident plunged into the deepest grief, the inquiry held at Sheerness has helped to remove those grave doubts which were shared by so many, that all that could have been done was done to save the lives of devoted men, for the action taken by Captain Gordon Douglas has been upheld by the court. The actual finding has not been made public, but the Admiralty has announced that it has learned with much satisfaction that "all proper measures were taken to save life on the occasion in question." We may add that none could receive such a decision with greater satisfaction than ourselves. The conflicting evidence given before the court of inquiry is sufficient to show how the opinion of those serving on board the ship and who actually witnessed the accident was divided; but we must be satisfied with the decision that the measures taken by the Captain were advisable under the circumstances. Five officers, however, agreed that something more should have been done, and the Commander was a wavering witness, who seemed to be suffering from shortness of memory. In the communications from a variety of sources—letters addressed to private friends as well as to ourselves—the only view taken was that the ship should not have been allowed to drift away to leeward, and that the attempt to rescue the men overboard should not have been so soon abandoned. Having before us such evidence of the feeling then existing, we were convinced that for the good of the Service, and to remove the painful impression which appeared to have been created, nothing but an inquiry of a searching character would avail. That has now been held, and by the result which has been published to the world neither the reputation of the Service nor that of the Captain whose conduct was called into question has suffered. Had it not been for the undivided expression of opinion which reached us and the positive feeling that a tragic mistake had been committed, we should not have commented on the lamentable affair at the length we did. But the end in view has been so far attained, that an inquiry has been held, and the name of Captain Gordon Douglas, which was overshadowed by the reports sent home, has been cleared. It is, however, a matter for regret that the action of the Admiralty was not more spontaneous, and that the inquiry was not announced in sufficient time to admit of more publicitly being given to the proceedings. In an article on this subject the *Western Morning News* remarks that:—"It may be that the opinions of Commander Dacres, Lieutenant Bethell, Lieutenant Schomberg, Lieutenant May, Lieutenant Field and Midshipman Sargeant—who all more or less strongly expressed their ideas that they should have been allowed to wear the ship, or that the boat should have stayed out longer, or that steam should have been got up—it may be, we say, that these suggestions were all impracticable, ill-advised, or dangerous. What we contend for is this, that this hastily-convened and quickly-concluded inquiry, under the circumstances detailed, was not a searching or public inquiry such as Mr. Ward Hunt promised, such as the Navy had a right to expect, and such as would have taken place if a court-martial had been ordered. Experience has shown that the exhaustiveness of the evidence given and the verdict pronounced is often materially affected by the fact that all England, through its daily Press, is critically watching the proceedings from day to day. But this thing *was* 'done in a corner.'" That there should still be an impression that there is something to be hidden is much to be deplored for the sake of all concerned, and we venture to think that the Admiralty has not acted wisely in this matter. In a Portsmouth paper we also see it stated that the Newcastle inquiry has left public opinion divided, for the conflicting nature of the evidence which has appeared cannot be accepted as an assurance that all was right. Further comment is unnecessary, but in conclusion it may be well to state that the report of the inquiry published last week was received at so late an hour that some errors and discrepancies were allowed to pass, and we are especially desirous of correcting some remarks with which Captain Douglas has been credited. Referring to the gallant young Midshipman who lost his life, he is reported to have said that "he had thrown himself twice overboard without cause." What Captain Douglas stated was, that Mr. Wingfield was known to be most anxious to obtain the Humane Society's medal, and had expressed his determination to go overboard to the rescue of any man, and had displayed so much readiness to risk his life in the endeavour that Captain Douglas had found it necessary to caution him. That the brave boy, who has now to be mourned by his friends and former messmates, knew no fear is beyond dispute, and his loss is to be deplored by all. Had he lived he would doubtless have won the decoration for gallantry which he so coveted, but, having died in the attempt to save the life of another, his dying act remains unnoticed by that Society which awards honours for humanity, since it is not customary to mark its appreciation of deeds of daring unless those who perform them are fortunate in surviving. Even had this young officer not expressed his determination to endeavour to save a drowning shipmate at any time, he could not have done less than go overboard on this sad occasion, for he was a magnificent swimmer, and was on duty at the spot where the accident happened. He fully succeeded in his purpose of reaching the man and placing the life-collar round his neck, and that he acted throughout with coolness is evidenced from his last words as he jumped overboard, being the order, "Let go the life-buoy." The same medal which would have been granted to poor young Wingfield had he lived would be doubly prized as a tribute to his memory if awarded to his sorrowing relatives, and we sincerely trust that his last act of bravery may meet with this recognition.

A weekly contemporary publishes what it professes is a correct "statement of the regiments which will compose the British expeditionary force for the East in the event of this country engaging in war," appending the names of the officers to whom will be entrusted the commands. The particulars are so palpably incorrect that our military readers will not allow themselves to be blinded by them; but, for the information of those unconnected with the Army, we may state that the whole paragraph is the merest guesswork. Three times has the same paper treated us with details of the composition of the "proposed expeditionary force," but not once has it hit the mark, or even approached it, and, strange to say, on each occasion different corps have been named. So much anxiety exists on the part of the friends of the corps mentioned for service that we feel bound to set their minds easy. At such a time it is not too much to expect that editors will exercise a little caution, for the wild shots occasionally appearing only tend to excite people unnecessarily, and to harass the Government at a moment when they have a difficult duty to perform.

The grand military concert, for the benefit of that most excellent institution the Royal Cambridge Asylum for Soldiers' Widows, at the Royal Albert Hall, to-day, ought to be a great success, and we hope it will. Military music, if not so "refined" as that of "the future," is far more easily understood by men and women of the present time, and for the general public, for whom Wagner is *caviare*, is very acceptable indeed, and the programme on the present occasion promises a great treat to the multitude who will, we trust, be present.

The War Office has managed to kick up a nice fuss among the officers of the Army in China. The local allowances there were paid in dollars reckoned at their *real* value—3s. 10d. or 3s. 9d.—when, lo! an order was received, a few days before the end of the financial year, stating that 4s. 3d. was in future, and from April 1, 1877, to be the value of the dollar in paying these allowances. The state of mind of the officers can be better imagined than described.

It is at least prudent for Russia to advise Prince Milan to restrain his war party. There is still an Austro-Hungarian Power. There is also the fact that Servian valour, stiffened by Muscovite valour—naturally it is rather limp—has only sufficed to show that Servians are made to be beaten.

We understand that the gunboats built for the Chinese Government have proved excellent sea-boats in their outward voyages, and that Lord Napier of Magdala, who inspected them at Gibraltar, expressed a very high opinion of their qualities and power for river defence and for aggression. As to what the Chinese Government intends doing with them, that is a matter which, we suppose, has been fully considered by those most interested in the subject.

There is little likelihood that Sir John Garvock will complete the full term of the Portsmouth command, as any one may see who looks at the "Army List," and in that case Prince Edward of Saxe-Weimar, now kept out of it, will succeed—say two years hence. *Ce que est deferré n'est pas perdu.* There cannot be a better officer for the command at Portsmouth—which is, all in all, very trying and very "multiform"—than his Serene Highness.

The sketches in the *Graphic* of invalid Roumanian soldiers indicate that these warriors wear feathers in their caps, but it can not be clearly made out if they are white or not.

The force of Militia Engineers has been fixed at 1,060 non-commissioned officers and men, who are to supply the deficiencies in the organization of the 5th, 6th, 7th, and 8th Army Corps. This leaves three companies to be provided—three out of fifteen shown to be wanting in the original draft of the localization scheme.

The *Whitehall Review* announces that Lieutenant-Colonel H. Brackenbury, R.A., has started for the Russian head-quarters as Correspondent of the *Times*. It will be rather an anomalous position for a British officer on full pay and in active employ to fill; so we presume Lieutenant-Colonel Brackenbury, who served as Correspondent to the *Times* in the war of 1866 with the Austrian Army, and was praised by Benedek for his coolness at the battle of Königgrätz, and who acted in the same capacity with the Prussian Army during the invasion of France, is only detached temporarily. M. Ivan de Wœstyne, armed with a letter of recommendation from the French Ambassador, General le Flô, to Colonel Gaillard, the French *Attaché* at the head-quarters of the Grand Duke Nicolas, has been received as Correspondent of the *Figaro*. He was formerly in the Army, and commanded a battery during the siege of Paris. The most "advanced" of the correspondents is the gentleman who represents the *Daily Telegraph* at Erzeroum; but as the fortune of war changes and shifts, every one of them may come to the front in turn.

The *Graphic* this week contains sketches and photographs of "Famine" scenes in the Madras Presidency which we commend to the notice of Mr. Gladstone as a dealer in atrocities, and to the complacent chucklers who believe "the fairly favourable" reports sent over from India to bolster up the "just-keep-'em-alive" policy of Sir R. Temple and his admirers, They are simply too fearful—each one a nightmare. The name "Relief Camp" must be a bitter mockery. The *British Medical Journal* has a pungent article on the cruel controversy between Dr. Cornish and the authorities, who certainly are not in this question ranged on the side of the Angels of Mercy and Charity. We have never yet heard of the Angel of Political Economy, but Sir R. Temple, who has got the ear of the authorities at home and abroad, is apparently sustained by her ministrations in the desert which he is creating. Is it a fact or not that the annual death-rate per thousand in the Madras famine camps is 930.8, as stated by Dr. Cornish? If so, "surplus population" will soon cease to create anxiety to Indian statesmen, and the ratio of increase will revert to the maximum of decrease. We doubt if Lord Salisbury could point out anything so terrible in Turkey. Not all the atrocities in Bulgaria by the Turks, or in Circassia by the Russians, nor all the slaughter of battle, can at all come near this death-rate. But India is far off—"Heaven is distant, and the Czar is near"—and so we do not even wince at the fearful suffering of these poor, helpless, uncomplaining wretches, who are fast going down before Sir Richard Temple's "minutes" and practical conclusions as opposed to "medical theories."

The Navy.

GAZETTE.

Admiralty, May 18, 1877.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, Nav.-Lieut. George White has been placed on the Retired List of his rank from the 9th inst.

In accordance with the provisions of H.M.'s Order in Council of Feb. 22, 1870, the undermentioned Chief-Engineers have been placed on the Retired List of their rank from the 16th inst.:—William Donnison and James Orchard.

May 19, 1877.

Staff-Surgeon William Anderson has been promoted to the rank of Fleet-Surg. in H.M.'s Fleet, with seniority of March 23, 1877.

May 21, 1877.

Royal Marines—The undermentioned promotion has taken place in the Royal Marine Light Infantry, viz.:—Lieut. Francis Mordaunt Shairp to be Capt., vice Capt. and Brevet Major Arthur C. J. McMeekan, retired at his own request, under the provisions of H.M.'s Order in Council of Feb. 22, 1870; May 10, 1877.

May 22, 1877.

Staff-Surg. William George Ridings has been promoted to the rank of Fleet-Surg. in H.M.'s Fleet, with seniority of the 3rd inst.

Royal Marines—The undermentioned promotion has taken place in the Royal Marine Light Infantry, viz.:—Lieut. Nassau William Irwin Hampden Stephens to be Capt., vice Capt. and Brevet Major Frederick Herbert Ruel, placed on the Retired List, under the provisions of H.M.'s Order in Council of Feb. 22, 1870; May 13, 1877.

May 24, 1877.

The following promotions have been this day made:—Sub-Lieuts. James Gordon Bremer, Frederick Lenox Langdale, Rudolph Edward de Lisle, Cecil Henry Wright, Charles Allan Fenwick Waters, Erasmus Denison St. Andrew Ommanney, Arthur Lloyd Babington, Frederick St. George Rich, Arthur Granville Kempe, John Gibbings, Arthur Richard Macdonnell Creagh, Rowland Edward Berkeley, Hubert Gould Willin Thorold, James Mallcott Richardson, James Pipon Montgomery, Frederick Elton, William Wyatt Smythe, William Graham White, Edward William Lloyd, Charles Elsden Gladstone, Ernest Alfred Simons, to be Lieuts. in H.M.'s Fleet.

Royal Marines—The undermentioned promotions have taken place in the Royal Marine Light Infantry consequent on the retirement, on May 7, 1877, of Gen. Alexander Anderson, C.B., under the provisions of H.M.'s Order in Council of Feb. 22, 1870:—Lieut.-Gen. George Colt Langley, C.B., to be Gen.; May 7, 1877. Major-Gen. Hayes Marriott, to be Lieut.-Gen., vice Langley; May 7, 1877. Col.-Commandant Penrose Charles Penrose, C.B., to be Major-Gen., vice Marriott; Dec. 24, 1868, such antedate not to carry back pay prior to May 7, 1877. Col. and Second-Commandant John Henry Stewart to be Col.-Commandant, vice Penrose; May 7, 1877. Lieut.-Col. and Brevet Col. John William Alexander Kennedy to be Col. and Second-Commandant, vice Stewart; May 7, 1877. Capt. and Brevet Major William Henry Worthy Bennett to be Lieut.-Col., vice Kennedy; May 7, 1877. Lieut. Edward Nicoll William Holbrook to be Capt., vice Bennett; May 7, 1877.

APPOINTMENTS.

Lieutenants—Arthur M. Farquhar, to be flag-lieut. to Rear-Admiral William M. Dowell, C.B.; Frank H. Rogers and Henry J. L. Norcock, to the Vernon, additional, to qualify as torpedo lieutenants; A. B. Thomas, to the Defence, as additional; and W. J. G. Carrow, to the Duke of Wellington; G. R. Bethell, to the Warrior; James H. T. Burke, to the Minotaur, additional for one year; Francis W. Cobb, to the Iron Duke, additional for the Coastguard.

Navigating Sub-Lieutenants — Francis Roberts, to the Martin; Frederick C. A. Crooke, to the Black Prince; and George A. C. Webb, to the Minotaur.

Surgeon—Henry Scanlan, to the Duke of Wellington, for service in the Victory.

Chief Engineers—Nathaniel Farrant, to the Indus, additional; Jown Downes, to the Asia, additional; John C. Weeks, to the Indus, additional; John Hill, to the Pembroke, additional.

Engineers—Richard W. Earl, to the Indus, additional; James Butchart, to the Pembroke, additional.

Assistant-Engineers—Andrew S. Barter, to the Indus, additional; John G. Coombs, to the Asia, additional.

Assistant-Paymaster—W. Inch, to the Black Prince.

Achilles, Capt. Sir W. N. W. Hewett, K.C.B., having had bottom scraped and coated with composition, has been put out of dock at Keyham. The defects cannot possibly be made good in the allotted time, and only the most important items will be taken in hand, so as not to delay the ship. The remainder will be postponed until a more favourable opportunity.

Active, Capt. R. F. Boxer, remains in the steam basin at Portsmouth, and will not be ready to sail for some time. Her destination is still uncertain.

Alberta, Staff-Capt. D. N. Welch, is to be got ready by June 28.

Arab, Com. F. S. Broughton, arrived at Karwar on April 28; she would fill up with coal and proceed to Bombay the same day.

Cherub, Lieut.-Com. F. R. B. Kemp, will arrive in the Thames on July 1 for the use of the Naval Artillery Volunteers of London.

Diamond, Capt. G. S. Bosanquet, was expected at Zanzibar about the middle of April.

Druid, Capt. Purvis, arrived at Sierra Leone on April 29, where he found the Boxer, and would leave for Cape Coast Castle after coaling.

Elk, Com. A. Tupman, left Spithead on Sunday morning for the South-East Coast of the American Station.

Eurydice, Capt. Marcus A. S. Hare, was inspected at Portsmouth on Monday by Admiral George Elliot and Rear-Admiral Hood, C.B. She left Portsmouth on Wednesday and will proceed to Madeira for a cruise.

Express, Lieut.-Com. the Hon. A. Littleton. The *Gibraltar Chronicle* describes an encounter on the night of May 10, at Camp Bay, between a boat of the Express and some Spanish smugglers, which, it says, but for the judgment and discretion shown by the officer in command of the boat might have resulted in a serious loss of life to the Spaniards. The *Chronicle* writes:—"It appears that shortly after 7 o'clock, when quite light, the traders began to move out from the Old Mole, as usual, on their accustomed errand, to which the suggestion of the new Customs changes has lately given greater stimulus, and the Express sent out a boat, as is done frequently, to see that these traders do not loiter about in English waters, and so provoke attacks from *Escampavias.* The boat of the Royal Navy was manned by four seamen and two Marines, all armed, and under the charge of Sub-Lieut. C. Elliot. One of these gentry being observed to hang about under the rocks and not make the best of her way on her voyage, was approached to be warned to get on, when the Spaniards pulled into Camp Bay, deliberately hauled up their boat on the beach, and themselves, nine in number, landed. Mr. Elliot also pulled to the shore and called on them to surrender for so flagrant a breach of regulations, when the men on shore, who had obtained vantage ground on the high bank under which the boat of the Express was lying, replied by volleys of stones, which fell into the boat, one of the sailors being cut somewhat severely about the forehead; seeing that the smugglers' boat would take some time to launch, Mr. Elliot pulled back with all speed to the gun-vessel and returned with the greatest expedition with a reinforcement of the cutter fully manned, and both boats pulled into Camp Bay and again summoned the smugglers, who, seeing that all resistance was useless, surrendered at once, and getting their boat off, which was laden with thirty-four bales of tobacco, were escorted to the New Mole, where the crew was landed, and marched under escort from the New Mole Guard to the Main Guard. The nine Spaniards implicated in the above affair were brought up at the Police office, before Lieut.-Col. W. Mollan, C.B., police magistrate, and charged with the assault on the boat's crew. The spokesman, a shrewd-looking, wiry old man, stated in defence that he had once before been captured by a Guardacosta, and mistook the English boat for a Spanish revenue cutter, but the evidence proved beyond a doubt that showers of stones were thrown after the officer in command had shouted out that they were English. The magistrate inflicted a fine of £5 on each prisoner, or, in default, two months' imprisonment with hard labour. The smugglers seemed to take the imposition of the fine and the alternative imprisonment as a matter of course."

Fawn, Com. W. J. L. Wharton, was at Massowa on Feb. 6.

Flying Fish, Com. H. F. Crohan, returned to Zanzibar on March 15 from the Seychelles; she left on March 23 for the Mozambique, Tamatave, and Mauritius.

Fox, Staff-Com. J. G. Dathan, left Devonport on Wednesday for Portsmouth, Sheerness, and Chatham.

Himalaya, Capt. E. White, left Simon's Bay on April 21, and arrived in Plymouth Sound on Thursday evening. She has brought home, besides the crews of several gunboats, relieved on the China Station, the right wing of the 32nd Regt., which will takr up quarters in Tregantle Fort, Plymouth.

Immortalite, Acting Capt. Gerard Noel. At the inquest held at Haslar Hospital on the body of John Aldridge, a private in the Royal Marines, belonging to the Immortalité, it was shown that whilst the deceased was on duty a sailor, who was engaged in unreeving the running gear on the top-mast rigging, when about to get down on to the top with a 12-inch single block in his hand, found the boom was loose, and in saving himself dropped the block on to the head of the deceased, fracturing his skull. He was conveyed to the hospital, where he died on the following day. The jury returned a verdict of "Accidental death," and expressed an opinion that strict orders should be given by officers in command of her Majesty's ships to midshipmen and petty officers in charge that all booms should be kept taut when triced up. The Immortalité was paid off on Monday (all standing) and placed in the Steam Reserve. The court-martial for the trial of Capt. Francis A. Hume, was resumed on Saturday morning, when Mr. Fegen, R.N., barrister, appeared for the defence.—Commander Noel, acting captain of the ship, recalled, stated that at the inquiry held by the officers some slight difficulty was experienced in getting information from Rogers, as he appeared somewhat frightened by the prisoner. About eight o'clock on the evening of the alleged assaults witness went into the prisoner's cabin to report what Rogers had said. Prisoner was sitting at his round table apparently reading. The prisoner was then, as at all other times, accessible to anybody without knocking at the door, or giving any warning before entering. All the doors that were usually kept open were open on that occasion. Rogers was released from confinement by the prisoner's order on Christmas-day to get his dinner in his mess. It was the prisoner's custom to give orders that all prisoners, excepting those under solitary confinement, should be released and sent to their mess on Christmas-day till evening quarters.—By the prosecutor: Gave Rogers a very good character. Rear-Admiral Rowley Lambert, C.B., late in command of the Detached Squadron, deposed: I received the letter produced from the prisoner under the following circumstances. I had ordered a court of inquiry to investigate the charge preferred against the prisoner.—Q. Had you, directly or indirectly, brought any influence to bear on Captain Hume to induce him to write the letter before the Court? A. Most certainly and decidedly not.—The letter was as follows: "Mauritius, Jan. 25.—Sir,—Finding myself very ill indeed, and fearing that my mind may not remain clear much longer, I wish to make the following statements with regard to the subject of the court of inquiry to be held this day: That the charge brought against me by William Rogers is true in so much that at times I have been too familiar in my manner with the said William Rogers, and I make this statement in order to prevent the necessity of further inquiry in this matter, and beg that I be forthwith invalided, and the case sent home to be dealt with by the Admiralty." Fleet Surgeon John Chamberlain Ingles, of the Immortalité, proved that the certificate produced was in his handwriting. He was called early on the morning of January 25 to see the prisoner, and found him in his sleeping cabin. The prisoner told him, as near as he could remember, that he had a letter to send to Admiral Lambert, which he wished him to see, and asked witness to sign a certificate as to the state of his mind. Witness went into the after cabin and read the prisoner's letter, and wrote the following certificate—"I hereby certify Captain F. A. Hume is at present in his right mind." Admiral Lambert, in answer to the court, said that prior to the occurrence which led to the court-martial he never had reason to think that the prisoner was not in possession of his full mental faculties. He ordered a court of inquiry to assemble to investigate the charges brought by Rogers. The court of inquiry would have been held at the Cape of Good Hope, but it did not take place because of the letters from prisoner. The report of the inquiry held by the officers at Singapore was in his possession on the 26th of December. The squadron sailed on the morning of the 27th. The inquiry held by the officers of the ship was not held by his order. Paymaster Warburton, of the Immortalité, assisted in the investigation on December 23, prisoner having desired him to attend with the commander and first lieutenant. Rogers stated that similar conduct by prisoner had happened before, and on being asked why he had not reported it to the master-at-arms, said he did not like to. At the investigation he saw marks on prisoner's jacket which Rogers said he had made. Prisoner said that after finishing a cigar or pipe he was in the habit of going into another cabin to wash out his mouth, and he thought it not improbable that Rogers had taken the opportunity, passing as he did close to him, to place the marks on the back of his jacket.—Q. Did you at the time consider this possible without prisoner knowing it?—A. I did. Indeed it was the only explanation that occurred to me. During the enquiry prisoner denied the charge, and said, "I came on board from a pinnace. I dined as usual in my cabin, sat myself down in my usual chair facing the table in the fore-cabin, and on Rogers coming in to me I spoke to him on the subject of his breaking his leave lately. The lamps were lighted, all doors were open, and two officers were in the fore-cabin." They were examined. One could give no information at all. The other, a midshipman, remembered seeing Rogers going into the captain's after-cabin once during the evening. He said he saw the captain sitting in his usual place, and smoking a cigar. He was speaking to Rogers, but the midshipman did not observe anything unusual, nor hear any noise or whispering. He added that he was sitting in such a position at the fore-cabin table that he could see the arm-chair in which prisoner was in the habit of sitting when smoking. Capt. Whyte: Do you think it possible that the assault with which prisoner is charged could have taken place without the knowledge of the two officers in the fore-cabin? Witness: I would rather not answer the question, as it would be constituting myself a judge. The captain's servant was examined at the inquiry, and stated that he did not remember seeing Rogers at all in the cabin. The report of Dec. 23 concluded in these words:—"In conclusion, the evidence before us showed most positively that there was nothing of a secret nature about the whole affair, but all the doors were opened and the cabins fully lighted; that there were two officers in the fore-cabin and servants at their work; and that the captain was, as usual, accessible to any one without warning. Prosecutor: In coming to that conclusion, did you consider Rogers had spoken truly or falsely? Witness: Truly to an extent. The court then adjourned until Monday. On the re-assembling of the court on Monday morning the President called upon the prisoner to cross-examine the witnesses who had been called on Friday, and whose cross-examination had been postponed on the application of the prisoner, on the ground that his counsel was not present. The Judge-Advocate having conferred with the prisoner, said that the latter declined to cross-examine either of the witnesses. The President: Then I would remind him that it will be too late to cross-examine them afterwards. Acting Commander A. R. Thomas, of the Immortalité, who was senior lieutenant on Dec. 23, deposed to taking part in the investigation in the captain's cabin on the morning of that day. He corroborated the evidence already given by Acting Capt. Noel and the Paymaster. Capt. Blake: Did you hear Mr. Warburton make a suggestion to Capt. Hume after the investigation? Witness: A suggestion was made, but I do not think it was after the investigation. The suggestion was that other persons, who, Rogers said, had been concerned in similar affairs before, should be examined. And was the suggestion acted upon? No. Rear-Admiral Foley: Did you put any questions to Rogers during that examination? Yes. State what they were and the answers. I asked him to describe exactly the prisoner's conduct. There were several other questions which I cannot now repeat in detail. I remember a general outline of what took place. The white jacket the prisoner wore on the evening before was produced at the court of inquiry, and I saw the marks upon it. William Rogers said that he took the opportunity of placing his painted hand on the captain's jacket on the last occasion of his going into the cabin. The Judge-Advocate: Did the prisoner offer any explanation as to the marks? Capt. Hume said he was going into the sleeping cabin to wash his teeth after smoking, and he could only suppose that the paint must have been placed upon him while passing through the narrow passage from one cabin to the other. The prisoner: Was it the duty of the messenger at the captain's cabin to wait upon the captain only, or on the officers generally? On the officers generally. Had Rogers been at his usual place, is it your opinion that he would have seen me beckon to him before the sentry saw me? I should say the sentry would have the best opportunity of seeing, as he walks immediately opposite the cabin door, whereas the messenger boy is usually between the guns. Was I present at or in any way concerned in the drawing up of your report of Dec. 23 last? No. To the best of your belief, was I on board the ship at that time? I am almost certain you were not. Sub-Lieut. John A. Ashworth, of the Immortalité, deposed that he was sitting in the fore cabin of the ship on the evening of Dec. 22. He was sitting on the after side of the table on the starboard side reading a book. He could not see into the after cabin, but he could see the gangway on the half deck. By the court: I did not see William Rogers pass into the after cabin that evening. He might have passed in, and I might not have noticed it. During the time I was in the fore cabin I did not hear any noise of a scuffling or uncommon nature in the after cabin. My back was to the after bulkhead. I could just have seen into the after cabin from where I sat by looking abaft the windsail, but I did not do so. On the evening of the 22nd the band was not playing, nor was any other noise going on which would have prevented my hearing anything passing in the after cabin. By the Judge-Advocate: I was not in the fore cabin during the whole of the six to eight watch. By the prisoner: I saw you two or three times during the time I was in the fore cabin. You were in and out from seven to half-past seven, and you were there for five or ten minutes at three bells (half-past seven). Mr. Rushworth was there. You spoke to us both. I recollect you telling me about two tigers that were going on board the flagship. You told me how they caught them at Jahore. I did not notice any red paint on your jacket at that time. I recollect seeing you in the cabin about five minutes to eight o'clock, when you were having some bird-cages cleared away to make room for the choir, who were coming in to practice. The cabins were well lighted, and the doors were open as usual. You were accessible to anybody during the whole time without any warning. Midshipman Charles Rushworth deposed to being in the fore cabin on the evening in question between seven and a quarter-past, and again between 25 minutes past and half-past. He observed William Rogers, the messenger, go into the captain's cabin between 25 minutes past and half-past. Rogers came out with a book. By the President: I only saw William Rogers go in and come out of the captain's cabin once. I do not believe that anything could have taken place in the after cabin without my seeing it. The prisoner: Did you see me while the messenger was in my cabin, and if so where was I? As the messenger went by me out of the fore cabin you were sitting in your chair. Did I speak to you in the after cabin that evening, and if so, at what time, and on what subject? Yes, about seven o'clock, telling me about a trip you had been to the Maharajah of Jahore. This was the case for the prosecution, and the Court adjourned until Thursday morning to enable the prisoner to prepare his defence. The court reassembled on Thursday. The prisoner read a written defence, in which he said:—"I deny any of the acts charged against me by Wm. Rogers; but I admit that on his bringing the *Saturday Review* into my cabin I did place my hands on his shoulders whilst speaking to him, as I had done on some previous occasions, and did, as far as I can remember, on returning the *Review* take hold of his arm. But how the paint came upon my white jacket it is, and will be, to me a mystery; and it was not until pointed at by Wm. Rogers in the presence of the commander that I knew there was any such mark on my jacket. I should here explain that the jacket was washed without my knowledge. When first I discovered the terrible position in which my own good nature had placed me I was utterly paralysed, and to this I attribute my folly in not at once causing the other cases to be looked into. This frightful accusation hanging over me during the passage from Singapore to the Mauritius, coupled with another heavy affliction, reduced me to such a state of mind that the fleet surgeon decided that I could not go on to the Cape, and, therefore, brought me forward for survey before we arrived at the Mauritius. To this state of mind, which is described in the medical history of my case, I attribute the unadvised expression in my letter, so capable of misconstruction, viz.:—'I have at times been too familiar in my manner with William Rogers.' My intention was not to acknowledge that I had acted with indecency towards him, but that I had at times when speaking to him thoughtlessly placed my hand on his shoulder, as I have before mentioned. The medical history of my case, which I propose to put in, together with the report of survey already before the court, which recommended my being invalided for nervous debility, will, I hope, leave no doubt with the court of my then state of mind." Having called attention to points in the evidence of Rogers, prisoner continued, "You are asked to affirm by your finding that I, whilst captain of the Immortalité, lying at Singapore, on December 22, 1876, between 6.45 and 8 p.m., with all the cabin lighted, doors open, and the cabin freely accessible to anyone, and in view of the sentry and anyone on the half-deck, with one officer at least in the fore-cabin during the whole time seated within three or four feet of the bulkhead separating the fore and after-cabins, and another in the fore-cabin during one of the alleged occasions, my servants at their usual work in my cabins, the door between which and the after-cabin being open, you are asked to affirm that I, under such circumstances, committed three indecent assaults on an unwilling man, as big, or bigger, and, I should imagine, more powerful, than myself. This is evidently so impossible, that I feel I might almost leave the case to rest here. It is due, however, to myself to state that whatever my manner may have been towards William Rogers or others, I have, neither in thought nor deed, been guilty of any impure or indecent conduct whatever. It is due to this court that I should explain, in reference to the delay in presenting myself before them to meet these charges, that I had indulged in the hope of being brought to trial on charges of a less revolting nature. When, therefore, I first heard indirectly the nature of the charges, I became completely unhinged; and, contrary to the advice of all my friends, I tendered my resignation, preferring, at the time, that course to having to undergo the painful ordeal of a court-martial on such charges. I put out of sight that this step would be read by everybody as a confession of guilt in my anxiety to escape suffering. When I reluctantly sent my letter of resignation, I fully believed it would be accepted, and I acted as if I were free, and left town. But, hearing on Thursday evening last that my resignation had not been accepted, and that the court-martial had been ordered for that day, I immediately proceeded to Portsmouth and presented myself on board here on Friday forenoon. The refusal of my resignation, although known to my brother earlier, was withheld by him from me, on account of my state of health. I do not propose to call any of the witnesses that I have named. They could only testify to facts which have been abundantly proved, and their examination would needlessly detain you. I now hope that it will relieve me from the agonies of torture which I have endured for so many months, and which, in spite of the conspicuousness of my innocence, have, at times, been nearly insupportable." He called Staff-Surgeon Inglis to prove that the medical certificate he had originally given the accused related to the mental and bodily suffering of the prisoner, for which he had recommended his being invalided. The Rev. Alexander Nicolls, B.A., chaplain of the Immortalité during the whole of Capt. Hume's command, deposed: I had the best opportunity of forming an opinion of prisoner's character and conduct, especially having been admitted to the closest friendship. Apart from the question at issue, If I were to single out a man of noble, blameless life, one of the first I should select would be Capt. Hume, and I think nothing will change this impression. I take pleasure in seeing that the same feeling is almost universal amongst the officers. The prisoner having intimated that his defence was closed, the court was cleared for the deliberation of the members. On being reopened the Deputy Judge Advocate read the finding—That the Court having well weighed the evidence given for the prosecution and also that of the defence, find that the prisoner was guilty of conduct unbecoming the character of an officer, and sentenced him to be dismissed her Majesty's service.

Jackal, Lieut.-Com. H. A. Digby, left Plymouth Sound on Saturday for the Hebrides.

Kestrel, Com. C. B. Theobald. The bronze medal of the R.H. Society has been awarded to D. T. Bishop, A.B., and R. Edmonds, signal boy, both of this ship, for trying to save A. Targett, a Royal Marine, who had fallen into the Yang'tze River, at Hankow, China, in nine fathoms, current five miles an hour. Targett fell into the water and sank. Bishop and Edmonds jumped after him, but did not find him; over quarter of an hour in the water. The danger was great from the undercurrents.

Liberty, Lieut.-Com. C. Johnstone, arrived in Plymouth Sound on Tuesday afternoon from a week's cruise in the Channel.

Lively, paddle dispatch-vessel, will proceed from Devonport to Sheerness to have her defects made good and be fitted with new boilers, the pressure of work at Devonport being too great for her to be taken in hand there.

Lord Warden, Capt. the Hon. E. R. Fremantle, C.B., arrived at Sheerness on Wednesday. After taking supernumeraries from the Royal Naval Barracks, she left for Devonport on Thursday.

Lynx, Com. F. M. Ommanney, left Zanzibar on March 11 for the Seychelles, to give leave; she will return to Zanzibar.

Minotaur, Capt. Lord W. T. Kerr, flagship of Rear-Admiral Beauchamp Seymour, C.B., Commander-in-Chief of the Channel Squadron, is to leave Portsmouth to-day for Plymouth Sound, where the Channel Fleet, with the additions ordered to be made, is to assemble. On Wednesday H.R.H. the Prince of Wales lunched with Admiral Seymour, and afterwards witnessed some interesting torpedo experiments from the quarter-deck. Two runs were made with the Whitehead torpedo, discharged from a torpedo launch, after which a steam pinnace was sent away without any one on board, being steered and controlled by electricity, and after dropping a series of countermines, exploded them with surprising results. The firing of two 100-pound torpedoes from a steam pinnace, the vibrations of which were distinctly perceptible on board the Thunderer some 200 yards off, brought this part of the day's programme to a conclusion.

Narcissus, Capt. Lord Charles Scott, was paid off at Devonport on Tuesday.

Newcastle, Capt. D. Gordon, will not be paid off until June 1, as her crew is partially refitting her for further service.

Osprey, Com. the Hon. Henry Holmes A'Court, has been ordered to the Pacific, calling at Rio de Janeiro.

Pearl, Capt. L. Brine, which arrived at Spithead on Friday from Australia, will be paid-off at Portsmouth on 5 p.m.

Philomel, Com. Henry H. Boys, left Zanzibar on March 11 for the Mozambique; she is ordered home *viâ* the Suez Canal.

Repulse, Commander F. S. Vander Meulen (Capt. F. W. Wilson) having been invalided home, anchored and saluted at Spithead on Thursday morning. She was commissioned on July 9, 1872, at Portsmouth, where she will pay off.

Simoom, Capt. R. G. Pasley, arrived at Bermuda on the 12th inst., all well; and sailed on the 19th inst. for Prtsmouth.

Sirius, Capt. G. L. Sulivan, was at Quittah on April 17.

Sultan, Capt. H.R.H. the Duke of Edinburgh. His Royal Highness, accompanied by about twenty officers, arrived at Cairo on Friday, the 18th, and was received at the station by the Khedive and the leading members of the English colony. Mr. Vivian, the British Consul-General, gave a *déjeûner* in his honour, and in the evening his Royal Highness dined with the Khedive. The Duke departs to-morrow for Port Said.

Swallow, Com. John B. Warren, sailed from Spithead on Sunday for the West Coast of Africa.

Teazer, Com. C. Wodehouse, was in dock at Bombay on April 30.

Thetis, Capt. T. Le Hunte Ward, arrived at Gibraltar on the 14th inst., and sailed for England on the 15th inst.

Thunderer, Capt. J. C. Wilson, was visited by H.R.H. the Prince of Wales on Wednesday. On going on board the Prince was received by Capt. Wilson and officers on the quarter-deck. The crew was sent to divisions, where they were carefully inspected by his Royal Highness, who expressed to Capt. Wilson his high appreciation of the admirable physique and sailor-like appearance of the men. Going below, the Prince was then conducted over the ship, and exhibited the greatest interest in the almost endless uses and varieties of its complicated machinery. The Prince having again ascended to the superstructure deck from the labyrinth of passages in the belt and lower decks, the officers from the highest to the lowest were individually introduced to him, his Royal Highness shaking hands with each, not excepting the warrant officers, whose horny and tar-stained hands he cordially grasped. The ship then cleared for action. Everything that could interfere with the fire of the guns were instantly removed. The armour hatches were dropped, the deck illuminators taken away, and armour scuttles substituted; the ventilating cowls removed, and the ventilators closed, the water-tight doors shut and secured, the pumps in every compartment rigged, the turrets cast loose, and the maze of machinery set to work to hoist the shell from the magazine, ram it home, and revolve the turrets. In what seemed a remarkably short space of time the captain was in the pilot-house and the deck of the ship was entirely deserted. The ship was perfectly clear for action in less than five minutes. After having been shown the torpedo gear, the use of which was explained by means of a dummy Whitehead, his Royal Highness addressed a few parting words to the blue-jackets. He said—"My lads, I have derived the greatest satisfaction from this inspection of the ship. The manner in which it was cleared for action was highly creditable to you, the more especially considering the short time you have been brought together. With so excellent a captain and commander I have no doubt the Thunderer will become the smartest ship in the Service." In the evening his Royal Highness dined on board the Thunderer with Capt. Wilson and the officers. There were present Admiral George Elliot, Commander-in-Chief, Gen. Sir Hastings Doyle, Mr. Ashby, Capt. the Hon. Carr Glyn, Com. Lord Charles Beresford, Rear-Admiral Foley, the Duke of Montrose, the Marquis of Waterford, Staff-Com. Jackson, Chief Engineer Nott, Flag-Lieut. Gresley, Lieuts. Napier, Stewart, Gibson, and the Hon. C. Denison, Assist.-Paymr. Marsh, Sub-Lieut. Robertson, Surg. Corcoran, Paymr. Williams, Lieut. Leefe, R.M.A., Fleet-Surg. Flanigan, Mr. William Russell, and Engineers Sugden and Foote. After "The Queen" had been duly honoured, Capt. Wilson, in proposing "The Health of the Prince of Wales," stated that the visit of his Royal Highness was totally unexpected, and was not only an honour to himself and the ship, but to the Navy, in which the Prince had always taken the greatest interest. This was shown by his coming among them in the simple uniform of the Naval Reserve, by his sending to the Britannia not only the son whom he intended for the Service, but his eldest son, who might one day be King of England, and also by the cordial manner in which he had identified himself with sailors from the highest to the lowest during his voyage to and from India. The toast was enthusiastically received, and the Prince made a suitable response, in which he alluded to the wonders he had seen during the day. The Thunderer steamed out to Spithead early on Thursday morning for the purpose of receiving her ammunition. The crew were mustered in the course of the day by Admiral Elliot, the Commander-in-Chief, who did not inspect the ship, considering this would be superfluous after what he had seen on board the day before on the occasion of the visit of the Prince of Wales. The Thunderer is expected to sail for Plymouth on Sunday, in company with the Minotaur, making a full-power six hours' trial of her machinery by the way. She will be temporarily attached to the Channel Squadron, but it is believed that she will be eventually ordered to the Mediterranean.

Topaze, Capt. A. Thrupp, was paid off, all standing, alongside the Dockyard on Tuesday, and the crew granted leave. The entire ship's crew mustered in the dockyard, and, headed by the band of the Black Prince and the officers of the Topaze, the whole were marched to the head of Fore-street, and there dispersed.

Tourmaline, Commodore F. W. Sullivan, C.B., left the Cape of Good Hope on April 19 for Cape Coast Castle.

Undaunted, Capt. H. W. Brent, flagship of Vice-Admiral Sir R. Macdonald, K.C.S.I., was at Bombay on April 30.

Urgent, Com. R. H. Boyle. On Sunday evening an accident occurred at Spithead to the commander's boat, resulting in the loss of two lives. As the boat was returning to the Urgent, and when under the stern of the ship, the wind caught the sail, and the boat capsized, throwing the crew and the midshipman in charge into the water. Boats from the Urgent and Waterwitch were soon on the spot, but Henry Russel and Chas. Grinsell, ordinary seamen, were drowned. One of the men saved received such severe injuries that it was found necessary to send him to hospital.

Valorous, Capt. L. F. Jones, arrived at Portsmouth on the 24th inst.

Vernon, Capt. W. Arthur, was visited by H.R.H. the Prince of Wales on Wednesday. He was shown by Commander Wilson a number of experiments in the lecture-room illustrative of torpedo warfare, and upon going on deck some mines were fired by a steam pinnace, an old craft which was moored over each mine being shattered by the explosion. The difference in the effect of gun-cotton when detonated and when simply ignited was then demonstrated by putting a dry and a wet disc of gun-cotton together and igniting the former with a hot iron, the dry one burning away and leaving the wet one untouched. Two similar discs were then ignited by a fuse containing fulminate of mercury, when both the wet and the dry discs detonated violently, smashing to pieces the wood on which they were placed. The use of a hand charge was then shown by exploding an 8oz. disc of gun-cotton in a cask, which was blown to atoms. Finally, a chain cable was broken by the explosion of 2½lb. of gun-cotton, and a line of six small charges, representing counter mines, were simultaneously exploded, the Prince himself firing them.

Wye, Staff-Com. W. W. Vine, arrived at Bermuda on the 14th inst., all well.

A lecture on the difficulties of Arctic exploration, and the means of surmounting them by the employment of balloons, was delivered on Thursday by Dr. Henry Reece in the Vestry-hall, St. James's, Piccadilly. The lecturer illustrated his views by experiments to show the power of steering balloons, and of securing the safe return of aeronauts to exploring vessels. A primary deviation from the practice of controlling exhibition balloons consisted in applying the resisting power to the balloon itself, and not to the car. The lecturer was of opinion that by means of a succession of balloons the whole of the North Pole might be explored. One of the audience expressed his fears that hydrogen gas would be found too expensive for inflating purposes. An apparatus was shown for photographing the surface of the earth, and the proceedings closed.

A few days since the senior admiral of the Fleet, Sir George Rose Sartorius, K.C.B., paid a visit to Portsmouth Dockyard. Accompanied by Flag-Lieut. Arthur F. Gresley, the veteran officer made a thorough inspection of the dockyard, including the extension, and was engaged for some time in an inspection of the Inflexible. As is well-known to our naval readers, the gallant admiral, although he has attained an advanced age, continues to take a deep interest in matters pertaining to the *matériel* and *personnel* of the Fleet. A stranger who happened to see the hale and hearty old gentleman in animated conversation with the flag-lieut., or wending his way, without the aid of glasses, 'tween decks of the Inflexible, would not have supposed that he was born as long ago as 1790, or that his entrance into the Royal Navy dates as far back as 1801. Sir George has "done the State some service," and is one of the few survivors of Trafalgar, where he served on board H.M.S. Tonnant. The venerable admiral can sympathise with Hobart Pasha in the awkward position in which he has found himself, for, like Hobart, Sir George has, in the course of his career, served a foreign Power, and had to pay the penalty. In 1832 he assumed command, with the rank of admiral, of Don Pedro's fleet, whose movements he continued to direct until succeeded in 1833 by Sir Charles Napier. His name, in consequence, was struck off the list of British captains; but was restored in 1836, and, after the lapse of forty years, heads the list of admirals.—*Portsmouth Times.*

Furnish on the New Hire System.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea.—"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company—Offices, 9, Southampton-street, Strand.

THEATRES.

Her Majesty's Opera.—The principal attractions at Her Majesty's Opera this week comprised a magnificent performance of *Lucrezia Borgia*, supported by Mdlle. Titiens, Mdme. Trebelli Bettini, M. Faure, and Signor Currion. On Tuesday evening Madame Trebelli-Bettini appeared as Rosina in the *Barbiere*, while the part of Basilio was allotted to Signor Foli, whose lengthened absence from the stage has been much regretted. He was in splendid voice, and was warmly welcomed. The great event of the week was the production of *Robert le Diable*, in which Signor Foli was again heard to great advantage. The opera, which was magnificently placed upon the stage, will be repeated next week. On this evening *Faust* will be given with a powerful cast, including Mdlle. Nilsson and M. Faure.

Lyceum.—The latest novelty here is a revival of the famous drama, *The Courier of Lyons*, this time entitled *The Lyons Mail*, and revised by Mr. Charles Reade from the Kean version at the Princess's. The piece is a very fair sample of melodrama, relating as it does the singular case of mistaken identity, by which the innocent Lesurques is made to suffer for the crime of Dubosc, the real culprit. Many play-goers will remember the impression made by Mr. Charles Kean in the dual *rôle* of the victim and the scoundrel. Now we have Mr. Henry Irving following in his steps, and the result is, on the whole, satisfactory. The peculiarities, or mannerisms, or whatever they may be called, of the popular actor are of advantage to his present part, as they were in Richard, and there seems every probability of *The Lyons Mail* proving a success. Mr. Irving is well supported, Mr. F. Tyars being remarkably good as the magistrate, while praise must be awarded to Mr. Brooke as Didier, and to Mr. Huntley as the horse-dealing thief. Mr. T. Mead makes a great feature of the elder Lesurques, and the boy, Joliquet, in the hands of Miss Lydia Howard, becomes one of the most important characters in the piece. Miss Isabel Bateman and Miss Virginia Francis also do good service in the revival, placed upon the stage with all the care and attention to detail which is characteristic of the Lyceum management.

Gaiety.—On Whit-Monday Mr. Hollingshead inaugurated a summer season of French plays by the production of *L'Ami Fritz*, by MM. Erckmann-Chatrian. This piece, which has already achieved great success in Paris, is less of a comedy than of a poem in dramatic form, and, according to the fashion of the French stage now-a-days, it teaches a pointed moral, the aim being to advocate marriage against celibacy. The hero is a young Alsatian, one of a trio of confirmed bachelors, and he is converted from his creed partly by the arguments of a Jewish Rabbi and partly by the charms of a pretty girl, the daughter of one of his farmer tenants. It is refreshing to find a French play in which the elements of adultery and crime are not present, and more so to find that a pleasant story is well told in purely idyllic style. The acting of M. Febvre, of the Comedie Française, as Fritz Cobus, is exquisite, and may serve as a useful model to many of our own actors. The Rabbi David of M. Libert is also a good performance, though somewhat hard in voice and manner. It is a pity that M. Got could not be persuaded to pay us a visit and repeat his wonderful impersonation of a character which came upon the Parisian people like a revelation. Mdlle. Alice Lody now plays Suzel, and is the *ingenue* to the life. Mr. Hollingshead must be congratulated on having made a good start with his new venture.

Adelphi.—After having lain dormant for some years, the well-known Princess's drama, *The Streets of London*, has made its appearance here, and has been placed upon the boards by Mr. Chatterton with all the realism which accompanied its first success. As an example of what a stage manager can do when he is put upon his mettle, no better instance could be found than the fire scene in the present performance, and this is only one out of the many effective incidents which crowd Mr. Boucicault's play—incidents which are perfectly realised upon the Adelphi stage. The cast includes many eminent actors and actresses, at the head of whom stands Mr. S. Emery, whose Badger is an admirable performance. The lovers of stirring melo drama will find plenty of food for enjoyment in the latest revival of the *Streets of London*.

Globe.—Yet another of Mr. Boucicault's dramas revived; this time also from the Princess's, in the form of *After Dark*. Mr. Edward Righton, who has taken the control of the Globe, has also taken the precaution to surround himself with a strong company before representing a strong play, and has further added to the piece a certain charm of novelty by the transfer of some scenes to the localities in which they would be suited to-day. The result is a performance which is highly creditable to all concerned. When it is recorded that the only item with which fault can be found is the conduct of the railway train, and when it is evident that the shortcomings of the locomotive and its load are due to the want of stage room, it must be acknowledged that Mr. Righton has done his best as a manager, besides earning golden opinions as an actor by his rendering of Dicey Morris. Mr. Ryder is remarkably good as Old Tom, giving real tragic force to the part, and the acting of Eliza, by Miss Lydia Foote, is about the best thing of its kind now to be seen. Mr. Charles Harcourt as Billingham, Mr. Billington as Chumley, and Mr. H. H. Vincent as the hero, are worthy of praise, as is also Miss Emma Ritta for her graceful and ladylike impersonation of Rose, while, as for Mr. W. J. Hill as Area Jack, it need only be remarked that he is as funny as ever. Special commendation must be bestowed upon the scenery by Messrs. Gordon and Harford.

THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—You have on previous occasions done me the honour to insert some of my letters on the present officering of the native Indian Army, and I trust the Session of Parliament now sitting will not be allowed to come to a close without Sir Henry Havelock or some other member putting a few questions concerning its condition. I might be permitted to suggest the following points on which questions may be put:—1. Was a lieut.-colonel ever detached to the Island of Penin to command a party of forty sepoys because no subalterns were available? 2. Was not a major ever sent there for the same purpose? 3. Is there not a lamentable want of subalterns in the Indian Army, whose duties are now performed by field-officers? 4. Is it not true that some time last year a Madras native Infantry corps could not attend at a brigade parade because it had only three European officers, and those were on the sick-list? I saw this stated in an Indian paper. 5. Is it not true that the Indian military authorities refuse furlough to the officers of the native Indian Army in order to keep up the number of European officers with the native regiments? 6. Did not the proclamation of the empire at Delhi entail an expense of keeping up a band in native regiments upon the European officers, the Government only paying the regulated allowance? 7. Are not the senior European officers in the native Indian Army extremely discontented at having to perform subaltern's duties? I refer the reader to Captain R. Burton's book, recently published, "Sind Revisited," for information about the Indian Army; and, in strict confidence, and not for communication to the Indian Government, I am willing to disclose my name to any member of Parliament who requires it for a *bonâ-fide* purpose.

April 21st 1877. Velox.

HELMETS FOR THE INFANTRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Forgive my troubling you, but I really think "A. B." (*vide* letter in your issue of April 28, 1877) would find few in the British Army to coincide with his views as to the policeman's crested helmet and its fantastic additions. Poll the Service, sir, and I make bold to say the spiked helmet, handsomely and substantially made, would carry the day by a large majority, as the most soldier-like head-piece for the Infantry.—I am, &c.,

Head-ache Shako.

The General Steam Navigation Company's ss. Dragon, just arrived from Rotterdam, among other consignments brings a large quantity of Taunus Water for the use of her Majesty the Queen.

At the Danish Picture Gallery, New Bond-street, there is now on view Mr. Barker's new picture, "Taking the Russian Guns at Balaclava, Lord Cardigan leading the Light Brigade into the Russian Battery." In the front line are to be seen the uniforms of the 13th Light Dragoons and 17th Lancers, and in the second line the 8th and 11th Hussars and 4th Light Dragoons, while Lord Cardigan appears in the foreground in the act of cutting down a Russian gunner who has aimed a blow at him with the butt of his musket.

Advertisements.

BIRTH.

Creagh.—May 17, at Malta, the wife of Captain A. M. Creagh, 42nd Royal Highlanders (the Black Watch), of a daughter.

WANTED, for Officers' Mess 94th Regiment, a COOK. Apply to Mess President, 94th Regiment, Fleetwood.

ARMY MEDICAL DEPARTMENT,
12th May, 1877.

AN EXAMINATION of CANDIDATES for COMMISSIONS in the MEDICAL DEPARTMENT of her Majesty's ARMY will be held in London on the 13th August next, and following days:—

1. Candidates having two qualifications—one to practice medicine, and the other surgery—under the Medical Act, and who are not under 21 nor above 32 years of age at the date of the London examination, are eligible to attend.

2. Those gentlemen who may be selected for appointments will receive £250 per annum and allowances in addition, after passing the examination at the Army Medical School at Netley.

3. The tenure of appointment will be limited to ten years, and on the completion of that period of commissioned service, surgeons, unless they be specially selected for further employment in the Department, will be entitled to receive, in lieu of all pension on retirement (pension for wounds excepted) the sum of £1000.

4. Application for admission to the examination should be made in writing, without delay, to the Director-General of the Army Medical Department, London, by whom a printed schedule containing further particulars will be furnished.

5. There will be 50 appointments offered for competition.

(Signed) W. M. MUIR, Director-General.

INDIAN MEDICAL SERVICE.—Notice is Hereby Given that an examination of candidates for nineteen appointments as Surgeon in her Majesty's Indian Medical Service will be held on Monday, the 13th August next, and following days.

Copies of the Regulations for the Examination, together with information regarding Pay and Retiring Allowances, &c. of Indian Medical Officers, may be obtained on application at the Military Department, India Office, London, S.W.

The necessary Certificates must be submitted to the Military Secretary so as to reach his address at least a fortnight before the date fixed for examination.

ALLEN JOHNSON, Colonel,
Military Secretary.

India Office, 15th May, 1877.

ENTRY OF ENGINEER STUDENTS IN HER MAJESTY'S DOCKYARDS.

My Lords Commissioners of the Admiralty having decided to offer 45 vacancies to be competed for, NOTICE is HEREBY GIVEN that a Competitive Examination for these vacancies will be held on TUESDAY, the 11th September, 1877, and following days, in London, Edinburgh, Glasgow, Dublin, Belfast, Cork, Leeds, Bristol, Liverpool, Newcastle-on-Tyne, Chatham, Sheerness, Portsmouth, and Devonport.

The age of Candidates must be not less than 14 nor more than 16 on 1st May, 1877.

The parents or guardians of all engineer students will be required to pay each year in advance the sum of £25 during the first three years of the student's training. The engineer students this year and next year will be entered at Portsmouth Dockyard only, and board and lodging will be provided for them in the Dockyard, where they will be required to reside.

A small weekly rate of pay (annually increasing) will be given to each engineer student during his six years' training. The engineer students will be under the supervision of the Captain of the Steam Reserve and a staff of competent officers, and subject to such rules and regulations as their Lordships may deem necessary.

Parents or guardians will be required to enter into a bond to the amount of £300 that the students, after completing their training, will enter the Naval Service.

References as to respectability and good conduct will be absolutely necessary.

The Lords of the Admiralty having, by recent changes, very materially raised and improved the position of the Engineer Officers of the Royal Navy, desire, by early publication of the above regulations, to encourage more general competition for these appointments.

For further particulars apply, by letter only, to the Secretary of the Admiralty, Whitehall, London.

Application to be permitted to compete will not be entertained after 31st July, 1877.

By command of their Lordships,
ROBERT HALL.

Admiralty, S.W., 16th May, 1877.

"SANITAS."—The only true Antiseptic & Disinfectant Combined. Non-Poisonous, Sanitary, Medicinal, Preservative. For use in Houses, Hospitals, and all Public Institutions, Stables, Warehouses, Factories, and all places where noxious, infectious, or bad smelling emanations exist.

"SANITAS"—Has Sanitary Powers equal to both Carbolic Acid and Ozone, and has no injurious action on clothing, furniture, carpeting, &c. It is the best preservative of Skins, Paste, Albumen, and all Animal matters liable to decomposition, such as Meat, Fish, Poultry, &c.

"SANITAS"—Is strongly recommended against Small-Pox, Typhoid Fever, Scarlet Fever, Hay Fever, Rheumatic Complaints, Foot and Mouth Disease, &c.

NO HOUSE SHOULD BE WITHOUT "SANITAS."

"SANITAS"—"This solution has considerable advantage over most of the substances which have been from time to time proposed as either disinfectants or antiseptics; it is neither corrosive nor poisonous, and, as it leaves no stain on textile fabrics, and does not injure them, it can be directly applied to clothes, carpets, furniture, etc. IT POSSESSES AN AROMATIC ODOUR, AND IS, THEREFORE, IN THAT RESPECT SUPERIOR TO CARBOLIC ACID, now so much employed."

(Signed) ARTHUR HILL HASSALL, M.D.,
Senior Physician to the Royal Free Hospital.
(Signed) OTTO HEHNER, Public Analyst.

"SANITAS"—May be had of all Chemists and Wholesale Druggists.

Prices.—Bottles, first quality only, 1s., 1s. 6d., 2s. 6d.
Per Gallon—First Quality, 20s. Second Quality, 10s.
Special quotations for large Orders.
Odourless "Sanitas" at same prices.

For Pamphlet and full particulars enclose stamp to the "SANITAS" COMPANY, 57, Moorgate-st., London, E.C.

Opposite Burlington Arcade

THE STAFFORD HOUSE COMMITTEE for the RELIEF of SUFFERING among the TURKISH SOLDIERS.

President, the Duke of SUTHERLAND, K.G.

The Turkish dominions having now been invaded, and hostilities having actually commenced, the suffering among the Turkish soldiers is very greatly increased, and as will be seen from the annexed statement by Captain Burnaby, who has just returned from Asia Minor, they are in the greatest need of clothing, of food for the hospitals, and of medical stores and surgical instruments.

The Committee, therefore, appeal strongly to their countrymen for subscriptions to enable them to mitigate the horrors of the war by sending out to the Turkish soldiers such additional succour as is now most urgently needed.

STATEMENT BY CAPTAIN BURNABY.

"Regent's Park Barracks, April 27, 1877.

"In the course of my recent travels through Asia Minor, I visited several Turkish military hospitals, and conversed with the surgeons in charge. They often complained to me of the great scarcity of drugs, and said the authorities at Constantinople found it impracticable to supply many of the necessary specific medicines and surgical instruments, all of which have to be obtained in Europe.

"If people in this country could only realise to themselves the sufferings which the wounded will undergo when being operated upon without chloroform and with worn-out surgical instruments, I think they would willingly subscribe to the Stafford House Fund.

"The soldiers from the southern parts of Anatolia suffer very much from the change of climate, and are utterly unsupplied with warm underclothing. Many a time I have met battalions of Redifs on the march, the men with bare feet and wading through deep snow while the thermometer stood at zero. Many were frost-bitten on the march to Erzeroum and Kars. A supply of warm stockings and flannel shirts and blankets would save thousands of lives."

Warranted waterproof, and as soft as a glove. Gentlemen with tender feet have been known to wear these boots for two years without repairing.

COLCHESTER, ESSEX, on the outskirts of the town, within 10 minutes walk of St. Botolph's and the Hythe Stations, on the Wivenhoe Branch of the Great Eastern Railway, and only two miles from the main line station, from whence there is an excellent service of quick trains to London.—An exceedingly attractive Freehold Residential Property, known as Scarlett's, situate on the east side of the garrison town of Colchester. It comprises a substantially-built and and well-arranged residence, in capital order, including three reception rooms, four principal bed and two dressing rooms, two secondary bed rooms, bath room, and suitable domestic offices, with cellarage in basement. The residence occupies a dry and elevated position, commanding extensive and pleasing views over an undulating country, placed nearly in the centre of about 20 acres of very ornamental land, approached by two carriage sweeps, with entrance gates, surrounded by lawns and pleasure grounds, tastefully studded with choice specimen shrubs, conifers, and other trees of great beauty and luxuriant growth, intersected by shaded and winding walks, leading to productive kitchen gardens, with conservatory, vinery, and forcing pits. well-stocked orchard, and productive closes of pasture land. In the rear is a small farmery, gardener's cottage, and the requisite outbuildings. The whole occupying a charming position, and, with the exception of about two acres, is in hand, and will be sold with possession.

MESSRS. BEADEL are instructed by the Proprietor to offer for SALE by AUCTION, at the Mart, Tokenhouse yard, London, on Thursday, the 7th of June, 1877, at 2 o'clock precisely, in one lot, the above very attractive FREEHOLD PROPERTY. Particulars, with plans and conditions of sale, may be obtained of Horace Philbrick, Esq., Solicitor, 50, Old Broad-street, E.C.; at the Mart; and of Messrs. Beadel, 25, Gresham-street, London, E.C.

JUNIOR NAVAL AND MILITARY CLUB, PALL MALL.—The ANNUAL GENERAL MEETING of this Club will take place on MONDAY, the 28th May, at One o'Clock.

By Order,
C. H. J. COLLINGS,
14th May, 1877. Secretary.

NAVAL AND MILITARY CLUB.—The ANNUAL GENERAL MEETING of this Club will be held at WILLIS'S ROOMS, 26, King Street, St. James's, on MONDAY, the 28th of May, at 2.30 p.m.

April, 1877.

RUPTURES (BY ROYAL LETTERS PATENT)

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 medical gentlemen to be the most effective invention for the curative treatment of hernia. The use of a steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the manufacturer,

MR. WHITE, 228, PICCADILLY, LONDON.

Price of a single truss, 16s., 21s., 26s. 6d., and 31s. 6d.; post free. Double ditto, 31s. 6d., 42s., and 52s. 6d.; post free. An umbilical ditto, 42s. and 52s. 6d.; post free. Post-Office Orders to be made payable to JOHN WHITE, Post Office, Piccadilly. Every description of RIDING BELTS, ELASTIC STOCKINGS to draw on, and ELASTIC SILK SUSPENDERS, on new and improved principles.

JOHN WHITE, Manufacturer, 228, Piccadilly London,

THOMAS WHITE'S CELEBRATED CAMPAIGNING KIT,

CONSISTING OF

BEDSTEAD, BEDDING, BLANKET, PILLOW, BATH, WASHSTAND, BASIN, CAMP-STOOL, BUCKET, LANTERN, POLE-STRAP, LOOKING-GLASS, PYJAMAS, AND SLEEPING CAP.

ALL OF WHICH ARE CONTAINED IN HIS

LOCK-UP WATERPROOF BAG.

Which, when packed with the above articles, supplies room for clothing and other necessaries. The chief feature in this Kit is T. White's FOLDING BEDSTEAD (recently improved), weighing 16lbs., price 30s.; or his larger sized ditto, 18lbs., price 35s., intended for officers entitled to carry extra weight. Also his CANTEENS for company messing, to cook for and dine three or more officers, as supplied and thoroughly tested during the Manœuvres of 1871, 1872, 1873, 1874, and 1875. This Canteen was used by Sir Garnet Wolseley, G.C.M.G., K.C.B., his Staff, and the 42nd Highlanders (the Black Watch), and other regiments during the Gold Coast campaign, and is recommended and patronized by the highest military authorities.

The above Campaigning Kit, or Canteens, and in most instances both, have been supplied to his Majesty the Emperor of Germany; H.R.H. the Duke of Cambridge, K.G., &c.; H.R.H. the Duke of Connaught, K.G., &c.; H.S.H. Prince Edward of Saxe-Weimar, C.B.; the late General Sir Hope Grant, G.C.B.; Generals the Right Hon. Sir John Michel, G.C.B.; Sir R. Walpole, K.C.B.; Sir Charles Ellice, K.C.B.; Major-Generals Sir Charles Staveley, K.C.B.; Sir Alfred Horsford, G.C.B., Military Secretary; J. S. Brownrigg, C.B.; Henry Smyth, C.B.; Lord Mark Kerr, C.B.; D. Lysons, C.B., Q.M.G.; Sir Thomas MacMahon, Bart., C.B.; Sir E. Greathed, K.C.B.; G. V. Maxwell, C.B.; Hon. A. Hardinge, C.B.; C. Shute, C.B.; W. Parke, C.B.; A. J. Herbert, C.B.; and Sir Garnet J. Wolseley, G.C.M.G., K.C.B., besides some thousands of officers of nearly every branch of and regiment in the Service.

THOMAS WHITE,

CAMP AND BARRACK FURNISHER,

Begs leave to inform Commandants of Corps, Presidents of Messes, and Officers generally, that he

IS PREPARED TO SUPPLY ON HIRE

EVERYTHING NECESSARY FOR OFFICERS' MESSES,

Including

MARQUEES, FURNITURE, BOARDED FLOORS, PORTABLE KITCHENS,

WHITE'S CELEBRATED FIELD RANGE,

Cooking Utensils, Cutlery, Electro-Plate, Crockery, China, Glass, &c.

The same will be securely packed and forwarded, accompanied by an experienced assistant, if desired, to any part of the United Kingdom.

THOMAS WHITE'S STANDING CAMP TENT KIT,

As supplied by him for 12 years to the National Rifle Association at Wimbledon, and to Officers at Aldershot when under canvas, consisting of the following articles:—

Wood Folding Camp Bedstead
Hair Mattress
" Pillow
Folding Chair
Sponge Bath
Water Can
Tent Pole Strap
Strip of Matting
Tripod Washstand.
Looking Glass
Basin
Lantern

Can be had on hire, in any number, to meet the requirements of regiments or County Rifle Meetings. The weight of each Kit complete is about 80lbs. The Kit includes everything necessary for camping out, and is looked upon by the large number of officers who have used it in England Ireland, and Scotland as a great convenience, saving them the trouble and annoyance of looking out, packing, and conveying their own goods (which are often unfitted for the purpose) to the camping ground.

P.S.—The Campaigning Kit is for Sale, and not for Hire; the Standing Camp Tent Kit is for Hire only.

Full details, Illustrated Price Lists, and Estimates for Officers' Messes, may be had post free on application to

THOMAS WHITE, CAMP FURNISHER, ALDERSHOT.

BAUMGARTEN'S INVIGORATIVE NERVINE ESSENCE. A most powerful nutritive cordial, which restores to their normal condition all the secretions on the integrity of which perfect health depends.

Report by Dr. Hassall—"Having analysed the preparation to which Messrs. Baumgarten and Co. have given the name of 'Invigorative Nervine Essence,' I am of opinion that it is a combination well calculated, from its containing, among other ingredients, Pepsine and Phosphate of Soda, to prove most serviceable to the debilitated, the nervous, and the dyspeptic."

Price 8s. per bottle, or four quantities in one, 22s. Carriage free on receipt of remittance. Sole agents, BRANT and CO., 288 Strand, London, W.C.

HOLLOWAY'S PILLS.—To Nervous Sufferers.—Nervousness, so called, has been said to arise from foul blood or a guilty conscience. When the first is the origin, the afflicted may be cheered by the knowledge that a course of Holloway's Pills will dissipate both cause and effect. Many nervous invalids of long duration have afforded the most remarkable recoveries under these purifying Pills, which have assuaged sufferings of the severest character, and steadily restored the afflicted to comfort, confidence, and health, after change of climate and every other means had signally failed. Holloway's Pills renew the lost appetite, and regulate digestion, without permitting those feelings of fullness, flatulency, distension, faintness, and palpitation, which seem to threaten instant death to the timid and enfeebled.

THE SOLDIERS' DAUGHTERS' HOME, Hampstead. Instituted 8th March, 1855.

Chairman—
Major-General J. T. Boileau, R.E., F.R.S.

Number of Children in the Home, 171; Vacancies, 29; Candidates awaiting Admission, 124.

Owing to the loss, by death, of several of the largest annual subscribers, and to the great falling off in donations, the funds are at present unequal to support the increased number of girls (26) who have been added to the Foundation during the last two years.

Further aid is earnestly solicited to meet the increased call upon the funds. Remittances to be made to C. R. Low, Esq., Secretary, No. 7, Whitehall, London, S.W. A guinea yearly gives 1 vote; five guineas, 2 votes for life.

ROYAL SCHOOL FOR DAUGHTERS OF OFFICERS OF THE ARMY.

The daughters of all officers in her Majesty's Army, inclusive of the Royal Marines, on full or half pay, or who may have died in the service, are eligible. The ages of admission are from ten to fifteen.

The next election will take place on June 20, 1877.

Pupils elected by votes of subscribers pay only £12 per annum.

Each donation of £5 5s. entitles to one life vote. Each annual subscription of 10s. 6d. entitles to one vote at all elections during the current year.

Further contributions to meet the current expenses are earnestly solicited by the Committee.

By order,
G. W. FORSTER, Secretary.
No. 22, Cockspur Street, London.

ST. LAWRENCE-ON-SEA, NEAR RAMSGATE.

THE "GRANVILLE" HOTEL.

THE "GRANVILLE" PRIVATE SPECIAL EXPRESS TRAINS to ST. LAWRENCE-ON-SEA, near Ramsgate, in 1 hour and 45 minutes. Departures every Friday, from Charing Cross at 3.45, and Cannon Street at 3.55 p.m. (See bills.)

THE "GRANVILLE."
"The situation of the palatial establishment on a cliff somewhat removed from the town, though conveniently proximate thereto, is an advantage greatly augmented by its superb suite of ozone and various other health-giving baths, its well-constructed rink, its excellent and cheerfully appointed table d'hôte, and all other liberal additions of comfort, luxury, and amusement since the hotel has come into the present enterprising hands."—"Daily Telegraph," March 29.

THE "GRANVILLE" HOTEL.
The "Saturday Review" says:—"The scenery, the air, the accommodation for visitors were described as of the most perfect kind; and we could not help wondering how it was that this place, which had been in existence in a quiet way for several years, had suddenly, like Byron, gone to bed and awoke famous."

THE "GRANVILLE" HOTEL.
"Mayfair" says:—"The proprietor of the hotel, which has carried the name of St. Lawrence-on-Sea to the utmost ends of the earth, has energetically and judiciously lavished a fortune, first in making the 'Granville' Hotel one of the most charming seaside residences in the Kingdom, and next in bringing the fact under the notice of the public."

WILLIAM S. BURTON,

39, OXFORD STREET, W.

THE PERFECT SUBSTITUTE FOR SILVER.—The REAL NICKEL SILVER introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs. Elkington and Co., is the best article next to silver that can be used as such, either usefully or ornamentally, as by no test can it be distinguished from real silver.

Patterns.	Fiddle or Old Silver	Bead or Thread	King's or Shell.
	£ s. d.	£ s. d.	£ s. d.
Table Forks or Spoons, per doz.	1 10 .	2 1 .	2 5 .
Dessert do., per doz.	1 2 .	1 9 .	1 11 .
Tea Spoons „	. 14 .	1 . .	1 2 .

These are as strongly plated, and are in every respect at least equal to what other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern:—Table Spoons and Forks, 23s. per doz.; Dessert, 17s. per doz.; Tea Spoons, 12s. per doz.

All kinds of re-plating done by the patent process.

WILLIAM S. BURTON, General Furnishing Ironmonger, by appointment to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled Stock, with Lists of Prices and Plans of the 30 large Show-Rooms, post free.—39, Oxford-street, W.; 1, 1A, 2, 3, and 4, Newman-street; 4, 5, and 6, Perry's-place; and 1, Newman-yard; Manufactories, 84, Newman-street and Newman Mews, London, W.

SOVEREIGN LIFE ASSURANCE COMPANY.

EXTRACT FROM REPORT OF THE DIRECTORS, MAY, 1877:—

The Directors have again the pleasure of reporting a material advance in the amount of new business effected by the Company during the past year.

The Policies issued were 474 in number, assuring £249,060, or nearly £50,000 in excess of the preceding year. The average amount of each Policy was £525, and the new premium income represented was £8,295 3s. 10d., or £2,100 more than in 1875. The increase on the Total Revenue from Premiums and Interest was £4,995.

The sum paid for claims by death during the year was not in excess of the amount anticipated; but the aggregate disbursements on account of policies falling due exceeded that of any former statement, owing to an increased number of Endowment Assurances having arrived at maturity. Nevertheless, £23,000 were added to the Funds of the Company.

H. D. DAVENPORT, Secretary.

IMPORTANT NOTICE.

A REVOLUTION IN THE WATCH TRADE.

GRAND PREMIUM

GOLD LEVER WATCH,

LARGE SIZE, COMPENSATION BALANCE, JEWELLED IN 10 HOLES.

THE ENTERPRISE WATCH AND JEWELLERY COMPANY OF SCOTLAND, 135 and 137, ARGYLE STREET, Glasgow—in order to bring their Business under the notice of the Public—have concluded arrangements by which each Subscriber of Three Pounds to the Watch and Jewellery Association will be entitled to receive

ONE GOLD LEVER WATCH,

Large Size, Compensation Balance, Jewelled in 10 Holes, Gold or Black Chapter Figures, Sunk Seconds, and Steel Hands, on the conditions under-mentioned.

These Watches are full-sized for Gentlemen, with well-finished Gold Case, which springs off at the back; thoroughly air-tight, so that no dust can penetrate; close-fitting inside Cap over highly-finished compensation balance; Lever Movement;

OR ONE LADY'S GOLD LEVER WATCH,

with beautiful Gold Case, one size smaller than a Gentleman's, equally well finished as the above, with extra chasing and flowered engravings.

These Gold Lever Watches are manufactured in every part with the greatest care, have all the most modern improvements, and the materials of which their works are composed are the best which years of practical experience have enabled us to furnish; they are are also full size, with handsome Gold Case, stamped inside. A guarantee of performance and quality will be sent with each article, as all are timed and regulated under our own personal supervision. They are fitted with compensation balance, which will not be affected by change of temperature, and their accuracy may be depended upon equally in the cold of the Arctic regions or in the heat of the Torrid Zone.

The Lady's Gold Watch is a gem of perfection and beauty—perfection in the works, and beauty in artistic chasing and engraving of the Gold Case. As a Presentation Watch it has no equal at the price.

In the manufacture of our Compensation Balance Lever Watch we require the science of the arithmetician in order to find the revolutions of the wheels; of the geometrician, to determine the curve of the teeth; of the mechanician, to find the forces that must be applied; and an artist capable of putting into execution the principles and rules which these sciences prescribe. He must know the amount of resistance which fluids present to bodies in motion, the effects of heat and cold on the various metals; he must have experience in dividing the circles of the wheels into the requisite number of rigorously equal parts, and in adjusting them one with another; he must also have a deep perception of the beautiful for ornamentation in chasing and engraving. In fact, all the resources of Art and Mechanism have been called into requisition to produce the Splendid Watch which we are now offering to the public. Every pivot, pin, wheel, pinion, and escapement are highly polished, and the whole is so substantially put together that it really excels anything heretofore manufactured as a Time Measurer.

For the attainment of habits of punctuality, for the regulation of the usual routine of business and everyday life, for the evenings sufficient repose and the morning's timely arousement, and for other innumerable purposes of convenience, necessity, and pleasure, much depends upon the possession of an accurate timekeeper.

Orders and Testimonials are pouring in from all parts of Great Britain and Ireland, and the demand for these Celebrated Watches is still increasing.

Among the many Testimonials, we have received, we only quote the following:—

"Coast-Guard Station, Stone Creek, Otteringham,
"Near Hull, 4th May, 1877.

"*Gentlemen,*

"Mr. Littlefield returns thanks to the Enterprise Watch and Jewellery Company of Scotland for the Lady's Gold Lever Watch, a perfect gem, and the Working Man's Silver Lever Watch sent to him, and has enclosed Post Office Orders for £13, with Coupons, and requests that the Company will send him one more of the Lady's, and likewise one of the Gentleman's Gold Lever Watches, which, if equal to the one he has got, are all that can be desired.

"Send also Two heavy Gold Guard Chains for Ladies; and I trust that the Company will be successful in gaining the patronage of the public.

"Could you send me a few of your Coupons to circulate amongst my friends, as what I had are done, and many of my acquaintances are wishing to send for Watches, as the price and quality are really surprising.

"Yours very respectfully,
"J. LITTLEFIELD."

To all who are desirous of such an excellent Watch we would advise that immediate application be made, as the Coupons will be taken in rotation as they arrive.

INSTRUCTIONS.

In order to prevent delay in transmission, it is particularly requested that the Name and Address be written as legibly as possible, and the Post Office Order or Bank Draft made payable to Mr. FRANCIS, M'ALLISTER, Glasgow. The Coupon must be enclosed with remittance, as no watch will be sent without one.

State also if a Lady's or Gentleman's Watch is required.

In consequence of the unprecedented demand for "Our Gold and Silver Lever Watches," we were compelled to withdraw our advertisements till we executed the numerous orders we had on hand, but, with the additions we have made to our extensive premises, and extra assistants, we trust to be able to dispatch all orders within 12 hours after receiving them. This demand has been caused by the quality of the article supplied, which is unsurpassed, fully fulfilling all that is guaranteed. Coupon Holders can be supplied personally. Our only place of Business is as undernoted:—

THE first document which attracts our attention in the 7th volume is headed "Mission confided to General le Comte Le Marois, Aide-de-Camp of the Emperor," Paris, March 5, 1811. The General is to go to Boulogne to inspect the troops, the camp, and flotilla, and to write to his Majesty "two hours before leaving." Thence to Dunkerque, "where you will remain for two days to see what the smogglers (*sic*) are at, and the quantity of English newspapers they bring over." Next to Ostend, "where you will remain two days, and study all that concerns licensed vessels. I am assured that frauds are committed; that lace is shipped, and then brought back to make me believe the balance of trade is in my favour." From Ostend the General was to go to Antwerp, to visit the arsenal, the squadron, &c. He was to remain eight days there, and to spend two hours a-day in the arsenal and on the river. He was then to visit Rotterdam, Flushing, Wilhelmstadt, Berg-op-Zoom, and other places, and to furnish detailed reports on a variety of subjects. At Rotterdam the General was to invite the officers to dinner, so as to sound them. Other Aides-de-Camp were sent on missions to other countries with instructions to write every day, thus showing how indefatigable the Emperor was in procuring information, and how unweariedly he kept his eye fixed on all that was passing. In April, 1811, the Emperor wrote a long letter to the King of Wirtemberg concerning the probability of a war with Russia. It must be remembered that at the Treaty of Tilsit the Czar had made a good many concessions to Napoleon—had promised to remain neutral when he went to war with Austria, to acknowledge him as King of Spain, &c. In return, the Czar was to keep possession of Moldavia and Wallachia and Finland. But when Napoleon had conquered Austria he began to back out of his engagements, being determined that Russia should not gain what he considered a stepping-stone to Constantinople. The desire of the Czar to keep Moldavia and Wallachia led not only to the battles of Eylan and Friedland, but indirectly to the occupation of Vienna, to Essling, Wagram, &c., to the Peninsular war, and finally to the invasion of Russia and the retreat from Moscow. In his letter the Emperor says:—"The King of Prussia allowed himself to be dragged into war; he wished to retard it when he was no longer master, and he wept before Jena, having a presentiment of what was going to happen. It was the same with the Emperor of Austria; he allowed the Landwehr to be armed, and he was at once drawn into war, I think the same will happen to the Emperor Alexander. This prince is already far from the spirit of the Treaty of Tilsit. All the ideas of war come from Russia, and unless the Emperor promptly puts a stop to the impulsion given to public opinion he will be dragged into war in spite of himself; and thus war will take place in spite of me, in spite of him, in spite of the interests of France and those of Russia. I have seen this so often that it is my experience of the past which unveils the future. All that is an operatic scene, the English working the machinery." The fact is, that Napoleon suspected Russia of wishing to come to terms with Turkey and with England, and he determined to attack. Writing on April 4, 1811, to General Bertier, the Emperor said—"My cousin, the Army of Portugal must be divided into six divisions." The 5th Division was to be composed of the 17th Light Infantry, 22nd and 65th of the Line, Hanoverians, Prussians, and Irishmen. The volume before us contains several letters concerning the best way of attacking Corfu—some of these letters half-a-dozen pages in length, and going into the most minute details. At page 179 we find "Observations concerning the bad men of the battalions of the Island of Elba." And the Emperor writes—"I see by a letter from the Grand Duchess that two Captains of the 2nd Battalion are spoken of as *mauvais sujets*." The Emperor ordered the bad men to be sent to Corsica! He little imagined in 1811 that he should one day rule over the Island of Elba and review a remnant of the Old Guard there. On May 24 Napoleon addressed a long note to the War Minister on his forces in France and Italy and his corps of observation on the Elbe and the Rhine. He had then divisions at Cologne, Munster, Dusseldorf, Aix-la-Chapelle, Utrecht, Mayence, Verona, Brescia, Bassano, &c. He had eighty battalions of Infantry on the Rhine, and amongst these troops eight battalions of Swiss, four Portuguese battalions, two Spanish and two Illyrian battalions. In Italy the foreign was also represented in the shape of Spaniards, Poles, and Croatians. He had also a corps of observation at Boulogne, and another at Bayonne, and his armies covered the Low Countries and Spain. One reads page after page of such details as the following:—"The first brigade will be formed of six battalions of six companies each, each company of 150 men, furnished by the twenty-seven French and three Polish regiments forming part of the Army of the South and that of the Centre. This brigade will assemble at Tours; a Second Colonel will take the command and two Second Majors, who will each command three battalions. This brigade will be 5,000 strong." On the 18th July the Emperor dictated the following order from the Trianon:—"Express my dissatisfaction to the Colonel of the 9th Cuirassiers, who sent a bad man, who had been three months in prison, to the Guard. Put him under arrest for twenty-four hours, and mention this in an order of the day to the Army." From Compiégne, the Emperor wrote, September 3, 1811, to Marshal Davout, commanding the Army of Germany—"My cousin, I see with great pain that you have sent the 8th Hussars to East Ems. When I remove a troop from that pestilential place, you have the simplicity to send thither one of my best regiments. I regard that regiment as lost. If you don't take care to quarter your troops in healthy places, you will do to me as you did at Vienna. I have withdrawn all the troops which were on the coast. Even at Flushing, which is most important, I have only left 600 defaulters. I prefer exposing myself to the chances of the enemy than to lose men in such a miserable way. You pursue an opposite course," &c. On the 14th of the same month his Majesty wrote some orders which are of interest just now, because, while some people hold that Germany would be justified in trying to put a stop to the armaments being made by France, others hold the contrary opinion. The Emperor, addressing Marshal Davout, said:—"My cousin, I have sent a courier to Berlin to-day, and I have given directions to Comte Saint Marsa that if Prussia does not at once cease her works of fortification, provisioning Spandau, and Kolberg, and all her military movements, he is to leave Berlin. My intention is, that as soon as the Comte Saint Marsan shall have left Berlin, that you march at once on that capital. . . My resolution is so strongly expressed that I hope Prussia will feel her impotency and the folly of her pretensions. . . Should you enter into Prussia make no proclamation, say nothing, but take and disarm everything. You must try and surprise Spandau." In another letter to Marshal Davout dated Paris, December 2, 1811, the Emperor writes: "The Germans complain that all the rumours of an insurrection in Germany are fomented by the French. They complain that you said at Rostok you would know how to prevent Germany from becoming another Spain. These expressions do a deal of mischief. There is nothing in common between Spain and the German provinces. Spain would have been reduced long ago but for those 60,000 English, her 1,000 leagues of coast, and the money she has received from America. But Germany has no America, no sea, nor strong places, nor 60,000 Englishmen. There is nothing to fear even if the German was as idle and as given to assassination and superstition as the people in Spain, where there are 300,000 monks," &c. On December 5 the Emperor wrote to Berthier, saying—"My cousin, write to Marshal Suchet [commanding the Barcelona district] to complain that his wife, in her correspondence with Madame de Saligny, talks about what passes in the army, that these details should not be found in the letter of a woman who ought to know nothing of the force of the army, nor the movements which it makes, but should speak of her health and nothing more." "Speak of her health!" At all events, Madame la Maréchale, Duchesse d'Albufera, has managed to preserve it. She is still alive, and inhabits a splendid hotel in the Faubourg St. Honoré, a few doors from the British Embassy. On December 6 the Emperor complained to Berthier of the way in which his affairs were being managed in Spain. He expressed his dissatisfaction with Marmont, with Victor, with Soult; and said of the latter:—"The Duke of Dalmatia has the finest army in the world, and yet he can neither hold General Hill nor the army of Murcia in check." On December 20 the Emperor wrote to his Foreign Minister, Maret, Duke of Bassano, ordering him, in the event of war with Russia, to establish a regular spy system. Agents, chiefly Poles, were to be sent to various parts of Russia, and were to be recompensed according to the importance of the information furnished. We shall conclude our notice of the present volume by remarking that Napoleon blamed all his Lieutenants in Spain in the most severe terms, while speaking with great respect of Wellington and Hill. It was said that at the commencement of the war the English commander, in reading the list of the Generals appointed to serve under him, exclaimed—"I only hope they will make the enemy tremble as much as they do me." If the Duke of Wellington was dissatisfied at the beginning of the war, Napoleon was dissatisfied all through to the end.

Of late years the question has arisen among some few naval officers as to the necessity of retaining the Corps of Royal Marines as an adjunct to the naval force of the country. The arguments advanced are, that the class of vessels in which large detachments were embarked have been replaced by ironclads, turret-ships, and gunboats, in which accommodation can only be provided for a diminished crew and a smaller detachment of Marines; that our seamen are now continuous service men, trained and educated to the discipline of the Service, and do not require the example of a more highly disciplined body among them as under the old system of manning a ship, when some came from ships recently paid off, many had not seen a man-of-war for years, but had been in the merchant navy, and others were idlers, landsmen, and raw hands; and that, in the event of any shore work being required on active service, the naval element is now sufficiently well drilled in the use of the rifle, in company, battalion, and even brigade drill, to act as troops on an emergency. These arguments have an apparently fair amount of reason upon the face of them, but they can be easily and satisfactorily answered. It doubtless is true that the greater number of our modern vessels of war have less accommodation for their ships' companies, but it is equally true that, although we have none of our old line-of-battle ships of two and three decks formed into Channel or Mediterranean Squadrons, yet we have them still in commission in our home ports as flagships and guard-ships with strong detachments of Marines on board, and we have a fleet sufficiently large to employ the usual number of the corps afloat. With regard to the second objection, it would be invidious even to hint that the men of the Royal Navy are not sufficiently disciplined to stick honestly to their duty without being overawed by another set of men in a different uniform, as at the mutiny at the Nore, and no one dreams now-a-days that this can be one object of embarking Marines. The Navy is now composed of men educated in the Service from boyhood, and entered for continuous service. They have grown up in discipline, and are of very different stuff to the motley crews of old. Lastly, touching the value of seamen as soldiers in the event of a landing place being required. That the Blue-jackets can handle a rifle there can be no question, and that during the last twenty years they have learnt a certain amount of company and battalion drill there also is no doubt; they have likewise done good service in a body when landed in the Crimea, in India, and in China, but it must be remembered that they chiefly worked great gun batteries, and that they were in all cases acting in conjunction with Marines or troops of the Line. Many instances might occur in warfare where an Admiral commanding a large squadron and having no troops at hand might find it necessary to undertake operations on shore. British pluck has done and can do much, but it would be folly to suppose that the amount of military drill learnt by seamen could make them as efficient against a body of soldiers on shore as another body of trained soldiers, such as the Royal Marines, could be. The sailor has sufficient training to work on shore with the soldier, but it is doubtful if he could do much without him. The experiment has yet to be tried, and it is to be hoped that no Commander-in-Chief will be put to such a strait as to have no Marines to form a part of his landing force. It is also as well to consider the value of the Marines as soldiers to the State. Their training as a military body is in every respect equal to that of any regiment in her Majesty's Service, and they are efficient at any moment to take part in any military operations on an equal footing with their brethren of the Army. But, in addition to their military knowledge, they possess other useful knowledge which a soldier does not. A Marine having once been embarked is thenceforth ready for service on board ship with his sea legs on at a moment's notice. He has previously been trained in the battery at his head-quarters in great gun drill and in knotting and splicing, and is prepared to take his place at any gun in the ship. He knows the names of the principal ropes that are led to the deck and their uses, and is therefore of the utmost value in working the vessel. Accustomed to manning and arming boats, he is at no loss in settling himself in his place where boat work is required, and can take an oar if necessary. Further, should he be an artificer, he will have had an opportunity of keeping up the practice of his trade by employment in the Works Department at his head-quarters, and thereby rendering himself of still more value. Wherever work has had to be done, there Marines have been present to help to do it, whether in general actions in the Fleet, as at the Nile or Trafalgar, in *rencontres* between ship and ship, in boat expeditions, or when formed into battalions on shore, as at Walcheren, in Spain, on the Coast of Syria, or in China, and on all occasions the corps has earned its laurels. To carry out, then, the idea entertained by a few of reducing, or, still further, of abolishing a corps which is proved to be of such eminent service to the State, would be most impolitic. At the end of the last century the corps was twenty thousand strong, and it has fluctuated from that date until, by the abolition of the Woolwich Division, and other reductions in 1869, it has now reached a figure less than fourteen thousand, including the Artillery division. A particular Administration may gain credit for reducing its Estimates, but so long as England and her possessions have to be defended, so must a certain force be provided for the defence. It matters not to the country at large whether that force is paid by the Admiralty or War Office, so long as it has to be paid; and the question is simply whether the military strength sustained by the country is adequate to or in excess of its requirements. Of the Corps of Royal Marines it certainly cannot be said to be in excess; but, on the contrary, should we become involved in a war of any extent in which our naval power would be engaged, the present strength of the Royal Marines would not be found sufficient to meet the necessities of the Service.

It would be idle to pretend that there is not the least probability of our being called upon to dispatch an expedition to protect our own interests; and it may not be uninteresting, therefore, to examine the qualifications of the Generals most likely to be entrusted with command in any force which we may send. We shall assume, though it is by no means certain, that the Duke of Cambridge would remain at the Horse Guards, where he has a splendid and efficient staff. The name which has been most frequently in the mouth of the public is that of Lord Napier of Magdala. He has seen much service, has always been successful, and is a man of acknowledged ability. Moreover, he is accustomed to deal with Orientals. On the other hand, he has never been opposed to an European enemy, is sixty-seven years of age, and has passed some forty-five years of his life in debilitating climates; and, above all, he is now in a most important and responsible post, where he could ill be spared. The health and the age of Lord Strathnairn, great as his experience, his ability, and his diplomatic talents undoubtedly are, put him out of the question for active service at the head of an army. Sir William Codrington is another officer whose name naturally occurs to us. An excellent regimental officer, he commanded first a brigade and then a division in the Crimea with much credit. He has, however, never had an opportunity of proving his fitness to be entrusted with the direction of an army in the field, for, though appointed Commander-in-Chief of the Crimean Army, he saw no fighting at its head. He is thoroughly well versed in the practice and theory of his profession, and, though seventy-three years of age, is still active and vigorous. Sir Lintorn Simmons, who is high up among the Lieutenant-Generals, is only fifty-six years of age, and thoroughly versed in the art of war generally, but he is an Engineer, and never handled troops in his life. Sir Augustus Spencer, though seventy years of age, is still vigorous. As Brigadier at the siege of Sebastopol and in command of the expedition to Kinburn he gained credit, and, if more than one *corps d'armée* is sent to Turkey, he will probably be offered a command. Major-General Sir D. Lysons is deemed one of the most skilful of our tacticians, and has considerable experience of war, but his standing as regards rank is such that it is improbable that he would be entrusted—at all events, at first—with a higher command than that of a division. Yet public opinion places him among the coming Generals. He commanded a brigade during the latter part of the Crimean war, and was very much to the front on all occasions. Regarding Sir Garnet Wolseley it is unnecessary to say much. He is young, ardent, well versed in his profession, and has seen much service. Still, he has never commanded a brigade, or even a battalion, against a European foe. Nevertheless, he may be considered as safe for a division, if he be not Chief of the Staff. Lord Henry Percy would probably be considered among the candidates for a division. Sir Alfred Horsford is sure of one, at all events, and he was long ago indicated as the General to whom the Brigade of Guards and the Highland Brigade would be entrusted. Prince Edward of Saxe-Weimar, Herbert, Sir Thomas Steele, Lord Mark Kerr, Ingall, General Parke, Lord A. Russell, J. W. S. Smith, Leicester Smyth and Alison have all claims for employment. As to the Brigadiers, Thesiger, Bright, Sir John M'Leod, Lord Clarina, Lord Abinger, and Knox are men whose claims would be taken into consideration; and there are several others equally good. Among Cavalry officers the names which suggest themselves are those of Oakes, de Salis, Shute, Wardlaw, and Foster; and if there was an Indian contingent, Probyn would be sure of a brigade. The command of the Artillery and Engineers would probably be given to Major-General d'Aguilar and Sir H. Harness respectively. For the positions of Adjutant-General and Quartermaster-General better men than General Stephenson, Armstrong, and Lord Longford could scarcely be found, if they desired to serve. There can scarcely be a doubt that Dr. Munro would be the Principal Medical Officer. Of course we only indulge in conjectures, founded on the antecedents of officers; but we will venture to say that in case of war few of those we have named would be unemployed. We hear a good deal of a dearth of men fitted for high command; yet, on careful examination, we think that the public will feel convinced that alarm is needless and confidence well founded.

General U. S. Grant, who is now the honoured visitor of this metropolis, was, certainly, favoured in his military career by many circumstances. He was not involved in any of the discredit of the earlier defeats of the Federals at the beginning of the war, when the Confederate armies were confident and strong. He escaped the odium and responsibility connected with the failure of the first attempts of the Government at Washington to organize an army and stamp out the great rebellion. He was engaged, when his name first cropped up, with Generals of great incapacity, and with an enemy of inferior quality in the West, where he won his spurs. He achieved the earliest success of any importance, if we except the victory of M'Clellan in Western Virginia, which led to his rocket-like rise and fall. Grant's capture of Fort Henry and Fort Donelson, in which he displayed energy and ability, was one of the great turning-points of the war. His refusal of terms to Buckner, for which he was greeted by the North with the title of "U. S."—or "Unconditional Surrender"—Grant, gave a fair index to the character of the man, and when in his dispatch of February 16 he announced that he had taken 12,000 men and 40 guns, he may be said to have made unconsciously his first bid for the Presidency. Thence his way was clear, and he succeeded, after working his way from point to point through a series of commands, increasing in importance and rank, to the command of a large army well-seasoned to war, rendered confident by success at the very moment when the strength of the South had begun to fail and the Confederate troops had tasted over and over again the bitterness of defeat, when some of their ablest Generals and myriads of their most gallant soldiers had fallen, and when the star of Lee had paled and Stonewall Jackson ceased to be invincible. This is not said in any spirit of detraction—it is a statement of facts. To General Grant belongs the merit of carrying out in the field the simple formula in which Mr. Lincoln expressed his policy towards the rebellion. He kept "pegging away." His plan of action was based on the very obvious fact that if he could only keep "pegging away" the stone walls and brick and mortar of the Confederate front must cave in at last and allow him passage whither he listed. The Southern armies, decimated by campaigns in which sanguinary battles and actions were aided in their work by long marches, were no longer able to present an equal front to the Federal hosts. Their numbers could be counted at last by the tens of thousands on the fingers of one hand. Grant understood the situation fully. It was clear that once the North and the West were united in adhesion to the Federal Government, and were resolved on putting down the insurrection, their population, fed by a ceaseless immigration of disciplined Germans, by hordes of Irish, who, without military training, were fair raw material for soldiery, and by natives of every State in Europe, many of them versed in war, could supply his armies with plentiful food for powder, whilst the sea placed all the resources of the world at the disposal of the Government at Washington. On the other hand, the South was in a closed receiver, which was fast becoming exhausted. They had no reserves of population to draw upon, and, indeed, their peasantry—the negroes—were fast becoming the most resolute of their enemies. Then was the moment to begin "pegging away." And Grant began accordingly and at once to do so, and the Confederacy was doomed. In its destruction Grant was the last great final cause, and he stands on English soil as the soldier who carried out with unflinching energy the only strategy which the genius of Lee could not frustrate and the valour of Jackson could not sustain. Twice President of the United States—the saviour of his country, if not of society—General Grant deserves all honour from those who admire success and the qualities which win it.

It is stated that the Mediterranean Squadron, under Vice-Admiral Hornby's command, may be expected to remain stationed for some time at the Piræus.

Five Admirals' flags have been flying at Devonport during the past week, namely, those of Admiral Sir T. M. C. Symonds, K.C.B., Commander-in-Chief;

Vice-Admiral F. B. P. Seymour, C.B., commanding Channel Squadron; Rear-Admiral A. Phillimore, Superintendent of Reserves; Rear-Admiral G. O. Willes, C.B., Admiral-Superintendent; and Rear-Admiral W. M. Dowell, C.B., second in command of the Channel Squadron.

On the 30th instant the Garnet, 12-gun composite screw corvette, is ordered to be launched at Chatham. Her principal dimensions are: length between perpendiculars, 220ft.; extreme breadth, 40ft.; displacement, 1,864 tons; draught of water, 15ft. 6in.

Orders have been received at Plymouth for the Channel Squadron and the additional ships which have been temporarily placed under the command of Vice-Admiral Seymour to leave Plymouth for Queenstown to-day.

Rear-Admiral Phillimore, during his stay at Plymouth, has taken the opportunity of inspecting the Reserve ships assembled there with the Channel Squadron. We understand that the state and condition of the ships and the appearance of their crews, augmented by men of the shore force embarked for the annual cruise, have been found most satisfactory.

We trust that the gallantry of Acting Sub-Lieutenant Montgomerie, late of the Immortalité, particulars of which we have given in another column, will not be allowed to pass unnoticed by the Admiralty. His escape from being drowned appears to have been a narrow one, and it is a matter for remark that the life-buoys in this ship seem to have been in as inefficient a condition as those on board the Newcastle were lately proved to be.

It is announced that an examination of Surgeons in the Royal Navy who are eligible and who may be desirous of qualifying for the rank of Staff Surgeon will be held at the Royal Naval Hospitals at Haslar and Plymouth on Tuesday, July 17.

We have to record the death of Admiral Sir Stephen Lushington, G.C.B., who entered the Navy in 1816 as first-class volunteer on board the Tagus, and was afterwards appointed to the Hinde, then commanded by Admiral Hon. Henry J. Rous, in which ship he was actively employed in the suppression of piracy in the Archipelago in 1823 and two following years. For his services he was made Lieutenant in July, 1824. In the Zebra and Cambrian he again did good service against pirates, and was present at the battle of Navarin. He was appointed in October, 1827, to the Asia on the same station, and in May, 1828, was given the command of the Ætna, bomb, in the operations against Morea Castle, and for his distinguished services obtained the Cross of St. Louis of France and the Gold Cross of the Redeemer of Greece, and in October, 1829, having received the approbation of the Admiralty, was further rewarded by promotion to Captain. He commanded the Cleopatra, Retribution, and Vengeance, and was Superintendent of the Indian Navy from 1848 till 1852. He commanded the Albion throughout the Crimean war, was repeatedly mentioned in despatches, and thrice gazetted with high praise for his indefatigable exertions, zeal, and ability while in command of the Naval Brigade at the siege and capture of Sebastopol, and for his services was nominated a Knight Commander of the Bath and made an Officer of the Legion of Honour, of which he was promoted to be Commander in 1857, and was decorated with the Order of the Medjidie. He became Rear-Admiral in 1855, was appointed Lieutenant-Governor of Greenwich Hospital in May, 1862, and became an Admiral on the Reserve List in December, 1865. He was appointed a Grand Cross of the Order of the Bath in March, 1867.

Captain R. V. Hamilton, C.B., Superintendent of Pembroke Dockyard, has been granted leave of absence from May 31 to the 16th of the present month.

The boiler explosion on board the Thunderer, from which the Navy suffered so severely, has been the means of directing attention to the testing of boilers generally. Not only has it now been arranged that the boilers of all her Majesty's ships shall be periodically tested, but those used in the dockyards are also to be examined and thoroughly tested every six months.

In troopships carrying collapsible boats frequent trial and exercise is to be made with them, so as to insure their being in perfect working order should necessity for their use arise.

We regret to hear of the dismissal by sentence of court-martial of a medical officer serving on the East Indies Station. Two charges of drinking to excess were brought against him, but only one was proved.

General surprise seems to have been felt in naval circles when the sentence on the late Captain of the Immortalité was made known, so convinced were the majority that he would be able to clear himself of the charge brought against him. It is true that no more has been proved against him than that his conduct was unbecoming an officer, but his dismissal by a court which had to try him on the graver charges does unfortunately connect his dismissal with those charges. There is a strong feeling that either the sentence is not severe enough, or too severe. If the Court believed in his guilt, dismissal was not enough, and if they did not so believe, why was he not acquitted of those grave charges? It is a most lamentable case, and that there are many who cannot bring themselves to believe in his guilt, even in a small degree, is plain from the manner in which the Chaplain of the ship spoke of his late Captain when called as a witness for the defence. "If," said the Chaplain, "I were to single out a man of noble, blameless life, one of the first I should select would be Captain Hume."

Directions have been received at Chatham Yard for the reception of a Russian Lieutenant named Radazoff, who has expressed a wish to inspect ships in progress of construction.

It is with much regret we have to record the death of Fleet-Surgeon Dyas, of the Warrior, on Saturday last. The particulars of the sad occurrence will be found in another column.

Rear-Admiral Phillimore has been devoting the past fortnight to the inspection of Coast-guard stations in the Western Counties, his flag being hoisted in the Hawke. While at Devonport he was the guest of Rear-Admiral Willes, C.B.

Many of the *employés* in Chatham Dockyard are working extra hours (Saturday excepted) in consequence of the pressure of work.

It is particularly painful to find that the machinery of every new ship which attempts to leave a home port on being commissioned will most persistently go wrong. Our latest pride and joy, the mighty Thunderer, has unhappily proved no exception to this rule, and no sooner do we hear that she has started for Plymouth to join the flag of Vice-Admiral Seymour, than we learn that she is back again with damaged machinery. In this case, what is strangely enough technically known as an "eccentric go-ahead" rod has snapped, and on examination the signs of an old-standing flaw are detected. Of course, it is quite as impossible to see through a bar of iron as it is through a stone wall, and some liability to accidents of this nature must be accepted as unavoidable; but they are, nevertheless, most lamentable, and we hope that there is no room for entertaining the slightest suspicion that this is another case of bad workmanship, and a repetition of some of those avoidable accidents with which the Navy has lately become too familiar. As the ship was within reach of the telegraph, and not far from the works of the contractor who built the engines, it has been easy to obtain spare gear to replace that which has proved defective on the first occasion of its being put to the test at sea. But it would have been quite another thing had she left for her station, far away from home, and had met with such an accident as rendered one of her engines entirely useless. When affairs of this kind happen, we cannot fail to recognise the absolute dependence of ships of the mastless class upon the efficiency of their machinery, and the necessity for keeping a jealous eye upon the manner in which it is turned out of hand becomes more than ever apparent.

Arrangements will be made at the ports to grant leave to a certain number of seamen and Marines during the third week in July, to enable them to proceed to Wimbledon to compete for the Army and Navy Challenge Cup.

Mr. Rowsell, Director of Admiralty Contracts, has returned to duty after his absence in the Mediterranean, and we are glad to hear that his health has been greatly benefitted by the change.

It has now been definitely decided that the Active shall go to the West Coast of Africa, and the Commodore will have authority to turn over from the Tourmaline to the Active should he desire to do so, either to avail himself of the better accommodation of the Active or on account of the condition of the engines of the Tourmaline.

The officer who joined the Active and almost immediately disappeared, and remained absent until he became a deserter, has again made his appearance, and orders have been given for his trial by court-martial.

One hundred extra men are to be employed overtime at Devonport in order to push forward the boilers now under construction for the Hercules.

The names of the following officers have been removed from the "Navy List" during the past month:—Acting Sub-Lieutenant E. W. Underwood, who failed to pass his examination at the College; Chaplain the Rev. C. E. Hodson, M.A., resigned; and Assistant-Paymaster George C. Long, resigned. The death has also been reported of Lieutenant Reginald Pole.

Mr. Henwood, the Naval Architect, has failed in his application for the inspection of certain confidential reports made by the Controller of the Navy to the Admiralty. The application was made in connection with an action brought by Mr. Henwood against Mr. Childers for alleged libel in an Admiralty minute, but it has been rejected by the Queen's Bench Division, whither it had been taken on appeal from Judges' Chambers.

"Mutiny on board a British ironclad" is by no means a pleasant thing to hear cried about the streets of London by the newsvendors; but such was the case yesterday afternoon, and there is, unhappily, some ground for so grave a statement. That discontent does prevail on board the Alexandra there can be no doubt, and though many were quite ready to admit that she was by no means likely to be a truly happy ship, we were scarcely prepared for so marked an exhibition of feeling on the lower deck so very early in the commission. Let us hope that no want of tact will be allowed to turn the Alexandra into a second Bristol.

A Greenwich Hospital Pension of £50 per annum has been awarded to Major Thomas Waters, Royal Marines, it having fallen vacant by the death of Colonel J. K. Willson.

Notwithstanding the appointment of a Committee to inquire into the outbreak of scurvy in the late Arctic Expedition, opinion appears to be as divided as ever. Many who have seen a vast amount of sledge work are quite at variance with the medical opinion; and this being so, Mr. Lyon Playfair intends to ask the First Lord of the Admiralty, in the House of Commons on Monday, what steps, if any, Mr. Hunt has taken with a view to prevent similar calamities on future occesions? A very plain answer is scarcely to be expected.

We understand that H.R.H. the Duke of Cambridge was very much pleased at finding some of the Aldershot battalions so very strong and all so unusually well filled. The rank and file were very young; but that, as a friend of ours says, "is not a lasting defect." The recruits might be reckoned at 5,000, and they were generally well spoken of by the commanding officers.

Cabrera, Duke of Morella, died in his bed quietly at Wentworth, on May 24, at the age of sixty-six. People who have so long read of him, and those who have seen him, will be surprised to learn that he was young; but the young "Clerico" of twenty-three, who raised a guerilla for Don Carlos, did not mistake his profession when he so appeared in arms as representative of the Church militant. Mina, the sanguinary wretch who disgraced the cause of Queen Christina and Christianity—an anti-human specimen of humanity—caused the mother and sisters of the faithful partizan to be butchered, and inaugurated the war of reprisals which gave an unusual ferocity of character to even Spanish civil war, and Cabrera retaliated by the wholesale slaughter of his Christino prisoners. From that time till the end of the war the energy, genius, and skill of the partizan chief were exemplified in the most daring feats of arms, and his career became a daily romance; and in one of these exploits he won by the capture of Morella the title of Duke of that ilk, which was all Don Carlos could give him, for the defection of Maroto caused his appointments as Captain-General and Governor of Aragon, Valencia, and Murcia to turn to Dead Sea apples. Still he held to the field till he was overwhelmed by Espartero. In 1842 he was made Captain General of the Army. In 1845 he denounced the abdication of Don Carlos, and in 1848 he made another effort to.

As we stated last week, each regiment is in future to have attached to it its own transport, so as to be independent of any extraneous aid, whereby to enable it to march at once on receipt of orders for active service. To facilitate matters, it is proposed that the necessary camp equipage, &c., shall be embarked laden in waggons, so that the same may be landed in a state ready for marching off forthwith on the army reaching its destination. The experiment of embarking and disembarking the waggons was tested at Woolwich Dockyard on Saturday last with one of the new horse boats, under the superintendence of Captain Brownlow, R.N.

Among the officers who have gven evidence before the War Office Committee on Commissariat Organization are Deputy Commissaries-General F. E. Watt and A. W. Downes, representing the Commissariat; and Commissaries-General H. W. Gordon, C.B., H. Tatum, C.B., and Deputy-Commissaries W. Booth and H. M. Dunstan, Ordnance Store Department.

"And there is nothing new under the sun" was uttered in great bitterness of heart at now a long period in the past. It is by no means inapplicable to the proposed new Department of Army Accountants.

We have before drawn attention to the vacancy which still exists on the Staff of Lord Napier of Magdala for a Military Secretary. If his Lordship only knew how many half-pay Lieutenant-Colonels there are who are hoping for employment, and would jump at the chance of serving on the Staff of so popular a chief, we feel certain he would at once take steps for filling the appointment. The chance of qualifying for full Colonel is not within the reach of an unfortunate half-pay man every day, and, when it does offer, it is not unreasonable that it should be eagerly sought after. There are dozens of officers promoted to unattached Lieutenant-Colonelcies whose professional prospects will be ruined for ever unless they succeed in obtaining some such employment as this. Can nothing be done by the Horse Guards with regard to the appointment if Lord Napier does not nominate a Military Secretary himself?

Consequent upon the promotion of Captain Wolseley, 6th Regiment, to a substantive Majority, Captain R. Vandeleur, 5th Lancers, will be gazetted Brevet Major, in succession to Major-General F. E. Voyes, Bengal Staff Corps, who died on April 26.

The following promotions take place in the Army, with effect from the 7th ultimo, in succession to General A. Anderson, Royal Marines, placed on the Retired List, viz., Brevet Major M. W. de la P. Beresford, half pay, late 49th Regiment, Staff Officer of Pensioners at Armagh, to be Lieutenant-Colonel; and Captain A. M. Rawlins, 95th Regiment, to be Major.

The following promotions take place in the Army consequent upon the death of General Sir W. L. Griffies-Williams, Bart., Madras Infantry, which occurred on the 23rd ultimo—viz., Lieutenant-General H. Macan, C.B., Bombay Infantry, to be General; Major-General G. de Sausmarez, Madras Infantry, to be Lieutenant-General; Colonel W. A. Stratton, commanding the Brigade Depôt at Perth, to be Major-General; Major A. H. Wavell, 41st Regiment, to be Lieutenant-Colonel; and Captain H. A. Burton, 14th Regiment, to be Major.

Lieutenant-Colonel R. Home, C.B., Royal Engineers, has found himself compelled to resign his seat on the Committee on Commissariat Organization, by reason of the immense amount of work now devolving upon him in connection with the department on the staff of which he is so zealous a member.

A patrol-jacket has been approved for Field-Marshals, Generals, and officers of the General, Divisional, and Brigade Staff when on field service, full particulars of which will be immediately published.

Officers of Hussars at levées, and in the evening when in full dress, will in future wear blue cloth pantaloons and Hessian boots of a special "dress" pattern.

The best shooting regiment in the Army for the year 1876-77 was the 26th Cameronians, with a figure of merit of 103·90, Captain Phillips' being the best shooting company. The best shot with the Henry-Martini was Corporal F. Prattinton, 30th Regiment, and the best judge of distance, Private W. Wilks, 77th Regiment.

Lieutenant-Colonel the Hon. Paul Methuen, Scots Guards, succeeds Lieutenant-Colonel C. A. Wynne-Finch as Assistant Military Secretary to General Sir John Michel, G.C.B., commanding the troops in Ireland.

Lieutenant E. P. Wilford, 28th Regiment, has been appointed Fort Adjutant at Hong Kong, vice Lieutenant T. J. Chamberlain, 80th Regiment.

Brevet Major W. R. Lascelles, Rifle Brigade, whose term of employment as Deputy Assistant-Adjutant and Quartermaster-General at Portsmouth will shortly expire, has been appointed Aide-de-Camp to Lieutenant-General Sir John Garvock, G.C.B., who will assume command of the Southern District on July 1. Major Lascelles entered the Rifle Brigade February 20, 1855; was promoted to Lieutenant, July 6, 1855; Captain, November 15, 1861; and Brevet Major, March 10, 1875. He served in the Indian Mutiny campaign, including the capture of Lucknow (medal and clasp), and with the 1st Sikh Irregular Cavalry (Probyn's Horse) during the China campaign of 1860 (medal and two clasps). He held an appointment as Brigade-Major in India from 1864 to 1867, passed the Staff College in 1871, was appointed Deputy Assistant-Adjutant and Quartermaster-General at Cork August 4, 1872, and transferred in a similar capacity to Portsmouth in January, 1874.

A good deal of dissatisfaction is being caused in the Royal Artillery by reason of the delay which occurrs in regard to the retirement of field officers. In one case, an officer handed over charge of a district as far back as August last in view of his retirement, and up to Tuesday last his name was still borne on the establishment, though he has long been in the enjoyment of a handsome salary from another source, he having accepted civil employment previous to making his application for pension. All this time promotion in the senior ranks of the regiment has been at a deadlock, not a single step having passed to the Lieutenant-Colonels for a period extending over nearly twelve months.

The Secretary of State for War entertains H.R.H. the Duke of Cambridge and the principal officers of the War Office at a full-dress dinner to-night, to celebrate her Majesty's birthday, at his residence in Grosvenor-crescent.

The Army.

1st Life Guards proceed from Windsor to Aldershot for the summer drills.

3rd Dragoon Guards will leave Dublin for the Curragh on Tuesday for the drill season.

3rd Hussars. Troop Sergt.-Major Hughes has been appointed qrmr.-sergt. of the Mount Aboo Sanitarium.

4th Hussars. Lieut. Grant has resumed regimental duty from the Staff of Gen. Sir F. Haines, K.C.B., in India.

6th Dragoons. Major Billington is about to retire upon half pay. Capt. Heaviside is also contemplating half-pay retirement.

19th Hussars. The regimental steeplechases came off on Saturday at Newbridge, H.R.H. the Duke of Connaught being amongst those who were present. The events were as follows:—Subalterns' Cup, £25 added, 2½ miles—Lieut. H. M. Warde's Constellation (owner) 1; Open Military Steeplechase of 30 sovs, about 2½ miles—Vet.-Surg. M. J. Hartigan's (3rd Dragoon Guards) Away (Capt. Bates) walked over; Regimental Challenge Cup, £30 added, 3 miles—Lieut. French's Q.C. (owner), 1; Hunter's Stakes, 2½ miles—Capt. Webster's Quicksilver (owner), 1; Consolation Race, 2 miles—Lieut. French's Mrs. Gamp (owner), 1.

20th Hussars are, we (*Brighton Gazette*) are pleased to learn, to remain another year in Brighton, the result of a request which had been made to the War Office on behalf of the Town. This arrangement will, of course, be dependent upon what movements may be rendered necessary by the Eastern Question. Excepting this contingency, the only shifts that are likely to be made in connection with the 20th Hussars this summer will be in the troops at out-stations; those at Hilsea may exchange with some of those at present with head-quarters here. We are sure that the inhabitants of Brighton will be glad to learn these facts; for a better-conducted regiment was never quartered in the town, and none has been more ready to lend assistance in entertainments organised for the various charitable and public institutions.

Royal Artillery.

The command of the Field Artillery at Woolwich has been conferred upon Col. G. T. Field, late superintendent of the Royal Carriage Department, who succeeds Col. George Colclough, posted to the Royal Horse Artillery and appointed to command the Artillery in Ireland. In July the reorganization scheme will abolish the title of officer commanding Field Artillery, and Col. Field will then take command of the new 5th Brigade. The command of the camp at Woolwich will for the future be a Staff appointment, and it has been bestowed upon Col. E. J. Williams. Col. C. S. Henry has been appointed on the Staff of the Royal Horse Artillery at Aldershot.

The harness-room of the Grand Depôt, Woolwich, was entered on Monday night and the harness and appointments maliciously cut and destroyed. A driver who was on stable picket during the night has been apprehended on suspicion, but there appears to have been no motive for the act, the officer in command of the brigade being well known for the consideration shown to his men and the esteem in which he is held.

Major-Gen. Sir John Adye, Governor of the Royal Military Academy, has issued an order announcing that a scholarship has been established in memory of Major-Gen. Sir Henry Tombs, V.C., R.A., and a considerable sum of money having been subscribed by officers of the Royal Artillery and others, with the view of perpetuating the memory of that distinguished officer, it was decided that part of it should be expended upon a memorial in the garrison church at Woolwich, which has been done, and that the remainder should be invested and the interest given half-yearly as a scholarship to the senior cadet of each term who enters the Royal Artillery. The half-yearly interest will amount to about £30. The first presentation will be made in the batch of gentlemen cadets to be commissioned in July next.

Capt. D. T. O'Callaghan has been appointed Acting Second Assist.-Superintendent of Experiments at the School of Gunnery, Shoeburyness.

Lieut. R. W. O'Grady has been assigned local rank as captain in India.

Royal Engineers.

The officers gave a ball at Chatham on the 24th ult., when several hundred guests were present. Among the visitors were Vice-Admiral Chads, Commander-in-Chief at the Nore; Rear-Admiral Fellowes, C.B., Superintendent of Chatham Dockyard; Major-Gen. Erskine, Commandant of the Chatham District; Capt. Brandreth, R.N., Superintendent of Sheerness Dockyard, and other heads of departments.

Col. Sir William Jervois, K.C.M.G., before leaving Singapore, nominated Capt. Satterthwaite, R.E., Assistant Colonial Engineer in the Straits Settlements, to proceed with him to Australia as aide-de-camp, in lieu of Capt. Paton, 24th Regt., who has acted as his Excellency's permanent aide-de-camp since his departure from England. This he did, the *Whitehall Review* states, as he considered it important that he should be able to command the advice and services of a professional engineer in framing the report which he goes to Melbourne to draw up. Capt. Paton has accompanied Lady Jervois and family to England, and will return to Singapore to rejoin Sir William's Staff on his resuming the governorship.

Grenadier Guards. The 3rd Batn. will proceed at the end of the month to Aldershot for the summer drills.

Coldstream Guards. The 1st Batn. will proceed to Aldershot for the drill season.

Scots Guards. When Lieut.-Col. Grant Gordon retires from the Scots Guards shortly, as it is known to be his intention to do, he is not unlikely, the *Whitehall Review* says, to take command of a metropolitan Volunteer regiment. We may even go farther than this, and announce the probability of Col. Gordon succeeding Lord Elcho as the head of the London Scottish. The distinguished "kilted" corps is to be congratulated upon its prospect of obtaining in Lord Elcho's place one of the smartest and most popular officers of the Brigade of Guards, and one who will throw his whole heart into his work and maintain his regiment in its present high state of efficiency.

6th Regiment. It is rumoured that the 2nd Batn. will move from Dover to Aldershot for the drill season.

9th Regiment. The *Irish Times* gives the following list of officers who accompanied the battalion, viz.:—Major Vibart (in command), Brevet Major Gernon, Capts. Gillespie, Biddulph, Edgar, Vandeleur, Kane, Sunderland, and Ind; Lieuts. Wavell (adjt.), Longfield, Terry, Deverell, Allcard, James, Robertson, and Brewster. Capt. Butler, 1st Batn., who lately surveyed more than 200 miles of the Attrek River, in the costume of a Chinese merchant, has been summoned to Simla to give an account of his adventure. Capt. Stockley has been appointed interpreter to the 2nd Batn. in the absence of a qualified subaltern.

18th Royal Irish. The 2nd Batn. leaves Fermoy next week for the Curragh Camp. After the drill season it will proceed to Kilkenny for the winter.

25th Regiment. The 2nd Batn. is expected to be moved to Aldershot from Shorncliffe for the drill season.

30th Regiment. Qrmr. A. Borland died lately at Chatham. The deceased entered the regiment twenty-three years ago, and obtained his commission June 13, 1874. He served through the Crimean campaign and was wounded. He was in possession of several war medals, besides the Royal Humane Society's medal for saving life.

42nd Highlanders. Capt. Fox vacates his appointment as superintendent of gymnastics at Malta from the 1st inst.

45th Regiment. Lieut. Mason, a probationer, wing officer 3rd Hyderabad Infantry, is about to be admitted to the Bengal S.C., from March 7, 1876.

49th Regiment will be moved from Portsmouth to Aldershot for the drill season.

Royal Marines.

The Admiralty has been pleased to award a medal with an annuity of £10 for long service and good conduct to Mr. Joseph Tucker, late 1st class sergeant-instructor in musketry of the Plymouth Division R.M.L.I., and at present serving as timekeeper in Keyham Dockyard.

The Admiralty has approved of five marksmen (non-commissioned officers, gunners, or privates) from each division of Royal Marines being allowed to compete for the Army and Navy Challenge Cup at Wimbledon on July 17, 18, and 19 next. Competitors to proceed to the camp on July 16.

54th Regiment. Capt. Newbolt has been appointed adjt. of the 40th Lancashire Rifle Volunteers.

60th Rifles. In the absence of a qualified officer, Capt. Forster has been appointed interpreter to the 4th Batn.

64th Regiment is expected to proceed to Colchester when it is moved from Aldershot at the end of July.

68th Light Infantry. The following account of the sad end of Capt. Bolden is copied from the *Delhi Gazette* of April 28:—"Capt. Bolden met with his death at Mandulgurh. It is a village about forty or fifty miles from Shapoora, and about sixty from Neemuch. Shapoora is about forty miles from Nusseerabad, where the head-quarters of the 68th are. It was the middle of the day, on Wednesday, the 18th, that a large male tiger showed himself to the beaters fearlessly. One he seized, indeed, by the shoulder, and he is not expected to live. He was close to another, who, however, being shouted to, bolted out of his way. The hunting party consisted of Capt. Bolden and Mr. Bayers, from Neemuch, and Lieut. Goad, from Nusseerabad. The two former were on elephants after the tiger, Mr. Bayers in a howdah, the other driving his animal seated on a sort of extemporised cloth saddle only. The tiger appears to have displayed great cunning and fearlessness, and, escaping the ball aimed at it, suddenly by a flank manœuvre jumped on Capt. Bolden's elephant from behind. Both elephants rushed away, and very soon Mr. Bayers found himself still in his howdah a couple of miles from the scene. Had Capt. Bolden's elephant been as fearless as himself, the tragic story had ended differently. As it was, when his terror-stricken elephant rushed madly from his assailant, the rider was thrown backward, and must have fallen into the very jaws of the infuriated lord of the forest, who forsook the elephant to execute his will with teeth and claws on his newly-acquired prey. His object seems to have been merely to disable, for, having fearfully lacerated the lower limbs, it is said he galloped after the elephant again. All this was the work of an instant, and ere the terrified on-lookers (of whom Mr. Bayers was not one) could draw their breath, the tiger was out of sight. The wounded man was carried somehow to his tent, too far away, and letters were hurried off to Deolee and to Nusseerabad for help. The Cavalry surgeon from the former station was the first to reach. The news did not reach Nusseerabad till Friday morning, and Dr. Henry Waghorn, himself an eminent shikaree, started off at once on a camel to the obscure spot where the wounded man was lying. He reached there the next day with his apothecary, and amputation of the thigh was performed at once. He sat up with him all night, but with Sunday's dawn it was evident the poor fellow would not see another. His intellect was unclouded, but the shock to his powerful frame, and, possibly, poison from the tiger's teeth or claws were too much. He sent a last greeting to his colonel in reply to a letter that had just come in from Nusseerabad, moved his pain-stricken frame a little as he turned his weary head, and died. His body was sent in by Dr. Waghorn to head-quarters, where it arrived the next day about noon for burial in the graveyard at Nusseerabad, and there it lies under the shade of a tree visited daily by many who knew and valued Capt. Bolden's work. Dr. Waghorn, thoroughly exhausted by his camel journey, without food under a fierce sun, and his devotion to his friend, was not able to return till Wednesday. Another of many instances where members of the medical profession forget themselves in their zeal for the helpless sufferers they are summoned to help." Capt. Crawford has been appointed adjt. of the 2nd Adm. Batn. Durham Rifle Volunteers.

71st Highlanders. Capt. de Lancey, aide-de-camp to Major-Gen. Airey at Malta, has proceeded home on sick leave.

72nd Highlanders. The following items are taken from the regimental magazine:—"Lieut.-Col. Beresford embarked on board H.M.S. Euphrates, on April 11, at Bombay, *en route* to England, on medical certificate. Col. Beresford joined the 72nd Highlanders twenty-four years ago as an ensign, and has served with the colours throughout this entire period. He went out with the regiment to the Crimea, and was present during the siege operations and fall of Sebastopol (Crimean medal with clasp and Turkish medal). He also served with the regiment throughout the operations in Central India, and pursuit of the rebel forces under Tantia Topee and Rao Sahib in 1858-59. As the Royal Warrant now in force limits the command of regiments to five years, we shall not, in all probability, see our gallant colonel again at the head of the regiment, his term expiring in June next. We wish him good-bye, good luck, a pleasant passage to the old country, and speedy employment. The detachment to Ranikhet marched on the morning of the 2nd inst., under command of Capt. Bolton. Strength as follows:—1 captain, 1 subaltern, 1 staff, 6 sergeants, 1 lance sergeant, 5 corporals, 6 lance-corporals, 3 drummers, and 103 privates. A detachment consisting of 4 men, 4 women, and 14 children, having been selected by the medical officer, started on the 10th inst., *en route* to Murree Convalescent Depôt. Major Brownlow, having rejoined on the 11th inst. from leave of absence, assumes command of the regiment. Major Clarke and Capt. Simpson have obtained six months' leave of absence from April 15 to Oct. 15, to visit Cashmere. Pymr. (Major) Cassidy for same period to Dalhousie. Capt. Garnett officiates as paymaster. Major Stockwell, and Lieuts. Hughes-Hallett and Swiney have obtained sixty days privilege leave of absence."

75th Regiment left the Curragh on Monday for Kingstown, and embarked in H.M.S. Assistance for Guernsey, to relieve the 104th.

80th Regiment. Major-Gen. H. C. Smith, lieut.-col. on the Retired Full-Pay List, died at Norfolk-crescent, S.W., on the 29th ult. The deceased served with the regiment in the Sutlej campaign of 1845-46 (medal), throughout the Burmese war of 1852, and was present at the capture of Martaban, operations before Rangoon, April 12, 13, and 14; and capture of the great Dragon Pagoda (with the storming party), and capture of Prome (medal with clasp for Pegu); served in the Indian campaign of 1858-59, and was present with the Camel Corps at the battle of Galowlee and capture of Calpee, and campaign in Oude (medal); served with the left attack during the Bhootan expedition of 1865 (medal with clasp). He entered the Army Oct. 8, 1844; became lieut., Dec. 24, 1845; capt., May 1, 1853; major, Oct. 18, 1859; brevet lieut.-col., Nov. 22, 1870; lieut.-col., Jan. 10, 1872; col., Dec. 11, 1876; and retired upon full pay, with the hon. rank of major-gen., only a few days ago.

84th Regiment, from Preston, is to be removed to Sheffield.

88th Connaught Rangers. Lieut. Lavie is about to retire from the Service by sale of his commission.

89th Princess Victoria's. An entertainment of reading, singing, and music was given in the theatre at Thayetmyo on Easter Monday. The entertainment was under the management of Sub-Lieut. Harman, and was very successful.

98th Regiment. Capt. Haughton has been appointed superintendent of gymnastics at Malta, vice Capt. Fox, 42nd Highlanders. Capt. Sharp has leave from Malta to England to Oct. 3, on private affairs.

102nd Fusiliers. Major Duncan has been granted leave of absence from the 15th inst. to Aug. 15, on relinquishing his appointment as Garrison Instructor at Dublin, on promotion. Referring to this officer's departure, the *Irish Times* says:—"His departure will be much regretted, as he has always discharged his duties with great tact and discretion, the result of which was that his pupils in the garrison classes, as a rule, succeeded at their examinations, and there can be no doubt but that he will carry with him the good wishes for his future welfare of all the young officers who have studied under him, and of all others who have had the pleasure of his acquaintance."

104th Fusiliers. Having been relieved at Guernsey by the 75th, the regiment has embarked in H.M.S. Assistance for Ireland, where it is expected to arrive on Monday.

105th Light Infantry. Major Raikes is retiring. Lieut. Graham has been appointed instr. of musketry, vice Whitehill, promoted.

108th Regiment. Paymr. (Capt.) Mitchell died at Colchester on the 11th ult., aged fifty-five years. He was appointed paymr. Sept. 17, 1863, and became hon. capt., Sept. 17, 1868.

109th Regiment. Capt. Ducat is acting temporarily as garrison quartermaster at Fort William, the present holder of the appointment, Lieut.-Col. Jones, having proceeded on furlough.

Rifle Brigade. Capt. Walpole, 4th Batn., has been assigned local rank as capt. in India from Aug. 14, 1872.

THE AUXILIARY FORCES.

MILITIA.

Royal Bucks. H.R.H. the Field-Marshal Commanding-in-Chief was greatly pleased with the appearance of the men when he inspected them at Aldershot on Saturday last. The regiment, having completed its training, left Aldershot yesterday for High Wycombe, where it will be dismissed to-day.

Royal Cornwall Rangers. The period of training expired on Tuesday. Previous to dismissal the regiment was inspected by Col. H. F. Williams, commanding the 35th Brigade Depôt. During the training the men behaved remarkably well.

2nd Devon assembled for training on Monday at Devonport. The officers present are Col. Stevenson; Lieut.-Cols. Trood and Hayne; Capts. Pitts, Evans, Toms, Howorth, Deane, Mountsteven, De Schmid, Muntz, and Chapman; Lieuts. Scarbrough and Edgar; Sub-Lieuts. Stevens, La Terriere, Keate, and the Hon. W. Y. Buller; Surg.-Major Whipple, and Capt. and Adjt. Letts. The regiment marched to Egg Buckland Fort in the afternoon, after a preliminary inspection at Mutley. The officers, as well as men, are under canvas, the fort only being used for officers' mess purposes.

Essex Rifles, 700 strong, underwent inspection at Colchester on Friday last by Col. Chapman, C.B., commanding the Brigade Depôt at Warley. The officers on parade were Col. Whitehead; Majors Savill and Meadows; Capts. Disney (hon. major), Walker, Swinhoe, Brace, Savill, Holroyd, and Sampson; Lieuts. Romer, Parr, and Lysons; Sub-Lieuts. Lyons, Caddell, Chandos-Pole, Masterman, Mulville, and Knowles; Capt. Barry (adjt.), Surg.-Major Waylen, and Surg. Baker. Col. Chapman told them they were a very excellent regiment indeed, and had improved in physique since last year. Everything had been done in a most steady, efficient, and soldierlike manner, and they would be a splendid regiment if required for active service. The officers gave a ball during the training, the arrangements being carried out by Capts. Disney, Holroyd, Barry, and Surg.-Major Waylen.

West Essex, under Col. Brise, M.P., was officially inspected on the 23rd ult., at Chelmsford, by Col. Chapman, commanding the 44th Sub-District, who spoke in the highest possible terms of its appearance. In the evening the officers gave a ball at the Shire Hall, which was numerously attended.

2nd Royal Lancashire. The regiment was inspected by Col. Robertson, commanding the 13th and 14th Sub-Districts, at Liverpool, last week. The total strength is 1,490, and there were on the field, exclusive of the Staff, 23 sergts., 42 corpls., and 841 privates. The officers were Col. Blundell; Lieut.-Col. Garraway; Major Bolton; Capts. Sir T. Hesketh, Bart., Harington, Gardner, Woodward, Priestley, Blundell, Leeming, Leeson, and Parkinson; Lieuts. Blundell, and Moore; Sub-Lieuts. R. de Trafford, G. de Trafford, Sweetman-Powell, Segrave, Molyneux-Seel; Capt. and Adjt. Dixon, Capt. Batten, acting adjt. of the 2nd Batn.; Capt. Herbert, paymr. and qrmr.; and Drs. Manifold and Cavanagh. Major Bancroft was prevented by illness from being present. Col. Robertson, addressing Col. Blundell and the officers, said it would be a very agreeable duty to him to make a most favourable report as to the efficiency of the regiment. He considered the manner in which the movements had been performed was most creditable, especially when he was aware of the very short time they had had for drill, for he was informed that only fifteen days' drill in the field had been available. They could not, however, have done better if their whole time could have been used. A rumour as to the intended removal of the regiment to Warrington appears to be regarded with some disfavour, it being thought that the muster in that part of the county would not be so strong as it has been in Liverpool.

Royal London was the best shooting Militia regiment in 1875-76, with a figure of 44·16, and the permanent Staff sergeants the best shooting Staff of the whole of the Militia regiments in 1876. Colr.-Sergt. Morgan was the best shot of the whole of the Militia Permanent Staff, and C Company the best shooting company of the whole of the Militia regiments, with an average in the first period of 49·74.

Royal Pembroke Artillery. This excellent regiment was inspected last week, at Haverfordwest, by Col. Davis, V.C., commanding Auxiliary Artillery Western District, and was found in admirable order. Col. Owen, Major Graham, and Capt. Summers put the men through several battalion movements, and Lieut. Thomas was examined in company drill. At the conclusion of the inspection Col. Davis addressed the regiment, and awarded high praise to officers and men for the steadiness and efficiency with which the movements had been carried out. The officers present were:—Col. Owen; Hon. Lieut.-Col. Willan; Major Graham; Hon. Major Cooper; Capts. B. Summers and W. T. Summers; Lieut. Thomas; Sub-Lieuts. Macdonald, Lloyd, and Thomas; Capt. Lewes, R.A., adjt.; and Surg.-Major Brown, the total of all ranks being 330. Lieut. Rind and Sub-Lieut. Levett were on leave. The regiment was dismissed on Saturday. Some rustic sports took place at Portfield on Whit-Monday. Major Graham, Major Cooper, and Lieut. Lloyd acted as stewards.

1st Warwick. The annual inspection was made by Col. Wilby, commanding the 28th Brigade District, at Warwick, on Tuesday and Wednesday week. There were on parade 4 field officers, 7 capts., 10 subalterns, 3 Staff officers, 39 sergts., 36 corpls., 10 drummers, 654 rank and file. The officers were Lieut.-Col. Grimston (in command); Hon. Lieut.-Cols. Sawyer and Vaughton; Major Roberts; Capts. Marsland, Pennington, Macaulay, Savage, Wyndham, Fortescue, and Searle (South Gloucestershire Militia); Lieut. Boultbee; Sub-Lieuts. Dawes, Pym, Wheler, Strachan, Fryer, Nicol, Dolben, Harrison, and Molyneux; Capt. and Adjt. Blois; Surg.-Major Goodchild, and Qrmr. Bannister. Col. Wilby said he had been exceedingly well satisfied with everything he had seen. The arms and accoutrements were in good order, and he was greatly pleased to see how steady the men were under arms. Their conduct during the training, he was glad to learn, had been good, and he should have much pleasure in making a favourable report of the state of the regiment. He might add that he had noticed a decided improvement upon last year's inspection, and he hoped that that improvement would be maintained.

Highland Borderers. The annual dinner was held at the Freemasons' Tavern on Thursday. Present:—Col. Findlay; Lieut.-Cols. Craigie-Halkett and Campbell; Major Edgeworth Horrocks; Capts. Sir J. Maitland and Hon. C. Erskine; and Lieuts. Montgomery, Buchanan, Crossman, Lyons, and Orr-Ewing.

Londonderry, assembled for training at Londonderry, consists of 2 field officers, 6 capts., 6 subalterns, the adjt., assist.-surg., and 417 non-commissioned officers and men.

The following regiments assembled on Monday last for training, viz.:—2nd Devon, at Plymouth; Royal South Lincoln, at Grantham; 5th Royal Middlesex, at Uxbridge; 2nd Somerset, at Bath; 1st Batn. 1st Stafford, at Lichfield; 2nd Royal Surrey, at Guildford; Worcester, at Worcester; Edinburgh Artillery, at Edinburgh; 1st Royal Lanark, at Lanark; Carlow, at Carlow; Leitrim, at Carrick-on-Suir; Londonderry, at Londonderry; and Waterford Artillery, at Waterford.

The following regiments assemble on Monday next, viz.:—1st Devon, at Exeter; 2nd Royal Middlesex, at Barnet; 4th Royal Middlesex, at Hounslow; 1st Somerset, at Taunton; 2nd Tower Hamlets, at Victoria Park-square; 3rd West York, at Doncaster; Royal Aberdeen, at Aberdeen; Edinburgh, at Dalkeith; Haddington Artillery, at Dunbar; Cavan, at Cavan; Clare, at Ennis; Donegal, at Lifford; Royal North Down, at Newtownards; Royal South Down, at Downpatrick; Kilkenny, at Kilkenny; Royal Limerick, at Limerick; North Mayo, at Ballina; Sligo, at Sligo; Mid-Ulster Artillery, at Dungannon; and Wexford, at Wexford.

The following regiments, having completed their training, will be dismissed to-day, viz.:—Royal Anglesey Engineers, at Beaumaris; Royal Bucks, at High Wycombe (from Aldershot); Cambridge, at Ely; Royal Cornwall Rangers, at Bodmin; Devon Artillery, at Fort Tregantle; Dorset, at Dorchester; Isle of Wight Artillery, at Carisbrooke Castle; Hertford, at Hertford; 7th Royal Lancashire, at Bury; Leicester, at Leicester; Royal North Lincoln, at Lincoln; Royal Monmouth Engineers, at Monmouth; Oxford, at Oxford; Yorkshire Artillery, at Scarborough; Royal South Wales Borderers, at Brecon; 2nd West York, at York; 5th West York, at Knaresborough; 6th West York, at Halifax.

YEOMANRY.

East Kent Mounted Rifles. The inspection was made at Dover on Monday by Col. Tower, C.B., commanding the Cavalry Depôt. During the week the regiment displayed great aptitude in outpost duty. A ball, at which the leading families of the county were present, was also given, and passed off with *éclat*.

VOLUNTEERS.

2nd Adm. Batn. Durham Rifles. Capt. Crawford, 68th Regt., has been appointed to the adjutancy.

40th Royal Lancashire. Capt. Newbolt, 54th Regt., succeeds Capt. Woodward, 2nd Queen's, as adjt.

2nd Surrey Rifles. The adjutancy is vacant, Capt. O'Callaghan having accepted pension.

THE INDIAN ARMY.

5th Bengal Cavalry. Major R. B. Graham has been granted leave from India for eighteen months on private affairs, and has arrived in England.

17th Bengal Cavalry. Capt. E. G. Newnham has arrived home from India on furlough.

4th Bengal N.I. Col. H. C. Anderson has arrived home on furlough. Lieut. B. Smith, wing officer, has been appointed adjt., vice Douglas, vacated on expiration of his tenure of appointment; and Lieut. C. H. Des Vœux, wing officer, qrmr., vice Eliot, also vacated on expiration of his tenure of appointment.

5th Bengal N.I. Surg.-Major R. H. Perkins, in medical charge, officiating in medical charge 16th N.I., is to be a depty. surg.-gen. in India, with temporary rank, vice Depty. Surg.-Gen. A. Christison, M.D., proceeding on furlough to Europe.

6th Bengal N.I. Col. W. Q. Pogson has arrived home from India on furlough.

22nd Bengal N.I. Lieut. A. Q. Gordon has qualified for promotion, and his name will shortly appear in the *Gazette*.

31st Bengal N.I. Col. E. G. Langmore has been granted a three months' extension of leave from India.

41st Bengal N.I. Lieut.-Col. C. C. Ekins, Staff Corps, has been appointed second in command and wing commander, vice Ryan, retired.

4th Sikh Infantry. Lieut. C. Dempster has applied for leave to England.

1st Madras Light Cavalry. Capt. A. V. Chick, squadron subaltern, has applied for leave to Australia.

9th Madras N.I. Lieut. A. M. E. H. Welch has applied for leave to Australia.

1st Bombay N.I. Col. W. Walker, commandant, retires from April 27. The *Times of India* says:—"Col. Williams, second in command, should not be allowed to leave the Army without a word in recognition of the many services he has rendered to his corps. The 1st Grenadiers are ever foremost in all those matters which show more than anything that the interior economy of a corps is in a thoroughly healthy condition. In the annual Soldiers' Industrial Exhibition, held at Poona, this regiment generally carries off the palm, while its schools, both for boys and girls, have always received the warm commendation of Major Jacob. And all this very largely owing to the unwearied efforts of Col. Williams, a man devoted to his regiment, beloved by all ranks in it, and not to be easily replaced. It is worth while mentioning that he was one of those officers, of whom not many remain in this Presidency, who was in 1848-49 with the Bombay Army column in the Punjab, where he was present at the siege of Mooltan, and received the medal.'

4th Bombay N.I. Capt. S. Carter, adjt., has applied for leave to England on medical certificate.

15th Bombay N.I. Lieut.-Col. R. Johnstone has arrived home from India on leave.

19th Bombay N.I. Col. W. Creagh is about to leave England for India to resume duty.

20th Bombay N.I. Of the seven officers whose names appeared in the Government gazette as retiring on April 1, under the commutation scheme, the most noticeable, says the *Times of India*, is Col. Rice, second in command 20th N.I., who carries with him the regrets of an unusually large number of friends. Every one in the Service knows Col. Rice, the mighty slayer of tigers, the indefatigable sportsman, the good shot, the jovial companion. He is a good specimen of that class of Indian officer now growing rarer and rarer—a man of action, emphatically devoted to the chase, and never so happy as when actively employing those physical energies with which he is so largely endowed.

REGIMENTAL DINNERS.

The officers of the following regiments have eaten their annual dinner in great happiness and harmony:—

The 3rd Dragoon Guards dined at the Freemasons' Tavern on Monday. Present:—Gen. Robertson, C.B., Sir G. H. Græme, Cols. Sayer, C.B., and Tower, C.B., Lieut.-Col. According to the Vienna correspondent of the *Times*, "the official programme of the journey of the Czar has been settled. He will leave Tsarkoe Selo to-day. He is to be accompanied by the Heir-Apparent, the Grand Duke Serge, the Chancellor, Prince Gortchakoff; Adjt.-Gen. Count Alderberg; the Minister of War Gen. Milutin; the Secretaries of State, Von Hamburger and Baron Jomini; the German Military *Attaché*, Gen. Werder; and the Austrian Military *Attaché*, Baron Bochtolsheim. The Austrian Army is already represented at the Russian head-quarters by Lieut.-Col. Lohneysen and Major Pollon, whose special mission is to follow the Army and report on the operations; while the military representative, Baron Bechtolsheim, like the German Military *Attaché*, will attend the person of the Czar. The Grand Duke Vladimir, who also forms part of the Imperial suite, has already left for the Army."

THE QUEEN'S BIRTHDAY HONOURS.

WAR OFFICE, PALL MALL, June 2, 1877.

The Queen has been graciously pleased to approve of the following promotions in the Army:—

Lieutenant-Colonel Nevinson Willoughby de Courcy, Royal Marines.
Inspector-General of Hospitals and Fleets William Thomas Domville, M.D.
Deputy Commissary-General Arthur William Downes.

INDIA OFFICE, June 2, 1877.

The Queen has been graciously pleased, on the occasion of the celebration of her Majesty's birthday, to nominate and appoint Field-Marshal his Royal Highness George William Frederick Charles, Duke of Cambridge, K.G., G.C.B., K.P., G.C.M.G., to be an Extra Knight Grand Commander of the Most Exalted Order of the Star of India, and to make the following appointments to the Second and Third Classes of the said Most Exalted Order:—

To be Knights Commanders:—

Joseph Dalton Hooker, Esq., M.D., C.B., Director of the Royal Botanical Gardens at Kew.
Thomas Lawrence Seccombe, Esq., C.B., Financial Secretary to the Secretary of State for India in Council.

To be Companions:—

Colonel George Cliffe Hatch, Bengal Staff Corps, Judge Advocate-General, Bengal Army.
Lieutenant-Colonel William George Davies, Bengal Staff Corps, Commissioner, Delhi.

THE ORDER OF ST. MICHAEL AND ST. GEORGE.

(From a Supplement to the *London Gazette.*)

Colonial Office, Downing-street, May 30.

The Queen, having taken into her Royal consideration the statutes of the most distinguished Order of St. Michael and St. George, bearing date the 4th day of December, 1868, and the 3rd day of April, 1869, and, in consequence of the growth and advancement of her Colonial Empire, being desirous of making such alterations in the said statutes as will enable her Majesty to admit certain persons as honorary and extra members of this said most distinguished order, and also to increase the numbers of the members of the several classes thereof, and to provide for the appointment of such officers of the said most distinguished order as were formerly appointed under statutes no longer in force—has been graciously pleased, in pursuance and in exercise of the power vested in her as Sovereign and Chief of the said most distinguished order, to repeal the aforesaid statutes.

And her Majesty has been graciously pleased by statutes, bearing date the 30th day of May, 1877, to ordain, amongst other things, therein set forth, that the said order shall henceforth, as heretofore, be styled and designated in all acts, proceedings, and pleadings as "The Most Distinguished Order of St. Michael and St. George." And that it shall as heretofore consist of the Sovereign, a Grand Master, and three several classes of members, namely:—Knights Grand Cross, Knights Commanders, and Companions.

And to ordain that the first class, or Knights Grand Cross, shall not exceed thirty-five in number, in addition to such extra and honorary members as her Majesty, her heirs, and successors shall from time to time appoint; and that the second class, or Knights Commanders, shall not exceed 120 in number; and that the third class, or Companions, shall not exceed 200 in number. It being competent to her Majesty, her heirs, and successors to appoint any Princes of the blood Royal, being descendants of his late Majesty King George the First, as Extra Knights Grand Cross; and such members of the Royal family as have already been appointed Knights Grand Cross shall be considered, and are declared to be Extra Knights Grand Cross of the said most distinguished order.

And to ordain that the honorary members of the said most distinguished order shall consist of foreign princes and persons upon whom her Majesty has conferred, or her Majesty, her heirs, and successors may think fit to confer, the honour of being admitted into the said most distinguished order; and every such honorary member shall be additional and not included within the numbers of ordinary members prescribed for the several classes.

And to ordain that the persons to be admitted as ordinary members of the said most distinguished order shall be such subjects of her Majesty, whether natural born or naturalised in the United Kingdom of Great Britain and Ireland, or in any of her Majesty's colonies or dependencies as may have held or shall hereafter hold high and confidential offices, or may have rendered or shall hereafter render extraordinary and important services to her Majesty as Sovereign of the United Kingdom of Great Britain and Ireland, within or in any relation to any of her Majesty's colonial possessions, or who may become eminently distinguished therein by their talents, merits, virtues, loyalty, or services, or who now are or hereafter may be appointed officers of the said most distinguished order.

Her Majesty has also been pleased to ordain that the following officers shall, as formerly, be appointed to the said most distinguished order—namely, a Prelate, a Chancellor, a Secretary, a King of Arms, a Registrar, and Officers of Arms attendant upon the order.

The Queen, in order to mark the high sense and esteem to which her Majesty holds the said order, and to give an additional proof of her affectionate regard for Field-Marshal his Royal Highness Albert Edward Prince of Wales, K.G., has been pleased to nominate and appoint his Royal Highness to be an extra member of the first class, or Knights Grand Cross of the said most distinguished order.

The Queen has been graciously pleased to reappoint Field-Marshal his Royal Highness George William Frederick Charles, Duke of Cambridge, K.G., G.C.M.G., Commanding-in-Chief of the Forces, to be grand master and first or principal Knight Grand Cross of the said most distinguished order.

Her Majesty has further been pleased to appoint the following officers to the said most distinguished order:—

The Right Rev. Father in God George Augustus, Doctor of Divinity, Bishop of Lichfield, and formerly Bishop Metropolitan of the Colony of New Zealand, to be the Prelate of the said Order.
Charles Cox, Esq., chief clerk in the Colonial Department, and up to the present time Secretary and Registrar of the said order, to be the Chancellor of the said Order.
Robert George Wyndham Herbert, Esq., Permanent Under Secretary of State for the Colonies, to be the Secretary of the said Order.
The Hon. Robert Henry Meade, Assistant Under Secretary of State for the Colonies, to be the Registrar of the said Order.

Her Majesty has also been graciously pleased to make the following appointments to the said most distinguished order:—

To be an ordinary member of the first class, or Knights Grand Cross of the said most distinguished order:

The Most Hon. the Marquis of Normanby, K.C.M.G., Governor of the Colony of New Zealand.

To be ordinary members of the second class, or Knights Commanders of the said most distinguished order:—

Major-Gen. Sir Harry Saint George Ord, R.E., Knt., C.B., lately Governor of the Straits Settlements.
Major Robert Miller Mundy, C.M.G., lately Lieut.-Governor of the Colony of British Honduras.
Major-Gen. Patrick Leonard M'Dougall, depty.-quarter-master-gen., formerly adjt.-gen. of the Militia of the Dominion of Canada.
Major-Gen. John Henry Lefroy, R.A., C.B., lately Governor of the Bermuda Islands.
Major-Gen. Edward Selby Smyth, commanding the Militia of the Dominion of Canada.
Brig.-Gen. Robert Michael Laffan, R.E., Governor of the Bermuda Islands.

To be ordinary members of the third class, or Companions of the said most distinguished order:—

Major Donald R. Cameron, R.A., lately chief officer of the British Boundary Commission, Canada.
Capt. Samuel Anderson, R.E., lately chief astronomer of the British Boundary Commission, Canada.
Capt. George Arthur French, R.A., formerly Commissioner of the North-West Police, Canada.
Capt. Louis Frederick Knollys, late of her Majesty's 32nd Regt. of Foot, lately commanding armed constabulary in the colony of Fiji.

The Queen has appointed George William, Earl of Coventry, to be a Capt. in her Majesty's Honourable Corps of Gentlemen-at-Arms, in the room of Charles John, Earl of Shrewsbury, deceased. His lordship has never been in the Army.

A concert was held last Saturday at the Albert Hall on behalf of the Royal Cambridge Asylum for Soldiers' Widows. H.R.H. the Prince of Wales honoured the concert with his presence, accompanied by his sons. Mdlle. Titiens was, through indisposition, unable to appear. The arrangements, which were in every way successful, were carried out by Col. the Hon. Percy Fielding, assisted by Col. Ainslie Stewart, the Secretary to the Asylum. The proposition made at the annual meeting of subscribers to the Asylum to increase the salary of Col. Ainslie Stewart, the Secretary, is, we hear, to be laid before the general committee, who will doubtless carry the proposition into effect.

Whenever a man confined in a military provost prison is ordered to be discharged from the Service, at the expiration of his imprisonment, as an incorrigible character, a non-commissioned officer is to be sent to the prison to receive him and conduct him to his corps, by whom the necessary plain clothes, railway warrants, and allowances to which he is entitled will be furnished, the parchment certificate being handed to the man by the non-commissioned officer when seen off at the railway station.

The following district order has been published in Ireland:—"Adjutant-General's Office, Dublin, May 26, 1877. The reconnaissance and sketches of the undermentioned officers and non-commissioned officers having been submitted to the Field-Marshal Commanding-in-Chief, his Royal Highness, having examined them, considers they reflect much credit on the officers and non-commissioned officers who made them, namely, Lieuts. D. Matheson and E. Pennefather, Troop Sergt.-Majors Tye and M'Kee, 6th Inniskilling Dragoons; Lieuts. R. B. Mainwaring, Edward Clough Taylor, and C. G. A. Mahew, 1st Batn. 23rd Royal Welsh Fusiliers. —By order, G. S. Young, A.A.G."

H.R.H. the Field-Marshal Commanding-in-Chief visited Aldershot on Saturday last and inspected the troops in the garrison. His Royal Highness was met at the Farnborough Station by Lieut.-Gen. Sir Thomas Steele, K.C.B., commanding the division and the head-quarter Staff. The Duke was accompanied by Lieut.-Gen. Sir C. Ellice, K.C.B., Major-Gen. Lysons, C.B., Col. Radcliffe, R.A., Col. T. D. Baker, C.B., and Col. M'Donald. Major-Gen. Sir Thomas M'Mahon, Bart., C.B., Col. Sir Henry Havelock, Bart., V.C., C.B., and Surg.-Gen. Munro, M.D., C.B., were also present. The troops having marched past by brigades, returned to quarters, while his Royal Highness inspected the recruits of the Infantry brigades. The Royal Engineer troops and companies also next underwent a brief inspection, after which his Royal Highness proceeded to inspect Capt. Shaw's models for Infantry tactics. The next and last visit was to the Cavalry Barracks, in front of which the 1st Dragoons, 8th Hussars, and 17th Lancers were drawn up under Major-Gen. Wardlaw, C.B., and facing them, on the other side of the Avenue-road, in front of the Infantry Permanent Barracks, were three batteries of Royal Horse and five batteries of Field Artillery, under Major-Gen. Turner, C.B. His Royal Highness spent some time with these branches of the Service, and, having completed the inspection, the proceedings terminated. The Duke was understood to have expressed himself highly pleased with the appearance of the recruits of the different corps and regiments, all of whom underwent a close and minute inspection. The total on parade was 13,650 men, 2,020 horses, and 46 guns. His Royal Highness and Staff left Aldershot for Waterloo by the 1.40 p.m. ordinary train.

Col. A. C. M'Master, Madras S.C., having completed his five years' tenure of the post of assist. adjt.-gen. at Secunderabad, has vacated the same, and been succeeded by Capt. Hammick, 43rd Foot. The general issued the following complimentary order on Col. M'Master's deposition of office:—"Major-Gen. Macintire, C.B., cannot allow Col. M'Master to relinquish the appointment he has so efficiently filled for the last five years without placing on record the high opinion of him as a Staff officer, and of his knowledge of the important duties of his office. From his courteous and kind manner Col. M'Master has won the esteem of all ranks. As the several general officers who have commanded this force during Col. M'Master's tenure of office have recorded their high opinion of him as a Staff officer, Major-Gen. Macintire can only say that he fully endorses the high opinion they have all expressed, and trusts that Col. M'Master's future career will be prosperous. In vacating the appointment of assist. adjt.-gen. of this force the major-general is certain that Col. M'Master takes with him the good wishes of all." Col. M'Master is to receive command of the 1st N.I., when Col. Lawder retires.

Mr. Rowe, of Brompton-road, is noted for his oroide gold jewellery, and has added to the attractions of his establishment a novel watch chain, which he designates "The Derby" pattern. It is very neat, and cannot be told from the real metal. It is also exceptionally strong, and made to resist wear and tear, so that it is eminently useful. The oroide gold jewellery will retain its colour in any atmosphere, and will not yield to wear. It evidently has much to recommend it.

At the manufactory of Messrs. Elkington and Co. several hundred hands are constantly employed designing, manufacturing, and turning out endless quantities and varieties of spoons and forks. To give an idea of the enormous growth in the manufacture of these articles, it may be mentioned that the quantity distributed over the surface of the globe by Messrs. Elkington alone, during the last forty years, could be counted by many millions, while the weight of solid silver employed to coat them during that period may be estimated by tons, and would make a girdle of sufficient length to go several times round the earth, and would represent an equivalent to the whole coinage of more than one European State.

OUTFITS FOR INDIA AND THE COLONIES.

DETAILED LISTS of the necessary Outfit, with prices, &c., for every Climate and Appointment will be forwarded on application to

THRESHER AND GLENNY,

COLT'S NEW GOVERNMENT ARMY REVOLVER,

After a severe competitive trial by the U. S. Ordnance Department in 1873 and 1876, has been exclusively adopted by the United States Government, and the whole of the United States Cavalry is now armed with them. It is made to take the 45-cal. regulation Service cartridge, and AMMUNITION FOR THEM MAY BE OBTAINED FROM THE STORES OF AN ARMY IN THE FIELD.—See General Orders, May, 1877.

Length of barrel 5½ inches and 7½ inches.

In the competitive trial at the Royal Arsenal, Woolwich, in 1869, advertised by another maker, the Colt's pistol used was a muzzle-loader adapted to the use of metallic cartridges, which pistol has not been made or sold after that year.

ROYAL CAMBRIDGE ASYLUM FOR SOLDIERS' WIDOWS, KINGSTON, SURREY.
OFFICE: 40, Charing Cross, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army.

There are 57 widows in the Asylum.

Each widow has a furnished room, and receives six shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The funded income of the charity yields only £556, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £2,100 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

A regiment can purchase a vote in perpetuity by paying five guineas. J. A. STEWART, Colonel, Secretary.

Office, 40, Charing Cross, S.W.

BUTLER'S MILITARY BAND INSTRUMENTS are all guaranteed first-class, both as to Tone and Workmanship, at prices much under those usually charged.
Manufactory—29, HAYMARKET, LONDON,
And at ELLIS'S QUAY, DUBLIN.

LONDON, SATURDAY, JUNE 2, 1877.

The "localization of the war"! Yes, of course the war can be and will be localized. It will not spread to South America, or to Australia, or Southern Africa—at least, just now; but surely it will rage over Eastern Europe and Western Asia, and how far and how deep none can foretell. Our "Fools' Paradise" is likely to be rudely invaded if the news published in the fifth edition of a small evening paper last night be true. If the Shah of Persia has concluded a military convention with Russia, and has placed his troops at the disposal of the Czar—if a Russian General has been invested with the command of Persian troops, and if Gereral Frankini, or any other Russian General, has set out with thirty-seven Russian officers to direct their operations, there can be but one course open to us. We must at once notify it to the Shah of Persia that he will incur the certain consequences of an occupation of his ports and capital by British troops if he does not immediately desist, and we must get ready to carry out that threat most thoroughly should he be so ill-advised as to persist in a course which will involve him in a war in which he has no right to expect consideration. It is difficult to believe that the Shah can be so ill-advised; but, if he really has been lured to his ruin, let it be complete. The most effectual check to Russia in Asia that can be devised would be the annexation of Persia by Great Britain. We have not desired it. We have not in any way sought to injure Persia. When she lay at our feet we were magnanimous and merciful, but if she has deliberately kindled this flame of war in Asia Minor, we must "localize it" at once. The Indian Empire is the be-all and end-all of our thoughts and policy in the Eastern Question. In those two words are centred all the British interests we possess in the Eastern world and in the seas and lands which lie between it and us. For what does the Shah make war against Turkey? The barbarous savage and brutal man whom, to our shame, we *fêted* and ran after here—he, at least, can not pretend that he is indignant at Bulgarian atrocities, or that he draws his sword for the relief of oppressed nationalities and for the redress of Christian grievances. But he has surely been delivered into our hands, and, if our statesmen have the courage and foresight to seize it, he has placed within our reach the key of the Eastern Question, with which we can close the door on India far more securely than if we held Egypt in our hands to-morrow. There is no limit to be placed to the gravity of that news, and, if it be verified, we may very soon hear of further complications from Affghanistan which will illustrate in a remarkable manner the wisdom of those who really thought that a light could be set to the first of a series of charged mines all in communication, and that by using the word "localize" we could then stop the explosion at any point we pleased. Everywhere the flames are bursting out. Greece has, we learn, resolved upon war—in other words, "the Grand Idea" people have prevailed, and we shall see in time to come how they make it work with "the Slavonic idea" of their Russian allies. Servia is just barely kept in order by judicious counsels from St. Petersburg and by the fear of an Austrian occupation, but at the first opportunity she is certain to break loose and join in the fray. The timid spirit of Kaiser Wilhelm has been so alarmed at the defenceless condition of the frontier of Alsace-Lorraine, in case those terrible French should make a sudden dash at his newly-acquired dominions, that he has ordered an extra force—some 9,000 men only—to be marched to the front to make all secure. And all this time the leaders of the people here are playing with fire—nay, more, pouring petroleum on the flames. "Perish the British Empire! Long live Bulgaria! Hurrah for foreign war, and success to the Birmingham arms trade!" Did Mr. Gladstone say a word to the pacific people who live by making cannon, muskets, bayonets, swords, and ammunition for other people to die by about the wickedness of their business? Not he. But he told them a great deal about the badness of the Turks and of the Queen's Government, which must be a comfort to us in our time of trouble. There is a good deal of talking about "Heaven" and "the will of God" in reference to the Turk; but, if we are to judge of Divine tendencies by overt acts, we should should say that Heaven and the Almighty are on the side of the Mahometan, and not on the side of the Orthodox followers of the Eastern Church. The Danube swells abnormally, rain descends in torrents, the roads are ruined, bridges give way in Europe—and in Asia the snow and the torrents impede the march of the Muscovite ministers of Divine vengeance. In the field, again, "le bon Dieu" is *not*, so far, on the side of the great battalions; and, with the exception of the capture of Bayazid and Ardahan, there are no successes to be scored as yet to the Christian Crusaders. All this is very strange, and it shows—not to write it irreverently—that the decided convictions which are expressed here below respecting the unfitness for the Turk to live in the world have not yet extended the sphere of their operations to the heights.

The retirement scheme, which it was announced in Parliament was to be published before the Whitsun recess, is, we are happy to learn, in a forward state, and will be out very shortly--that is to say, of course, if all goes smoothly. Unfortunately, there are unforeseen circumstances which are beyond even the control of the War Office, and it is only right that allowances should be made for these. The anxiety of the Army is reasonable enough, but the head of the Horse Guards and the head of the War Office are likewise anxious—anxious that the scheme upon which so much depends shall not prove a failure, as it would be likely to do were the time spent in the final consideration of it too much limited. We fear we must prepare Captains for compulsory retirement, though it will be found, we believe, that the limit of service has been slightly extended, and made twenty-two years instead of twenty, as at first suggested.

Mr. Jones Barker, who devotes his brush to the illustration of great military episodes in the recent history of the British Army, is now exhibiting a picture which he calls "Taking the Russian guns at Balaclava—Lord Cardigan leading the Light Brigade." That is a misnomer, for the guns were not "taken"—*i.e.*, they were not captured from the enemy, although they were for the moment in the possession of our troopers; but that is a matter of small consequence, and the general merits of the picture should attract visitors who are interested in such subjects. It is at least as like what happened as Miss Thompson's picture entitled "Balaclava."

At a recent meeting of the Committee formed for the purpose of promoting a memorial to the late Captain Clayton, 9th Lancers, it was resolved that, in compliance with the wishes of the great majority of subscribers to the fund, the memorial should in some way be associated with Harrow School, at which Captain Clayton was educated. It was further decided that the memorial should take the form of a scholarship, to be called the "Clayton Scholarship," and to be founded with the object of encouraging modern studies, such as those which are principally adapted to prepare candidates for the examinations for admission to the Army. It is thus hoped to perpetuate the name of the deceased officer in connection both with the school to which he was strongly attached and with the profession of which he was so bright an ornament. Those who may wish to contribute to the memorial are requested to communicate at an early date with the Honorary Secretary, Captain R. Barton, Coldstream Guards, 4, Cleveland-square, S.W., as the Committee are anxious to be able to ascertain as soon as possible the amount of the funds which will be at their disposal.

The officers of the late Military Train will be pleased to learn that the Committee now sitting at the War Office has decided to examine them as to their views on the important question it has been assembled to consider, and that representatives of their body have already received orders to present themselves before the Committee.

Sir Henry Havelock has given notice that he will on Monday, the 4th of June, ask the Secretary of State for War whether it is the case that trained soldiers, in considerable numbers, are being taken from the Infantry and Cavalry, including regiments upon a low establishment, for transport and hospital purposes—that is, to be instructed as drivers and sick-bearers; and, whether he will consider the advisability of directing the Committee of General Officers on Commissariat Organization, now sitting, to consider and report upon a normal establishment of transport and sick carriage in proportion to the requirements and numbers of all arms; and on the best mode of expanding that nucleus on emergency by volunteering from the Militia or other sources, arranged beforehand, without further depleting the already weak numbers of the Line.

We believe that the patterns of the new helmets were submitted to H.R.H. the Duke of Cambridge this week, and that they were finally sanctioned by the Field-Marshal Commanding-in-Chief. The material is of felt, with a brass spike on the top, and a brass *plaque* in front, consisting of a star surmounted by a crown, with the Royal motto surrounding the regimental number. There is a brass scale chin-strap, and a small brass scale chain above the peak, which gives the helmet a light and handsome appearance. There is a neck-piece behind, and the peak is of the Prussian shape. We do not know whether it is proposed to give the non-combatants brass knobs instead of spikes, as in India. The only objection we can see to the new head-dress is that it will be very conspicuous, especially of a sunny day; but it will be an immense improvement on the shako, and add much to the effective appearance of troops on parade. There is also a new forage cap for the Cavalry, each class—Dragoons, Hussars, and Lancers—having a distinctive badge, which has been approved of after trial. The Cavalry will be armed with revolvers. We are glad to learn that the supply of Service ammunition in the field and in action has been fully considered, and that the important questions connected with that vital matter have been settled.

The following distribution of the Turkish Army along the Danube and in Bulgaria represents their position and force about a fortnight ago:—Widdin, 73 battalions, 52,000 Infantry, 2,000 Cavalry, 100 guns; Rasova, 100 Infantry; Nicopoli, 8 battalions, 4,500 Infantry, 170 Cavalry, 18 guns; Sistova, 8 battalions, 6,000 men, 170 Cavalry, 18 guns; Rustchuk, 40 battalions, 33,000 men, 1,500 Cavalry, 70 guns; Tinlaskin, 2,000 men; Silistria, 24 battalions, 17,800 Infantry, 170 Cavalry, 6 guns; Matchin, 2 battalions, 1,350 Infantry, 150 Cavalry, 2 guns; Varna, 18 battalions, 13,600 Infantry, 400 Cavalry, 30 guns; Pravady, 2 battalions, 1,400 Infantry; Schumla, 36 battalions, 24,180 Infantry, 2,400 Cavalry, 70 guns; Razgrad, 4 battalions, 3,140 Infantry; Ternova, 3 battalions, 2,300 Infantry; Pleuna, 2 battalions, 1,600 Infantry.

The examination of the first candidates for admission to the Foundation of the Kelly College, Tavistock (so called from the Founder, the late Admiral Benedictus Marwood Kelly) will be held on the 7th August, and the conditions of admission may be learned on application to the Head Master, R. W. Taylor, M.A. (formerly Fellow of St. John's, Cambridge), who will supply the forms necessary, or to Dr. Kelly, Taunton. The payment for each boy is £3 10s. a-quarter, and the College will be opened next September. The trustees, besides members of the descendants of the family of the Founder, are the Earl of Devon, the Bishop of Exeter, Sir D. Acland, Bart., Sir J. Duckworth, Bart., Admiral Foley, Sir Massey Lopes, Bart., &c.

The "Armee-Steeplechase" at the Austrian Derby of the Vienna May meetings was witnessed by the Emperor and a great assemblage, and was "nicht ohne mehrfache Umfälle," of which the severest was sustained by Count Wurmbrand, who was thrown, and lay as dead. The Emperor and the Crown Prince at once drove off in Mr. Cavaliero's carriage to the scene of the disaster, and evinced the liveliest solicitude about the gallant officer, but we are glad to hear that he is expected to get all right.

The Navy.

GAZETTE.

ADMIRALTY, May 26, 1877.

In accordance with the provisions of H.M.'s Order in Council of April 30, 1877, Engineer Christopher Lund has been placed on the Retired List from this date.

APPOINTMENTS.

Commander—F. J. J. Eliott, to the Resistance.

Lieutenants—A. Evans, to the Black Prince; Reginald A. Stock, to the Defence; and Arthur Fullerton, to the Dædalus, for service in Fervent tender, vice Dundas, whose period of service has expired; John Durnford, to the Vernon; Henry Crawford, to the Defence; W. C. Domville, Waties, Corbett, Macvey, Napier, B. E. Maitland, Clement W. Swetenham, Innes Gairdner, William Bourke, and Harold G. Bird, to the Cambridge, additional for gunnery instruction.

Sub-Lieutenants—J. I. Pocock, to the Defence; and R. S. D. Cumming, to the Black Prince; Henry Leeke, to the Pallas; William J. H. Auton, to the Achilles; Archibald T. Carter, to the Squirrel; Andrew W. Davies, to the Zephyr; James Willison, to the Alexandria; Claude Hunter, to the Black Prince; Henry J. Davison, to the Seaflower; and Thomas H. Fisher, to the Sealark.

Engineers—Bryant G. Little and William J. C. Brown, to the Asia, additional.

ACHILLES, Capt. Sir W. N. W. Hewett, K.C.B., V.C., was taken out of Keyham Basin on Saturday afternoon and went direct into the Sound to take on board her ammunition to-day. To-day has been named for sailing for Queenstown.

ALACRITY, Lieut.-Com. W. U. Moore, was surveying in the Fiji Group according to the latest accounts.

ALEXANDRA, Capt. R. O'B. FitzRoy, flagship of Rear-Admiral G. T. P. Hornby. News has been received of a serious outbreak by some of the crew of the Alexandra, great discontent having prevailed owing to excessive drill and severity of punishment. The watch, which had been kept hard at work on deck on Sunday, were ordered in the afternoon to get up ashes from the stokehole, and it is stated, though scarcely credible, that the captain ordered private provisions of the men's messes to be thrown overboard. They refused to get up the ashes, and some of the watch were made prisoners, but not till after the sights of the guns had been thrown overboard, and some of the live stock of the officers. Four of the ringleaders have been sentenced to forty-two days' imprisonment. A correspondent of the *Portsmouth Times* also states that on Sunday, the 13th instant, at six p.m., during the passage of the Mediterranean Fleet from Suda Bay to Port Said, when the evening service was over every one was astonished by the signal for "washing clothes" being hoisted at the masthead of the flagship. Officers and men looked and wondered, but there was no mistake about it. There was the signal, and it had to be obeyed. The *Portsmouth Times* hopes that the Admiralty will demand to be informed of the circumstances under which the order was given.

AMETHYST, Capt. A. J. Chatfield, was visiting ports to the south of Valparaiso in April.

ARGUS, Capt. Jermain, rejoined the flag at Bermuda from Halifax on May 8.

ASSISTANCE, Capt. Prattent, was to leave Alderney at noon on Thursday for Guernsey.

AUDACIOUS, Capt. P. H. Colomb, arrived at Nagasaki on March 25, and was to remain there.

BEAGLE, Lieut.-Com. C. Caffin, was expected at Sydney when the mail left.

BELLEROPHON, Capt. J. A. Fisher, flagship of Vice-Admiral Sir A. C. Key, was at Bermuda on May 9.

BULLFINCH, Com. R. M. Lloyd, left Bermuda on May 3 for Nassau to relieve the Zephyr, which will proceed to Bermuda.

CHERUB, Lieut.-Com. Francis Kemp, which has been lent by the Admiralty as cruising vessel for the London Brigade Royal Naval Artillery Volunteers, left Sheerness on Monday for Gravesend.

CONFLICT, Lieut.-Com. J. G. Musters, was to leave Sydney on April 10, to cruise among the New Hebrides and Solomon Islands.

CROMER, Lieut. V. E. Von Donop, tender to Resistance, came into Devonport Harbour on Saturday to make good defects.

CRUISER, Com. J. Hext, left Malta on May 21 for a short cruise of instruction.

ECLIPSE, Capt. G. E. Erskine, left for Halifax on the 9th inst., on her way to St. John's Newfoundland, where she will be stationed during the fishery season. She arrived at Halifax on the 14th inst.

EGERIA, Com. A. L. Douglas, was to go to Petropaulovski from Nagasaki as soon as the Lapwing court-martial was over, instead of the Modeste.

ENCOUNTER, Capt. R. Bradshaw, left Bermuda on May 8 for Antigua, to be senior officer on the Barbados Division. An additional lieutenant of the Encounter has, says the *Hampshire Telegraph*, been tried by court-martial for an act to the prejudice of good order and discipline, but as the result was nothing more than a reprimand, it may be taken for granted that the offence was not of a serious nature, though it looks rather formidable on paper.

HARPY, paddle-tender, sailed from Devonport on Saturday for Sheerness and Hull with navigating party for Firm and Forester.

HART, Com. Hon. H. N. Hood. By advices, dated April 3, this vessel was at Yokohama, but after inspection by Admiral Ryder she was to leave for Hong Kong to receive her new crew from the Tamar. Capt. H. Royse, consequent upon his promotion, had been succeeded in command of the Hart by Com. Hood, and was to leave by the mail of April 3. He had held his appointment for four years and a-half, and officers and men alike bore testimony to a happy and creditable commission. Capt. Royse dined on board his old ship on the evening before the mail left, to take a farewell of his late shipmates. He was subsequently pulled to the mail steamer by Com. Hood and officers, the crew giving farewell cheers from the rigging and sides of the vessel.

HIMALAYA, Capt. E. White, returned to Plymouth from Portsmouth on Sunday to be docked for survey and repairs.

IMMORTALITE, Acting Capt. Gerard Noel. We have received, says the *Portsmouth Times*, particulars of a gallant action on board the Immortalité when on passage between Ascension and St. Vincent. About 3 a.m. on April 6 an ordinary seaman, named Thomas Hocken, was discovered to have fallen overboard, and who by dint of struggling, he being an indifferent swimmer, was just able to keep himself afloat. Mr. Robert A. J. Montgomerie, acting sub-lieut. (who was working a sight on the bridge at the time), heard the cry of "Man overboard," rushed to the side of the ship, and saw the man struggling in the water. He jumped after him from the bridge, a height of thirty feet, he being dressed in thick clothes at the time, and the ship going before the wind, under sail, five miles an hour. The vessel was of course laid to, and boats lowered immediately. Meanwhile Mr. Montgomerie was struggling in the water, weighted by saturated clothes, and a man incapable of doing anything for himself. He towed Hocken to where he supposed the life-buoy would have been dropped, a distance of about twenty yards, but found nothing there. This appears to have been owing to the life-buoy not slipping in one instance, and the second slipping and not righting. It now dawned on Mr. Montgomerie that unless he could rid himself of his clothes they must both sink. He gave Hocken every encouragement and hope, and had got clear of all but his trousers, when the man, who was getting frightened, clasped him by the legs, and they both sank to a depth of between twenty and thirty feet, when Mr. Montgomerie, by a great effort, got clear of his clothes and raised himself to the surface, bringing his companion with him. With both hands he succeeded in keeping Hocken's head above water for about ten minutes, as he had by this time become unconscious, but no boat coming and finding they would inevitably both sink, he most reluctantly gave up the hope of saving the poor fellow, who sank beside him. He then swam towards the ship, now distant about a mile and a-half. The captain had decided to beat back to the boats and thus ensure a greater search, as the ship would be a better mark for the people in the water to make towards. When Montgomerie was about half way back to the ship he saw by the light of the moon the sails fill as though she was about to leave him, when by a great effort he raised himself in the water and shouted with all his might. Fortunately he was heard on board, and a boat was immediately lowered, and he was picked up in a very exhausted state, having been in the water upwards of thirty-five minutes. It should be mentioned that the neighbourhood abounded with sharks, a fact which was well known on board the vessel. We are glad to learn that this very gallant effort to save another's life has been marked by their lordships' approval, and that this young officer is likely to be recommended for the Albert medal, a decoration he richly deserves. We hope to see so praiseworthy an act acknowledged in a more substantial manner by his early promotion.

JACKAL, Lieut.-Com. H. A. Digby, was to leave Rothesay on May 26 for the Western Hebrides. Letters should be addressed to Loch Maddy, Western Hebrides, till further notice.

LAPWING, Com. Sir W. Wiseman, Bart., was at Nagasaki on April 2. Her repairs were completed, and she was waiting for a court-martial. At its conclusion she would be sene to Tientsin to relieve the Curlew.

LONDON, Capt. T. B. Sulivan. A correspondent of the *Western Morning News* says:—"Slaving has been going on rather briskly; the London's boats captured a dhow with 170 slaves, and brought them to Zanzibar. Lieut. Cresswell, the officer who took them, had a narrow escape of his life. It seems that at daylight he saw this dhow, and ran up in the steam cutter to board her. As he got up alongside he thought she was a passenger dhow, the Arabs sitting down quietly on the poop. Fortunately, just as he was going alongside the interpreter stood up and sang out, 'She is full of slaves.' Lieut. Cresswell immediately went astern, and proceeded to get assistance from other boats. The dhow was unable to get away, as there was no wind. When more boats came they saw that resistance was useless, and so hauled down their flag. It seemed their intention was to let the boat come alongside (she only had six hands all told), and, as the officer stepped over the side to shoot him, the interpreter saw a man behind the mast with his gun cocked and levelled, when he sang out, 'She is full of slaves,' and from what the crew said afterwards, directly they had fired at the officer they intended jumping down into the boat and killing the rest, which they could have easily done, as those in the boat were unprepared and had no suspicion she was a slaver."

LORD WARDEN, Capt. the Hon. E. R. Fremantle, C.B., arrived in Plymouth Sound from Sheerness on Saturday to join the Channel Squadron, and will probably leave for Queenstown to-day. An enquiry into the cause of the death of John Lister, a private of Marines, has been held at the Royal Naval Hospital, Stonehouse, by the county coroner, Mr. R. R. Rodd. Mr. Eastlake appeared on behalf of the Admiralty. This is the second death resulting from the late accident on board. It appeared that on May 19 a number of men were employed at the capstan as the vessel was about to proceed to sea. The first bridle was eased out without any mishap, and in raising the second bridle the capstan began to take charge. An order was then given by the first lieutenant for the men to stand firmly at the bars. The capstan began to get greater command over the men, and some of them jumped on the bars. The capstan then took complete charge. Some of the men were on top and were carried round with it while others went underneath on the deck. The bars soon afterwards flew out in every direction, and several men were injured, one dying a few hours afterwards. The deceased had a severe fracture of the skull. The coroner said he considered that the officers had done all in their power, and that they had given proper orders and taken every precaution. The jury returned a verdict of accidental death, and at the same time exonerated the officers from all blame.

MODESTE, Capt. A. Buller, C.B., has proceeded to Hong Kong to recommission on the arrival of her new crew in the Tamar.

MONARCH, Capt. M. Culme-Seymour, was ordered to leave Malta yesterday for England. She will be supplied with new boilers and condensers at Chatham Dockyard, where the work is to be at once proceeded with. The boilers and condensers have been prepared at Portsmouth Dockyard. The following officers take passage to England in the Monarch:—Capt. Campbell, R.M.A., of the Devastation; Acting Sub-Lieut. I. H. C. East, and Mr. Yugiero Hatfhida, Japanese midshipman, of the Raleigh; and Mr. Barry, late boatswain of the Hotspur. Staff-Surg. Robert Hay, M.D., also goes home in the Monarch on promotion. Messrs. H. S. White, C. Hamilton, W. C. Pakenham, and F. E. Newton, midshipmen of the Monarch, have been appointed to the Raleigh.

MINOTAUR, Capt. Lord W. T. Kerr, flagship of Rear-Admiral Beauchamp Seymour, C.B., Commander-in-Chief of the Channel Squadron, arrived at Plymouth on Sunday. To-day has been named for sailing for Queenstown.

NYMPHE, Capt. S. P. Townshend, was expected at Sydney when the mail left.

OPAL, Capt. F. C. B. Robinson, has been despatched to San Francisco and Esquimalt.

ORONTES, Capt. Edward H. Seymour, has been directed to call at St. Helena on her passage out to the Cape to make some exchanges, and she may be detained some little time at the Cape, as she will wait for the 1st Batn. 13th Regt. to be relieved and make their way down from the part of the country where they have been stationed.

PEARL, Capt. L. Brine, will be paid off on Tuesday at Portsmouth. The Pearl, which has just returned after four years' absence, will, says the *Hampshire Telegraph*, require very extensive repairs before she is fit for another commission, and her boilers have been on board for nearly twelve years. She had the misfortune to ground on the bar at Port Jackson, but the Admiralty has expressed to the commanding officer the conviction that the occurrence was purely accidental, and no one is held to be blameable.

PERT, Com. H. C. Aitchison, was to leave Bermuda for the fisheries about May 14.

PLOVER, Com. H. B. Stewart, was expected at Jamaica by last accounts, and would be employed in taking soundings between Jamaica and Cuba.

RENARD, Lieut.-Com. H. J. Pugh, was at Auckland according to last accounts. She would convey instructions respecting affairs in Samoa to the Sappho when received from England.

REPULSE, Acting-Capt. F. S. Vander Meulen, will be ready to pay off at Portsmouth on June 12. She was commissioned at Portsmouth on July 9, 1872, bearing the flag of Admiral Cochrane, and left England on the 2nd of the following month for Valparaiso, which was reached on Oct. 27. After a stay there of four months she proceeded up the coast to the Sandwich Islands, Esquimaot. Vancouver's Island was reached on July 27, 1873. The Repulse went to the Coasts of Mexico and Central America, remaining there till the summer of 1874, when she was called to San Jose de Quatemala with reference to the flogging of the English Consul, Mr. Magee. The English flag saluted that of the Admiral on Sept. 4, and on the following day the Repulse left for Panama, and from thence steamed to the Sandwich and the Vancouver's Islands, where she stayed till the end of the summer of 1875. Panama was the next rendezvous, and whilst there Admiral Hancock hoisted his flag as the successor to Admiral Cochrane. The coast of Peru was next visited, but a return to Panama had to be effected, Admiral Hancock invaliding. The Repulse then became the flagship of Rear-Admiral Algernon de Horsey, and proceeded to Valparaiso. That port was left for the return home on Feb. 15 of the present year. Stress of weather compelled the ship to come round Cape Horn, instead of passing through the Straits of Magellan, and the station was passed on March 8, the vessel being about two miles distant from the point. Rio was reached on April 3, and left on the 9th, and the Repulse arrived at Spithead on May 24. Comparatively few casualties or fatalities have occurred throughout the commission, but the desertions were unusually large. On Oct. 20, 1872, a heavy gale was encountered and the fore-yard was lost; and whilst in a severe storm on Oct. 29, 1875, off Cape Flattery, Oregon, North America, the main yard, jibboom, two lower booms, and hree boats were carried away.—*Portsmouth Times.*

ROVER, Capt. T. Barnardiston, left Bermuda on May 8 to visit ports in Cuba.

RUPERT, Capt. W. E. Gordon, C.B., was at Malta on May 25. According to the *Times* the Rupert is to pass through the Canal and take up a position at the Suez end, and the Hotspur and she are likely to prove efficient sentries to guard British interests in this part of Egypt.

SANDFLY, Lieut.-Com. J. Bell, was expected at Sydney when the mail left.

SAPPHIRE, Capt. E. H. Murray, arrived at Wellington on March 26, having visited the outlying islands of New Zealand.

SAPPHO, Com. Noel N. S. Digby, left Wellington on March 27 for Tonga and Samoa.

SHAH, Capt. F. G. D. Bedford, flagship of Rear-Admiral de Horsey, was at Coquimbo on April 15.

THETIS, Capt. T. Le Hunte Ward, arrived in Plymouth Sound on Saturday from the East India Station, last from Malta, where she had to put in owing to a serious accident to her machinery. The Thetis' commission has extended over more than four years, and she will be paid off into the 4th division of Reserve. She was on the China Station for a short time, and on returning to Shanghai from Nagasaki in Nov., 1873, she was ordered to return to Aden, where a court of inquiry was to be held concerning the destruction of ten dhows, which Capt. Ward, on his outward passage through the Red Sea, had mistaken for slave vessels. The Admiralty considered that the mistake had been made through over zeal, and the Thetis was ordered to remain on the East India Station, where she relieved the Wolverene, and was busily employed in the suppression of the slave trade for two and a-half years. During this period, which was, indeed, a very trying one to the officers and crew, who were so often and in all weathers exposed in open boats, ten prizes were captured and 484 slaves liberated. The Thetis left Zanzibar on Oct. 2, 1876, and arrived at Bombay on Nov. 2, where she remained till Jan. 11 last. She next proceeded on her homeward voyage through the Suez Canal, calling at Aden, Malta, and Gibraltar. Unfortunately an accident happened to her screw during the passage from Port Said to Malta, so that she had to do the best she could under sail alone against strong westerly gales and heavy seas. Being rather a bad sailer, she ran short of provisions, but the men did not suffer much in consequence, for the Devastation took her in tow on March 17, and in the evening she arrived in Malta harbour. The Thetis was commissioned on Feb. 1, 1873.

THUNDERER, Capt. J. C. Wilson, will join the Channel Squadron at Queenstown. The return to Spithead, which caused officers and crew of this powerful war engine so much vexation, was due to an accident which may fairly be included in the class of "non-preventible"—that is, it was an accident pure and simple, of which no supervision or examination could have detected the reason or likelihood. On Friday week the Thunderer took her shell and powder on board, which was a hard day's work, owing to the size of the projectiles and the peculiar construction of the vessel, and this day week, at 1.20 p.m., she started for Plymouth, and when outside she was swung to adjust compasses, the engines being worked up gradually to greater speed. At 3 p.m. the vessel was going full speed, the register gave sixty-eight revolutions a minute with both engines, and continued at that rate for an hour. At 4 p.m. the slide rod guides in both engines showed signs of "heating," and soon afterwards the foremost slide rod guides of the starboard engine became so hot as to make it necessary to stop the engine altogether. The speed of the port engine was reduced to forty revolutions from sixty-eight, as the slide rod guides there also indicated heating. When the starboard engine had been cooled, both were kept going at forty revolutions, and they were working at that rate, when, shortly before 6 o'clock p.m., the foremost eccentric "go-ahead" rod broke, carrying away the slide guide rod of the starboard engine. There was nothing for it but to put back to port. There were on board at the time an "inspector of machinery afloat," and a dockyard officer of great experience and ability, in addition to Mr. Nott, the chief engineer, who is considered one of the best in the Navy. These things are annoying, and to none more than the officers who worked so hard and zealously to get the vessel ready for service and to make the crew efficient. The trial trip, short as it was, revealed a flaw where reparation can not be so easily effected as in slide rod guides and the like—in the capacity of the stokers for their task, owing to their youth and consequent want of stamina. There are sixteen pair engines and fifteen single engines on board the vessel; and there is no use in such lavish outlay in the most powerful machinery in the world if the means of getting it to work are wanting.

Torch, Com. R. H. Hamond, has been docked at Malta for repairs.

Urgent, Com. R. H. Boyle, in tow of the Valorous, passed the Lizards at 6 p.m. on Saturday.

Valorous, Capt. L. F. Jones, returned to Plymouth from towing the Urgent on Monday.

Vesuvius, Capt. Morgan Singer. To ascertain the most reliable means of protecting ships against the attack of the Whitehead torpedo, Capt. Singer has carried out a series of experiments in the repairing basin in the Extension Works at Portsmouth. Various forms of nets composed of alternate lines of bars and chains have been tried, but the size and power of the missile have been so increased of late that it has been found that the torpedo nets of the Thunderer afford little or no protection. Last week a chain net, formed of chains 5-16ths of an inch thick, was easily perforated by the Whitehead. The great fault of the nets is their extreme rigidity, which opposes a solid wall to the impact of the torpedo, and the bars are consequently snapped. After many trials, however, very successful results have been obtained from a wire grummet matting, composed of wire strands about half an inch in thickness rove into open meshes. It possesses considerable flexibility, and, as it yields when struck, the force of the torpedo is not suddenly, but gradually, arrested, and as it loses its momentum it is thrown back by the recoil of the mat. During the experiments a torpedo was forced back without inflicting any injury to the matting.

Vigilant, flying the flag of Vice-Admiral Ryder, was at Yokohama on April 2, having left Hong Kong on March 15, and after calling at Amoy, Nagasaki, and Kobe, arrived at Yokohama on March 31.

Warrior, Capt. W. H. Whyte. A melancholy affair occurred on board at Portsmouth on Saturday. Fleet-Surg. Dyas, being unwell, went into his cabin to lie down, but his services being required about one o'clock, the captain sent for him. The steward found the door locked, and, being unable to obtain an answer to his summons, the door was burst open, and Mr. Dyas was found in an insensible condition. As an emetic could not be administered the stomach pump was used, but all efforts were futile, and he died in the evening, never having regained consciousness. At the inquest held on board on Monday the jury returned the verdict, "That the deceased died from the effects of taking opium, in the form of tincture of opium or laudanum, in a large quantity, but under what circumstances there is no evidence to show."

Wizard, Lieut.-Com. Doxat, left Malta on May 18 for the Piræus, carrying mails, &c., for the fleet. Surg. W. M. Ellis has been appointed to do duty in the Wizard during the leave of absence of Surg. R. Sproule.

Wolverene, Commodore Hoskins, was at Wellington on April 9.

Small as is the military support which Egypt can give to the Sultan at the present crisis, the amount of aid which she can render at sea is infinitely less. All the Egyptian ironclads have long since passed into the hands of Turkey, and since the burning of the unfortunate Latif, the only fighting vessels that remain are the frigates Mehemet Ali, of 24 guns and 400-horse power, the frigate Sher Gehaid, of 28 guns and 400-horse power, and a gunboat formerly belonging to Sherard Osborn's Anglo-Chinese squadron. The first named was originally intended for a yacht, and being built of thin iron plating is now fit for nothing more warlike than a troopship, in which capacity she is at present employed. The second vessel, the Sher Gehaid, is a wooden ship, whose boilers are in such a state that they exploded on the last occasion when steam was got up, so that her utility as a fighting ship cannot be highly estimated. Besides these, there are three or four of his Highness's yachts and the steamers of the Poste Khedive Administration, all fast vessels and capable of being made useful as transports, provided, of course, that means were taken to supply them with coal. Unfortunately this, for financial reasons, cannot at present be done, and their sphere of usefulness is in consequence much circumscribed. —*Standard.*

The anti-fouling composition invented by Major Crease, R.M.A., is to be applied to one side of the bottom of the Orontes, while the other side will have that of Dr. Sims' invention, so that a fair comparison of the two compositions may be arrived at.

Furnish on the New Hire System.—The "New Hire System" is quite distinct from anything yet attempted. Houses furnished throughout 20 Wholesale Houses to select goods from. "An excellent idea. —"Army and Navy Gazette." Prospectus, with Press opinions, post-free. General Furnishing Company — Offices. 9, Southampton-street, Strand

ADMIRALTY CIRCULAR.

We have received for publication the following Fleet Circular, No. 13, of May 5, 1877, respecting the examination of chain cables :—

With a view still further to guard against defects in the chain cables of her Majesty's ships and vessels, my Lords are pleased to direct that the following precautions shall be observed in future :—2. The chain cables of every sea-going ship, and of every harbour ship not at permanent moorings, are, when practicable, to be retested in the proving machine, and afterwards subjected to the usual strict and minute examination every three or four years from the date of their original supply by dockyard officers. 3. If the ship is on a foreign station, where no testing machine is available, the captain will, as the time approaches, inform the Commander-in-Chief, so that, if practicable, arrangements may be made to land the cables at a foreign yard, in order that they may be carefully cleaned, minutely examined, and every link measured. If this is impracticable, the Commander-in-Chief will report the cause to the Admiralty, and state what measures he proposes to adopt to ensure the cables undergoing the best possible examination. As a general rule advantage is to be taken of a ship being recommissioned to carry out these directions, and unless under exceptional circumstances, the examination is not necessary in the case of a ship on the eve of returning home. 4. The date of the last retesting or dockyard examination is to be noted in the half-yearly report of survey. 5. In determining the loss a worn chain cable should sustain to render it unsuitable for further service at sea, it is to be observed that whenever any length or part of a chain cable of $\frac{7}{8}$-inch or upwards shall be found to have lost in any one of its links, at the smallest part, one-eighth of an inch of its original diameter, such length or part should be considered as unfit for its original appropriation, and should be either transferred to tke size below corresponding to the diameter of the smallest part of the reduced link, or be set apart for harbour service, or have the worn link or links replaced, the length retested, and used for its original appropriation, as may be most advantageous to the Crown ; very small cables (as used in Coastguard cruisers, &c.), $\frac{3}{4}$-inch or under, in which the sizes vary by sixteenths of an inch, should be similarly treated when the diameter of the iron shall have been reduced one-sixteenth of an inch. As the links may wear of an oval shape in the section, the size is to be determined on the mean of the largest and smallest diameters at the smallest section of the link. 6. Chain messengers are not to be considered unserviceable except they are so reduced by wear as to alter the pitch of the chain, or the diameter of the iron at the crowns of the links is reduced beyond one-eighth of an inch, or except the chain has been broken in service. 7. As the various lengths or parts of chain cables of the same denomination may wear unequally they are to be assorted, as far as practicable, in forming a whole cable for the purpose of being issued to a ship, with reference to the degree of wear of the several lengths of the same size, so that they may all be nearly alike worn when an old cable is issued; when a new link is required in a cable or messenger, this new link is to be tested. 8. On the arrival of a ship at a dockyard, after a three or four years' commission, her chain cables are to be landed, tested in the proving machine, and subsequently examined before being replaced on board.—By command of their Lordships, Robert Hall.

THE LATE ARCTIC EXPEDITION.

We insert with pleasure the following letter from such a distinguished officer and high authority as Rear-Admiral McClintock :—

29, Kensington-gate, Palace-gate, W., June 1, 1877.

Sir,—Will you kindly allow me through the medium of your paper to make known one or two facts bearing upon the health of the Arctic sledging crews and the recent enquiry respecting the outbreak of scurvy in the Arctic Expedition, as I think it due to Sir George Nares and his officers that former Arctic experience should not be lost sight of? If Sir G. Nares erred in not having supplied his sledge parties with lime-juice, then we Arctic travellers have all likewise erred. I have myself made several sledging journeys varying in length from twenty to one hundred and five days each without either lime-juice or scurvy in any of my parties; and the experience of my brother officers in the Franklin search agreed with my own. Briefly, we lived upon pemmican, and enjoyed sound health. Therefore, acting as I have always done upon experience when obtainable in preference to any number of suggestions, however valuable they may appear, had I been in Sir George Nares' place I also would have left the lime-juice behind.

This is a very remarkable and decisive expression of opinion, and coming after the Report of the Committee, which contained what was nothing more or less than an emphatic condemnation of the course Admiral McClintock declares he would have pursued, may cause those who assailed Sir G. Nares so vigorously to reflect a little, and to see that there are two sides to the question.

CAPTAIN HUME'S CASE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I hope you will use your powerful influence in poor Capt. Hume's favour. The majority of his brother officers undoubtedly think the sentence—as the charges were in no way proved—severe, and it is even proposed by some naval officers to move a vote of sympathy in Hume's favour. There is little doubt that he was wandering in his mind when the affair happened, and none believe that he had an improper thought or idea. Let me ask you what may be the effect of the sentence? All an unscrupulous man will have to do is to get an opportunity of going into an officer's cabin, and then charge him with improper conduct. Consideration of his long and faithful services may restore him to the "Navy List." For the honour of the Navy this should be done, for had he been guilty of the charges brought against him he should have been punished with the utmost severity, and for one not proved guilty the sentence of the Court is terrible.—I am, &c.,

A Post-Captain.

Errata.—For "on" still represents "or" in p. 327, third column, notice of Lett's Map of the Danube, read "ou" still represents "or ;" and p. 322, "Siout" for "Sioub."

INDIA.

We (*Civil and Military Gazette*) understand that a second edition of the Army Regulations is likely to be published this year, and that an officer will be employed during the present season at Simla in its compilation. The existing edition was published in 1870.

It is known, a correspondent of the *Times of India* says, that Sir Charles Staveley is anxious to secure for Brig.-Gen. Aitchison a further extension of the office of adjt.-gen., but I do not think the arrangement can be carried out, and Gen. Aitchison will come to Bombay to succeed Gen. Gell, and will, he ventures to prophecy, make a very popular brigadier.

The Mhow Parsees have subscribed a sum of money for the presentation of a testimonial to Major-Gen. G. S. Montgomery, C.S.I., Bombay Infantry, on his vacating the Mhow command and proceeding to England.

The following appointments have been made in the Adjt.-Gen's. Department:—Major H. Thompson, Bengal S.C., depty.-assist. adjt.-gen., an assist. adjt.-gen. on the establishment, in succession to Lieut.-Col. F. Eteson, 3rd Foot, dated Dec. 1, 1876. Capt. G. R. J. Shakespear, Bengal S.C., to be a depty. assist.-adjt. gen. on the establishment, in succession to Major H. Thompson, promoted, dated Dec. 1, 1876.

Col. A. Irvine, Bengal S.C., accepts a pension of £365, and a special annuity of £375 3s., from April 28, to be paid in Tasmania.

The following brigade-majors are to be depty. assist. adjt.-gens. on the establishment during the remainder of their tour of Staff service:—Majors R. Beadon, late 4th European Light Cavalry; E. F. Angelo, 1st Foot; R. Morris, late 1st European Light Cavalry; and G. W. Smith, 85th Foot; and Capt. W. J. Boyes, 12th Foot.

Brigdr.-Gen. H. T. Macpherson, C.B., V.C., Bengal S.C., has been transferred from the Mooltan to the Rawal Pindee Brigade, and Brigdr.-Gen. J. I. Murray, C.B., Bengal S.C., is posted to Mooltan; both from the 1st proximo, the date of expiration of Brigdr.-Gen. Sir C. H. Brownlow's tenure of Staff employ. Col. B. F. Vander Gucht, Bengal S.C., has been posted to Jubbulpore for general duty, on the expiration of his present leave.

Referring to G. G. O. No. 435 of July 1, 1868, publishing Military Letter No. 86 of April 23, 1868, from H.M.'s Secretary of State for India, granting to subscribers to the Bombay Military Fund the boon of having the loans allowed by Article 15, Section III. of the Bombay Military Fund Rules, paid in England at 2s. the rupee, H.M.'s Secretary of State has been pleased to rule that the privilege of payment in England will be limited to one-half of the amounts which subscribers are entitled to borrow in India under Articles 14 and 15 of the rules; and further, that payment of a loan in England at 2s. the rupee will only be made on the subscriber undertaking at the time of applying for it to refund the same at the India Office with interest within two months from the date of advance in the event of his wife or children, as the case may be, not proceeding to India. Col., 6,000 rupees; lieut.-col., 4,800 rupees; major, 3,600 rupees; and capt., 2,400 rupees. 2. Payments as above in England will be issued in the month preceding the date of the departure of the vessel in which passages have been taken, and embarkation certificates signed by the captain of the vessel will be required in order that the earliest intimation may be given to the Fund Office in India of the departure of the family of the subscriber to whom a loan has been granted. 3. Recoveries from officers on account of loans paid in England will be commenced from the first issue of pay after the receipt of advice of the issue of the loan. 4. Amended forms of application for loans embodying the undertaking above referred to will be prepared in the Bombay Military Fund Office, under instructions from the Controller of Military Accounts.

Gen. Sir Watkin Lewis Griffies-Williams, Bart., Madras Infantry, died at 79, Elgin-crescent, S.W., on the 23rd ult., in his 77th year. Sir Watkin entered the Madras Army in 1819, and served in both the Burmese wars in 1824-26 and in 1852. During the first war he was present at the storming of Rangoon and the Syrian Pagoda. He also served in 1844-45 at the siege and storming of Punnullah and the capture of Munnohur. His commissions bore date as follows, viz.:—Ensign, June 12, 1819; lieut., June 13, 1819; capt., March 21, 1827; major, June 2, 1838; lieut.-col., June 28, 1842; col., Nov. 17, 1852; major-gen., Nov. 28, 1854; lieut.-gen., Sept. 17, 1866; and gen., June 25, 1870. He is succeeded in the baronetcy by his brother, the Rev. David H. T. Griffies-Williams, rector of Penboyr, Carmarthenshire.

At a final meeting of the committee of the Thunderer Relief Fund in Portsmouth Dockyard, Admiral Elliott, Commander-in-Chief, presiding, the managing committee reported that the subscriptions had amounted to £10,560, which, with £185 on account of interest, gives the total amount received as £10,745. Of this sum £2,992 has been expended in gratuities to injured men, in relief to widows and relatives, and in office and other incidental expenses, leaving £7,752 for the payment of annuities to widows and orphans. The assistance of the Patriotic Fund was solicited for the purpose of paying annuities, but the council of that fund declined to undertake that duty. However, a scheme for the payment of the annuities had been prepared. The report was adopted, and votes of thanks were passed to those who had chiefly interested themselves in the fund.

We are informed, says the *Globe*, that the report respecting the arrival of North American naval officers and engineers at St. Petersburg is entirely without foundation. The Russian Admiralty has more skilled officers than it knows how to dispose of in the present ineffective condition of its fleet, and is not likely to sanction a measure which would produce universal dissatisfaction throughout the entire Navy. Since 1864 it has been the policy of the Government to discourage the presence of foreigners in its Army and Navy; and although as regards the latter branch of the Service the result has been far from satisfactory, still the Admiralty ascribes the inefficiency of the fleet to the climatic disadvantages of Russia, which it trusts to see removed at the end of the present war, and would *ad interim* violently oppose the reintroduction of any naval officers who were not of Russian nationality.

Throat Irritation.—The throat and windpipe are especially liable to inflammation, causing soreness and dryness, tickling and irritation, inducing cough and affecting the voice. For these symptoms use glycerine in the form of jujubes. Glycerine, in these agreeable confections, being in proximity to the glands at the moment they are excited by the act of sucking, becomes actively healing. Sold only in 6d. and 1s. boxes (by post for 14 stamps), labelled "James Epps and Co., Homœopathic Chemists, 48, Threadneedle Street, and 170 Piccadilly, London."

THEATRES.

Her Majesty's Opera.—The great attraction at Her Majesty's Opera during the present week has been the performance of *Faust*, supported by Madame Nilsson and M. Faure. With such an unrivalled cast it was not to be wondered at that the house was densely crowded by a most enthusiastic audience. In every respect the performance was admirable. On Tuesday evening Mdlle. Chiomi achieved a decided success in the difficult *rôle* of Lucia. Her voice is remarkably pleasing, and her appearance prepossessing. It is gratifying to hear that Mdlle. Titiens, although not declared "out of danger," is slowly improving.

Aquarium.—Mr. Frank Marshall has had a scheme in hand for reviving some of the plays of the so-called dramatists of the Restoration, and the first step towards carrying out his notion has been the production of *The Inconstant*, Farquhar's best play. Whether the experiment of reviving it at the Aquarium will be successful it is, of course, impossible to say. The adventures of young Mirabel, and his ultimate conversion and marriage, are amusing, and the fact that an audience still follow the course of such a comedy and the humours of the various characters, obsolete as they are, is a strong proof of the sterling quality of the material. The manager has not only placed the comedy upon the stage with care and taste, but has engaged for its representation a company containing many efficient members. First comes Mr. Charles Warner, who enacts the hero. It is so easy to over act in such a case, that the more judicious of the audience will give the young actor credit for a performance unique in itself, and likely to be misinterpreted by the vulgar mind. Next in value is the Old Mirabel of W. H. Stephens, an excellent piece of acting, third on the list we may place the Bizarre of Miss E. Meyrick, and the Oriana of Miss M. Brennan is very amusing, even if not a bit natural. Mr. Macklin is a fair Dugard, Mr. Fawn a little too coarse for Dureiête, and Miss Egan an exceedingly good Lamorce. Special praise must be given to the make-up and impressiveness of the four bandits.

Strand.—After having strayed far away from the fold of burlesque proper, and worshipped strange gods, the authorities have returned to their old loves, and, lo! *The Maid and the Magpie* is on the boards again. Right welcome is it, too, though the old familiar faces have either gone over to the majority, or have taken their places in the ranks of high comedy. Miss Marie Wilton is missed, but there is a sprightly lady called Miss Nellie Bouverie here, who makes a very pleasant substitute. Perhaps people would not worship Mrs. Bancroft in the part. Miss Oliver is not often seen now, but Miss L. Venne is voted charming. Mr. J. Clarke has become a shining light of comedy, but we have still Mr. Harry Cox, and the late James Bland is worthily followed by M. Marius. Times change, verily, but art is long, and there was true art in burlesque at the time when Henry Byron wrote *The Maid and the Magpie*.

Surrey.—Robertsonian comedy at the Surrey sounds strange when talked about, but of the possibility of its successful production no one can have any reasonable doubt after witnessing the performance of *Love Wins*, one of the neatest and most attractive pieces of modern days, which, by the irony of events, has seen but little of the light in London. It is the production of Messrs. Savile Clarke and L. H. F. du Terreaux, and has been prosperously played at Cambridge and Croydon. The chief feature in it is an old circus man who has a pretty daughter, naturally enough beloved by two men—father and son. She prefers youth, so the father casts the son off, only to find him make a great name as a painter and save the lady of his love from the degradation of the arena. The piece is well acted, especially by Mr. Harry Taylor and Miss A. Bentley, and the scenery is remarkably good.

INDIAN WARRANT OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I am pleased that the question of pensions to Warrant officers of the Indian Army has been taken up, and I hope it will not be let drop until such time as the Indian Council can be got to revise the scale. Why should a man, after spending the best thirty years of his life in India, if he wishes to retire in England or the Colonies, have to do so on a much less pension than if he remained in India? There are cases in which men of short service who invalided in India, to serve their own purpose, are receiving higher rates of pension than those of superior rank who completed their contracted periods of service, and returned to end their days in their native land. This is holding out a premium to men to invalid at short service and remain in India. The absurdity of such rules are apparent, and causing a regular stagnation in promotion, as many of the seniors will not retire in England on the reduced rates of pension, but are holding on till Government revise the rules.—I am, &c.,

Sub.

PROMOTION IN THE MEDICAL DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Allow me to point out a rather curious fact with respect to Mr. Hardy's new rule for medical promotion. Mr. Hardy expected, as he told Dr. Playfair, that the three years' Indian service rule must have been known as general in its application to the department in consequence of certain promotions which took place in 1867. These promotions are dated March 9, 1867, and among the officers "selected" for promotion is the surgeon of the Rifle Brigade, who never saw India. Now what can reasonable men infer from this? Why that the rule was never general in its application, and never intended to be so; and therefore, when Mr. Hardy made it "one of the elements of selection," as he said, he was bound in duty to publish it. Another curious fact is, the Director-General never served in India as a regimental surgeon for three years, and yet he administered the whole department in that country. Can any reasonable man believe that after this personal experience of administration in India, without having complied with this rule, Sir William Muir has the slightest faith in the necessity of such a rule? How can a man honestly advise the powers that be to act up to this rule when he has personal experience of its absurdity? And what must men think of an administrative officer who forces compliance upon others of a rule which he himself violated, and of which he must hold a contemptible opinion, unless he is conscious in his breast that his own administration in India was faulty, the result of his not having complied with this three years rule?—I am, &c.,

X. Y. Z.

SCREW-PROPELLERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Permit me to draw the attention of the public through your columns to a recently-invented screw-propeller, which is said to effect an economy of 50 per cent. of fuel, and hence is drawing some support from members of the two Services, and to mention that intending investors in any engineering speculation would always do well to go to the small expense of consulting an engineer before investing. No particular instance can form any exception to this general rule.—I am, &c.,

London, May 25, 1877. Scrutator.

POST-CAPTAINS' COMMANDS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—It seems to be a pretty general opinion among naval men that the Admiralty have made a mistake in permitting captains of Indian troopships to hold their appointments for three years, instead of two, as heretofore. Junior captains are already five years on half pay before their turn comes for a ship. It would have been better if their Lordships had resolved that for the future all post-captains' commands should be for two years only. The rule would press hardly upon those officers in a pecuniary point of view, but everything should give way to efficiency. Can a man, absent from his work for five years, be considered efficient?—Yours, &c.,

Active Service.

BIRTHS.

Clarke.—May 28, at 7, Milne Place, Stoke Devonport, the wife of Edward H. Clarke, Lieutenant R.N., H.M.S. Implacable, of a daughter.

Beaty-Pownall.—May 29, at the Hall, Dalintober, Campbeltown, Argyllshire, the wife of G. A. Beaty-Pownall, Esq., Captain R.A., and Adjutant Argyll and Bute Militia, of a son.

DEATHS.

Gregory.—May 27, at Llandegai Rectory, North Wales, Avice Mary Gregory, aged thirteen months, the daughter of Captain Gregory Knight, of Narborough, Leicestershire.

Stewart.—April 22, at Calcutta, Neil Henry Stewart, M.D., Deputy Surgeon-General, Bengal, fourth son of the late Joseph Stewart, of Foss.

Advertisements.

ROYAL ITALIAN OPERA, COVENT GARDEN.

Mdlle. Zare Thalberg.—This evening, June 2. FRA DIAVOLO. Zerlina, Mdlle. Zare Thalberg; Lady Koburg, Mdlle. Ghiotti; Lord Koburg, Sgnr. Ciampi; Beppo, Sgnr. Tagliafico; and Fra Diavolo, M. Capoul. Conductor, Sgnr. Bevignani.

NEXT WEEK THERE WILL BE SIX PERFORMANCES.

Madame Adelina Patti.—Monday, June 4 (first time this season), AIDA. Aida, Madame Adelina Patti; Amneris, Madame Scalchi; Amonasro, Sgnr. Grasiani; and Radamès, Sgnr. Nicolini.

Mdlle. Albani. — Tuesday, June 5, LINDA DI CHAMOUNI. Linda, Mdlle. Albani; Pierotto, Mdlle. Synnerberg; and Carlo, Sgnr. Piazza.

Wednesday next, June 6, LES HUGUENOTS. Valentina, Mdlle. D'Angeri; Margherita di Valois, Mdlle. Marimon; Huguenot Soldier, Sgnr. Sabater; and Raoul di Nangis, M. Capoul.

Thursday, June 7, GUGLIELMO TELL. Mathilde, Mdlle. Bianchi; Guglielmo Tell, Sgnr. Cotogni; and Arnoldo, Sgnr. Marini.

ADMIRALTY.—MEDICAL DEPARTMENT of the NAVY, 9, New Street, Spring Gardens, S.W., May 18, 1877.

NOTICE is hereby given, that an Examination of Candidates for Commissions in the Medical Service of the Royal Navy will be held at the UNIVERSITY of LONDON, Burlington Gardens, on MONDAY, 13th August, 1877, and following days at 10 o'clock. Candidates must present themselves at this Department at 11 o'clock on Thursday, 9th August, 1877, when, should they be found in all respects eligible, they will be permitted to appear for examination. The necessary forms to be filled up by Candidates will be supplied on application to this Department, and should be returned as early as possible.

A. ARMSTRONG,
Director-General

WOLVERHAMPTON and STAFFORDSHIRE GENERAL HOSPITAL,
Wolverhampton, 29th May, 1877.

A VACANCY will occur on the 15th August next in the office of HOUSE GOVERNOR and SECRETARY in this Institution. The Vice-Presidents and Weekly Board will proceed to elect a gentleman to discharge the duties of the above office on TUESDAY, the 17th July.

He must be unmarried, or a widower without the care of a family, be competent to manage the affairs of a large public charity, and must possess a thorough knowledge of accounts.

The remuneration may be estimated at £200 a-year, in addition to board and washing, and residence in the Institution. Security will be required to the amount of £500. An office clerk is kept.

Applications and testimonials, sealed, and addressed to the Chairman of the Weekly Board, must be received at the Hospital not later than Monday, 25th June.

By order of the Weekly Board.

ROYAL UNITED SERVICE INSTITUTION, Whitehall Yard. 1877.

LECTURE at Three o'clock, Friday, June 8th.
JOHN SCOTT RUSSELL, Esq., F.R.S.,
On "The Development of our Modern War Fleet."
To be followed by a discussion.
By order of the Council,
B. BURGESS, Capt., Secretary.

A HISTORY OF CAVALRY

FROM THE EARLIEST TIMES;

WITH LESSONS FOR THE FUTURE.

By Lieutenant-Colonel GEORGE T. DENISON, Commanding the Governor-General's Body-Guard, Canada.
Author of "Modern Cavalry," &c.

Recently published, 2 vols., 8vo, price 28s.,

THE INVASIONS OF ENGLAND:

A HISTORY OF THE PAST,

WITH LESSONS FOR THE FUTURE.

By Captain H. M. HOZIER,
Author of "The Seven Weeks' War," &c.

"This able and interesting work. . . we commend to the close attention of our readers."—"Army and Navy Gazette."

"As to all invasions executed or deliberately projected, but not carried out, from the landing of Julias Cæsar to the raising of the Boulogne camp, Captain Hozier furnishes copious and most interesting particulars. Nor is his manner inferior to his matter. He writes with admirable lucidity. His narrative, too, in addition to its clearness and animation, is flavoured with much delicate humour, often of a very significant kind."—"Pall Mall Gazette."

THE RUSSO-TURKISH WAR.

ENTRY OF ENGINEER STUDENTS IN HER MAJESTY'S DOCKYARDS.

My Lords Commissioners of the Admiralty having decided to offer 45 vacancies to be competed for, NOTICE is HEREBY GIVEN that a Competitive Examination for these vacancies will be held on TUESDAY, the 11th September, 1877, and following days, in London, Edinburgh, Glasgow, Dublin, Belfast, Cork, Leeds, Bristol, Liverpool, Newcastle-on-Tyne, Chatham, Sheerness, Portsmouth, Devonport, and Aberdeen.

The age of Candidates must be not less than 14 nor more than 16 on 1st May, 1877.

The parents or guardians of all engineer students will be required to pay each year in advance the sum of £25 during the first three years of the student's training. The engineer students this year and next year will be entered at Portsmouth Dockyard only, and board and lodging will be provided for them in the Dockyard, where they will be required to reside.

A small weekly rate of pay (annually increasing) will be given to each engineer student during his six years' training. The engineer students will be under the supervision of the Captain of the Steam Reserve and a staff of competent officers, and subject to such rules and regulations as their Lordships may deem necessary.

Parents or guardians will be required to enter into a bond to the amount of £300 that the students, after completing their training, will enter the Naval Service.

References as to respectability and good conduct will be absolutely necessary.

The Lords of the Admiralty having, by recent changes, very materially raised and improved the position of the Engineer Officers of the Royal Navy, desire, by early publication of the above regulations, to encourage more general competition for these appointments.

For further particulars apply, by letter only, to the Secretary of the Admiralty, Whitehall, London.

Application to be permitted to compete will not be entertained after 31st July, 1877.

By command of their Lordships,
ROBERT HALL.

Admiralty, S.W., 16th May, 1877.

NAVAL CADETSHIPS, &c.

"EASTMAN'S" ROYAL NAVAL ACADEMY, BURGOYNE HOUSE, SOUTHSEA.

Principal, since 1860, G. EASTCOTT SPICKERNELL.

At the last two Naval Cadet Examinations pupils took the *First* Place. More than 1,000 pupils have entered her Majesty's Service.

The House is situated close to and directly facing the sea. Pupils have good Bathing and Boating, under careful superintendence.

Pupils are received from Nine years of age and upwards. To make the School specially adapted for Junior Pupils intended for the Royal Navy and the Public Schools, Senior Pupils are not now received.

NAVAL CADETS, ASSISTANT CLERKS, HOPE HOUSE, SOMERSET-PLACE, SOUTHSEA.

Principal—Mr. T. H. VICKERY.

In addition to the general course of study pursued at this long-established School, pupils are specially prepared for the examination required for the above.
